Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present French mail brings advices from this port to the 30th March; the French mail from London Jan. 29 was received on the 19th March, and the following P. and O. mail of Feb. 5 arrived out on the 23rd March. The *Japan Herald* supplies the following summary of news:—

The past fortnight has been remarkably scant of political news, the only item of importance which has transpired being the appointment of Okubo, Kido, Itagaki, and Ito to inquire into the working of the present Government arrangements. As these officials are competent men, who have the confidence of the people, they will be able, if they really set to work in an honest spirit, to suggest many much-needed reforms in the Government, the centralising tendencies of which, and the absorption of all power and emoluments by a few officials at Tokio, is calling forth a good deal of attention in the native press. The subject of the so oft talked of Parliament is also continually being discussed in the papers, and the number of letters written on the subject proves the interest excited, and the desire of the Japanese to be allowed some opportunity of expressing their views on the important questions which are as yet decided exclusively by the governing bureaucracy, without any reference to the wishes of the people.

The Government has issued a notification again authorising the export of rice, which has consequently risen in price. The Japanese say that the friends and connections of the officers of the Government, who were aware of the coming notification, have been buying up rice throughout the country, and are now reaping the advantage of the increased value.

The *City of Peking* arrived here on the 13th March, after a passage of a little over twenty days. She broke one of the blades of her screw three days prior to her arrival. The general opinion respecting the ship was one of disappointment, as it was felt that she was neither so large nor so fine as (from the interested encomiums of the American papers) we had been led to expect. Nevertheless, the ship is a fine one, and considering the want of experience in iron shipbuilding in America, the *City of Peking* is a very creditable attempt.

The torpedo boat designed by Mr. E. S. Boynton, which has for some time been under construction for the Japanese Government at the yard of Messrs. Whitfield and Dowson, was launched on the 22nd March. It is expected that she will be in readiness to be used for making experiments in about a month.

Digitized by Google

A number of annoying taxes which, whilst causing much irritation, brought in but a very small revenue, have been repealed, and a tax on the luxuries, *sake* and tobacco instituted in their place.

The Mikado has been for some days confined to his palace by a slight illness, but is now recovering. It is rumoured that a residence is to be constructed for him at Yokohama.

Various suggestions are being made for constructing different lines of railroad throughout the country, but as capital commands a high rate of interest, the line would not be remunerative to native capitalists.

The Pacific Mail Company's steamer *City of Peking* arrived at San Francisco on the 28th ult. with advices to Yokohama extending to April 10. There are no important items of news by this opportunity.

HIOGO-OSAKA.

Our advices by the present mail extend to the 20th March. The *Hiogo News* supplies the following items of intelligence :—

There must be something radically wrong at the Yokohama branch of the Imperial Japanese Post-office when we receive eight weeks' English papers by one mail. On the 19th March we received from H.B.M.'s postal agent in Kobe our files of English papers from Nov. 23 to Jan. 9 inclusive, our files for thirteen days later having come to hand previously. On inquiry at H.B.M.'s Consulate we learnt that the whole of the eight packets had been received the same morning by the *Oregonian* in a sealed package, and also that letters bearing the London post mark of December 12 had been received at the same time from Yokohama. Now that in this matter the Yokohama postal officials are disgracefully to blame is evident, as, on examination, we found on one of our packets the Yokohama post-mark of February 5th, and on another that of February 22nd, the former having thus been six weeks coming from Yokohama to Kobe, although two or more steamers perform the journey in a day and a-half every week ! We hope that for their own credit's sake some of the new post-office officials will cause an inquiry to be made into the reasons for this extraordinary delay, and take steps to prevent so discreditable a circumstance again taking place.

The commanders of H.M.S. *Sylvia* and *Mosquito* have resolved to take advantage of the glorious weather which we are now enjoying to give their men a day's outing this week. Some athletic sports have been held on the Race Course, at which the gallant "Blue Jackets" contended in friendly rivalry for various prizes and the championship of their respective crews in speed, strength, and agility. A number of ladies were present, and the concourse of native spectators was almost as great as on a race day. The commander and officers of the *Sylvia* are greatly to be commended for the encouragement they give to the athletic sports. As the *Sylvia* is likely to make a long stay in these waters, we hope we shall have some more opportunities of witnessing her athletes compete. They have shown themselves to be very fair performers, and with a little more training they would be hard to beat.

The Kobe Amateur Dramatic Corps have given a performance at the Gymnasium Theatre. The house was not so well filled as we could have wished to see it, but the fact that nearly every lady of the community honoured the performance with her presence doubtless more than consoled the members of the corps for the paucity of the attendance of the sterner sex. The pieces chosen were "Milky White" and, "The Turkish Bath." The Members of the Musical Union have given a Concert. A good programme, well carried out, was listened to by a large and attentive audience.

Lot No. 4, on the foreign concession, Osaka, containing 139½ tsubos, with a dwelling-house, has been purchased at public auction by Mr. Swaby for $650. Lot 9, containing 173 tsubos, with a dwelling-house and godown, was sold to the same purchaser for $950. Lot 12½, containing 173 tsubos, with a godown, was sold after the sale to Messrs. E. C. Kirby and Co., there having been no bid made for it at the auction.

A few nights since a burglar broke into a house on the native bund, close to the former Foreign-office. The owner of the premises jumped up, and received a severe cut on the wrist from a large knife. The man ran away, but was soon captured on the bund by the police.

CHINA.

PEKING AND TIENTSIN.

It is positively announced from Tientsin that the Customs difficulty has terminated. The Territorial Taoutai issued a proclamation virtually promising that the new rule should be abandoned, and the merchants began opening their shops and taking delivery of their cargo ; they stopped again, however, at 11 A.M. on the 24th March, under advice that this proclamation would not actually protect them against the Customs Taoutai's demand, and that they had better wait for the arrival of the Viceroy, who was expected that evening. His Excellency did arrive in the afternoon, and was at once petitioned by the merchants, in the sense of their previous remonstrances. The latest news, dated 26th March, says that the Viceroy has given positive instructions to the Customs' Taoutai to abandon his proposed changes, and revert to the old order of things.

The *Peking Gazette* of the 6th March contains a sensible protest by the late Viceroy of Nanking against a proposal by the Censor Hu Ting-kwei to raise funds for repairing the banks of the Yellow River, by issuing 200 extra salt licenses. The Viceroy pithily suggests that, if there were an opening for the sale of the salt, the idea would be a useful one ; but the secret lies rather in quickening consumption than in increasing supplies. There is already such an accumulation of salt in the hands of licensees that they have to take it in yearly turns to sell their stock ; and to add more, would be to risk a deadlock. If the Viceroy had added that the abolition of the monopoly and the imposition of a light duty would be a means both of increasing revenue and quickening consumption he would have told a useful truth.

The *Peking Gazette* of the 4th March contains a memorial from Shen Pao-cheng and the authorities of Foh-kien, asking that certain restrictions on emigration to, and trade with, Formosa be removed. An edict granting the request was published on the 15th February. The memorial is sensible and interesting.

SHANGHAI.

The present mail brings advices from this port to the 2nd April ; the French mail from London, Feb. 12, was received on the 30th March. The following summary of news is from the *North China Herald* :—

The elections for the Municipal Council for the ensuing year came off on the 6th and 7th April. Thirteen candidates have been nominated, and have declared their willingness to serve if elected. We are very glad to see that there is to be again a lively contest. "Contest" is perhaps not the right word to apply to an election in Shanghai, because the gentlemen nominated do not canvass for suffrages, and consent, rather than seek, to enter upon office. But it is desirable, for the satisfaction even of these gentlemen themselves, as well as for the satisfaction of the community and the honour and glory of our Municipal institutions, that there should be more than the necessary nine names placed before the Electors. The latter can certainly not complain if there are no more, because the remedy is in their own hands ; it is in the power of any two electors to nominate a qualified candidate. But it is far more gratifying to the Councillors themselves to feel that they hold office by popular choice, rather than as a matter of course because no choice existed. In fact, we believe several of the gentlemen who have come forward on the present occasion did so on condition that there should be enough nominations to ensure a contest. And it certainly tends to make the office more honourable, that it should be the result of real election, instead of going a-begging, as it has sometimes done. We should like to see, always, a score of nominations ; and the more there are, the more ready will men be to stand. It is quite clear that no more than nine men can be elected, so some must be left out ; and the more companions there are likely to be in defeat, the less hesitation will there be to incur the chance.

Another seizure of opium, alleged to be smuggled, has been made. The attention of some *lekin* runners was attracted to a jinriksha, in which a foreigner, who said his name was Walker, and a coolie were riding ; and, according to Walker's statement, they forcibly dragged both him and the coolie out of the vehicle. The coolie had several balls of opium concealed in different parts of his clothing, which Walker claimed as his. All concerned went to the Central Police-station, where a charge of assault against the runners was made by Walker, and he was permitted to take the opium away with him on the understanding that all were to appear next morning at the Mixed Court. The case was called on before Chên and Dr. Yates, the U.S. Assessor ; but, Walker claiming to be a British subject, the charge was dismissed.

The talk of the garrulous frequenters of the city tea-shops has turned of late almost exclusively on the tonsorial institution. A portion of the Imperial mourning order, twenty-four days of abstinence from the razor, yet remains before barbers can legally resume their occupation. Cases are imagined and reported daily of this or that person incurring the penalty. A proclamation makes this one thousand blows as regards unprivileged persons, and degradation or fine as regards persons of literary or official rank. No case of severe beating is reported, and some cases are said to have been dismissed by the magistrate with a reprimand. Field-labourers are commisserated, for they more than others complain of the aching from which they suffer when unshorn until the hair attains considerable length. As natives living in the foreign settlement are generally found shorn, the mandarin runners in the city are often perplexed when they see a well-dressed fellow, whose head is clean shaved, whether to seize him or not. When they are sure that it is a city man who has thus offended—and multitudes do offend, encouraged by the immunity that is extended to our native fellow-residents—they easily

Digitized by Google

mulct him on the spot, offenders always preferring summary street justice to an interview with the magistrate.

A prospectus has been issued of a water works company, which proposes to take up the very necessary project of supplying the settlement with pure water. The projectors purpose taking water from the Hwangpoo, at a point below Dow's Wharf. The proposed capital is Tls. 30,000, to be raised in 300 shares of Tls. 100 each.

The annual general meeting of the Shanghai Cricket Club has been held. The statement of accounts showed that the Club was not so flourishing pecuniarily as it might be; and it was resolved to authorise the incoming committee to ask the Recreation Fund trustees for a gift of Tls. 500 towards the general improvement of the ground. Some other subjects were also discussed, in connection with the ensuing season's campaign, and the following were elected as the committee for the year:—Messrs. Tate, St. Croix, Souper, Scott, Caldbeck, Anderson, and Hamilton.

The *Kanagawa Maru* met with an accident during her passage from Nagasaki to this port. Off the Amherst Rocks she broke her shaft, of course rendering the engines useless. Sail was made, and the steamer reached port, and has been towed to Tung-ka-doo Dock.

The steamer *Glenfinlas*, having damaged some of the blades of her propeller in the Suez Canal during the passage out, has, to avoid the expense of docking, been canted at the Hongkew wharf sufficiently for the necessary repairs to be made.

On the 30th March a strong party of seamen and marines, with band, pioneers, and a field gun, were landed from H.M.S. *Modeste*, and marched to the Race Course; where, under the command of Captain Buller, they were put through some field movements, which were performed with great precision.

The members of the Nagasaki Rowing Club have invited the members of the Yokohama, Kobe and Shanghai Clubs to join in a friendly competition at a Regatta in Nagasaki, during the first week in May. The race to be rowed in Canton fours, without sliding seats. We hear that the invitation is to be accepted by the S.R.C., and that the selection of a crew is going on.

FOOCHOW.

The subjoined items of intelligence from this port are taken from the *Foochow Herald* of the 4th April:—

We learn from a creditable source that the Peking authorities have so far acknowledged the Great Northern Telegraph Company's claims in agreeing to discuss them, and that Shen Pao Chen—Imperial Commissioner at the Arsenal—has been appointed to act on behalf of his Government, while Lieutenant Schultz—at present in Foochow—the Secretary to the Danish Legation, will act for General Rassloff. We shall await the result with much interest.

H.B.M.'s Consul has been occupied the greater part of one day in hearing a case of alleged threatened assault and riotous conduct, between two belligerent British subjects. The plaintiff certainly looked big enough to hold his own, and it is unnecessary to add that the defendant was not a man of very formidable proportions or particularly unamiable visage. Defendant had on a former occasion been assaulted by the plaintiff. The Consul thought that the ends of justice would be satisfied by binding defendant in the sum of £100 to keep the peace for three months.

We are informed that Monsieur de Segonza, acting Director of the Arsenal, has left for Tai-Wan, to assist in operations against the Formosan tribes.

HONG KONG.

Our advices by the present mail extend to the 8th April; no later mail from London had been received since the 30th March. The following items of intelligence are from the *Hong Kong Daily Press*:—

We are in receipt of further particulars of the loss of the ill-fated *Yuen-tze-fee*. She left Amoy on the 27th March, and anchored outside, in consequence of thick foggy weather. She sailed again the next morning, and at 5.10 A.M. she struck violently on Dodd's Island, notwithstanding that the engines had been stopped immediately on sighting the land. At each sea she gave several lurches, and every time went higher on to the rocks. The engines were set a-going at intervals, with a view of backing her off. She, however, stuck on rocks thirty feet under water. Immediately after she struck the passengers and luggage were landed, and endeavours were continually made to get the ship off, until the 29th March. At that time the fires were put out, and she gradually lay over on the starboard side and sunk. All the boats were destroyed previously, except one, which had been sent to Amoy to take the news and send out assistance. All the passengers landed by means of jumping over the bow on to the rocks, and their luggage was saved in the same way. She was abandoned twice by the crew, but they returned to her again with the view of saving what could be saved, and to see if the vessel could by any means be got off. H.I.C.M. gunboat *Long Feng* sent a boat to the island with provisions and water, and subsequently took all on board from the island, and proceeded to Amoy, where they were landed, after experiencing the greatest kindness from Captain Cocker and the officers of the *Leng Feng*. A Naval Court of Inquiry was held, presided over by Lieut. Peally, at which were present also Captain Cocker and Mr. Phillips, British Vice Consul. The certificate of the captain of the *Yuen-tze-fee* was suspended for three months for an error of judgment, but his conduct after the wreck received great praise. The engineers, firemen, and seamen embarked on board the *Douglas*, and have arrived here.

The liquidation and arrangements for the resumption of business by the well-known travellers' bank, Bowles Brothers and Co., are progressing favourably. Mr. Charles Bowles arrived in Japan from America by the *City of Peking* and left by the present mail. On his arrival in Geneva the bank proposes to re-open its doors and resume business. Mr. Bowles came to Japan to meet the Japanese creditors of the house, whose interests, from being the most distant, were the most prejudiced; but by special arrangement with the Japanese and Foreign Agency Company to act as agents of the liquidation and the judicious selection of the Oriental Banking Corporation, to act as trust depositary for the funds for payment of coupons, &c., on the spot, in Japan, without charge to the bondholders, even these most distant creditors may be cared for as well as if at the counters of the bank in Europe and America. Such efforts and goodwill to retrieve commercial disaster deserve success, whatever may be the obstacles. The total liquidation of a bank's debts, by funding process or any other, is a rare example, and we can but wish it success, particularly as it cannot fail to have a good effect on foreign bank credit in Japan.

The *Government Gazette* contains an order made by his Excellency the Acting Administrator, as follows:—By virtue of the provisions of Section VI. of the Lighthouse Ordinance, 1873, it is ordered: "1, That every ship which enters the waters of the colony after the 16th April shall pay the following light dues, that is to say, one cent per ton. 2. It is further ordered, by virtue of Section VIII. of the same Ordinance, that such steamers of the Hong Kong, Canton, and Macao Steamboat Company, Limited, as enter the waters of the colony by day, and all Chinese junks, be exempt from payment of light dues."

In the Vice Admiralty Court the *Ava* v. *Rona* case came on again before the Chief Justice. The Attorney-General appeared for the owners of the *Ava*, and Mr. Kingsmill for the owners of the *Rona*. After the questions at issue had been argued by counsel, his Lordship made some suggestions for a compromise, and ultimately the motion was adjourned *sine die*, to enable the parties to come to a settlement.

An Indian chain-gang guard belonging to the Victoria Gaol is reported to be missing, and it is said that he was in the habit on pay day of visiting the gambling-houses on the borders of British Kowloon. These dens, which it was understood were to be suppressed, are reported to be in full activity again, and draw great numbers of house boys, coolies, and other servants from Hong Kong.

The steamer *Iraouaddy*, with the present mail, which left Shanghai on the 2nd April for this port, was detained at the Woosung bar for twenty four hours.

Owing to the density of the atmosphere and the unfavourable nature of the weather generally yesterday, it was not possible to observe the eclipse of the sun in this colony.

STRAITS SETTLEMENTS.

SINGAPORE.

The present mail brings advices from this port to the 15th April. The P. and O. mail from London 5th March, was received on the 9th April, and the following French mail of March 12 arrived out on the 13th April. The following summary of the news is from the *Straits Times*:—

We are glad to observe a notification in the *Government Gazette*, announcing the appointment of Mr. Welner as Commander of the steamer *Pluto*, vice Commander McEwen, resigned. Capt. McEwen's appointment was made by the Secretary of State for the Colonies,—a little bit of patronage that has been not only expensive, but of little benefit to the Colony, as he was only here a few months before promotion to a more lucrative position in the Hong Kong civil service. Captain McEwen was no doubt a competent master for the vessel, but we presume there are thousands of other shipmasters quite as competent; and the command of our little local steamer is a very small office on which to exercise high official patronage, especially so great a distance from home. His appointment to the *Pluto*, while it was an injustice to Mr. Welner, who not only held the acting appointment but was entitled to the promotion, was merely a tentative measure, to make this Colony pay for his support until some other convenient opening offered for him. We trust that Mr. Welner will this time be permitted to enjoy his promotion, undisturbed by further petty Colonial Office patronage.

In view of the prevalence of cattle diseases in the Settlements, entailing severe losses upon the native owners, we are

Digitized by Google

glad to observe that a manual of the more deadly forms of cattle disease, printed in Hindostanee, has been prepared by Mr. J. H. B. Haller, President of the Indian Cattle Plague Commission, whose report was published as an appendix to the *Government Gazette* of the 27th of February last. Copies will be furnished to any persons able to read Hindostanee, on application to the Colonial Secretary. We trust the work may prove of great benefit to the native cattle owners.

We regret to learn of another fatal accident on board ship, through leaving the hatches open at night. Mr. Hermann Behrmann, chief officer of the German ship *Senator Iken*, lying alongside Tanjong Pagar Wharf, on coming out of the cabin stepped into the after hatch, which was open, and was precipitated into the ship's hold, a depth of nearly thirty feet, sustaining such severe injuries that he died next morning. The ship was taking in ballast, and the coolies had worked late, which accounted for he hatch being kept open until after dark. So many accidents have occurred through lack of precaution in closing the hatchways of ships that too much care cannot be taken to guard against their possibility.

At a meeting of the Sarawak Committee of Administration, held at Kuching on the 15th March, the President informed the meeting that the question of the formation of a steam navigation company in Kuching might be considered settled, all the hares having been taken up, and that upon receipt of a telegram from H.H. the Rajah confirming the conditions on which he company is formed, the transfer of the *Royalist* would be at once carried out.

The s.s. *Calabar*, Capt. Hatchison, which has just completed epair at Tanjong Pagar Wharf, has had a trial trip, when she attained a speed of 10½ knots per hour. After taking in about 100 tons of cargo, she still kept up a speed of nine to ten knots, which would probably be exceeded after some hours' working of the machinery.

Captain Dunlop, Inspector-General of Police, proceeded to Malacca last week in the *Pluto*, and is still in that Settlement, busied with duties connected with the police force in Malacca and the native States. We are informed that the ruler of Rumbowe has lately assumed a more friendly attitude towards the British authorities, and has promised to render every assistance n endeavouring to discover the perpetrators of the robbery and murder at Chin Chin.

A Chinese prisoner has attempted to escape from the criminal prison. He had gained access to the loft between the ceiling and the roof of his cell, and then by removing the tiles emerged on a sat of portico, where he was discovered by the sentry, and was secured. During the same night a prisoner in one of the separate cells committed suicide by hanging himself to the bars of the ventilator, by means of a handkerchief or piece of cloth twisted up into a rope. The latter was, we hear, one of those charged with participating in the late outbreak.

The Governor has returned from Malacca in the *Pluto*, and has since left on a visit to Penang, from whence he will return in about eight days.

The new lighthouse at the entrance to the Straits of Malacca is approaching completion.

The average note circulation of the local Banks during March was :—

Oriental Bank	$288,645
Chartered Mercantile Bank	467,655
Chartered Bank	670,145

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—The market for imports had continued very quiet, and Yarn had again receded, sales "to arrive" having kept dealers fully supplied. For Shirtings a slightly better inquiry had been apparent at the low rates ruling. Indigo Shirtings and Black Velvets had declined in value. In Woollens there was little worth noting, beyond a firmer feeling in Mousselines. Nothing of importance had taken place in Metals.

HANKOW.—From this Port "a considerable business in imports" is reported, but prices would have still to advance ere they are on a level with those current at Shanghai. In Grey Shirtings, the heavy makes alone seem to have improved, and the best chop of them is not yet over Tls. 2.80 piece, while at date, the foreigners' market had little more than begun to be affected by the demand for T-cloths and Drills, noticed last week. Of Lead, sales had been made at Tls. 6.40 per picul, but the enquiry was weak.

CHINKIANG.—Messrs. Spencer and Wolff write on the 29th March, "A marked improvement has taken place in the value of Cotton goods; but it has in no way checked the demand, which still continues good. Sandalwood depressed by large supplies. Demand for Iron very small."

SHANGHAI.—The *North China Herald* report says:—The market at this port has been in an excited state, and a very large business in Plain Cottons has been put through. With one or two exceptions, prices have materially improved. The nature of the business—*i.e.*, whether it be the result of a real trade demand or speculative—is not easily determinable, but even if speculation has played an important part in it—and the large settlements "to arrive," do, to some extent, support this surmise—the natives alone are concerned in it. This argues a strong confidence in the future on their part, more especially as the buyers—to a man almost—are either the agents of the inland traders, or the traders themselves. Grey Shirtings: On the spot, Dewhurst's Red Pheasant chop has realised Tls. 1.39 per piece; 7 lbs., scarcely anything to be met with now under Tls. 1.45 per piece, and very ordinary chops selling freely at Tls. 1.48 to 1.50 per piece. Dewhurst's Eagles are nominally worth Tls. 1.60 per piece, 8¼ lbs. An advance of 3c. to 5c. per piece, all round nearly, has been established. Butterworth's Green Globe has been sold at Tls. 1.69 per piece. Collie's Lion-on-Bale at Tls. 1.79. Dewhurst's Eagle and Mendel's Hand and Branch have been done Tls. 2.00 per piece, and E-Wo Green Dragon has touched Tls. 2.05 per piece. For Jinkee Stag Head Tls. 1.80 per piece has been declined, and sundry chops, that were barely marketable at Tls. 1.70 when last mail left, have been placed at Tls. 1.75 per piece.

MANILA.—Owing to the intervention of the Easter holidays only a very limited business had been transacted. Values of Plain Staples were nominally unchanged, but a slight improvement was observable in some classes of coloured goods.

EXPORTS.

TEA.

YOKOHAMA.—Early in the interval some settlements were effected on even more favourable terms than last quoted, say on the basis of $34 to 36 per picul for good medium. At this decline the leaf had attracted considerable attention, and, by inducing a fairly general and, for the time of year, extensive business, obviated the necessity of any further concession on the part of natives.

SHANGHAI.—There had been only a few buyers in the market, but a fair amount of Green Teas had been settled during the week. Prices showed no material change from those ruling at the date of last mail. Settlements were for the most part, being shipped to America, for which country the Silver Eagle and Dilpussund were fully engaged.

SILK.

YOKOHAMA.—The market had continued quiet. Medium and Common hanks, which previously were in some inquiry, had been neglected, and better sorts had attracted more attention. Some business had been done in Oshius at a further advance. Two public auctions of Silk had been held, at which full values were obtained.

SHANGHAI.—The amount of business transacted was estimated at 400 bales, making total settlements to date 68,900 bales against 56,000 at same date last year. The following were the prices reported to have been paid :—Yakee Chop Nos. 3 and 3½, 19s. 3d. and 18s. 1d.; Kukee's "Chin Jan" and "Kin Hock," 16s. 3d. and 14s. 11d.; Blue Elephant, 15s. 6d.; S.S.S. Dollar chop, 13s. 10d.; Commou Tsatlees, 12s. 8d. and 13s. 5d.

Shipping Intelligence.

ARRIVALS.

At YOKOHAMA.—From Cardiff, March 22, James Paton; from Hamburg, 16, Mathrilde; from London, &c., May 8, Sumida (str.).

At SHANGHAI.—From London, March 24, Glenfinlas (str.), 25, Bengal (str.); from New York, 24, Titan; from London, &c., 10, Glenearn (str.).

At HONG KONG.—From London, April 3, Gordon Castle (str.); 4, Venice (str.); from Cardiff, 6, Panama; from Antwerp, 5, Fyen (str.); from San Francisco, 6, Avonmore; from London, &c., May 12, Agamemnon (str.).

At MANILA.—From Liverpool, March 25, Emiliano (str.); from Cardiff, 27, Loyola; from Hamburg, 22, Minna; from San Francisco, 25, A. M. Smull; 20, Sonoro; 31, S. R. Mead.

At SINGAPORE.—From Liverpool, April 12, Aurrera (str.); from Shields, April 14, Windermere; from Cardiff, March 12, Ivalo Hesperia.

At PENANG.—From London, May 11, Tartar (str.).

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—None.

From HONG KONG.—For Portland, Oregon, April 7, Garabaldi.

From MALILA.—For New York, March 8, Corona; For Boston, March 27, Ironside; for Liverpool, May 9, John Nicholson.

From SINGAPORE.—For Gibraltar, April 13, Lady Cecilia; for New York, April 10, Stanfield; for Boston, May 12, Kingdom of Saxony.

From PENANG.—None.

THE MAILS.

PRESENT INWARD MAIL.—MARSEILLES, MAY 13.—The Messageries Maritimes steamer Iraouaddy, with the inward French mails from China and Japan, arrived here to-day, at 1 P.M. She brings 187 passengers and a general cargo, including 315 bales of silk, 14,627 packages of tea, 1,264 packages of sundries and specie, the value not known, for London, which part of her cargo will be forwarded to its destination per company's steamer Gange, due in London on or about the 23rd of May.

INWARD MAIL DUE JUNE 7.—GALLE, MAY 13.—The P. and O. Company's steamer Khiva, from China, arrived on the 9th, and the China, from Australia, on the 11th inst. The Khedive left for Suez yesterday. Australian gold for Europe, £310,000.

OUTWARD MAIL OF APRIL 2.—SHANGHAI, MAY 13.—The P. and O. Company's steamer Hindostan, with the London mails of 2nd ult., arrived here to-day.

DUTCH OUTWARD MAIL.—SOUTHAMPTON, MAY 10.—The Star Ball Line steamship Thomas Sorby, Captain Jackson, sailed to-day for Batavia, Samarang, and Sourabaya, with the Netherland mails, a good number of passengers, and a full cargo of general merchandise.

TELEGRAMS FROM THE FAR EAST.

THE WAR IN ATCHIN.

THE HAGUE, MAY 12.—Official advices, dated Atchin, the 8th inst., state that the Dutch troops have occupied Lamteloe and Ketjel-Oeleyloe with but little loss.

CHINA AND KASHGAR.

ST. PETERSBURG, MAY 11.—The *Turkestan Gazette* states that Tsan-Tsun-Shun, the Chinese Commander-in-Chief, with the forces under his orders operating against Kashgar, was expected to reach Shicho at the beginning of April in order to besiege Mana. At the same time the Chinese troops stationed at Sastansa and Guthehansa would commence operations against Urumtei.

THE MURDER OF MR. MARGARY.

SHANGHAI, MAY 11.—The Hon. G. T. Grosvenor, Second Secretary of the British Legation at Peking, and Mr. Baber have been chosen to proceed to Yunnan with the Chinese Commissioner, in order to investigate the circumstances attending the murder of Mr. Margary.

RUSSIA AND JAPAN.

ST. PETERSBURG, MAY 12.—Shortly before starting for Germany the Emperor Alexander signed a convention with Japan, by which the island of Saghalien, at the mouth of the River Amoor, is ceded to Russia. Its extensive coal fields are to be worked by Russian engineers and miners, and it is intended for this purpose to employ a large number of the convicts from Siberia.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—May 12, at Nieuwe Diep, from Batavia, Koning der Nederlanden (str.); 13, at London, from Rangoon, Nordstjernen; 14, at London, from Rangoon, Martaban; May 9, at Amsterdam, from Probolingo, Antoinette.

DEPARTURES.—May 11, from Nieuwe Diep, for Batavia, Johannes; for Samarang, Bestevaer; 4, from Barcelona, for Manila, Nueva Lantaro; May 13, from Sunderland for Singapore, Maid of Aln; 9, from Amsterdam, for Samarang, Jupiter.

CASUALTIES.—Koning der Nederlanden (str.), at Nieuwe Diep, from Batavia, took fire on the night of the 12th inst., but was soon extinguished by the aid of seven fire engines. The poop is partly destroyed. The Durham, at Liverpool, May 11, from Cebu, reports during the voyage, experienced heavy gales and terrific sea, ship labouring, and flooding the decks fore and aft, starting water-tanks and donkey-engine, bursting open galley and mates' rooms, filling them with water, and carrying away several articles belonging to them, and one of the lifeboat's gunwales was completely smashed.

MISCELLANEOUS.—Passed Gibraltar May 10, Prinses Amalia (str.) from Nieuwe Diep, for Batavia; at Port Said, May 14, Celebes, from Nieuwe Diep, for Java. Passed Gibraltar, May 14, from Liverpool, for Yokohama, Belgic (str.).

TRIAL TRIP.—The splendid iron screw-steamer J. B. Walker, built by Messrs. Raylton, Dixon, and Co., of Middlesborough, took her official trip on the 13th inst. The J. B. Walker has been built to the order of Messrs. J. B. Walker and Co., of Middlesborough, and is to form one of their "Star Ball Line" trading between this country and Java.

LAID ON.—At Greenock, for Batavia, Karang (str.); at London, for Batavia, Robert Porter; at Liverpool, for Singapore, Hong Kong, and Shanghai, Hector (str.).

SPOKEN.—Montebello, from Liverpool to Bassein, Mar. 18, 22 S., 26 W.; Swan, from Newcastle, to Batavia, March 24, 30 S., 24.38 W.

LAUNCHES, &c.

ON the 7th inst. a clipper ship of 1,130 tons register was launched from the yard of Messrs. Walter Hood and Company, Aberdeen. As the vessel was leaving the ways the bowsprit caught in the rafters of the shed in which it had been built, causing them to crash down in heavy pieces amongst a crowd, mostly of young people, collected below. Several sustained slight injuries, and one of the apprentice carpenters in the yard and a boy, aged about eight years, were so seriously hurt that they had to be taken to the Infirmary. The vessel was named the Salamis, and is to form one of the fleet of Australian and China clippers belonging to Messrs. George Thompson, jun., and Co.

ON the 11th inst. Mr. SAMPSON LLOYD put a very elaborate question to the Under-Secretary of India on the "Western China Route." It is to be regretted that the answer was not equally elaborate. The concluding portion of Mr. LLOYD'S question refers to an important memorial which the "Association of Chambers of Commerce" sent in to the Prime Minister in February, 1873, urging the Government to complete the survey of the land route from Rangoon to Kiang-Hung. We trust that the papers promised by the Under Secretary will include this document.

WITH reference to the telegram which appears in another column announcing that the Island of Saghalien had been made over to the Russian Government, we understand that the Japanese Minister in London has no information to that effect, and we have reason to believe that the statement is premature.

Naval and Military.

The turret ship Devastation arrived at Malta on the 5th inst., and has been taken into Somerset Dock in order to have her bottom cleaned, which was very foul. The passage of this ship from England appears to have been remarkably smooth, excepting on two days, when she was on the Atlantic side of the Straits of Gibraltar, and even then she proved remarkably steady. It is very satisfactory to be able to report that the improvements in the ventilating apparatus have proved successful, and the ventilation of the ship is now well spoken of.

Major-General M'Murdo, C.B., has been given the Distinguished Service Reward, vacant in consequence of General Drummond's death. General M'Murdo served as Assistant Quartermaster-General of the Army under Sir Charles Napier during the campaign in Scinde in 1843, and during the campaign against the mountain and desert tribes situated on the right bank of the Indus early in 1845. He also served in the Crimean campaign as Director-General Land Transport Corps.

Lieut. G. C. Helme, of the first battalion of the 10th Regiment (stationed at Singapore), having applied for permission to enter the Staff College, is to be attached to the staff of Major-General Sir E. H. Greathed, K.C.B., at Colchester, for one month.

By the lamented death of Rear-Admiral Sherard Osborn, C.B., Captain A. F. R. Do Horsey will be promoted to the Active Flag List, and will vacate the post which he holds of Aide-de-Camp to the Queen.

The hired seamen and stokers on board Her Majesty's store-ship Buffalo have struck for higher wages, and have given notice to leave Government employ if their demand be not complied with.

The Admiralty has awarded the Captain's Good Service Pension of £150 a year, vacant by the promotion to flag rank of Captain E. W. Turnour, R.N., to Captain Elphinstone Aplin.

A seaman belonging to the Iron Duke has just received from the Japanese Government the sum of £165, as compensation for ill-treatment by the Japanese police.

The Iron Duke, the late flagship on the China station, is likely to be set apart for coastguard service.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BOSANQUET—On the 11th May, at 49, Grove-end-road, St. John's-wood, the wife of William D. Bosanquet, of Ceylon, of a daughter.

BROWN—On the 26th March, at Shanghai, the wife of Capt. Brown, s.s. *Ocean*, of a son, who only lived six hours.

LEISK—On the 26th March, at Burnside, Singapore, the wife of William R. Leisk, of a daughter.

LEROY—On the 26th March, at Shanghai, the wife of E. Leroy, of a son.

LOUREIRO—On the 28th April, at No. 1, Rua das Chagas, Lisbon, Mrs. José Loureiro, of a daughter.

MAXWELL—On the 24th March, at Butterworth House, Province Wellesley, Straits Settlements, the wife of William E. Maxwell, Assistant Government Agent, Province Wellesley, of a son.

SQUIER—On the 17th March, at Rose Villa, Hong Kong, the wife of J. Enston Squier, of a son.

MARRIAGES.

BOGGS—EATON.—On the 9th March, at Bangkok, Siam, the Rev. W. B. Boggs, A.M. to Flora J. Eaton, both of Nova Scotia.

GUIGNE—THUY.—On the 5th April, at the Catholic Church of the Good Shepherd, Singapore, by his Lordship the Right Rev. Bishop Le Turdu, assisted by the Rev. Fathers Martinet and Desbons, Albert de Guigne, to Miss Josephine Henriette Marie, eldest daughter of Paul Brasier de Thuy.

HAPPER—SHAW.—On the 15th March, at the Church of the American Presbyterian Mission, Canton, by the Rev. H. V. Noyes, assisted by the Rev. S. Whitehead, the Rev. A. P. Happer, D.D., to Miss H. J. Shaw.

DEATHS.

KNECHT—On the 25th Feb., at Bangkok, Siam, Marc Joseph Bernard Knecht, infant son of E. Knecht, Chancellier to the French Consulate.

LEPPER—On the 17th March, at Yokohama, Thomas Lepper, aged 85.

WILFRID—On the 10th March, at the Convent of the Holy Infant Jesus, Yokohama, Sister St. Wilfrid, aged 55 years.

PARLIAMENT.

—o—

HOUSE OF COMMONS.

—o—

BRITISH BURMAH AND WESTERN CHINA.

(May 11.) Mr. S. LLOYD asked the Under Secretary of State for India whether he had any objection to lay upon the table of the House copies of all correspondence respecting trade between British Burmah and Western China since 17th Feb. 1873, between the Secretary of State for India and the Governor-General of India, between the latter and the Chief Commissioner and Political Agent of British Burmah, between the said Chief Commissioner and his agents at Mandalay and Bhamo, between the Mandalay agent and the Government of Burmah, and between the Governor-General of India and Her Majesty's Minister at Peking (in continuation of Parliamentary paper, "Rangoon and Western China," No. 258 of Session 1873).

Lord G. HAMILTON said that he proposed shortly to lay upon the table papers giving the reason for the despatch of the expedition from British Burmah to Western China, and also giving an account of the attack made upon the party. He thought that the papers would include nearly all the correspondence respecting the trade between Burmah and China.

Sir Charles Dilke will ask the Under-Secretary of State for India, on the 24th inst., whether the Indian Government have any information as to the Chinese attack on the dominions of the Ameer of Kashgar other than that which has appeared in the newspapers; and whether any instructions have been sent to the British Minister at Peking upon the subject.

THE JAVA RAILWAYS.

It is—our Dutch correspondent has several times stated—the firm intention of the Dutch Minister of the Colonies, Mr. Van Goltstein, to take the necessary measures to complete the railway-net in Java, and provide Sumatra with these means of communication. Up to this moment both the Dutch Government and the Chamber have shown a good deal of good-will; the general conviction prevails that more railways must be built, but the Dutch are proverbially slow regarding measures to improve the condition of their colonies, even of those which provide the Dutch treasury with hundreds of millions of guilders, so that Holland could be provided with a railway-net without borrowing one penny.

It is a most satisfactory fact that the Dutch Minister has sent Mr. A. W. P. Verherk Pistorius to London, in order to study the manner in which the English Government maintains regular relations between its Colonial Governments and that of the mother country. This voyage will most probably have an excellent effect, and will induce both the Government and the Chambers to make more haste than hitherto to provide those rich islands of Java and Sumatra with more complete means of communication. If the money which has been spent upon that unhappy Atchin war was disposed of in behalf of the above-stated purpose, the outlay, we think, would have been more profitable than now will be the case. The railways in the Dutch East Indies consist, at the present time, of two lines only. The entire length of the main line from Samarang to Djokjokarta is 165.7 kilometres, that of the branch from Kedoeng-Djatie to Willem I. 36.4 kilometres. The other railway runs in a direction due south from Batavia to Buitenzorg, and its length is 55.1 kilometres. Both these lines of railway were constructed under Government concessions by the Netherlands India Railway Company, whilst the Dutch Government became responsible for an amount of annual interest, which was provisionally fixed at fl.630,000, but with the condition that the obligations to pay this sum should only remain in force so long as the net annual profit derived from this line should fall short of that sum. The amount was subsequently raised to 765,000 guilders, whilst the duration of the guarantee was extended to the year 1906. It does not suit our purpose to sketch the financial history of this Company; it is enough to state that it was an eventful and troublesome one. The first sod of the railway from Samarang to Willem I. and Djoejokarta was cut at the first-named place on the 27th of June, 1864, and the sum total expended up to the 1st of January, 1873, was about nineteen millions of guilders, viz., for the main line at the rate of 86,900 guilders per kilometre, and in respect of the branch line at the rate of 138,800 guilders per kilometre. The average cost thus was 96,100 guilders per kilometre. The concession for the line from Batavia to Buitenzorg was also granted in 1864, but not until five years later was its construction commenced, and it was completed towards the end of 1872—the total length of this main line and its branches being 58.4 kilometres, which cost 54,500 guilders per kilometre, or, in toto, 3,200,000 guilders, to which must still be added the expenditure for railway material and rolling-stock, viz., 3,700 florins per kilometre. The total cost, including stations, rolling stock, &c., for both the main and branch lines was thus 22,780,000 guilders, or nearly £1,898,333, of which ten per cent. had to be spent for raising the necessary capital. The rolling-stock on the Samarang line consisted at the end of the year 1873—the returns do not go any further yet—of 237 waggons and trucks, and the entire distance run by the nineteen locomotives during the said year was 459,954 kilometres, and the number of passengers tickets reached the cipher of 565,733, for which 431,593 guilders were paid. The quantity of goods conveyed during that year for account of private individuals was 83,559 tons, paying for freight 1,006,034 guilders, being an average rate of £1 per ton. The gross receipts amounted to 1,575,010 guilders, and the expenditure 748,251 guilders, representing about 47½ per cent. of the gross receipts, and the net revenue on the working of the year was 826,759 guilders. The traffic expenditure for the previous year was nearly nine per cent. more than in 1873. The rolling-stock of the Batavia railway consisted of thirty carriages and fifty-five waggons of all kinds. The aggregate distance run by the trains was 140,750 kilometres. The total number of passengers conveyed was 507,528, and the sum received for their conveyance 249,309 guilders. The aggregate quantity of merchandise was 12,631 tons, giving a receipt of 70,307 guilders. The gross revenue amounted to 379,547 guilders, and the expenditure 174,250 guilders, viz., forty-six per cent. The results of the working of both lines for the above-mentioned year were :—

RECEIPTS.	Florins.
Balance of cash from accounts of previous year	376,484
Net revenue on the working of the year (as above stated)	1,032,056
Payment by the State, as guaranteed interest on capital ...	765,000
Total	2,173,540

PAYMENTS.	Florins.
Contributions to reserve, rolling stock, renewal, and sinking funds (Samarang line)	334,001
Litto to reserve fund of Batavia line	36,873

Digitized by Google

Interest and sinking fund of debenture capital	690,444
Dividend on share capital...	250,000
Payment to the State in part reimbursement of advances, as guaranteed interest on capital	552,757
Balance transferred to credit of account for 1874... ...	309,465
Total	2,178,540

In a second article we will state what since has been done to extend the railway communication.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, MAY 12.

For several days the Second Chamber has been occupied with discussing a Bill to regulate the establishment of manufactories, which was carried in to-day's sitting. Mr. A. Kuyper, the leading member of the anti-Revolutionary party, has asked permission to interpellate the Ministry about their intentions regarding the improvement of the education-laws. Probably this will cause a very warm debate. You will remember that two Radicals are making a crusade through the country to agitate for an improvement in the neutral schools. The opponents of the State schools, on the contrary, are demonstrating that it is only equitable that those who pay out of their own pockets for the instruction for their children should be reimbursed from the Treasury to the amount which the State would have to pay if they did not maintain their own schools. The question will be the principal one at the forthcoming elections for members of the Second Chamber. In this battle for the "to be or not to be" of the neutral schools it is very doubtful what the Minister will do or what he will promise. He certainly is most liberal in promises, as is proved by the following fact. For several years there was a question of making dry land of part of the Zuyderzee, a surface of 195,000 hectares. Some time ago a concession was asked by a few gentlemen, who demanded a subsidy of f.47,750,000, whilst the total cost of the work was estimated at f.140,000,000 which of course was to be covered by the sale of the reclaimed land. The Minister, however, has declined to grant this concession, and prefers that the work should be done by the State—and he asks for a preliminary credit of f.8,000, for a special survey.

It is said that the newly-appointed Minister of the War Department will introduce some important alterations in the administration of his office. This most certainly is a step in the right direction, and goes to show that the Minister differs from his predecessors, who were mere men of straw, whilst the Secretary-General was the actual Minister. In the military periodical, *Pro Patrie*, a proposal is made to memorialise the King for the introduction of obligatory military service, because the present strength of our army is not sufficient for our national defence. Every community, every village and town, will be canvassed for signatures to this petition, but our nation being anything but *soldatesque*, I fear the appeal will be something like a *vox clamans in deserto*.

Some time ago Mr. Nierstrasz, M.P., asked permission to interpellate the Minister of the Colonial Department about the state of our army in Java, especially the troops in Atchin. Mr. Van Goltstein has given, in to-day's sitting, ample information about the force, its enrolment, and the measures taken for this purpose, both here and in Java. The state of affairs, he said, was very satisfactory; the latest news from the Commander-in-Chief was most encouraging. Mr. Nierstrasz expressed himself contented with this answer.

The ex-Governor-General, Mr. J. Loudon, has arrived with his family at Lausanne, where he will reside for a time. In a few days he will visit the Hague, where he will remain as long as necessary for official affairs. The last mail brought us the famous book of Mr. de Rochemont, "Loudon and Atchin." The Liberal papers are simply furious about it. *Vide* the *Vaderland*:—"This book will be bought by thousands, but thousands will throw it away in disgust. We have read the book, but we cannot advise anybody to follow our example. How is it possible that his Excellency should not only have consented that this book should be written, but that the Government's archives should be put at the disposal of the author?" After some further exclamations in the same sense, the paper says, "We can well believe that the editor of the *Java Bode*, when he had read the book in prison, said, 'That is the *coup de grace* for Loudon!'" The manner in which Mr. de Rochemont flatters the ex-Governor-General, the manner in which his portrait is exhibited upon the title-page, is simply disgusting; but this is not the worst. The most sickening chapter is that in which such men as Fransen Van de Putte, Verspyck, and Nieuwenhuyzen are abused, to add to Loudon's glory. Verspyck is introduced as a man who did not even deserve an honourable dismissal for the services rendered by him to the State. Fransen Van de Putte is described as a person who co-operated with "clamourous publicists" to embarrass the political situation. All this is for the deification of Loudon. There is only one Loudon, and De Rochemont is his prophet! I am anxious to know what the Conservative papers will have to say. Up to this moment they have not spoken.

The general opinion is that the debate which will take place to-morrow in the Second Chamber about the reasons which led to the dismissal of Governor-General Loudon and the appointment of Mr. Van Lansberge will not be very animated. The Minister, it is asserted, is quite right, and Mr. Loudon will be the first to acknowledge that the Minister neither caused nor wished for his resignation. The private relations between these two high functionaries are said to be most friendly. A rumour says that Mr. Mees, M.P. for Rotterdam, would vacate his seat in order that it might be filled by Mr. Loudon, but that the latter declines most positively to accept a seat in the Chamber.

The King has appointed Mr. W. C. van Oordt Dutch Consul at Kanagawa and Yedo, in the place of Mr. J. M. Reynvaan.

The academical festival, which will take place early in the month of June at Leyden, promises to be most splendid. Gigantic preparations are being made for the occasion.

I regret to record the death of Jhr. Van Nispen hot Sevenaer, M.P. Since 1849 he had represented the district of Nymegen. He was a Roman Catholic, and one of the oldest members of the Second Chamber. He was respected by every one.

The annual meeting of the shareholders of the International Credit and Trading Company of Rotterdam will be held on the 14th of June.

PRODUCE MARKETS.

Our market for Colonial Produce is still without material improvement. The public sales excepted, no important transactions have taken place. Holders, however, keep firm, and do not incline to operate at lower quotations.

COFFEE.—Though the business has been limited prices have remained unaltered, whilst holders are still less inclined to sell, since it became known that in the month of April large deliveries took place. Some privately-imported parcels have obtained high prices. The Trading Company's auctions will be soon advertised.

TEA.—The public auction, on which 8,281/4 chests Java were offered, went off most satisfactorily, and prices were in favour of the sellers. On the 21st inst. 5,458/4 and 16/12 chests Java will be sold.

SUGAR.—In the last few days several parcels Java changed hands, and large quantities have been taken for export. The news from abroad about this article strengthens its position.

RICE.—Uncleaned sorts do not meet with demand; 5,716 bags Java, ex Kanagawa, are in the market, but are not yet sold.

SPICES.—Nutmegs and Mace very firm; transactions, however, remain very limited. Several parcels have arrived; 2,083 bags Black Pepper, ex Hampton, were sold; 80 bags Cloves found buyers at firm prices. The quotations are:—Nutmegs, No. 1, 190c. to 195c.; No. 2, 175c. to 180c.; No. 3, 130c. to 155c.; No. 4, 128c. to 130c. Mace, D, 175c. to 180c.; E, 170c. to 175c. Pepper, 28c. to 28½c.

JAVA TOBACCO.—Rather important parcels have been sold by private tender, and prices were very satisfactory in most instances. The arrivals have been very large, and they will shortly be brought into the market. The stock includes 2,099 bs. Sumatra; 20,631 bs. Java; 7,501 bs. cutted Java.

COTTON.—The market is still very dull.

JAVA INDIGO is somewhat quieter, and only small parcels have changed hands.

BANCA TIN.—Prices again show a downward tendency. The nominal quotation is f.50½. Billiton on the spot has sold at f.47¾. On the 26th inst. 22,800 slabs Banca will be sold by the Dutch Trading Company.

MANILA HEMP.—60 bales fine quality were sold at very firm prices.

MISCELLANEOUS.—A parcel of Getah Gitang offered in public sale was, for the most part, bought in. Rattans: At unaltered prices some small parcels have changed hands. Gutta-percha without business. Camphor (Japan) is quoted 45c. per ½ kilo., but this quotation is almost nominal. Mother-o'-Pearl Shells: 1,100 kilo. were sold at very firm prices.

SHIPPING.

ARRIVALS.—May 5, at Texel, from Padang, Jacob Roggeveen; 6, at Texel, from Rangoon, Renpor; 7, at Maassluis, from Banjoewangie, Hoek van Holland; at Flushing, from Java, Laurens Coster; 8, at Brouwershaven, from Sourabaya, Salatiga; at Texel, from Banjoewangie, Antoinette; 11, at Flushing, from Akyab, Eskdale (str.).

DEPARTURES.—May 4, from Maassluis, for Java, Thomas Sorby (str.); 11, from Texel, for Batavia, Johannes; for Samarang, Beatevaer.

(BY TELEGRAM.)

In the Second Chamber the supplementary credit for Java gave rise to an animated debate respecting the resignation of Mr. Loudon, the late Governor-General, the appointment of M. Van Lansberg, and other questions concerning Java. The Minister for the Colonies said he would consider whether he should propose to the King to abandon the secrecy observed with regard to the documents confidentially communicated to the States-General on the subject of the Atchin war. The credit was finally passed by 61 votes against 1.

At the annual general meeting of the Hong Kong and China Gas Company, held on the 14th inst., a dividend at the rate of 12 per cent. per annum, free of income-tax, was declared for the twelve months ending the 31st December, 1874.

The *Bowen*, the new steamer built on the Clyde for the Eastern and Australian Company, has made a successful trip. The *Bowen* is the fifth steamer despatched for this service, which is carried on under a postal contract with the colony of Queensland. The line goes, *viâ* Singapore, through the Java Sea, and round the north-eastern coast of Australia, touching at four ports in Queensland, and terminating as a mail route at Brisbane, where the English letters are delivered within 50 days from London.

THE Japanese Prince—the uncle of the Mikado—who has for some time past been residing in Berlin, is about to follow the example set by the son of the Khédive, and enter the army for a short period in order to acquaint himself with its discipline. The prince will be attached to one of the regiments of foot guards. Having passed through a course of practical service, he proposes then to enter the Military Academy for scientific training.

Captain C. F. Clery, 32nd Light Infantry, succeeds Captain Marter, King's Dragoon Guards, as Deputy Assistant-Adjutant and Quarter-master-General in Ireland. Captain Marter, is transferred to the Staff at Aldershot as Deputy-Assistant Adjutant-General, vice Major J. N. Crealock, 95th Regiment, who reverts to regimental duty on promotion.

The Eastern and Australian Company's steamer *Singapore* arrived at Singapore from Brisbane on the 11th instant, two days early, with Queensland mails for London.

LONDON: MONDAY, MAY 17, 1875.

THE CHURCH IN THE EAST.

THE recent retirement of Bishop JERMYN of Colombo, on account of failing health, seems to be a fitting occasion for a few remarks on Episcopacy in the Far East, and these we hope to offer from no sectarian, no party standpoint, but with a simple regard for what we believe to be the true interests of religion on the broadest possible basis. The resignation of the Bishop of Colombo is regarded by some as a seasonable opportunity for initiating what is after all a mere question of time,—the disestablishment of the Church in the East. There are not wanting writers who would have Ceylon set the example to British India in Church matters, as it recently did in decimal currency. We fail to see any analogy in the two cases. We incline to the belief that not only will the vacancy be filled, but that the present or any future Ministry will approach the question of disestablishment in the East not from any one particular point, but on the basis of a fully-considered and well determined policy applicable to the entire Church, as it exists eastward of the Suez Canal. Opinions may differ as to the probable date of this action, but there can be little question that it will have to be approached and dealt with in a statesman-like manner, and that those whom it most nearly concerns will have time allowed them to make the needful preparations for such a change of policy. For the credit of our common faith we sincerely trust that on this eventuating, the rock on which the Committee of the Colonial Bishoprics Fund split in regard to Hong Kong may be carefully avoided.

The disestablishment of the Church does not necessarily signify the sweeping away of all bishoprics. If the friends of the Church of England consider that, notwithstanding the withdrawal of State support, bishops are needful for their system of ecclesiastical government, no doubt provision for their maintenance will be made by the Colonial Bishopric Fund Committee and the Society for the Propagation of the Gospel in Foreign Parts. In British India and in Ceylon there are sufficient bodies of clergy to demand some sort of authoritative guidance by means of an acknowledged head, and bishops like HEBOR, CHAPMAN, and JERMYN have undoubtedly done good work. But these remarks fail to be applicable to some of the outlying settlements of the East. It cannot be to the advantage of theProtestant faith, striving to make its way in any of its various forms amongst Oriental nations, that there should be strife, or dissension, or unworthiness within the Church, calculated to cause the finger of reproach to be pointed at it from without, especially from those who are the objects of the Church's solicitude. We have unfortunately seen this in one Eastern diocese, that of Hong Kong—which, though not existing as a State-paid establishment, is under the shadow of the Colonial Bishoprics Fund—a regretful source of discord and disunion in the Church. Many members of the Church of England in our Settlements in China fail to discover any reasonable grounds for the existence of a bishopric in that part of the world, where the need for a clerical supervision is so exceedingly limited. Much less reason was there for the creation of a second diocese in the North of China, and still more recently this marvel has been exchanged for regret in view of the unsatisfactory footing on which one of these bishops stands in regard to the few chaplains supposed to be subject to his ecclesiastical rule and governance. The appointment of a Bishop of Labuan was an equally ill-considered measure, and although in these instances there are not the same grounds for criticism as in the case of State-paid dignitaries, we wish to direct the serious attention of those in authority whom it concerns to the extremely unsatisfactory state of the Church in the Far East. If it be considered by some that it is essential a ruler should be appointed over the clergy in China and other places, let them designate men whose temper, disposition, and qualities fit them to advise and guide instead of fostering discord. Above all, let our Colonial-office act with decision as to the maintenance or discontinuance of Colonial Bishoprics. At present the policy is harassing, uncertain, and unsatisfactory.

A DEPUTATION from the British and Foreign Anti-Slavery Association waited on the 11th inst. upon Lord CARNARVON, at the Colonial-office, to urge upon him to take some steps to put down coolie labour in some of our colonies. They stated that they considered the employment of coolies was only slavery in another name, and was kept up merely to foster the mercantile and planting interests. Lord CARNARVON, we are glad to notice, gave a statesmanly reply to the deputation, expressing his opinion that "considering the commercial depression that exists "in many of the West India Islands, a system of coolie "importations, if it can be administered under due safe-"guards, should be favoured by the Government." There is no doubt that under such circumstances coolie emigration can be made not only conducive to the development of the resources of many valuable countries, but may be of the highest advantage to the coolies themselves. While we should be the last to uphold anything like the abominable system of crimping and kidnapping which were long the disgrace of the coolie emigration from Macao, we believe that there is nothing of more importance than the discovery of some means of making the great labour-power of China available to the world; and that it is the part of our statesmen, while setting their faces sternly against all systems which may be tainted with such abuses as existed in the Macao trade, to endeavour earnestly to encourage legitimate emigration under due safeguards, that the coolies emigrate voluntarily, and are protected in their rights in the colonies to which they proceed.

WE have to express our great satisfaction with the course pursued by Mr. WADE, our Minister at Peking, in his negotiations with the Chinese Government on the subject of the murder of Mr. MARGARY. According to a telegram received from Shanghai through REUTER'S agency it appears that the Hon. T. G. GROSVENOR, one of the Secretaries of the Legation at Peking, and Mr. COLBORNE BABER, of the Consular Service, have been appointed to proceed with the Chinese Commissioner to the province of Yunan, to investigate the circumstances connected with this atrocity, with a view to ascertain the real authors. We congratulate these gentlemen on the opportunity thus afforded for distinguishing themselves by the accomplishment of this object. It is to be regretted that the PRIME MINISTER, in his announcement in the House of Commons, did not communicate this information.

THE naval complement in the China seas is still far below the requirements of the station, but we understand that, with every disposition to increase its strength, the Admiralty have not at their disposal suitable vessels. But, as soon as possible, it is intended to despatch two or three vessels suitable for the requirements, including the *Fawn*, for surveying purposes on the coast of China. The *Sylvia*, we believe, is fully occupied in surveys of the coast and harbours of Japan. We trust that Admiral RYDER will not allow Hong Kong to be represented by a single lame duck, such as H.M.S. *Elk*. It has been rumoured that instructions have been given to Admiral RYDER to despatch a vessel to the Korea for the purpose of reconnoitring and reporting to the Admiralty, but we believe nothing special has been ordered in this direction.

Digitized by Google

The Times of the 11th inst. contains an article with reference to the improved relations with Burmah, in which allusion is made to the attack upon the late Mr. MARGARY. *The Times* seems to consider that it does not appear that the King of BURMAH was responsible for the matter, although it is possible he may have instigated some of the Chiefs to make the attack. The Chinese hill tribes are considered those who are immediately concerned; and, if such is the case, it is to be hoped that our Minister at Peking will not allow the matter to drop until substantial reparation has been made.

WE understand that it is the intention of the Japanese Government to run a line of steamers on Lake Bivu, to connect with the railway on the west coast. The distance across the lake is about forty-five miles, and it will be necessary to have specially constructed steamers for the service.

THE MACAO COOLIE TRADE.

A Parliamentary Paper has been published, containing further correspondence on the Macao Coolie trade, from which we extract the following :—

Messrs. PUSTAU and Co. to Governor KENNEDY.

Hong Kong, June 3, 1874.

Your Excellency,—From a friendly hand we just received a copy of the Blue-book, entitled "China, No. 2, 1873 : Correspondence respecting the Macao Coolie Trade," and it is with deep regret and pain that we perceive in it, on page 5, an inaccuracy and imputation affecting us, which appears based upon erroneous impressions, and calls for immediate contradiction.

Ad. 1. We most respectfully deny the justification of your accusation that we are directly concerned in the Coolie Trade.

Ad. 3. Steamer *Nelusko.* We had informed the Acting Harbour-master at once that we were not agents of her, and it is a matter of surprise to us that your Excellency entirely omits cognisance of our letter of the 23rd of August, 1873, to the Harbour-master, a copy of which we herein inclose.

We will, under the circumstances, tender an explanation as regards this steamer, because if this case remains as represented by your Excellency, it may mislead to the belief that we were indeed directly concerned in the Macao Coolie Trade, which insinuation we have every reason to reject.

The steamer *Nelusko,* in consideration of our supplying most of her cargo from London to Hong Kong and Shanghai, was to be consigned to our firm also for outward employment. She was thus consigned to us on her return from Shanghai, and until the end of July, 1873, when her captain declared that he wished to take no other than a coolie charter, upon which he was at once told by us that we would not lend our hands for such a purpose, and we accordingly lost the commission on an outward freight rather than procure a coolie charter for the steamer.

We afterwards heard that the captain of the *Nelusko* had himself carried out his intention, which to hinder was as little in our power as in your Excellency's.

Ad. 3. *Louisa Canevaro* and *Columbia.* These vessels came here for repairs, under circumstances detailed in our letters of 23rd of August, 1873, addressed to the Harbour-master; and 23rd, 25th, and 28th of August, 1873, addressed to the Colonial Secretary, and the simple services to be rendered to above vessels can, in fairness, and in our humble opinion, not be construed into the imputed inference.

We crave your Excellency's attention to our letter of the 23rd of August, 1873, addressed to the Colonial Secretary, explaining :—

"At the same time we beg to inform you that our agency, as on former occasions with these ships, refers to her (the *Louisa Canevaro*) only whilst under repairs, and such temporary agency is necessitated from the owners only by the insurance being effected in London, consequently she had to repair under Lloyd's Surveyor's supervision, and the average papers required due form."

It is pretty well known in this Colony that our such agency never extended any farther. We, therefore, most respectfully repeat that we have always refused to be in any way connected with the coolie trade, and your Excellency may sympathise with our resolve not to appear charged to the contrary. May it therefore please your Excellency to fulfil our most respectful requests to supply the Secretary of State also with copies of our letters of 23rd of August, 1873, addressed to the Harbour-master; and 23rd and 25th of August, 1873, addressed to the Colonial Secretary; and of the present letter, or to take such measures as it may appear expedient to your Excellency's impartiality for their appearance in the next Blue-book, which direct course of publicity we would infinitely prefer to any other form, though the harm inflicted on us unjustly can hardly be mitigated thereby. Noticing from the letter of Lord Tenterden of 2nd of December, 1873, to Mr. Herbert that the incomplete correspondence has been communicated to the German Ambassador in London, we request your kind permission to supply full copies also of the present to the German Consul, with the request to forward them to the German Ambassador in London.

It is a duty to ourselves, the oldest German firm in Hong Kong, to keep our good name in honour, and your Excellency may rest assured that we shall ever be prepared to uphold the same.—Yours, &c.,

(Signed) WM. PUSTAU AND CO.

To His Excellency Sir Arthur Kennedy,
Governor of Hong Kong

Sir A. KENNEDY to the Earl of CARNARVON.

Government House, Hong Kong, June 12, 1874.

My Lord,—I have the honour to transmit the copy of a letter dated June 3, 1874, from Messrs. Pustau and Co., a German firm in this Colony, complaining of statements made by me, and published in Parliamentary Paper No. 2 (1874), respecting the Macao Coolie Trade. I also transmit copies of letters from Messrs. Pustau on the same subject, which they deem essential to their justification, and which do not appear in the published correspondence. I trust that it is hardly needful for me to preface my remarks by disclaiming all desire to injure the good name and honour of a firm with some of whose members I am on the most friendly terms.

Your Lordship will observe that in my despatch dated September 3, 1873, of which they complain, I express my surprise (and I might have sincerely added my regret) to find them acting as Agents for three of the most notorious coolie slave ships on the coast.

Messrs. Pustau complain that I have in the despatch just quoted charged them with "being directly concerned in the Macao Coolie Trade."

On full consideration, I am of opinion that this is not verbally accurate, and that the omission of the word "direct" would have left the statement more in accordance with the knowledge I possessed.

On the other hand, Messrs. Pustau and Co. fully admit their agency in the case of the two ships *Louisa Canevaro* and *Columbia,* which they well knew as notorious coolie ships, and protested against their removal from Hong Kong waters (*vide* page 6 of Printed Papers), when they well knew they were being fitted and provisioned for the transport of coolies,—an agency from which it is difficult to believe they did not derive profit. Messrs. Pustau draw distinctions between different kinds of agency which I am unable to appreciate. The ships for which they admittedly acted as agents were notoriously being fitted and provisioned in Hong Kong Harbour before proceeding to Macao to ship their cargo. Messrs. Pustau and Co. lay much stress on my alleged misstatement that they were Agents for the ship *Nelusko.*

I would not willingly charge Messrs. Pustau with aught that was not in my opinion borne out by facts; and I do not think that any stronger evidence of their agency can be adduced than the explanation they offer in their letter of the 3rd June, 1874, under this head, as well as their full knowledge of the character of the trade in which the ship was engaged. I inclose a copy of the reply I caused to be returned to Messrs. Pustau's letter.—I have, &c.,

(Signed) A. E. KENNEDY.

The Earl of CARNARVON to Sir A. KENNEDY.

Downing-street, August 6, 1874.

Sir,—I have communicated to the Earl of Derby a copy of your despatch of the 12th of June last, respecting the agency connection of Messrs. Pustau and Co. with the coolie trade steamers *Nelusko, Louisa Canevaro,* and *Columbia,* and I have suggested to his Lordship that these papers should be communicated to the German Ambassador in London, and that they should be included in any future paper presented to Parliament respecting the Macao Coolie Trade.—I have, &c.,

(Signed) CARNARVON.

The Earl of DERBY to Baron von den BRINCKEN.

Foreign-office, September 4, 1874.

M. le Baron,—On the 28th of July last his Excellency Count Münster forwarded to me a letter, addressed to the Governor of Hong Kong by the German firm of Pustau and Co., in which they complained that he had unjustly charged them with direct participation in the coolie trade; and, in doing so, his Excellency anticipated a communication I was about to address to him, sending him a copy of the identical letter which had been received from the Governor, as well as copies of the correspondence by which it had been followed.

On receiving his Excellency's note, I thought it better to defer my communication till I had again consulted Her Majesty's Secretary of State for the Colonies, through whose hands the correspondence had originally passed; the result of that consultation has been to confirm the opinion which I had previously formed, that the papers should be communicated to the Imperial Embassy; and I have, therefore, the honour to inclose copies of them herewith.

I have to add, that it is the intention of Her Majesty's Government to include the correspondence in the next series which may be published, and laid before Parliament, of papers on the subject of the coolie traffic; and I hope that this step will satisfy the wish which Messrs. Pustau and Co. appear to entertain, that full publicity may be given to their disclaimer, of their connection with that traffic.—I have, &c.,

(Signed) DERBY.

Mr. DUNLOP to the Earl of DERBY.

(Extract.) Havana, September 1, 1874.

I have already solicited your Lordship's attention to negotiations which will probably be privately attempted at Lisbon in favour of a re-opening of the Coolie traffic from Macao to Cuba; and some days ago I learned that some of the head-men of the free Chinese in Havana have been sounded on the possibility of their (the Chinese) acting with the so-called Colonisation Society for the purpose of establishing "Agencies" in the Chinese sea-ports, to induce "passenger colonists" to accept passages to other places, with an ultimate destination to Cuba; and also to see if something can be done in the Japanese seaports, so as to extend the system indirectly there.

I scarcely think the Chinese freemen (some of whom are in trade, keep small shops, and make a little money) will fall into the snare; but the proposal has been made to them, and prospects of lucrative shares in profits held out.

Mr. COBBOLD to the Earl of DERBY.

Lisbon, October 6, 1874.

My Lord,—I have taken occasion to bring to the notice of the Portuguese Minister for Foreign Affairs the subject of the Macao Coolie Traffic, more especially that under the denomination of free emigration. I did not fail to point out to his Excellency the deep interest evinced by Her Majesty's Government in the total suppression of this

Digitized by Google

traffic, not alone in the cause of humanity, but in the very interests of civilisation; and I clearly stated it as the opinion of my Government that the traffic in question, under whatever head, would never be entirely done away with unless the Portuguese Government were prepared to enforce to its utmost extent their Decree of March, 1873.

Senhor Corvo, in reply, said that he considered this question as one of the past, as regards Portugal; he assured me that, in March of this year, he even telegraphed to the Governor of Macao not to allow free emigration, as he feared it might serve as a cloak to the old traffic; and the advices received from that colony state that all vessels leaving Macao do so in ballast.

The new Governor of Macao is appointed to leave for his post about the middle of this month, and he takes with him positive instructions to carry out all the engagements of Portugal with regard to the suppression of the Coolie Traffic, coupled with the strictest orders not even to allow free emigration.

His Excellency further stated that a contemplated Treaty between Portugal and Peru has not yet been ratified, owing to the question of coolie emigration, and that he considers the negotiations at an end, inasmuch as he has written to the Portuguese Consul at Lima that he may come home on leave.—I have, &c.,

(Signed) T. CLEMENT COBBOLD.

The Earl of DERBY to Mr. COBBOLD.

Foreign-office, October 19, 1874.

Sir,—I have to instruct you to express to the Portuguese Minister for Foreign Affairs the satisfaction with which Her Majesty's Government have received his Excellency's assurances of the determination of the Portuguese Government not to allow a revival of the Macao Coolie Traffic in any form, as reported in your despatch of the 6th instant.—I am, &c., (Signed) DERBY.

Sir BROOKE ROBERTSON to Lord TENTERDEN.

(Extract.) Canton, December 15, 1874.

I have had the honour to receive the Earl of Derby's despatch of the 27th of October, transmitting, for my information, under flying seal, a despatch addressed by his Lordship to Her Majesty's Minister at Peking upon the subject of coolie traffic, with two inclosures.

In my last despatch I referred to the necessity of the Lisbon Government resisting insidious attempts to restore the coolie traffic under the name of free emigration, and I have reason to believe strong pressure will be brought to bear on the new Governor of Macao, Senhor d'Avila, for the coolie agents have never left China, although the barracoons have been closed; and, on the arrival of Senhor d'Avila lately, several who were residing at Hong Kong went at once to Macao, where the others have resided since the closing of emigration. It is evident, therefore, they expect a renewal of the traffic under a new Governor. Senhor Corvo's reply, however, to the remarks of Mr. Cobbold gives an assurance, at least, that they will be disappointed. At the same time every effort will doubtless be made by those interested in the traffic to induce Senhor d'Avila to re-establish the free emigration regulations, which were suspended and not annulled by his predecessor.

Governor Sir A. KENNEDY to the Earl of CARNARVON.

Government House, Hong Kong, January 13, 1875.

My Lord,—Adverting generally to the correspondence on the subject of the so-called Macao Coolie Trade, I have now the honour to draw your Lordship's attention to the translations of two notices, published in the *Boletim da Provincia de Macau e Timor*, dated 31st January, 1874.

2. Your Lordship will observe that the first of these documents established certain regulations for carrying on a system of Chinese emigration, and the latter suspends their operation for one year.

3. That term is about to expire, and I regard the resumption of the export of Chinese from Macao with great apprehension of a recurrence of many, if not all, the old abuses.

4. Several well known and influential coolie traders with large sums of money at command, together with many of their staff, are already on the spot to take advantage of the re-opening of the trade, if the prohibition of the Portuguese Government be not renewed.

5. On this latter point I have not at present any information to offer; but I should fear that the recent assumption of the Government of Macao by an officer new to Colonial affairs may be taken advantage of by the influential class of persons (both here and in Portugal), who are interested in a trade so highly profitable.—I have, &c.,

(Signed) A. E. KENNEDY.

Mr. COBBOLD to the Earl of DERBY.

Lisbon, March 22, 1875.

My Lord,—With reference to your despatch of the 2nd instant, I have the honour to inclose to your Lordship herewith translation of a note, dated the 19th instant, from the Portuguese Minister for Foreign Affairs, in which his Excellency states that the new Governor of Macao and Timor has been furnished with instructions to prohibit, until further orders, emigration under contract as well as all free emigration.—I have, &c., (Signed) T. CLEMENT COBBOLD.

Senhor CORVO to Mr. COBBOLD.

(Translation.) Lisbon, March 19, 1875.

Sir,—I have the honour to acknowledge the receipt of the note which you addressed to me on the 13th instant, wherein you inform me that you had received instructions from the Earl of Derby to call the attention of his Majesty's Government to the apprehension felt by Her Britannic Majesty's Government that, in case the provisions enacted last year by the ex-Governor of the Province of Macao and Timor concerning the free emigration of Asiatic passengers from the Port of Macao should be enforced, the Coolie Trade will be renewed under the guise of free emigration, as may be inferred from the endeavours which are made use of for this purpose by the agents of the trade.

I have to state to you in reply that the Government of his Majesty, in view of the importance of the matter, has already taken the necessary steps, and accordingly instructions were given to the present Governor of the Province, in the sense of forbidding, until further orders emigration under contract as well as all free emigration.

I take this opportunity to thank you for the information you give me as to the representations made to Her Britannic Majesty's Government upon this matter by the Governor of Hong Kong, and by the British Consul at Canton; as well as for your assurance that Her Britannic Majesty's Government are perfectly convinced of the sincere wish of his Majesty's Government not to allow the renewal of the Coolie Trade from the Port of Macao under any pretext whatsoever.—I avail, &c., (Signed) JOAO DE ANDRADE CORVO.

Miscellaneous.

COOLIE LABOUR.

On the 11th inst. a deputation from the British and Foreign Anti-Slavery Society had an interview with Lord Carnarvon, at the Colonial-office, to take some steps to put down coolie labour in some of the colonial possessions, which they considered was only slavery in another name, and was kept up merely to foster the mercantile and planting interests. They urged that the war in Cuba would end in the introduction of coolie labour from China, and that England ought to set Spain an example by abolishing coolie labour altogether unless every check and safeguard were applied. The true principles which governed emigration they held to be these:—That it is properly the object of Government supervision, but not of Government assistance in any pecuniary sense; that contracts for labour be only recognised or enforced which are made by the labourer with a full knowledge of the work to be done, and in the country where such labour has to be performed; and that where such emigration is permitted something like an equality in the respective numbers of both sexes be maintained. In the independent course of action which had already distinguished the administration of his lordship the deputation considered they had a guarantee that if his lordship found the policy pursued by his predecessors to be either at variance with the principles of a sound political economy, or subversive of the just liberties of the governed, or inimical to the true interests of the Empire, he would discontinue it.

The Hon. Evelyn Ashley and Mr. Sturge having made a few remarks, and put in a memorial embodying their views, Lord Carnarvon replied—I am very glad to find that there is not altogether a unanimous opinion in favour of the memorial just read. I should be sorry if it were so. It would open, of course, a very wide ground, and would imply an assent to conclusions on an important subject to which I am not prepared to subscribe. I hold distinctly that having especial reference to the commercial depression that exists in many of the West Indian islands, provided that you can administer a system of coolie importation under due safeguards, it is the duty of the Government to do so, and to give what assistance they can—not indeed as one speaker has put it, to one single class in these islands, but for the benefit of the whole, because the planters, though only a single class, if able to hold their own, promote the general prosperity of the whole colony. At the same time I feel the importance of watching such a system very closely. I have considered this subject carefully. Where there is a very redundant population with low wages in one place, and where in another that labour can be employed with great advantages to all parties, it is not only justifiable, but it is right on the part of the Government to give what assistance we can. That applies to another point, viz., the traffic amongst the Polynesian Islands. I should like to remind the deputation on one point, because it coincides with the view taken by Bishop Patteson (in whom there could not have been a more devoted follower of many of the principles which this deputation has had at heart). Bishop Patteson distinctly laid down in his letters his wish not that the trade should be repressed, but that it should be regulated so that it should become, instead of a curse and an evil, a great blessing. I have to thank you for the very flattering opinion you hold of me. I can freely say that I rejoice extremely that it has fallen to my fortune to carry through the emancipation of the slaves in West Africa. It has, however, been a work which required a good deal of consideration and many precautions. It could not be lightly undertaken, but having been undertaken, I think I may assure the deputation that so far as the very latest reports have been received it has been carried through successfully, and with far fewer difficulties and delays than one could have reasonably anticipated. It may be interesting to the deputation if I mention one or two of the received facts with regard to it. There have been a few instances of slave dealing since the abolition ordinances, but wherever the transactions have come to light they have been repressed, and repressed very firmly and with great determination by the local Government. I think, moreover, that the scheme of emancipation is widely and well known throughout the whole of the Protectorate. It was at one time a question as to how far it was generally understood, but I think that doubt is at an end. Of course, it was impossible not to entertain apprehension that in so great a social change as that of the emancipation of the slaves some disturbance to industry might take place, but I am within the truth when I state that the latest despatches show no sign of serious, still less of permanent, disturbance of trade and industry. In some recent telegrams or reports it was stated that trade was falling off at Accra. Well, trade no doubt has been slack at Accra, but it has been proportionately greater at some other places on the Coast; and the revenue, I am happy to believe, is generally holding its own. Too much cannot be attached to the maintenance of revenue on the Gold Coast. It is there, as in many other places, the secret of good policy, and so long as we can maintain a sufficient revenue so long we shall be able to carry out such reforms as the state of things and society permits. That has hitherto been the case. It has resulted in the maintenance of general tranquillity, with an apparently great satisfaction along the whole of the Coast. I think there remains one other subject for me to touch upon, and that is the allusion to Natal. I can only say on that subject—which was one that

Digitized by Google

cost me a great deal of painful consideration—that I simply did that which I believed to be right in the matter, and as time goes on, when the angry feelings which have been aroused have had time to subside, I doubt not more justice will be done to the course which I have taken, and it will be seen that the action taken was quite as much in the interest of the whole part of the colony as it was in the interests of the other and larger portion of Her Majesty's subjects. Natal is a magnificent country, but it merely forms part of the still larger territory of South Africa, and for South Africa I contemplate in the future a development of vast prosperity, the natural resources of that country are so great; the native population, which has been, perhaps, a source of difficulty and danger, can, as I believe, be converted into a source of strength. Some may think that there is a difference between these great objects—the material development of the country, and the proper treatment of the natives; but I believe, for my own part, that, so far from there being any difference, they are quite consistent. It is unnecessary to say another word on that subject. I desire, for my own part, as far as possible, that irritation should now disappear, for I very often think "the least said," to use a very homely phrase, "the sooner mended." I have great confidence in Sir Garnet Wolseley's ability, and in that which exists in all English colonists when the irritation of the moment has disappeared, that they will be governed by their own strong good sense of justice and right feeling.

Mr. Chesson, Mr. Jenkins, M.P., Mr. Fowler, M.P., and Sir Henry Havelock also urged the views of the Aborigines Society for increased vigilance on the part of the Government. Sir Henry Havelock, from personal knowledge of Sir Garnet Wolseley, could say that no better administrator could be appointed for Natal.

THE LATE ADMIRAL SHERARD OSBORN.

Mr. H. N. Lay writes to *The Times* as follows:—My absence from town has prevented my noticing your article on Admiral Osborn before. Your encomium of him I most cordially endorse. As allusion is made to my name, permit me for the sake of accuracy to point out one or two errors in your reference to Chinese matters. The Emperor of China did not, as you say, offer the command of the fleet through me to Captain Osborn. I was intrusted with its organisation, and Captain Osborn was selected by me to command it. I should wish to claim the credit of his appointment, and am unwilling to divide it with the Chinese Government. When Her Majesty's Government granted an Order in Council giving to Captain Osborn and myself the power to organise a military and naval force for China for two years, it was upon the faith of the most solemn pledges that such authority should never be abused to the detriment of British interests, which, be it said in passing, are ever identical with the best interests of China. I returned to that country some time before Captain Osborn's arrival with the fleet, and found that Major (now Colonel) Gordon had been allowed to enter the service of the provincial authorities. The Imperial Government perceiving the advantage to its old stupid policy that this oversight on our part would afford them, implored me to acquiesce therein and agree that Captain Osborn should occupy a like position. I refused; and, if at all mindful of the pledges I had given in England, how could I, with my knowledge of Chinese character, act otherwise? Captain Osborn arrived, and we both agreed that to accept the Gordon position would be wittingly to involve ourselves in doings which we could neither prevent nor defend. The treacherous massacres some time afterwards at Soochow within your memory confirmed the soundness of our judgment. We turned a deaf ear to the efforts—spread over six months—of the Imperial Government to persuade us into acquiescence, and so long as they could get Major Gordon to do their work of repression they were able to set the fleet at defiance. The result is known. But the Chinese Government, although in form repudiating, did not in fact repudiate their engagement. Conscious of their own wrong-doing, and actuated by fear that I should denounce their behaviour to Her Majesty's Government on my return home, they defrayed, upon my command, the cost of the fleet homewards, and, in fulfilment of a promise, remitted to me in London £40,000 towards that object, but this sum not being required, was returned to them. Unfortunately, we had no one here with eyes to discern the situation, and so the real facts were smothered. The history of the fleet has yet to be written, and the vicious policy of suffering our people to become the tools, instead of the guides, of the Chinese Government will, I make bold to say, before long be made manifest to all. And this opinion was, I am able to say, strongly and frequently expressed by Admiral Osborn, and so recently as within a few weeks of his lamentable decease."

Monetary and Commercial.

The Indian Government invite tenders, to be opened on the 16th June next, for a loan of £2,500,000 sterling in promissory notes, bearing interest at the rate of 4 per cent. per annum. The form and condition of these notes will be those of the notes of the transfer loan of 1st May, 1865, of which loan they will form a part. The minimum rate at which tenders will be accepted will be recorded under the signature of the Comptroller-General, and declared before any tender is opened. The notes will be payable to order, and interest thereon will be paid half-yearly, on the 1st May and 1st November in each year.

Messrs. Morton, Rose, and Co. invite subscriptions for $1,584,000 in Six per Cent. Gold Coupon Bonds of the City of New York. The loan is issued for the redemption of other City bonds due in 1874. The issue price is £201 per $1,000 bond, or £100 10s. per $500 bond, and the principal is to be repayable in gold coin in New York on the 1st November, 1896. The first coupon for interest will be payable on 1st November next.

An issue of £92,400 Six per Cent. Sterling Bonds of the City of Ottawa, at the price of 103 per cent., is announced by Messrs. Grant Brothers and Co. The bonds, which are issued for the purpose of completing the construction of waterworks, are secured on the water rates and by a rate in aid to be levied on the whole of the assessable property of the city.

At a special meeting of the Globe Telegraph and Trust Company (Limited), a resolution was passed authorising the issue of £2,000,000 further capital, which will raise the capital of the Company to £5,000,000.

The suspension has been reported of Messrs. Wilkinson, Watt and Co., coal exporters, ship-brokers, &c., of West Hartlepool The liabilities are stated to be about £100,000 and the assets £120,000. The latter, however, are subject to realisation, and consist chiefly of shares in steamships and public companies. The difficulties of the firm are stated to have arisen from losses incurred by the failure of Messrs. Richardson a short time back, and it is considered likely that other embarrassments will follow.

During the week ended the 8th inst. the quantity of tea taken from the bonded warehouses in London was 3,347,127 lb., of which 2,162,944 lb. was for home consumption, 740,665 lb. was removed coastwise, 360,971 lb. was exported, 78,079 lb. was sent coastwise for immediate export, and 4,468 lb. was for ships' stores. The amount of duty received was £54,074.

The market for Bar Silver has been very quiet during the week. The arrivals have been very small, and the amounts to hand, about £35,000 in all, have been sold at 57d. per oz., showing no alteration in price. There has been some inquiry for Mexican Dollars, but no transactions have yet taken place, the price remains, therefore, as last quoted, 56d. per oz.

THE BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month of April have been issued, and show, for the first time for a long period, an increase in the exports, the total value being, £20,221,830, against £19,432,270 in April last year, and £21,343,026, in April, 1873, being an augmentation of about 4 per cent. in the one case and a diminution of 5½ per cent. in the other. When it is remembered that most of our export commodities are now at lower prices than at this period last year this return must be regarded as satisfactory. Taking textile fabrics as the basis, being the most important section in our exports, we find that cotton piece goods have increased 21¼ per cent. in quantity and 18½ per cent. in value; linens are about 24½ per cent. higher in quantity, while the value has augmented 19½ per cent.; jute goods have been shipped to the extent of 31 per cent. more in quantity, but the corresponding value is only 8¼ per cent. higher; woollen cloths show an increase of 17 per cent. in quantity, and 18 per cent. in value; and worsted stuffs of 9½ per cent. in quantity, and 3¼ per cent. in value. Of coal the shipments are about 11,000 tons more, or about 1 per cent. increase; of alkali, nearly 4 per cent. more in quantity, while the value has fallen off 9½ per cent. Of iron and steel (raw and manufactured), the quantity has augmented about 9½ per cent., and the diminution in the value is about 11 per cent. Every description of the manufactured article has increased, except railroad; and in pig iron the quantity shipped is 50 per cent. more than in April last year. Yarns, cotton, linen, and jute have all been exported to a far greater degree, while silk and woollen sorts exhibit a decrease. Among the articles which show a decline in value are—apparel, 9 per cent.; bags and sacks, 30 per cent.; and haberdashery, 9 per cent., and the chief increase, apart from those commodities already mentioned, has been—in arms, &c., 45¼ per cent.; earthenware, 4 per cent., and leather, 8 per cent. The total value of the imports in the month was £30,327,214, against £31,616,521 in April, 1874, and £31,237,960 in April, 1873—a decline of 4 per cent. and 3 per cent. respectively. The chief cause of this has been smaller arrivals and lower prices of raw cotton, the quantity imported being 1,128,605 cwt., valued at £3,803,036, against 1,553,691 cwt., valued at £5,723,655, in the corresponding month last year, or a diminution of 27¼ per cent. in quantity, and 33½ per cent. in value. The other principal articles which have contributed to this decline are coffee, flax, indigo, rice, raw silk, raw sugar, and timber, the decrease in the value of the latter being nearly one million sterling. Of wheat the quantity imported has been 3,707,275 cwts., against 2,561,132 cwt. last April, chiefly from Russia and the United States; while the corresponding values are £1,892,788 this year, and £1,678,642 last, being an augmentation of 44¾ per cent. in quantity, and only 12¾ per cent. in value.

The following is an extract from these Returns of the figures which refer to our Export trade with China and the Far East:—

Borneo	8	7,400	13,019
Cochin-China	—	—	—

ARTICLES OF IMPORT.

No change of importance has occurred in the Produce Markets. The absence of speculation and consequent depression continue, and there is a general tendency towards lower prices. Tea, Silk, Sugar, Coffee, Rice, Pepper, Cotton, Hemp, and Hides are all rather lower than a fortnight ago, other articles being quiet at unchanged quotations.

TEA.

During the week business has been limited by private contract, whilst the quantity offered at public auction continues to be very small. Prices generally show but little alteration, but there have been some lower prices at public sale for some kinds of Green Tea. In the public sales 9,201 packages have been offered, of which 7,948 packages were sold without reserve. The deliveries for the week, as compared with last year, are as follows, viz. :—

	1875. lbs.	1874. lbs.
Home Consumption	2,179,942	2,205,136
Coastwise	743,683	684,379
Exports	294,445	405,915
Total delivered from London	3,218,070	3,295,430

Congous.—Red-leaf kinds : Siftings being scarce, full prices have been maintained ; broken-leaf kinds sell slowly at former prices ; fair to good common show no alteration. Fair to good Kaisows, from 1s. 1d. to 1s. 6d., remain firm, with but few on offer ; fine have been steady at last week's rates ; finest being only saleable in small parcels. Pak Lin kinds have been without change. Black-leaf kinds : Common to fair qualities have sold to a moderate extent without change in prices. Good medium to fine are quoted as before, with a fair demand. In finest there has been but little doing. Canton-make kinds : Common have sold from 10d. to 10½d. per lb., fair 11d. to 1s., other sorts showing no alteration. Oolongs : The few sales made have been at about former rates. In Souchongs there has been nothing of interest to notice, prices being about the same as before. *Scented Teas.*—Canton Capers show no alteration, but are fairly saleable at the low rates current for common to fair qualities ; good to fine, well scented, meet with a better demand. Orange Pekoes : Some common short-leaf kinds sold at 9½d. to 10½d. per lb. In Long-leaf kinds there is no change to quote. Foochow Capers are still dull of sale. Common Orange Pekoes have sold ½d. per lower, other kinds at about previous rates. *Green Teas.*—The market continues much depressed. Privately it is very difficult to effect sales, the trade supplying themselves at the public auctions, whilst there is but little export demand. Prices at public sale have again been lower for some grades, especially common-to medium kinds and fine Young Hysons.

SILK.

The market continues quiet, and business has been on a very moderate scale ; prices, however, have been fairly maintained. In China Silk there has been a small but steady business in medium and common Tsatlees at firm prices, but the better classes have been comparatively neglected. In Canton silk very little has been done. Japans have been in fair request, and several parcels have changed hands at about former rates. Deliveries from 1st to 12th instant :—

	1875.	1874.
China	1,587	955
Canton	184	229
Japan	148	288
Bengal	123	78
Total	2,042	1,550

Messrs. Arles, Dufour and Co.'s Lyons Circular, dated 8th inst., says :—We confirm our advices of the 10th of April. The opening of the spring season has resulted satisfactorily on the various markets of consumption of Silk goods, but dealers having supplied themselves freely, purchases for reassortment have been so far less important than anticipated. For Asiatic Silks the position is unaltered. All low grades of Chinas continue to be used on a very extensive scale at firm prices, but best Tsatlee remain almost entirely neglected, in spite of a reduction of f.2 from the highest point. Japans of the Mybash description and Bengals remain very difficult of sale.

COCOANUT OIL has attracted little attention at £43 10s. to £44 for fine Cochin, and at £37 10s. to £37 15s. for Ceylon in pipes.

CUTCH has further declined 6d. to 1s. At auction, of 1,420 boxes fine Pegue, Cock brand (of new import), 200 boxes sold at 24s. ; of 1,000 boxes fine Pegue from Calcutta 700 boxes sold at 23s. 6d. per cwt.

CHINA STRAW PLAIT.—At auction of 89 cases 300 bales only about 100 bales sold, ordinary white at £8, chiefly mottled at £7 2s. 6d. to £9 7s. 6d. per bale.

CHINA PRESERVES.—100 cases Ginger sold at 6d. ; 32 cases ditto bought in at 6¼d.

CAMPHOR.—China is quiet but steady at 70s. to 71s. per cwt.

CUBEBS firm, at an advance of 1s. per cwt., 50 bags good having been sold at 26s. 6d. to 28s.

DRAGON'S-BLOOD continues quiet ; of 16 cases at auction about half sold—lump, good at £9, middling at £5 7s. 6d. to £5 10s.

GUMS.—*Benjamin* is slightly easier and quieter ; of 165 cases offered at auction, one-fourth sold—fair to good Sumatra seconds at £10 5s. to £10 17s. 6d., false packed at £8 10s. to £7, brown fair thirds 76s. *Copal* very dull, and scarcely a transaction to report. *Damar* continues quiet ; and of 337 cases offered only a few sold at 62s. for fine Batavia. *Gamboge* easier, and of 61 cases one-fourth sold at £11 to £11 17s. 6d. for fair to good pipe a little run.

GALANGAL ROOT cheaper ; 60 bales fair sold at 21s.

GALLS have been quiet, and of 500 boxes at auction retired, about one-fourth since sold at 53s. for rather dark but worked.

GAMBIER.—The improved demand has continued, and sales of fair extent, chiefly during the early part of the fortnight, have been effected at a further advance in value. On the spot the sales include about 1,300 bales block at 25s. to 25s. 4½d., all faults, to 25s. 6d. for whole bales, all ex quay. For arrival 300 tons have been sold at 25s. 6d. to 25s. 7½d. ship, 150 tons off coast 24s. 10½d. ex ship, and 50 tons at 25s. 4½d. ex ship arrived. At auction 208 bags fine pale free cubes were bought in at 43s. At auction 39 bales dark pressed cubes sold at 20s.

HEMP.—A dull tone still prevails in the market for Manila, only small sales have been made privately, and a moderate supply at auction met few offers, and the bulk was bought in.

INDIA-RUBBER.—At auction 31 cases Borneo were bought in at 1s. 4d., except 10 cases, which sold at 1s. 3d.

JAPAN WAX.—There is an entire absence of demand, and all offers in the public sales have been withdrawn.

MUSK firm ; of 41 caddies Tonquin offered two thirds sold, fair to fine selected even well shaped pods at 40s. to 47s. ; good rough and bally 17s. to 18s. ; wet pickings 23s. 11 tins Yunan sold, fair at 34s. to 35s. 6d. ; and 6 tins Grain sold at 47s. 6d. to 53s. 6d. for fair to good.

PEPPER.—*Black* has been very dull at easier rates ; sales, 1,500 bags on the spot, Singapore at 5 11-16d. to 5¾d., Penang at 5d. At auction 4,806 bags offered met scarcely any demand, and nearly the whole was bought in. *White* has also been quiet and cheaper ; only small private sales of Singapore have been made at 7⅜d. to 7½d. In auction of 1,040 bags about 630 bags sold, fair to good fair bold at 7½d. to 7½d.

RICE.—The depression in this market has been further prolonged, and prices generally have slightly given way. On the spot the demand has been moderate, and only moderate sales have been effected at easier rates for Bengal as well as soft grain sorts. Floating cargoes of Burmah are about 3d. lower, at which there has been more business at the close, Rangoon at 8s. 3d., distant ditto 8s., Rangoon 7s. 9d. On the

Digitized by Google

spot good old white Bengal has been sold at 11s. 6d., ordinary at 10s. to 10s. 3d., fine new at 11s. to 12s. 9d. Bassein at 8s. to 8s. 3d., and Rangoon at 8s.

RHUBARB.—The public sales have embraced 77 cases China, the bulk of which were sold; good bold good fracture 3s. 3d.; middling to fair 1s. to 1s. 10d.; common 8d. to 11d. per lb.

SAPANWOOD.—At auction 7 tons Ceylon of fresh import sold at full rates at £13 2s. 6d., 7 tons damaged Manila sold at £8 15s. to £10 12s. 6d.

SPICES.—The market for all articles has been quiet. *Cassia Lignea:* Of 1,000 cases unworked 300 cases were sold at 55s., the remainder bought in at 58s. *Cinnamon:* 20 bales Ceylon partly sold at 2s. 10d. for first sort. *Chips:* Of 140 bags Ceylon 74 bags coarse bark sold at 2½d. *Cloves:* 231 bales good bright Zanzibar of fresh import sold at 1s. 4d. to 1s. 4½d., one lot fine 1s. 4⅞d. *Nutmegs:* Prices are steady without much demand. 5 cases 34 boxes Penang chiefly sold at about previous terms, average 66 nuts to the lb. at 3s. 10d., 76's at 3s. 5½d., 77's at 3s. 4d. to 3s. 5d. 27 bags Java sold, average 90 nuts to the lb. at 3s. 2d. to 3s. 3d., 102's at 2s. 11d., 114's at 2s. 10d.; of 20 cases 22 casks defective ditto 22 casks limed sold at 1s. 6d. to 1s. 7d. *Mace* continues dull, and in auction of 12 cases Penang only 2 cases good bright sold at 2s. 9d. and 3s., the remainder bought in at 2s. 6d. to 3s., also 8 casks good Java at 2s. 8d. per lb.

STAR ANISEEDS are slightly higher, being quoted £5 17s. 6d. to £6 2s. 6d. per cwt.

SOY is firmly held, and no business has been done.

STICKLAC.—Siam has been very quiet, and of 82 boxes good at auction retired, a few subsequently sold at £5 12s. 6d., and a few lots of fine privately at £5 15s.; sellers of fair at £5 7s. 6d. per cwt.

SAGO.—At public sale 915 bags went off slowly, and about 600 bags were sold, small steadily, large and medium at cheaper rates, fair large at 17s., fair medium 16s. 6d., good small at 17s. 6d. to 18s. *Flour:* In auction 2,518 bags Singapore were bought in at 13s. 6d. to 14s.

TAPIOCA.—723 bags fresh Singapore were all sold at about former rates, good to fine small white at 2⅛d. to 2¼d., one lot 2⅜d.; 486 bags old Penang bought in at 2d. to 2¼d.; 480 bags old Singapore sold, consisting of Malacca kind at 2d. to 2⅛d. *Pearl Tapioca:* 1,100 bags were nearly all sold at 6d. decline, dull to good bullets at 20s. to 21s., medium at 20s. 6d. to 21s. 6d., a few bags small at 22s. 6d. to 23s. *Flour:* 218 bags Singapore sold at 2¼d. to 2½d., chiefly at 2⅜d.

TIN.—The market during the past week has been steady. There is still an absence of speculative inquiry, but the demand for consumption and export is fairly active. Quotations are, Straits on the spot, £83 to £84, afloat £83, Banca £88, Billiton £83 per ton.

CASUALTIES.

The Light Brigade, from Java, for Rotterdam, while riding in Brouwershaven roads on the 7th inst., parted from both anchors, and grounded on Dwars in den Weg, but was towed off on the 10th, after discharging a portion of the cargo; captain reports cargo in good condition.

The Cybele (str.), of and from Glasgow, for Japan (*vid* London), was in collision off Blackwall on the 7th inst. with the Dudbrook barque, lying at the buoys; the latter vessel was struck amidships, staving in her planks, &c.

The Prince Louis, which left Cardiff on the 2nd inst. for Hong Kong, has put back leaky.

The Buston Vale, from Shields, for Singapore, put into Queenstown on the 10th inst., leaky.

The Mendota, arrived at New York April 28, from Batavia, reports having experienced strong westerly gales from lon. 71 W., during which she lost and split sails, and had everything movable washed from the deck; she was sixteen days within 500 miles of that port.

MISCELLANEOUS.

The steamer Chusan, from Glasgow for Shanghai, which sank at Ardrossan on Oct. 21, 1874, was floated on the 5th inst., and removed to Horse Island, where she now lies.

Passed Gibraltar, May 6, Koning der Nederlanden (str.), from Batavia, for Nieuwe Diep.

Arrived at Port Said, May 9, Pyah Pekhet, from Greenock for Penang.

The Prinses Amalia (str.), from Nieuwe Diep, for Batavia, passed Cape St. Vincent on the 9th inst.

The Celebes (str.), from Nieuwe Diep, for Java, arrived at Malta on the 8th inst., and left same day.

Arrived at St. Helena, April 15, France, Exmelin, from Zebu, for London, and sailed same day. Passed April 18, Laurel, from Yedo, for New York.

NOTICE TO MARINERS.

Japan—Yedo Bay.—Fixed Green Light off Haneda Point.—The Japanese Government has given notice, that from the 15th March 1875, a light would be exhibited from a screw-pile lighthouse recently erected off Haneda Point, south point of Yedo Anchorage, Yedo Bay. The light is a *fixed green* light, visible over the bay between the bearings of N.E. by E. ½ E. and S.S.E. ½ E., elevated 40 feet above the level of high water, and in clear weather should be seen from a distance of eight miles. The illuminating apparatus is of the fourth order. The lighthouse, 60 feet high, is built of iron, and painted white; it is situated about 500 yards inshore of the northernmost black buoy which marks the edge of the bank off Haneda Point (Kawi Saki), and stands in 7 feet water at low water. Approximate position, lat. 35° 31′ 35″ N., long. 139° 47′ 20″ E.—Also, that from the same date the following alteration would be made in Awomori Harbour light. The light would be changed from a fixed white light to a *fixed red light.*—Hydrographic-office, Admiralty, London, May, 1875.

The Corporation grant Drafts upon, and negotiate or collect Bills at any of the Branches or Agencies; also receive Deposits for fixed periods, at rates varying with the period of deposit.

The Corporation issue Letters of Credit and Circular Notes, negotiable in the principal cities of Europe, Asia, and America for the use of travellers.

They open Current Accounts for the convenience of constituents returning from China, Japan, and India.

They also undertake the Agency of constituents connected with the East, and receive for safe custody Indian and other Government Securities, drawing Interest and Dividends on the same as they fall due.

Shareholders having their shares on the London register receive their dividends at the fixed rate of 4s. 6d. per dollar. Dividends are payable in London in April and October, on receipt of the advice of meeting in Hong Kong, held in February and August.

GUERLAIN, 15, RUE DE LA PAIX PARIS.—Veritable Ambrosial Cream for shaving fashionable Perfumes for the handkerchief, Eau Lustrale for the hair, Eau de Cologne (préparation spéciale), Poudre de Cypris for the complexion, al fard, al bismuth a produit chimique.

FINEST TEA, DIRECT FROM CHINA.

"We venture to affirm that it would be well worth "some one's while to try the experiment of making "a market for really good Teas, charging as high "prices as he pleased. If the Fancy Teas which "now go to the Russian consumer could thus be "supplied in London, we entertain no doubt that "they would achieve an enormous sale for afternoon "use."—Leading Article, *Times*, 27th March, 1875.

Messrs. CHALMERS, MACKINTOSH, and Co., of Shanghai, take this opportunity of announcing that they have for some time supplied numerous friends with the very best Tea procurable, by direct shipments from China, in single original packages, of 10 lbs. and 20 lbs. each. They have thus in all cases been able to meet the difficulty as to quality so much complained of, and are prepared to extend the facility to any who will forward their names and addresses and quantity of Tea required to their agents for this purpose, Messrs. Daley and Symons, 15, Philpot-lane, London, E.C.

This is no attempt to supply "cheap" Tea, but a proved means of enabling consumers, by co-operation, and avoiding of intermediate profits and expenses, to purchase in China the finest "First Crop" Congou Teas, as received from the growers, in the original cases, having all their natural aroma and strength, absolutely secured from adulteration, and the handling and mixing processes of this country, which spoil the flavour.

It must be borne in mind that these "first crop" Teas are limited in quantity, and only to be procured once a year, being gathered in the early spring, and all shipped off in the months of June and July; and as the quantity forwarded this season by Messrs. C. M. and Co. depends upon the orders received during the present month, parties desiring a supply are invited to send in their names and addresses and the quantities required without delay.

Two qualities only are shipped—one at 3s. and another at 3s. 6d. per lb. duty paid and delivered, the latter being the finest Tea to be had (usually bought for the Russian market), and which through the ordinary channels would cost about 4s. 6d. per lb.

There is still a small quantity of the 1874 Teas for sale in original 20lb. boxes at 3s. 6d. per lb., and the new season's (1875) will not arrive till August.

Orders received on behalf of Messrs. Chalmers, Mackintosh, and Co., of Shanghai by

Messrs. DALEY and SYMONS, 15, Philpot-lane, E.C.

Payment—Cash on delivery.

Diploma of Merit, Vienna Exhibition, 1873.

YORKSHIRE RELISH

THE most delicious SAUCE in the world to CHOPS, STEAKS, FISH, &c. Sold by all Grocers and Oilmen in bottles 6d., 1s., and 2s. each. Trade mark—Willow-pattern plate.

PROPRIETORS:—

GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S BAKING POWDER.

THE BEST IN THE WORLD.—Makes delicious Bread without Yeast; Puddings, Pastry, &c., without Eggs, Butter or Lard. Bread made with this Powder is much easier to digest, and much more wholesome than that raised with yeast, and a larger quantity is obtained from the same weight of flour. One trial will convince the most sceptical of its superiority over others. Sold by Grocers, Chemists, and Oilmen in 1d. packets; 6d., 1s., 1s. 6d., and 2s. Tins. Prepared by GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S QUININE WINE.

THE BEST AND MOST AGREEABLE TONIC yet introduced. For the relief of Indigestion, General Debility, and Loss of Appetite it is INVALUABLE. Recommended for its purity by the *Food Journal*, Arthur Hill Hassall, M.D., Wentworth L. Scott, Esq., F.C.S., F.A.S.L., F.R.S.S.A., &c. Sold by Grocers, Oilmen, and Chemists, in large bottles at 1s., 1s. 1½d., 2s., and 2s. 3d. each. Prepared by GOODALL, BACKHOUSE & CO., LEEDS

NERVA, MARCHAND, & Cº

P. de Graaff, Hempenius, Mr. and Mrs. B. L. de Bruyn and two children, Mr. K. A. Haspels, Mrs. Eschauzier and child, Messrs. H. Bolt, T. Shooft, Corns. van Overvest, W. Arnold, T. P. Audebert, A. B. van Capelle.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present P. and O. mail brings advices from this port to the 6th April, and by the Pacific mail we have four days later news, viz., to the 10th of April; the French mail from London Feb. 12 was received on the 2nd April, and the following P and O. mail of Feb. 19 arrived out on the 7th April. The *Japan Herald* supplies the following summary of news:—

The political news of the fortnight is confined to rumours o changes in the Ministry, but as yet these *on dits* are apparently without foundation, no official intimation of new appointments having been made public. The Mikado has recovered from his recent indisposition, and has several times made his appearance in public. It is announced that the Empress left Tokio on the 7th April, to visit the shrines at the Island of Enoshima and at Kamakura.

The burglarious raids, which appeared to have been put a stop to a few months ago, have broken out again with renewed vigour. Not a house appears to be safe, and the robberies seem to be perpetrated with both skill and assurance. How the thieves can continue their career for so long unchecked is a marvel, for the streets both night and day are patrolled by police. Indeed, we do not know another city in the world where there are more guardians of order than there are in Yokohama, in proportion to the population. This is a serious subject, and deserves to be considered with a view to see whether it is impossible to evolve a remedy. It is not unlikely that in some instances the police may be in the confidence of the robbers, and take a share in their plunder for connivance at depredations; but we incline to think that in the majority of cases the apathy and stupidity of the police are as much to blame as is their venality, or the cleverness of the thieves.

An attempt has been made to set fire to an outhouse (at present unoccupied) on lot No. 88, Main-street. A foreign gentleman returning home saw, through one of the shutters of the house in question, a fire in one of the rooms. The alarm was quickly given, and help being at hand, the flames were fortunately extinguished. On examination it was found that a fire o very inflammable materials had been built against some wor

Digitized by Google

in a corner of the room. Nobody was found on or near the premises, though the policemen called in made thorough search.

We are much afraid that the shareholders in the Hong Kong and Shanghai Bank have not realised the full extent of their losses, and it will probably be as well for them to fortify their minds against "bad and doubtful debts" figuring rather heavily in next half-year's report. From what we learn from Kobe the Bank is a considerable creditor there for advances made to firms either actually declared insolvent or which may be expected so to be ere long. To meet the Kobe losses alone it is computed that a considerable portion of the balance of the reserved fund will be required, unless, indeed, these losses have been provided for by anticipation, which, however, is scarcely likely to have been the case.

The receipts of the telegraph offices for the year ending December 1874 amounted to 115,402 *yen*. Though this increase is owing in some respects to the opening of new offices at Shirakawa, Fukushima, Sendai and Ichinoseki, it is double the amount of the receipts of the year before last. The following is a list of the thirty-four districts in which telegraph offices are now open in Japan :—Nihonbashi, Akabane, Tsukiji, Asakusa, Hongo, Yotsuya, Riogoku, Yokohama, Odawara, Numatz, Shidzoka, Toyohashi, Nagoya, Gifu, Hikone, Kioto, Kawaguchi, Koraibashi, Kobe, Himeji, Okayama, Onomichi, Hiroshima, Yamaguchi, Simonoseki, Kokura, Fukuoka, Saga, Nagasaki, Utsunomiya, Sendai, Shirakawa, Fukushima, Ichinoseki.

A shock of earthquake was experienced on the 2nd April about half-past six A.M. Although we have not heard of any extensive damage, the effects were sufficiently strong to stop clocks, throw down pictures and ornaments, and in some instances crack the walls. This was the most severe shock which has been experienced for several years. It appears to have been more severely felt at Tokio than at this place, as it is reported that in the capital many walls have been cracked, and some thrown down by the shock.

The training for our spring meeting, which will take place on the 12th May and following days, is now being actively proceeded with. The Boat Club, after being driven from pillar to post, has at last settled down close to the Custom-house, and the opening day of the season was celebrated by a pull down to Mandarin Bluff and back. Four out of the five four-oars belonging to the Club showed up (the other one being under repair), and made a very creditable appearance. A meeting of canoeists has been held, when a Canoe Club was formed, and twenty-two names at once put down as members. A few rules were made. Messrs. Tripp and J. J. Dare were elected Commodore and Vice for the ensuing year.

After two years' residence in Japan, Mons. Berthemy, Minister for France, left on the 30th March, by the Messageries steamer. M. Berthemy had the confidence of the Japanese Government, and the entire respect of everybody with whom either his official, or social relations brought him in contact. Previously to his departure he was entertained at dinner by the Japanese Ministers at Hamagoten.

The Government mission to Siam returned on the 7th April, but nothing has transpired as to the results of the visit to that country. Sewaki and Morowaka, officials attached to the Foreign Department, have been appointed to visit China upon a special mission.

The 3rd April, being the anniversary of Jimmu-Tenno, the first Mikado, who is said to have ascended the throne B. C. 660, the day was observed as a holiday in all the public offices, and was celebrated with the usual rejoicings in the native town.

The *Japan Gazette* contains the following items of intelligence :—

The interval which has elapsed since the despatch of our last has been singularly devoid of incidents interesting to either residents or far-away readers. The Easter holidays have caused an appreciable diminution of the amount of business transacted amongst foreign traders, whilst the occurrence of the *matsuri* or festival of Jimmu Tenno has equally hindered the legitimate flow of commerce. Trade generally is most deplorably dull, and every one is holding on only with the hope that things must soon take a turn for the better.

Great improvements in the municipal economy of Tokio continue to be made. The principal divisions of the city have been lighted with gas, the more important streets have been graded and macadamised, new buildings on the European plan have been and are still being erected, substantial stone bridges are replacing the antiquated structures of wood which have hitherto done service, and such transformations are being made in the general aspect of the city that the foreign visitor will soon have but little except the strange tongue he hears to remind him that he has reached *Ultima Thule*.

New teas will be in the market before the despatch of another mail, and this staple, at least, continues to exhibit signs of vitality. Silk is not particularly lively, and the out-look for silk-worm egg producers during next season is anything but satisfactory. Notwithstanding the discouraging aspect of affairs, those who have resided for any length of time in this country continue to assert their faith in its resources, believing their development and the throwing open of the country to be only a question of time, and that far from distant.

The new buildings of the British Legation in Tokio having at length been completed, H.M.'s representative has transferred the seat of his official residence to the capital, and the premises hitherto occupied by Sir Harry Parkes on the Bluff have been formally handed over to the Japanese Government.

The *Monocacy*, U.S. gunboat, and *Mosquito*, British gunboat, are the only foreign vessels of war now in harbour. The *Decrés*, French corvette, and *Arcona*, German frigate, left recently, but the flag of the latter country will shortly be well represented, several vessels being expected.

A wholesale murder has been committed at O-shima-mura, near Kawasaki. A farmer, named Kato Shinyemon, killed a man, two women, and a girl, and badly wounded another man and woman. He then committed *harakivi*. A love affair is said to be the cause of the murder.

The eclipse of the sun which occurred on 6th April was not a success, so far as Yokohama was concerned. With the exception of about half an hour towards sundown, the sky was overclouded all day, and no observations of any scientific value could be obtained.

A native journal intimates that a number of Japanese manufacturers have made arrangements for a display of specimens of their products at the forthcoming Centenary Exposition at Philadelphia,

NAGASAKI.

We have advices from this port extending to the 5th April.

The *Rising Sun* of the 26th March says, a notification has been issued by the Japanese Minister for Foreign Affairs relative to certain changes in the weight and designation of silver yen. The name has been altered from silver yen to that of trade dollar, the latter being four grains heavier than the former.

According to a notification issued by the Governor of Nagasaki, a festival in commemoration of the soldiers whose lives were sacrificed during the Formosan war had been celebrated. The proceedings are described as having been of a comical character, and were, in one sense, appropriately terminated by a free fight between some Japanese soldiers and Chinese. Both natives and celestials were captured by the police, and taken to the police station.

The mosquito plague is described as having already set in at Hiroshima with such fierceness as to excite public notice ; and in another paragraph a plague of dogs is complained of, as being almost intolerable in some of the cities. At Simonoseki, for instance, "nearly every house has its dog, and upon witnessing a stranger they band together and attack him with the fury of wolves."

The business of the Japanese telegraph is now conducted in the new building connected with the Post-office at Nagasaki. A branch line is to be constructed between Nagasaki and Higo Ken.

CHINA.

PEKING AND TIENTSIN.

Advices had been received by telegram of the attack upon the Burmah Exploring Expedition and the murder of Mr. Margary. It was reported that Mr. Margary was enticed into one of the yamêns at Manwyne, with three of his Chinese servants, and was there killed, while the rest of the party were attacked, but escaped with the loss of all their effects, three Europeans of their number being wounded. It is further stated that Mr. Margary's head was placed on the city wall. Apprehension had been entertained about Mr. Ney Elias, who was separated from the main body of the expedition, but private advices had been received, stating that he was safe, having started on a more southerly route, and being turned back by the Chinese officials. The *North China Herald* says :—The inference is clear, from the details, that the murder was done at official instigation. And now that the sad event itself appears beyond doubt, we can almost hope that this part of the information will prove true, for the difficulty of identifying the criminals will then be removed. In any case, such a brutal outrage on a British official protected by Imperial passport will surely lead to a demand for stern reparation, and convince the Home Government what sort of civilisation is that possessed by the country which they have elected to treat as an equal. Manwyne is a town in Yunnan, at the foot of the Kakyen passes, and clearly within Chinese territory. The sad news will be read with the deepest regret. Few men who have lately passed through the Shanghai Consulate have been better known than Mr. Margary, and every one who knew him esteemed him. We can say with all sincerity that the service has sustained a great loss by his death, and that very many people in Shanghai have lost a valued friend.

No official news had been received of the action which Mr. Wade purposes taking in regard to the murder of Mr. Margary. It is understood, however, that he has taken the case strongly up, threatening even to haul down his flag unless a powerful commission of British and Chinese officers is forthwith delegated to look into the whole case and punish the perpetrators. We cannot hear that anything is yet known as to the result of the negotiations ; but as there had been time for telegraphic instruc-

Digitized by Google

tions to reach Peking from London, it may perhaps be assumed that Mr. Wade is acting under instructions from home.

The Tientsin correspondent of the *Herald* gives a connected history of the late troubles at that port. Of course, a good deal of the ground has been gone over before, but a good deal of new matter is introduced, and the letter forms a lucid and complete exposition of the affair. The Viceroy has replied in very vague terms to a petition from the merchants against the new mode of levying barrier dues, but it seems to be understood at Tientsin that the project will be abandoned. The Customs Taoutai will retain his post until the arrival of the Cantonese, Li Chaou-lang, who was gazetted to the appointment in November last, but has been prevented from taking it up. The retention of the Taoutai in office seems confirmatory evidence that he was acting with Li's knowledge. A reconciliation seems to have been arrived at between him and the Territorial Taoutai, for we hear they both dined with Li Hung-chang on the 30th March.

In the *Peking Gazette* of the 27th March the death of the Empress Kea-shun, wife of the late Emperor Tung-che, is announced as having taken place that morning. It had been previously known that the Empress was seriously ill, and expected to die. The Chinese say that she was leading a miserable, unhappy life, and that she must have welcomed death, although only seventeen years of age. For a Manchow lady she was considered very accomplished, being able both to read and write Chinese easily.

SHANGHAI.

The present mail brings advices from this port to the 9th April; the P. and O. mail from London, Feb. 19, was received on the 5th April. The following summary of news is from the *North China Herald*:—

A meeting of shareholders in the China and Japan Marine Insurance Company was held on the 5th April. The accounts showed a profit on the year's working of Tls. 4,000. This was insufficient to permit the declaration of a dividend. Messrs. Drysdale, Little, Behn, Bade, and Sutherland are directors for the current year.

The annual general meeting of the Shanghai Yacht Club was held on the 31st March. The minutes of the last meeting and statement of accounts for the season 1874-75 were passed after some discussion, and the meeting then proceeded to the election of officers, Mr. A. J. Little being re-elected commodore; Mr. S. B. Hill, vice-commodore; Mr. J. Wilson, treasurer; Mr. Dillon, prize-bearer; Messrs. Coryell and R. Mackenzie, auditors; Mr. Hewett, treasurer; Mr. Tucker and Mr. Lambert, hon. treasurers; and Messrs. Ashley, C. P. Blethen, J. P. Croal, and Viguier (in addition to the ex-officio members), committee of management. The date of the race for the Challenge Cup was left to the decision of the committee.

The Chinese Polytechnic Institution is making good progress. The committee have sufficient funds in hand to justify them in buying ground and erecting a building, and gratifying promises of support have been received from many quarters.

The minutes of the French Council meeting of the 23rd March carry us a step further in the negotiations about the Yang-king-pang. It will be remembered that the last letter of the French Council suggested the following points for submission to the arbitrators:—1st. Is the Bund in its present position an obstacle to navigation? 2nd. Does the encroachment prejudice the interests of property along the line of the creek? 3rd. Does not the acceptance by the English Council of a plan of a bridge adapted only for the present (narrowed) width of the creek vitiate their reclamation? The English Council objected to the latter clause, as being not one for submission to arbitration, but at most only an argument. The French Council have consequently agreed to withdraw it, but wish to substitute another, which was accidentally omitted from their first letter:—"Have encroachments been made by the English Municipal Council on the left bank of the Yang-king-pang? If so, are these encroachments an obstacle to navigation, and do they prejudice the interests of the bordering landowners?" The reply of the Council to this proposal is awaited.

Further correspondence has also taken place about the share to be borne by the respective Councils in building or repairing bridges over the Yang-king-pang. The French Council protest again the apparent willingness of the English Council to let the bridges collapse. The question, they urge, is one easily susceptible of adjustment, and if they won't have the French and English Ministers for arbitrators, arbitration in some other way is still the best way of settling it. In the meantime the French Council are willing to pay half the cost of getting out a new bridge for the Bund end of the creek, on the understanding that they shall be repaid the difference if the point be decided in their favour. The reply of the English Council to this proposal, also, is awaited. Both Councils equally repudiate the charge of being responsible for any possible interruption of traffic. A slight give and take alteration in the bund line of the Creek, on the French side, between Rues Petite and Montauban, is mutually agreed to.

The French Gas Company decline to submit their contract with the Municipality to interpretation at Saigon, because they hold that there is no doubt as to its meaning. The Council think otherwise, and purpose forcing the Company into arbitration.—Messrs. Butterfield and Swire purpose building a shed on the wharf which they have erected in front of the French Bund.—The question of the roads alongside the Ningpo Joss House is to be left in the hands of M. de Rochechouart.

The annual election of a Municipal Council for the English Settlement was held on the 6th and 7th April. It resulted in the election of Messrs. Cowie, Hart, Heyden, Kidner, Krauss, Lemarchand, Mackenzie, Purdon and Webb. Seven of these gentlemen are members of the old Council. Two—Messrs. Hart and Krauss—are new nominations. Elections to four vacancies on the French Municipal Council will be held on the 20th April. Two vacancies are caused among the French members by the resignation of M. Lemonnier and the expiry of Mr. Maignan's term of office; and two among the Foreign members, by the resignation of M. Lang, and the expiry of Mr. Ewald's term.

The programme has been issued, of the S. V. C. Rifle Meeting, to be held on the 11th, 12th and 13th May. A very good idea is the introduction of two prizes to encourage recruits. Practice is going on actively, and some good scoring is being made, notwithstanding the windy weather prevailing.

As the Messageries steamer *Iraouaddy* was steaming down the river she fouled the swinging boom of the hulk *Water Witch*, carrying it away and taking the mast out of a house-boat moored to the boom; passing onwards, before she could swing to the tide, she fouled the hulk *Berwick Walls*, and slightly damaged a house-boat moored alongside. Neither did this end her misadventures, for on crossing the Woosung Bar she took the ground just outside that obstruction. M. Hennequin at once despatched a tug down to assist her, and she was got off on the next tide. The accidents may be attributed to the state of the flood tide.

The French ironclad *Montcalm* has left for Ningpo. The French corvette *Volta* will follow for Ningpo to-day. Both vessels will then go to Nagasaki, and a French man-of-war will come over to take the place of the *Volta*.

A collision has occurred between the C.C.S.N. steamer *Ocean* and the C.M.S.N. steamer *Fusing*, on the voyage between Shanghai and Tientsin. The latter sank immediately, and fifty-five of those on board were drowned. The following particulars of the accident are given:—

The *Ocean* reports having encountered thick weather immediately after leaving Chefoo. On the morning of the collision she was going at reduced speed, with the whistle sounding, when at 10.40 A.M. the whistle was answered by another steamer on the port bow. The captain and second officer were on the bridge. Orders were at once given to port the helm, stop the engines, and reverse full speed, which orders were instantly obeyed. The look-outs then reported something right ahead, and in less than one minute she came into collision with the *Fusing*, striking her on the starboard bow close to the fore-rigging. A large hole was knocked in the *Ocean's* port bow, above and below water line about 10ft. by 5ft. The steamer *Fusing* was settling down by the head, and as soon as the ships got clear they lost sight of one another. The *Ocean's* boats were all lowered, and proceeded to the assistance of the sinking steamer, being guided by the cries of the Chinese passengers. The *Fusing* foundered almost instantly, and the passengers were clinging to the wreckage. The first boat, in charge of the second officer, picked up the chief officer of the *Fusing* and eleven Chinese, who were floating on a ladder. The second boat, in charge of the first officer, picked up eleven more Chinese; a boat in charge of the second and third officers rescued thirteen others; and a fourth boat was despatched in charge of the third engineer. Only one boat belonging to the *Fusing* got clear of the wreck, with the European portion of the crew (excepting Mr. Stewart, the third engineer, who was drowned), and some Chinese—23 in all. After putting the rescued men on board the *Ocean*, the boats returned and searched for over two hours amongst the wreckage for any other survivors. The compradore was found floating, quite dead. Many of the Chinese saved had sustained severe bruises, and had an arm or a leg broken; their wants were attended to as soon as possible. All attention was then given to the condition of the *Ocean*: the hole in the bow was blocked up with planks and bags of rice, and all hands—crew and passengers—were set to work to jettison the cargo (which consisted mostly of bean-cake) out of the fore compartment. By midnight the ship was sufficiently lightened to enable her to proceed for the nearest port. Two Chinese died on board the *Ocean*, and their bodies, with that of the compradore, were brought to Shanghai. The C.M. steamer *Nanzing* has been despatched to the scene of the disaster, in the hope that some of the bodies may be recovered.

The remains of two men drowned in the Whangpoo so long ago as December last have been found by the river-police floating this week. One of the poor fellows was Edward Carpenter, a marine of very good character, belonging to H.M.S. *Ringdove*. On the 19th December he went to visit an acquaintance on board H.M.S. *Modeste*, and returning at night, and quite sober (being, in fact, a teetotaller) he accidentally fell into the river from a sampan and was drowned. His remains were discovered floating among the junks off the native city, and were identified by his uniform and some marks on his under clothing. The other unfortunate was a seaman of the *Achilles*, who on Christmas-Day fell from a sampan while going from Hunt's Wharf to that steamer.

A correspondent sends us an account of a race meeting held at Newchwang on the 20th March. It appears to have been wedged in between a rainfall and a snowstorm, but to have been thoroughly successful in spite of difficulties. There were five steamers in port on the 26th—four loading for the south and one for Nagasaki.

Digitized by Google

It is reported that the well-known coasting steamer *Nanzing* has been purchased by the China Merchants S.S. Company, and that the price was Tls. 20,000.

At a land auction on the 2nd April, the following prices were realised :—

A lot of land situated near the Ningpo Joss House, measuring as per title deed 2 mow 5 fun, and registered in the U. S. Consulate as Lot No. 175—(This lot by recent survey contains 4 mow of land)—Tls. 121. A lot of land adjoining St. Catherine's Bridge, and near "Overweg's" Bungalow, measuring in area as per title deed 10 mow, 3 fun, 8 li, and registered in the U.S. Consulate as Lot No. 174—Tls. 14 per mow. A lot of land situated on the Pootung side, adjoining Muirhead's Dock, with frontage on the River Whangpoo of over 2,000 feet, containing as per title deeds 118 mow 3 fun 3 li 8 haou, and registered at the U. S. Consulate as Lots Nos. 127, 186, and 187—Tls. 480 for lot. A property situated at Woosung, immediately west of the Imperial Maritime Customs Harbour Master's Station, and adjoining the station of the Woosung-road Company. Lot 1 : A plot of land immediately west of the Woosung-road, containing about 28 mow, Tls. 10 per mow. Lot 2 : A plot of land north of the last-named property, and immediately west of the Woosung-road, containing about 28 mow, Tls. 10 per mow. A lot of land situated on the Pootung side, containing as per title deed 5 mow 9 fun 2 li 1 haou, and registered at H.B.M.'s Consulate as Lot 726, title deed 719, Tls. 4 per mow.

The following is the report for presentation to the sixth ordinary meeting of the shareholders of the North China Insurance Company, to be held at the offices of the company, Shanghai, on the 9th April :—

The directors have now to present to the shareholders the sixth half-yearly report, showing the position of the company on the 31st Dec. last, at which date the business of the term 1872-74 was concluded. From the statement of accounts it will be observed that the company had then a credit balance in hand of Tls. 559,156.49, after carrying forward the sum of Tls. 141,844.00 from the present working account, in addition to the capital (Tls. 300,000), and also the amount reserved out of the profits of the years 1872 and 1873 (Tls. 221,961.37). With reference to the receipts of premia during the six months under review, it is satisfactory to note a considerable increase as compared with similar periods of the two preceding years. The payments on account of losses and claims amounting to Tls. 311,058.33 include the several heavy losses alluded to in the last report. So far as at present known further settlements and claims in course of adjustment will absorb about Tls. 102,000. Some salvage, it is anticipated, will accrue to the company from the appeal to Privy Council in the *Rona* and *Ava* case. The item of Tls. 12,308.60 difference in exchange, it should be explained, is only an apparent loss, and is accounted for by the fact that remittances to London have been made at lower rates than that adopted by the directors for keeping the company's books. Since the 31st Dec., 1874, Tls. 300 per share, the equivalent of the paid-up capital, has been returned to the shareholders, and the directors are awaiting advice of the termination of the principal current risks to enable them to declare a dividend for the year 1874. Mr. James T. Brand resigned his seat at the board, owing to his departure for England.

HONG KONG.

Our advices by the present mail extend to the 15th April ; the French mail from London Feb. 26 was received on the 8th April. The following items of intelligence are from the *China Mail* :—

We understand that Sir Brooke Robertson, C.B., is not likely to leave Canton for the ensuing year. Several changes have of late taken place in the Consular service. Mr. Oxenham will, on arrival, proceed to Taiwan ; Mr. Brenan leaves Hankow for Peking, where he will be Assistant Chinese Secretary ; Mr. Hillier has gone to Chefoo, Mr. Watters to Swatow, and Mr. Frater has been appointed to Amoy. Mr. Baber, who has arrived out, having, we are glad to learn, greatly benefited by the visit home, has not yet been notified of his future post.

In reference to the report we recently mentioned that the Chinese Government intends to send some boys to England to learn the science of navigation, we now learn that it was not quite correct in detail. They are not to be sent there to go through a course of study in a naval school, but they are to be taken round the world in one of the Chinese men-of-war in order to learn practical navigation under the instruction of Capt. Tracey, R. N. The ship selected for the purpose is the *Yang Woo*, and she is now fitting up for the purpose, but she will not be able to start till the middle of autumn. She will first visit Japan.

The *Chinese Mail* publishes a proclamation under the authority of the acting Viceroy of Canton, enacting that all expectant Mandarins shall submit to a literary examination. Those only who shall have proved themselves proficient will be retained for active service ; the rest are sent for a probationary period to learn. It protests against the recent Imperial recognition of a young woman cutting her own flesh in order to mix it with the medicine administered to a sick parent, as an act of filial duty. It also says that the Chinese colonists at Macao are following the example of the philanthropic Committee of the Chinese Hospital here in the formation of an association for preaching the Sacred Edicts. Among other donors the monopolist of gambling there subscribed $200.

The one hundred days' mourning for the late Emperor of China will expire in a week's time, and barbers and actors will no doubt be glad of its termination. The actors who disbanded themselves when the mourning was enforced will shortly form themselves again into companies.

The only case of note before the Magistrates has been one against a Chinaman for breaches of the Explosive Substances Ordinance. It appeared that there has been no publication of the Chinese version of the Ordinance in the *Government Gazette*, and Mr. Russell, taking all the circumstances into consideration, fined the defendant only $10.

Mr. J. P. MacEwen, late of Singapore, has been appointed Assistant Harbour Master, and Mr. A. K. Travers third clerk in the Colonial Secretary's Office.

Vice-Admiral Ryder left this port in the *Vigilant* on the 4th April for the North, to aid Mr. Wade in exacting satisfaction from the Chinese Government for the murder of Mr. Margary. The *Vigilant* encountered rough weather on her passage North, and was compelled to put in at Amoy in consequence of having exhausted her coals. She left Amoy on the 9th April.

We take the following items of intelligence from the *Overland Trade Report* :—

The past fortnight has not been fruitful of events here. There is, consequently, little news to record.

The shareholders of the China and Japan Marine Insurance Company held their ordinary half-yearly meeting on the 5th of April, when the report and accounts were passed *nem. dis.* The Chairman, in his speech, drew attention to the fact that, although the past season had been a disastrous one to underwriters, yet their business had increased, and that they had to congratulate themselves on possessing a balance, though small, to the good. It was hoped that next term a dividend would be payable. The losses, by the report, were put down at 4,000 taels, but since it was printed that sum had been augmented, by the loss of the *Yun-tze Fee*, by some 7,000 taels. It was decided to open a branch in London, of which Mr. Schmidt would take charge, with a committee to assist him. The election of Mr. A. J. Little as a director was confirmed ; Messrs. Drysdale and Bade were re-elected directors, and the auditors were re-appointed.

We note the departure by this mail of another of the old residents in China. Mr. Thomas Pyke, of the firm of Messrs. Birley and Co., has been a prominent member of the community and has enjoyed the reputation of being a thorough business man. He has acted as a director of several public companies, and as a member of the Chamber of Commerce, in whose deliberations he generally took an active part. Mr. Pyke has resided in different parts of China for about thirty years, has been well known and much respected, and will be missed by a large circle of friends.

The annual meeting of Land Renters at Kiu-kiang was held on the 2nd April. The accounts showed an income of Tls. 1,252.19 and an expenditure of Tls. 1,080.42, leaving a balance in hand of Tls. 171.77. Messrs. Anderson, Kopsch, and Shaw were re-elected as Municipal Councillors for the current year. It was resolved to lower the rate of land-tax to Tls. 15 per lot. A proposal to lower the rental of bund frontage was negatived.

A meeting of the Legislative Council was held on the 8th April, when the new Marriage Ordinance was, after some few alterations in the minor details, passed. The object of the Bill is to secure a more accurate registration and to give equality in privilege to the various religious denominations.

On the 5th April the members of the Amateur Dramatic Club performed Mr. Tom Taylor's popular drama, "The Ticket-of-Leave Man," at the Theatre Royal, City Hall. The performance was well attended, and the play was admirably rendered. It was repeated on the 10th.

The Garrison Sports, which had been postponed on account of the unfavourable state of the weather, were concluded on the 1st April, on which day, as it was very fine, there was a large attendance and excellent sport.

Owing to the non-arrival of the steamer from Amoy, our advices are not to hand, and we are consequently unable to give the usual Foochow, Amoy, and Formosa reports.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 22nd April. The French mail from London 12th March was received on the 13th April, and the following P. and O. mail of March 19 arrived out on the 19th April. The following summary of the news is from the *Straits Times* :—

Sir Andrew Clarke is paying Gubernatorial visits to the other Settlements. In consequence of their approaching departure for India, it was resolved at a meeting of the Exchange to give a public ball and supper to Sir Andrew and Lady Clarke, as an expression of the esteem in which they are held by the entire community, and also to present his Excellency with a service of plate, as a testimonial of the public appreciation of his services to the colony during his short tenure of office, in the pacification of the

Digitized by Google

native States, and the introduction of his policy of active assistance in their Government. The ball and supper will be given on the 5th May, and active preparations are now in progress.

The reports of the British officers on the condition of the Native States continue to come in. We have a short but interesting report of Mr. J. G. Davidson, Resident of Salangore, who, though that country has by no means recovered from the disastrous effects of the anarchy that had driven away its population, is able to report a growing confidence on the part of the people, and is hopeful of inducing the return of the refugees who fled from the country on account of the late troubles, it being evident that it only requires the continuance of peace and order to ensure a steady increase of population, and the consequent development of the rich resources of the territory. We have also received a lengthy report from Mr. A. M. Skinner of a recent visit, in company with Captain Sir W. Wiseman, of H.M.'s *Lapwing*, to the various Native States.

In accordance with the request of the Governor, the Municipal Commissioners have made a report upon urgent needs and requirements to ensure the better working of the Municipality, in which they contemplate incurring an additional City debt of half-a-million dollars, on condition that the Government increase the Municipal revenue by giving them the rent of the markets and beaches, which now go to swell the Colonial exchequer. The principal item in the proposed works is the drainage of the town, and though this is a very necessary work, the expediency of incurring so heavy a liability with so small a Municipal Revenue, with heavy debts falling due shortly, is open to question.

The Criminal Assizes opened on the 12th April, before the Chief Justice, and most of the cases have been disposed of. The most important, however, are the trials of the prisoners concerned in the late gaol outbreak, of whom there are some forty-three in all, sent up under two separate indictments for murder. These cases will come on next week, till when the Court has been adjourned. The five survivors of the British ship *Euxine*, who were committed for trial by the police magistrate on a charge of murder in having sacrificed one of their shipmates, will not be tried in the Colony after all, it having been decided that our Court has no jurisdiction in the matter. They will, therefore, be sent home to England, where the question as to whether they are amenable to trial will have to be decided.

A large number of residents are taking their departure from the colony this spring. In addition to the batch who proceeded by the last mail steamer, a second large instalment left by the French mail last week, notable among whom were the Hon. H. W. Wood, M.L.C., and family, and the Hon. T. Braddell, Colonial Secretary, who goes home on leave of absence. The *Patroclus* took from us also the Rev. W. Dale and family. Mr. Dale was the pastor of the Presbyterian Church, and his departure is viewed with sincere regret by the community. Mr. Braddell's duties as Colonial Secretary will be performed during his absence by Mr. C. J. Irving, Auditor General, expected shortly from Europe, and until Mr. Irving's arrival the Hon. W. W. Willans, the treasurer, will act for him.

As the native pilot was just leaving the British barque *Amity*, which vessel cleared on the 16th April for Ilo Ilo, two stowaways emerged from their hiding place, and were discovered by the officers and crew. They proved to be two deserters from the 10th Regiment, named Stevensen and Cunningham, who had been reported to the police as missing. They were sent ashore in the pilot's boat, and taken in charge by the police immediately on landing.

The police have made a descent upon a horde of gamblers who had spread their mats and were busy gambling in the open air at the foot of Fort Canning Hill, and succeeded in arresting fifty-two of them. A raid has also been made upon a nest of gamblers in the Teluk Ayer district, when we hear that Inspector Kraal, hastily pursuing some of the fleeing Chinamen, rushed into an attap enclosure, and suddenly found himself at the bottom of a deep well, whence he was fished out by the police peons. Fortunately there was but little water in the well, and the Inspector sustained no injury.

At a meeting of the Sarawak Committee of Administration, held at Kuching, the President informed the meeting that the question of the formation of a steam navigation company in Kuching might be considered settled, all the shares having been taken up, and that upon receipt of a telegram from his Highness the Rajah confirming the conditions on which the company is formed, the transfer of the *Royalist* would be at once carried out.

Professor Vanek, the wizard, has returned from Bangkok, where he performed before the King, who was so highly pleased with the Professor's feats that he conferred upon him a gold medal, of the order of Phra Pan Klow. Professor Vanek has returned in ill health, having contracted a fever in Bangkok, which will necessitate his remaining here some time.

The *Gazette* notifies that Lieutenant M. C. Brackenbury, R.E., is appointed Private Secretary to the Governor, *v.* Mr. Mills resigned—to date from 18th February; and will temporarily perform the duties of Aide-de-Camp.

PENANG.

Our advices extend to the 24th April; the P. and O. mail from London March 19 arrived out on the 17th April. The *Penang Gazette* contains the following items of news:—

His Excellency the Governor, attended by his Private Secretary, the Hon. Major McNair, Captain Dunlop, and Messrs. Pickering and Swettenham, arrived in the colonial steamer *Pluto* on the 16th April from Singapore, *via* Malacca and Klang. On the 17th he landed unofficially and proceeded to the Government office, when he had interviews with several of the inhabitants. In the evening he went up the Hill as the guest of the Lieutenant-Governor and Mrs. Anson, returning to the *Pluto* on the 18th. The Governor subsequently attended two meetings of the Executive Council, and according to appointment a deputation from the Chamber of Commerce and other residents in Penang waited on him with an address, to which his Excellency replied briefly, apologising for not being prepared with his reply, and promising to send a more full one on his return to Singapore. On the 20th his Excellency left the jetty under a salute from the Fort, a guard of honour supplied by the 10th Regiment being in attendance. A number of officials and a few of the Native and European members of the community were present to bid Sir Andrew Clarke farewell, and as the steamer got under way gave him three hearty cheers, which his Excellency duly acknowledged from the bridge of the vessel. It caused no small amount of surprise and dissatisfaction to the non-official community that no notice was ever sent to it regarding the official nature of the Governor's departure, as it was the earnest desire of the public to pay all possible respect to him on the occasion, and the residents would have turned out *en masse* had they been aware that he would leave Penang otherwise than in the private manner in which he entered it.

On the 15th April a squall of unusual violence swept over Penang, doing considerable damage to the smaller craft in the harbour and more or less to the houses and trees in the Island and Province Wellesley. About twenty junks and schooners have been sunk through collisions, or capsized by the force of the wind; and the foreshore from the Jetty to Julutong is covered with wreckage. The losses sustained by Chinese and native merchants, both from damages done to their vessels as well as to the cargo contained in them, must be pretty considerable. The only injury sustained by European vessels was suffered by the s.s. *Lankat*, which vessel had her quarter and life boats, as well her gangway ladder and a good number of stancheons, carried away by a junk which drove on to her and carried away everything she came in contact with, as well as managing to crunch up her own deck-house.

The Assistant Resident, Captain Speedy, left for Laroot on the 20th April in H.M.S. *Thistle*, to collect the chiefs of that district and proceed with them to Pancore, where the Governor purposes having, if possible, a final conference with the Chiefs of Perak. Captain Speedy, we are informed, has applied for, and is likely to proceed home, on three months' leave on "urgent private affairs." Captain Hatchell is a candidate for the acting appointment, and is spoken of as likely to be posted to it. We are glad to hear that Captain Hatchell's long and faithful services are likely to be recognised to some extent at last. The treatment he was the recipient of at the hands of the former Governor was highly unjust, and the wonder is that he did not throw up service under a Government which had proved itself so faithless to one of its most conscientious and hard working officers.

It has been determined to establish a Masonic lodge in Penang, the necessary funds having been subscribed by the resident brethren. Steps have been taken to proceed at once with all requisite arrangements, and we sincerely trust that this institution, so much wanted in Penang, will flourish. The following principal officers have been nominated:—Brother R. C. Woods, W. M.; Brother A. Ainslie, S. W.; Brother T. A. Fox, J. W.

There has been an outbreak of cholera in Deli. The first and only victim to it was Mr. Feilberg. Others had been attacked, but were doing well when the last steamer left.

A match at bowls has been played at the Club, "Married v. Single," which was won by the bachelors by sixty pins.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—The import market was without change. The demand for nearly all staple goods was weak, and prices unremunerative. Grey Shirtings had been very dull, at about last quotations. Velvets were still very quiet. Cotton Yarns, except for best spinnings of 16/24, which had been dealt in, were weaker, and not in request. In Woollens and Woollen Mixtures, few transactions were reported, except in Mousselines, which maintained their value. Cloth and Blankets were in no request. The Metal market exhibited no improvement. Stocks continue to get heavier, whilst the demand does not increase. Nail-rod Iron, assorted, is slightly lower.

NEWCHWANG.—Messrs. Bush Bros.' Circular says:—Manufactures have

Digitized by Google

arrived in considerable lots, and the natives are not very anxious to come forward with offers, for fear that further supplies may overstock the market.

CHEFOO.—Messrs. Wilson, Cornabé and Co.'s Report says :—Business generally has been fairly active. Cotton Goods : 8¼lb. Grey Shirtings have not been in much inquiry, but we have had a good demand for 7lb. Grey Shirtings and 7lb. Mexican T-Cloths. Drills have not been asked for, while White Shirtings and other Fancy goods have been saleable at our quotations. Woollen Goods have been neglected. Metals : Lead has been in fair inquiry at from Tls. 5.90 to Tls. 6 per picul, but wants now seem to be filled. Nail Rod and Bar Iron has been dull of sale, and prices have, if anything, a downward tendency.

HANKOW.—Grey Cottons were in good demand, and prices were firm. Sales of 37,000 pieces Grey Shirtings, 10,700 pieces T-Cloths, and 3,700 pieces Drills reported during the fortnight.

CHINKIANG.—Messrs. Spencer and Wolff write on the 5th April :—Extensive sales of Piece goods have been made during the week at advancing rates, but advices received from Shanghai have tended to check any further rise ; the market, however, closes steady.

SHANGHAI.—The Chamber of Commerce Report says :—Cottons : During the first week of the fortnight the market for Plain Cottons was very strong with an active demand, and daily advancing prices, but the last week shows evidence of the wants of dealers being supplied, and they have been engaged in taking delivery of their purchases. Rates are below the highest quotations reached in the early part of the fortnight, but still in advance of those last given in most cases, but with a quiet market. Grey Shirtings, 7 and 8¼ lbs., are 4 to 5 cands. higher, with an active business for a few days, as above noticed, the market closing quiet. Heavy goods are in small stock and firm at the prices given. T-Cloths, common makes are wanted, but good Mexicans are in limited request at the close ; stocks are diminished. White Shirtings have been in better request, the lower counts are steady at quotations, but 72 reeds and upwards being scarce have commanded an advance of 4 to 5 cands. Drills : An extensive business has been done, but the demand has been freely met by holders, and prices show an improvement of only 2 to 3 cands. per piece. Woollens : Small business at rather easier rates ; of the sales reported 2,000 pieces Camlets, and about 700 pieces Spanish Stripes, were sold by auction. Long Ells have declined 1 mace per piece.

HONG KONG.—The arrivals during the interval, besides the mail steamer, had been the s.s. Gordon Castle, Venice, Fyen (Danish), and Glenfalloch bringing full supplies of manufactured goods for this market and the North. In the early part of the fortnight a fair amount of business was transacted at prices which showed an improving tendency, but the last week had been an exceedingly dull one, partly caused by increased firmness on the part of importers consequent upon improved advices from home, and partly by an unwillingness on the part of the dealers to go further into stock. The arrivals had been abundant, and there were full supplies coming forward by steamers close at hand, but as the export from England was moderate and likely to continue so for the present, there was every reason to expect that stocks would be kept within moderate compass.

CANTON.—Lead : Sales of mixed brands had been effected at $8.40 to $8.45, and WB was worth $8.45 to $8.50 per picul. Quicksilver was quoted $150 per picul.

SINGAPORE.—Messrs. Bousteads' circular says :—A moderate business has been done in Piece Goods. Prices generally have ruled steady, and in some cases a slight advance has been obtained. There has been rather less inquiry for 8¼ lbs. Grey Shirtings. 6 lbs. T-Cloths have continued in good demand, and with a light stock price has advanced to $1.47½. Grey Madapollams also show a slight advance, but demand has been limited. 36-inch White Shirtings of fine qualities are firmer, but transactions have been moderate. Grey Yarn 40's weaker and demand limited, small sales at $113 to 112½. Rather more business has been done in Iron at declining rates ; stocks are now somewhat reduced, but still ample for the very limited demand that now is. Copper Sheathing is dull, and prices are barely maintained. Yellow Metal meets with a very limited inquiry at former prices. Zinc Sheathing continues saleable at last rates ; stocks are cleared. Roll Zinc is in no demand. Brass Wire at the close is quiet, and prices weak. Pig Lead keeps moving in retail quantities at former prices.

PENANG.—The demand generally had been quiet. Business had been small at about former prices, but some holders were now asking an advance. The quarterly return of stocks showed that of some staples there were large supplies on hand.

EXPORTS.

TEA

YOKOHAMA.—With continued depressing advices from New York, the market relapsed into extreme quietness, and the few settlements reported although irregular and depending a good deal on the anxiety, or otherwise, of the owners to realise, showed a decidedly easier feeling. First musters of new crop garden Teas were promised about the 20th April.

HANKOW, KIUKIANG, SHANGHAI, AMOY, AND TAMSUI.—There had been no business done in Tea at these Ports during the interval.

CANTON.—Messrs Deacon and Co.'s repsrt says :—we have now to advise the despatch of the early shipments of New Seasons Congous memo. of which we subjoin. The settlements on this market may be estimated at about 4,000 boxes at prices ranging from Tls. 22 to 27 per picul. In Macao, in addition to the usual contract Teas, a large business has been transacted, and their prices are said to be about Tls. 19 ior for rather common mixed with old crop leaf up to Tls. 28 for finest. On comparing this season's yield with former years', we consider it a fair average, preferable in the cup to the last, but inferior as regaads appearance, and it is worthy of notice that there has been an unusally small quantity of fine to finest firades shipped, the bulk of the supply being fair to medium. There is some quantity of new season's Caper leaf on offer, but Teamen are afrid to invest at prices now asked, which though showing a reduction on last year's extravagant rates, are far above what would likely be realised here this season, in view of the basis now current in London. Small quantaties of leaf for Orange Pekoe are reported as being purchased at high figures. Scented flower will not be available in any quantity for about three weeks. The shipments of New Season's Congou to date are :—11th March, s.s. Ava, 5,060 lbs. ; 18th, s.s. Sunda, 23,676 lbs.; 22nd, s.s. Diomed, about 20,000 lbs.; 25th, s.s. Hoogly, 44,520 lbs.; 1st April, s.s. Avoca, 78,160 lbs.; 8th, s.s. Irawaddy, 255,780 lbs.; total, 427,196 lbs.

SILK.

YOKOHAMA.—There had been a fairly active market for all classes of Silk. Hank sorts in general had been much pressed for sale, which had induced business, chiefly in Medium and Common qualities, at prices showing a decline of about $20 per picul. Oshius continued in good demand, and fresh supplies had found ready buyers at the advance previous obtained. Settlements, from 1st July to date, 9,950 bales.

SHANGHAI.—During the fortnight, holders had shown some anxiety to clear out their stocks at a slight reduction on previous rates, and a fair business had resulted, mostly in No. 5, and common Tsatlees. There being little demand for classical chops, the few parcels going forward were mostly on native account. For this mail, the purchases included no well-known chops. Reaeels continued to accumnlate, and formed more than half the unsold stock. Settlements for the past fortnight, Chinas, 1,200 bales. Total settiements since 1tt June, 1874, 70,000 bales ; against 1873-74, 55,400 bales ; 1872-73, 55,500 bales. Comparative unsold stock on this market, on the 7th April, 1875, 800 bales ; 1874, 1,200 bales ; 1873, 400 bales.

CANTON.—Messrs. Olyphant and Co.'s circular says :—The inquiry for the European market has continued on about the sams ecale as before reported and settlements for the fortnight amount to 250 bales at about former prices. In some instances rather lower figures have been accepted, while in others holders demanded full values. The stock in the city is very small and consists chiefly of parcels unfit for Export. In the country, dealers are said to have moderate supplies which will probably be brought forward before the arrival of the new Silk. There has been a little enquiry for Rereels from one buyer and some small settlements are reported without particulars. It is impossible to purchase desirable parcels, as supplies are quite exhausted and a few boxes here and there are all that can be obtained. Thus far prospects for the new crop have been favouraele ; there is an abundant supply of leaves and the worms are progressing satisfactorily.

TELEGRAMS FROM THE FAR EAST.

DEATH OF THE VICEROY OF FOKIEN.

SHANGHAI, MAY 17.—The former Viceroy of Fokien is dead. The deceased was during his official career connected with the Foochow Arsenal, and commanded the Chinese force which subdued the Mohammedan rebels.

SIR DOUGLAS FORSYTH'S MISSION.

CALCUTTA, MAY 17.—Sir D. Forsyth's Embassy to Burmah sailed for Rangoon this morning. Colonel Brown proceeds to Shanghai tomorrow.

ROME, MAY 23.—The *Giornale delle Colonie* publishes a telegram from Colonel Wyndam, stating that Sir Douglas Forsyth had a long interview with the King of Burmah. The King said he warmly desired to come to an amicable settlement of the dispute with England. The Chinese general, who was suspected of having incited the natives to attack the expedition of Colonel Brown, had arrived there three days previously with despatches from Peking. The King denied all complicity in the disaster of the Brown expedition, and this fact had been confirmed by a private investigation. No serious difficulty was anticipated with regard to the Karem question. The rumours of foreigners having been badly treated by the King were denied, as was also the report of a concentration of troops in the direction of the frontier. Trade was inactive.

(FROM THE CORRESPONDENT OF THE INDIAN DAILYNEWS.)

MANDALAY, MAY 21.—Yesterday I had a long interview with the King. His Majesty is most anxious to settle matters amicably. Lee Tsee Tie, the Chinese General who it is supposed awaited Browne's advance, arrived here three days ago, the bearer of despatches from Peking. The King denies all complicity in the failure of Colonel Browne's expedition. No serious difficulty is anticipated regarding the Karennee question. The public opinion about the King's ill-treatment of foreigners is quite unfounded. The rumours of a concentration of troops towards the frontier are incorrect. Trade is depressed, and almost at a standstill pending the settlement of the question in dispute.

THE ATCHIN WAR.

THE HAGUE, MAY 20.—The Government has received a despatch from Atchin, dated 15th inst., announcing that Loekoe Daood has been appointed Sultan by the chiefs of the three Sagis.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—May 19, at Liverpool, from Batavia, Solway Queen; 21, at Amsterdam, from Java, Voorlichter; 19, at Greenock, from Rangoon, Mandalay (str.); 19, at Havre, from Sourabaya, Oriana; 20, at New York, from Batavia, Atalanta; from Shanghai, Inverness, Sooloo; 20, at Liverpool, from Singapore, Lochleven Castle; 21, at San Francisco, from Hong Kong, William Phillips; 20, off Dungeness, from Java, Wilhelmina and Clara; 21, at Greenock, from Java, Sliedrecht; 22, at New York, from Hong Kong, Commissary; at Boston, from Singapore, Olive; 23, off the Lizard, from Manila, Windhover; 24, at London, from Singapore, Guiseppina.

DEPARTURES.—May 18, from Cuxhaven, for Hong Kong, Excelsior; 20, from London, for Singapore, Excelsior; 20, from Rotterdam, for Java, Ada; 16, from Hamburg, for Hong Kong, Irene; 18, for Singapore, Adler; 21, from London, for Hong Kong, Solent; 20, from Sunderland, for Angier, Kenilworth.

LAID ON.—At Sunderland, for Singapore, Luzon; at Cardiff, for Hong Kong, Ringdove (str.).

SPOKEN.—Eliza, from Portsmouth to Sourabaya, March 23, 21.47 S., 29.51 W.; Tynedale, from Newcastle to Singapore, April 8, 2.50 S., 25.46 W.; Kashgar, from London to Hiogo, April 13, 0.30 S., 26.45 W.; Countess of Minto, from Colombo to London, April 21, 29 S., 10 E.

CASUALTIES.—The Lettie, at San Francisco April 29th, from Hong Kong reports:—On the 15th, had strong gales from N.E. to N.W. lasting 48 hours; lost sails, stove bulwarks, &c.—Ferdinand Brumm, from Hong Kong, at San Francisco 30th April, reports that on the 17th shifted cargo and sprung a leak, making 12 inches water per hour; pumps constantly working until arrival.

MISCELLANEOUS.—The German screw gun-vessel Cyclops, from Kiel, en route for the East Indies, China, and Japan, put into Plymouth on the 19th inst. to coal, and was expected to proceed on the following day. Arrived at Galle: May 13, Madura (str.), from Batavia, and left for Nieuwe Diep; 15, Oceanic (str.), from Liverpool, for Hong Kong and Yokohama; 18, Hampton (str.), from Southampton, for Batavia. At Suez: May 18, Prinses Amalia, from Nieuwe Diep, for Batavia, and proceeded the following day; Patroclus, from Shanghai, for London. At Port Said: May 21, Benledi, from Manila, for London; 22, Galley of Lorne, from London, for China. At Malta: The Peshawar (str.), arrived May 21, reports having passed on the previous day at 7 A.M. about 350 miles from Malta the Sirius (str.), under sail, with engines broken down; no assistance wanted; fair wind for Malta at the time. The Harrington (str.), from Batavia, for Rotterdam, arrived at Weymouth on the 21st inst., short of coal, after being supplied proceeded for her destination. At Suez, 23, from Liverpool, for China and Japan, Belgic; from London, from Shanghai, Glengyle.

NEW SEASON'S TEAS.

The latest telegrams report that the Hankow Tea Market has been opened at prices about on a par with those current at the commencement of last season. The quality of the teas is said to show an improvement upon last season. A large business has been done, and the steamers *Glenartney* and *Bengal* have been despatched, the first-named vessel having left Woosung on the 21st inst. The Foochow market is not yet opened.

The *Brisbane Courier* of the 27th March contains the following notice of the Torres Straits Mail Service:—The E. and A. Co.'s R.M.S. *Singapore*, now on her maiden voyage, arrived off Cape Moreton last evening, and had it not been for her passage from Keppel Bay being protracted by the heavy south-easterly gale fully twenty-four hours, the mails from London *vid* Brindisi, to the date of February 5th, would have been delivered on the forty-eighth day, being the quickest transit yet accomplished since the inauguration of the service, which is one that is daily growing more in favour with the mercantile community and public generally of this colony. Reliable data, carefully compiled, show that by means of the present mail service, *vid* Torres Straits, subsidised by Queensland alone, English mails during the past twelve monchs have, been delivered at Brisbane in less time, in some instances by many days than by the service *vid* Melbourne and Point de Galle, and *vid* Sydney and San Francisco, which are heavily subsidised by the colonies of Victoria and New South Wales.

PROFESSOR DOUGLAS will give a course of lectures on "The Chinese Language and Literature" at the Royal Institution, Albemarle-street, commencing on the 29th, at three P.M.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

AYRES—On the 4th May, at Dickoya, Ceylon, the wife of Charles Ayres, of a son, who survived his birth only four days.

BAYLEY—On the 31st March, at Nagasaki, Mrs. Bayley, of a daughter.

BRAGA—On the 7th April, at Yokohama, the wife of J. Braga, of twin daughters.

BYRNE—On the 4th April, at Shanghai, the wife of Mr. E. Byrne, of a son.

CAW—On the 18th May, at 17, Tredegar-place, London, the wife of Thomas Caw, of a daughter.

KAYE—On the 19th May, at Belmont-hill, Lee, the wife of William Kaye, of a son.

LARKIN—On the 31st March, at Hiogo, the wife of T. J. Larkin, Imperial Telegraph Department, of a son.

RENNIE—On the 3rd April, at Kiangnan Arsenal, Shanghai, Mrs. John Rennie, of a son.

RICKETT—On the 3rd April, at Yokohama, the wife of John Rickett, of a daughter.

SIKEMEIER-VERBEEK—On the 24th March, at Osaka, Mrs. Sikemeier-Verbeek, of a son.

MARRIAGES.

BARRIE—FORDER.—On the 8th April, at the British Legation, Yedo, by the Rev. J. Piper, in the presence of Sir Harry Parkes, K.C.B., William Barrie, engineer, to Ellen Sophia, daughter of William Forder, Wolverton, Bucks.

BERNIERES—HOVELT.—On the — May, A. Mouillesaux de Bernières, of the Imperial Maritime Customs of China, to Marie, youngest daughter of P. J. Hovelt.

BOGGS—EATON.—On the 9th March, at Bangkok, Siam, the Rev. W. B. Boggs, A.M. to Flora J. Eaton, both of Nova Scotia.

BOVET—ALLEN.—At the Church of the Holy Trinity, Shanghai, by the Rev. Canon Butcher, Alphonse Bovet, to Cornelia, daughter of General R. Allen, U. S. Army.

DARKE—HYDE.—On the 13th May, at St. Peter's, Kensington-park-road, by the Rev. C. F. Hyde, vicar of Dilton, Wiltshire, uncle of the bride, assisted by the Rev. John Robbins, D.D., vicar of the parish, and the Rev. Thomas Evans Fitz Roy, Philip Darke, of Salisbury, son of the late Lieut. Darke, of H.M. 4th Regiment of Foot, to Catherine Elizabeth, elder daughter of George Hyde, Commander, R. and O. Service and Royal Naval Reserve, of Holland-park-terrace, W.

DRISCOLL—CULLIFORD.—On the 8th April, at the British Legation, Yedo, by the Rev. J. Piper, in the presence of Sir Harry Parkes, K.C.B., William F. Driscoll to Jane, daughter of R. Culliford, of Langport, Somersetshire.

GRAY—KÖHLER.—On the 8th April, at St. Andrew's Cathedral, Singapore, Alex. Gray, Manager Chartered Bank of India Australia, and China, Penang, son of the late J. B. Gray, Batavia, to Catherina Maria, eldest daughter of the late J. M. Köhler, Assistant Resident of Probolingo, Java. No cards.

HUMPHREYS—DOWNEY.—On the 10th April, at St. John's Cathedral, Hong Kong, by the Rev. R. H. Kidd, Colonial Chaplain, assisted by the Rev. J. H. Baynes, William Griffiths Humphreys, of Gloster, to Mary Ann Downey.

JONES—FIGG.—On the 19th May, at Colombo, Charles Powell Jones, elder son of Capt. C. P. Jones, to Deborah S. (Cissy), eldest daughter of W. R. Figg, of De Crespigny-park, Camberwell. No cards.

POLITE—NEUGASSE.—On the 5th April, at Shanghai, at H. I. G. M.'s Consulate, George Polite, to Anna Neugasse.

DEATHS.

HEWETT—On the 17th April, at Bukit Tunga, Province Wellesley, Thomas Douglas Hewett, late Indian Navy, aged 45 years.

KILLEEN—On the 24th March, on board U.S.S. *Ashuelot*, at Nagasaki, John Killeen, of Galway, Ireland, aged 31 years.

THOMPSON—On the 4th April, at Yokohama, William H. Thompson, aged 31.

Naval and Military.

The late Commander-in-Chief on the China station (Sir Charles Shadwell, K.C.B.), has, on hauling down his flag, received from the Admiralty a letter of approval. Should Sir A. C. Key leave the Naval College for active employment, Sir Charles Shadwell is likely to succeed him.

Lieutenant R. A. G. Harrison has been posted to No. 6 battery of the 2nd brigade of Royal Artillery, serving in Ceylon. Captain C. Picot, of the 57th Regiment, will rejoin head quarters in Ceylon next winter from depôt duty.

The first battalion of the 10th regiment, now serving at Singapore, will, it is expected, be relieved early next year.

A sad accident occurred at Singapore on the 10th of April, caused by what appears to be a constant source of danger—the slippery condition of the landing steps. On the evening of the day named, Mr. Frederick Collings Rogers, first assistant-engineer of the Fly, was about to leave Dalhousie Pier to go on board his ship; but when going down the steps his foot slipped, and he fell directly across a sampan, which tilted, precipitating both him and the boatman into the water. The chief engineer, who was with him, in a moment pulled both Mr. Rogers and the boatman into the boat, after which they went off to the vessel, but Mr. Rogers survived only until getting alongside the ship. It is supposed that he severely injured himself by falling on the boat, and that this caused the shock to the nervous system by immersion in the water to prove fatal. The deceased, who was twenty-six years of age, leaves a wife and one child.

The Iron Duke, late flag-ship of Rear-Admiral Shadwell, on the China station, was paid off at Devonport on the 18th inst., in the presence of Captain Heneage, of the Royal Adelaide, flag-ship, Devonport. The crew remained on the jetty until they were all paid off, and then marched out of the dockyard, a body of seamen leading and marines following.

The Charybdis, 17, screw corvette, Captain T. E. Smith, has been ordered to Hong Kong, to make good the damage done by her second grounding in the Straits of Malacca, after which she will proceed to the Japan Division of the China Station.

The German gun-boat Cyclop, Captain von Riche, arrived in Plymouth Sound on the 19th inst. from Keil, *en route* for the East Indies, China, and Japan. She put in to coal, and is expected to proceed on her voyage to-day.

Surgeon John Wood (1872), late of the Crocodile troopship, Lieut. Ernest Kinder (1873), and Lieut. H. B. Lang (1866), have been appointed to the China Station.

H.M.S. Elk, from Hong Kong, left Malta on the 14th for Portsmouth.

Miscellaneous.

MAJOR SLADEN'S EXPEDITION.

Major-General Sladen writes to *The Times* as follows:—My attention has been called to an article in *The Times* of the 5th of March, which would seem to give a false impression of the expedition led by my brother, Major Sladen, towards the Chinese frontier. It is stated in the article referred to "that Mr. Margary had been killed, your correspondent believed, near the spot at which Major Sladen found obstacles too strong for him, and was forced to retreat." It is true that he found obstacles, but he was not forced to retreat. On the contrary, he completely overcame these obstacles and brought his expedition to a successful termination by his great "energy, and tact, and judgment." *Vide* Official Report, page 68, paragraph 6. The Governor-General in Council thus acknowledges his services:—"The information received proves the energy and tact with which Captain Sladen, in spite of many obstacles, has carried out the work assigned to him." This was to advance beyond Bhamo as far as he deemed it desirable up to the Chinese frontier, but no further. The Chinese frontier was reached at Manwyne, where poor Margary was murdered; but my brother went several marches beyond to the walled city of Momien, and remained there six weeks, returning by another route to Bhamo, surveying each of the passes across the Kachyen Hills. Considering that the Government was so satisfied, as evidenced by the great credit awarded him for his tact, judgment, and energy in carrying the expedition to a successful termination, the wonder is that he should have been overlooked in the organising of this second expedition, which, judging by results, seems to have met with some obstacles certainly which forced it to retreat even before reaching Manwyne. The only casualties of a whole day's fighting against 800 Chinese appear to have been a slight flesh wound and a graze from a slug. The battle, if such it may be called, was fought several miles from Manwyne in the Kachyen Hills. Poor Margary went into Manwyne and was murdered there. The King of Burmah, I have no doubt, caused the obstacles for both the expeditions. He was outwitted as regards the first and has gained thus far his end as regards the second.

AMONG the pictures at this year's exhibition of the Royal Academy is one of the "Marriage of the Duke and Duchess of Edinburgh," by M. Nicholas Chevalier. The interior of the Winter Palace is revealed under conditions of light and shade the most favourable for the picturesque display of its architectual proportions and elaborate ornamentation. The numerous figures—all faithful portraits—are admirably massed, and nothing is wanting that rich costumes and sumptuous accessories can bestow to give splendour and variety to the scene. Our readers will remember that M. Chevalier accompanied the Duke of Edinburgh as special artist during his tour in the Far East. He is now engaged on the "Opening of the Vienna Exhibition," which he attended at the desire of the Prince of Wales.

WE regret to announce the death of Mr. Dudley Baxter, a member of the well known firm of Baxter, Rose and Norton, solicitors, at the age of forty-eight. Mr. Baxter has for the last ten years occupied a prominent place in politics and statistics. In 1868 he wrote a work on the National Income and on Taxation; in 1870 a History of English Parties; in 1871 a work on the National Debts of the States of the World; in 1874 the Progress of National Debts and its Taxation. He was at all times an enthusiastic and useful member of the Conservative party. He leaves a widow and two sons, and was brother to Miss Baxter, who died at Hong Kong, after several years' labour among the Chinese.

LAUNCH.—On the 21st inst. Messrs. Wm. Denny and Brothers launched from their yard at Dumbarton an iron screw-steamship for the China Merchant Steam Shipping Company, Shanghai, of the following dimensions:—225′ × 34′ × 14 and 1,350 tons gross measurement. She will be fitted with compound direct acting inverted engines of 240 H. P. nominal, by Messrs. Denny and Co., engineers, Dumbarton. The vessel on leaving the ways was named the Pau-tah by Miss Maggie Robson.

THERE has been a series of *fêtes* upon the extensive estates of Mr. Matheson, M.P., in celebration of the majority of Mr. Matheson, junior, which were brought to a close by a public dinner given by the citizens of Inverness in honour of the member for Ross-shire. Mr. Matheson and his son accepted invitations. The dinner took place in the Caledonian Hotel, and was presided over by Provost Lyon Mackenzie. In honour of the event flags were flying all day from the principal buildings in Inverness.

THE Rev. A. H. Anderson, of Aldershot, has received an invitation from the English Presbyterian Congregation of Singapore. They offer him £600 per annum to begin with, a free house, and passage paid there for himself and family, and back again in three years. Mr. Anderson has replied, stating that duty calls upon him to continue in Aldershot.

A MAN named Thomas, with other aliases, is going the rounds, with the avowed object of raising funds to found a school in India for the benefit of Indian officers' children. There is no doubt but that he is an impostor, and was lately brought up before the Paddington magistrate. Our friends from the Far East are advised to be on their guard

THE Berlin correspondent of the *Daily Telegraph* announces that by the Treaty which Russia has concluded with Japan the latter country receives, in return for the cession of Saghalien, the whole of the Kurile Islands.

The London & China Telegraph.

LONDON: MONDAY, MAY 24, 1875.

TAXATION ON OPIUM IN THE FOREIGN SETTLEMENTS OF CHINA.

ACCORDING to a telegram which arrived a short time ago, the Chief Judge of the Supreme Court at Shanghai has decided that the Chinese authorities have not the right to impose local taxes upon opium in the foreign settlement. The details of the case have not been reported, but the nature of the point raised is no doubt in reference to the difficulty which has so often arisen with regard to the attempts made by the officials to impose upon opium a local duty in addition to that agreed to in the tariff, as the import duty. We shall look with interest for the details of the case, and may, if necessary, refer to it again. In the meantime we may observe that there is one very obvious ground against the imposition of local taxes upon opium in the foreign settlement, and that is that the amount which shall be collected at the port of import is expressly provided in the Treaty. The import duty upon opium is, according to the tariff, thirty taels per picul, and it is difficult to see how this can by any possibility be construed to mean that more than thirty taels per picul shall be raised upon it actually at the place of import. It is true that the trade rules appended to the Tientsin Treaty exempt opium from the action of the clauses with reference to transit dues, and leave the Chinese authorities at full liberty to impose whatever duties they may think fit upon it in the interior; but this cannot be construed into giving them a licence to collect an additional duty actually at the port of entry itself. The rule which affects this question is No. 5, "regarding certain commodities heretofore contraband." Section I. of that rule runs as follows:—

"Opium will henceforth pay thirty taels per picul import duty. The importer will sell it only at the port. It "will be carried into the interior by Chinese only, and "only as Chinese property; the foreign trader will not be "allowed to accompany it. The provisions of Art. IX. "of the Treaty of Tientsin, by which British subjects are "authorised to proceed into the interior with passports "to trade, will not extend to it, nor will those of "Art. XXVIII. of the same Treaty, by which the transit "dues are regulated; the transit dues on it will be ar"ranged as the Chinese Government sees fit; nor in "future revisions of the tariff is the same rule of revision "to be applied to opium as to other goods."

Upon this clause no doubt some arguments may be founded in favour of the course adopted by the Chinese, but taking a fair and impartial view of the subject, those arguments must be found to amount to very little. It might be urged that as upon the sale being effected the goods became Chinese property, the native authorities are justified in imposing local taxes in excess of the tariff duty at the port of import, and an attempt might be made to stretch its liability to transit dues into meaning a liability also to local dues. These are, in fact, the only two arguments we can conceive in favour of the Chinese view of the question; but it is obvious in respect to the first that the Chinese limit their abstract right to tax their own subjects by the treaty; while with regard to the second point it is specifically stated that "the transit dues" on opium will be arranged as the Chinese Government think fit, and "transit" dues cannot be construed to mean taxes raised at the same place where the import duties are paid. Similar arguments to the above have been urged upon frequent occasions when this question has arisen, and it is satisfactory that at last an authoritative opinion has been expressed upon the subject. It is to be hoped that this decision will have the effect of stopping the system of *espionage* which has caused so much annoyance in the Settlements, and tend to put down the "squeezing," of which so much complaint has been made. The exactions which are made by the Chinese outside the Settlement, not only upon opium, upon which they have a right to levy such transit dues as they like, but upon other imports which should be free from further taxation after the transit dues as provided by treaty have been paid upon them, are severe enough, without our being called upon to submit to any such impositions actually within the limit of the foreign Settlements.

MR. LAY AND THE CHINESE GOVERNMENT.

THE letter which we reproduced in our last number, written by Mr. H. N. LAY, C.B., to *The Times*, will recall to many of our readers in China a very interesting and critical period in the history of our relations with that country. The organisation of the LAY-OSBORN fleet, with a view of placing a suitable naval force at the disposal of the Chinese Government, and the subsequent refusal on the part of the Imperial authorities to carry out the engagements to which they had pledged themselves to Mr. LAY, were the subject of much comment at the time, but we believe that the merits of the case were not fully understood, and that sufficient importance was not attached to the position which Mr. LAY occupied with the Imperial Government when the arrangements for obtaining the flotilla were made at Peking. The point at which the scheme broke down was that the Imperial authorities desired to place the fleet under the command of the Provincial authorities, instead of its being directly under the Peking Government, and both Mr. LAY and the late Admiral, then Captain OSBORN, concurred in the conclusion that, if they accepted that position, they would be forced to be parties to any operation the Provincial authorities chose to dictate, and that they might be involved in some action, such as the treacherous murder of the Wangs at Soochow.

In a letter which he has written to *The Times*, Mr. LAY now points out that that journal was in error in saying that the Emperor of CHINA offered the command of the fleet through him to Capt. OSBORN, and that the whole affair was entrusted to Mr. LAY, who may thus claim credit for Capt. OSBORN'S appointment. This, there is no question, is strictly correct, and seeing that Mr. LAY has all along had the full force of such adverse comments as the failure of the scheme justified, and a great many which it certainly did not justify, it is only right that he should have the credit which is fairly due to him, of having taken pains to organise the flotilla upon a thorough basis, and of having selected an officer of the highest standing to take the post of commander. The real cause of the failure of the scheme was simply that it took too long to carry out, and that Lieut.-Colonel GORDON had, while Mr. LAY was engaged in organising the fleet, done much towards the suppression of the rebellion as commander—under the provincial authorities—of the "Ever Victorious Army," so that, on Mr. LAY'S return, the Chinese Government no longer felt a pressing necessity for the aid which they had eagerly sought when they despatched him to England to procure the vessels. As respects Colonel GORDON'S action, public opinion has fully exonerated him from any blame, as it was not to be expected that he would be aware of the treachery and duplicity of the Chinese officials; and so soon as he discovered them, after the taking of Soochow, when they executed the Taiping Wongs, notwithstanding that they had solemnly promised to spare them, GORDON at once threw up his command, as inconsistent with the honour of a British officer. This took place after Mr. LAY and Captain OSBORN had refused to place themselves in a similar position to that occupied by GORDON; and certainly Mr. LAY is justified in stating in the letter under notice

Digitized by Google

that the treacherous massacres at Soochow confirmed the accuracy of his and Captain OSBORN'S judgment. We heartily commend the few trenchant remarks which Mr. LAY makes in his letter to those who desire to form a true estimate of the merits of this question. He pertinently observes that the real facts of the case were at the time in a great measure smothered, and that when the true history of the fleet is written, the "vicious policy of suffering our "people to become the tools, instead of the guides, of the "Chinese Government will become manifest."

A RUSSIAN EXPLORER IN CHINA.

THE pretensions of the Russians to be regarded as the most favoured nation in their intercourse with China are, perhaps, sufficiently familiar to our readers to require much comment in an ordinary way, but an instance has just come under our notice which is remarkable for its utter disregard of well-known facts. It will be remembered that some time back we recorded in these columns the arrival in Shanghai of a Russian scientific expedition, consisting of Staff-Captain SOSNOFSKY and a small staff of interpreters, Kossacks, &c., whose object was to explore Mongolia and Siberia from the side of China. In due course the expedition arrived at Hankow, and Captain SOSNOFSKY was speedily *aux petits soins* with the Chinese authorities at that port. Elated with the reception he met with, and an apparent preliminary success which, no doubt, seemed of good augury for the future of the expedition, he forthwith addressed a letter to M. VENINKOF, the late Secretary of the Russian Imperial Geographical Society, which was read at the last meeting of that body. In the course of this communication he made a statement, exhibiting a very hazy condition of mind as regards the rights and privileges of foreigners at the Treaty Ports in general and the *status quo* at Hankow in particular. The following is in effect the tenor of this remarkable piece of intelligence as given by a contemporary, who evidently places implicit confidence in its accuracy:—"The local authorities have "shown (for Chinese) the most extraordinary favour "to the Russians by giving them permission to visit "every part of the town and neighbourhood (a con- "cession never previously accorded to strangers), and "to photograph any Chinese inhabitants or views at "pleasure." An assertion like this, however ridiculous it may appear to those who have any personal acquaintance with China, will naturally have considerable weight with many people from the mere fact of its being made by the head of a scientific expedition; and its very absurdity shows the great necessity for carefully scrutinising the statements made before Geographical Societies, and not allowing grave errors of fact like the present to go forth to the world unchallenged, and bearing, as it were, the societies' seal and guarantee as passports to general acceptance. In this particular instance the authorities of the Russian Geographical Society ought surely to have had sufficient general knowledge of the scope of the treaties between China and foreign Powers to enable them to detect and guard against the mistake to which we have drawn attention.

M. PROSPER GIQUEL, late chief director of the Foochow Arsenal, has arrived with five of his Chinese *élèves*, whom he is to take on a tour of inspection to all the chief manufacturing, military, and naval centres in France, Germany, and England. Three of these young men speak French very fairly; the other two speak English with even more readiness. One of them was for some time in command of a Chinese gunboat, which he successfully navigated as far as Singapore and back. He is accompanied by his first lieutenant, who shared the perils and glory of the voyage. It is not pretended that these youths are Princes or even Mandarins in their own country; they are the sons of respectable middle-class Chinamen, and their object in visiting Europe is solely to see for themselves the wonders of which they have heard so much, and which some years' study in the Foochow Arsenal have rendered them capable of appreciating. M. BOREL acts as secretary to M. GIQUEL.

THE *Morning Post* of Friday contains an article on the visit of Sir ANDREW CLARKE to Bangkok, which has already been fully detailed. On the removal of the Governor it says:—"Talented though his successor un- "doubtedly is, his views may not accord in all points with "those of Sir ANDREW CLARKE, and there may be diver- "gencies from the line that he had laid out that may in- "terfere with the entire fulfilment of his well-digested "plans."

THE next meeting of the Oriental Congress, to be held at St. Petersburg, is fixed for the 1st Sept. We understand that a committee has been formed to carry out the necessary arrangements, with Professor GREGORIEF at its head. From reports which have reached us, we believe that every provision will be made for the comfort and convenience of the members, and we trust that the English representatives will muster there in strong force.

Literature.

Etude sur Deux Dialectes de l'Indo-Chine—Des Tiams et Les Stiengs (Cochin-Chine et Cambodge). Par A. MORICE, Médecin de la Marine. Paris: Maisonneuve et Cie. 1875.

Our acquaintance with the various languages of Indo-China is still very imperfect, although much has been done during the present century, especially by missionaries, to throw light on Siamese, Chinese, Cambodgian, and Annamite, and Professor Aimonnier is now on the point of publishing a Cambodgian Dictionary at Saigon, if indeed he has not already done so. Besides the languages named, which are in a sense those of the civilised peoples of Indo-China, there are others which are quite different, and are, so to speak, virgin soil to the student. Of these on the one hand may be mentioned the language of the Tiams, and on the other those of the dwellers in the mountains and forests, whom the Annamites call Mois (*i.e.* savages), and among whom the Stiengs are the best known. Such, in brief, are the remarks with which M. Morice introduces his interesting little essay to the public, adding that he was enabled by special circumstances to study and collect vocabularies of the dialects referred to. He then proceeds to give a sketch of the Tiams (otherwise called Chams), from which we cull the following information:—These Tiams, scattered as they are among the Annamite and Cambodgian populations, present the curious spectacle of a people which has, nevertheless, preserved its manners, its religion, and a part of its ancient language, and what is more, has remained absolutely pure from an anthropological point of view. It is highly probable that these peculiarities are due to the fact of their being Mohammedans, and to this may also be set down the difference of their personal characteristics from those of the mercantile Celestial and the Cambodgian crushed beneath his feudal laws. The Tiams marry among themselves, but they are not strict Mohammedans in every respect, for their women do go about unveiled, and attend to all household affairs; furthermore, though living in a country where morality is at a low ebb, their virtue is unsullied. In character the Tiams are honest, brave, light-hearted, and probably more susceptible to European influences than the Annamites and, above all, the Cambodgians. They are taller, too, and more powerfully built; they are indefatigable walkers and bold hunters. They have no industry, and they spend their time in exploring the woods, in cultivating a little rice, in hunting, and now and then fishing. History gives us no precise information as to the origin of this people, but perhaps some day an investigation into the affinities of their language and other considerations may throw light on this subject. The language of the Tiams is not monosyllabic, and this fact distinguishes it from the group of languages spoken in the greater part of Eastern Asia. It is in some measure indebted to the Annamite and the Cambodgian, but more than a third of it is of Malay origin; this is clearly shown by some examples which M. Morice gives, and which, he observes, might easily be multiplied. It contains, in addition, words of unknown origin, but which are neither Malay, Cambodgian, nor Annamite.

If, says M. Morice, the Tiams have not been much studied, the Stiengs present an even more fertile field for fresh observation. The only previously existing contribution to a knowledge of their language was a slender vocabulary of seventy-four words, collected by the late M. Francis Garnier. These people are essentially savage in their habits and ways, and their language is an exceedingly poor one, about one-third of the words being Cambodgian badly pronounced. In this connection one fact is certainly worthy of notice: the Cambodgians have only the first five figures, whereas the Stiengs, though inferior to them in intelligence, use the decimal system of numeration. Their language has, further, borrowed some words from the Annamite, but beyond the sources here mentioned, there remains more than a half of their vocabulary which

Digitized by Google

it would be difficult to refer to any certain origin. These people appear to be the most ancient inhabitants of the country, and to have been gradually forced back into the forests and mountains by Cambodgian, Annamite, and Chinese invaders. They are not sociable in their ways, and but seldom go near the Annamite markets; when they do do so they bring in skins, resins, and various kinds of wood, and take away some miscellaneous commodities in exchange. In conclusion, we need only add that M. Morice furnishes copious vocabularies of the two dialects treated of in his very interesting essay, which, no doubt, will be found useful both by the traveller and by the philologist.

CARGOES AFLOAT.

—o—

SINGAPORE AND PENANG.

Lochleven Castle: 405 tons gambier, 390 tons sago flour, 12 tons black pepper, 1 ton white pepper, 20 tons sapanwood, 175 cwts. hides, 70 m. Malacca canes. Guiseppina N.: 610 tons gambier, 35 tons sago flour, 50 tons pearl sago, 120 tons black pepper, 280 cwts. rattans, 700 cwts. hides, 12 tons horns. Charles H. Southard: 555 tons gambier, 7 tons tin, 175 tons sago flour, 405 tons black pepper, 580 cwts. rattans, 900 cwts. hides, 11 tons india-rubber, 185 tons sugar, 40 m. Malacca canes, 1,340 cwts. copal. Star of the South: 332 tons gambier, 150 tons sago flour, 25 tons pearl sago, 300 tons black pepper, 50 tons white pepper, 25 tons gutta, 260 cwts. rattans, 10 tons india-rubber, 10 tons horns, 25 m. Malacca canes, 27 tons tapioca. Zenobia: 200 tons gambier, 200 tons sago flour, 35 tons pearl sago, 450 tons black pepper, 135 tons white pepper, 4 tons gutta, 2 tons coffee, 260 cwts. rattans, 550 cwts. hides, 5 tons india-rubber, 3 tons horns, 35 m. Malacca canes, 75 tons tapioca. Professor Van der Boon Mesch: 303 tons gambier, 220 tons sago flour, 150 tons pearl sago, 150 tons black pepper, 60 tons white pepper, 340 cwts. rattans, 295 cwts. hides, 6 tons horns, 20 m. Malacca canes, 8 cwts. mother-o'-pearls, 10 tons tapioca. St. Aubyn: 545 tons gambier, 60 tons sago flour, 5 tons white pepper, 8 tons gutta, 800 cwts. rattans, 14 tons horns, 35 m. Malacca canes, 185 cwts. mother o'pearls. Phineas Pendleton: 850 tons gambier, 760 tons sago flour, 40 tons pearl sago, 30 tons black pepper, 15 tons white pepper, 10 tons sapanwood, 1,240 cwts. rattans, 53 cwts. hides, 35 tons tapioca. Coldinghame: 25 tons tin, 793 tons black pepper, 180 cwts. rattans, 1,161 cwts. hides, 420 tons sugar, 18 tons horns. Vanguard: 66 tons tin, 198 tons black pepper, 260 cwts. rattans, 195 tons sugar. Constantia: 395 tons gambier, 150 tons pearl sago, 140 tons black pepper, 160 cwts. rattans, 223 cwts. hides. Condor: 150 tons gambier, 210 tons pearl sago, 100 tons black pepper, 240 cwts. rattans, 10 m. malacca canes. Glenavon: 150 tons gambier, 10 tons tin, 455 tons sago flour, 85 tons pearl sago, 265 tons black pepper, 80 tons white pepper, 11 tons gutta, 500 cwts. rattans, 980 cwts. hides, 17 tons india-rubber, 4 tons horns, 63 m. Malacca canes, 80 tons tapioca.

MANILA.

Stefano: 1,110 tons sugar, 130 tons hemp. Envoy: 750 tons sugar, 43 tons hemp, 12 tons sapanwood. Marina: 700 tons sugar, 227 tons hemp, 16 tons sapanwood, 190 mil. cigars. France: 500 tons sugar, 262 tons hemp. Windhover: 500 tons sugar, 560 tons hemp. Glamorganshire: 796 tons sugar, 320 tons hemp. Agnes Muir: 442 tons sugar, 14 tons coffee, 550 tons hemp, 30 tons sapanwood, 305 cwts. mastic, 27 mil. cigars. Ornate: 600 tons sugar, 292 tons hemp, 10 tons sapanwood. Sea Nymph: 254 tons sugar, 100 tons hemp. Uli: 175 tons sugar, 277 tons hemp. Mikado: 405 tons sugar, 7 tons sapanwood. Sarah Nicholson: 600 tons sugar, 550 tons hemp. Canaan: 500 tons sugar, 445 tons hemp, 30 tons sapanwood, 1,140 cwts. mastic, 140 mil. cigars. Star of the West: 1,000 tons sugar, 480 tons hemp. Ben Ledi (str.), 318 cwts. hides, 98 cwts. mother-o'-pearls, 70 mil. cigars. Monte Rosa, 25 tons sapanwood.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, MAY 19.

Another important Atchin debate has taken place in the Second Chamber, with reference to the grant of a credit to pay the passage of the newly appointed Governor General of Java. The whole history of the dismissal of Mr. Loudon was once more brought forward. The Minister Van Goltstein, however, declined to give any further information with reference to the circumstances which led to the resignation of Mr. Loudon. The new Governor-General, Mr. Van Lansberge, was sharply criticised during the debate, even in such terms that the Members were advised to moderate their language. Mr. Van de Putte warmly defended the new Governor. He said that at first the appointment had astonished him, but that what had already been done by Mr. Lansberge had afforded reason for him to hope that he would prove to be the "right man in the right place." General indignation was expressed in the Chamber at the statements which are made in the book of Mr. J. I. de Rochemont, "Loudon and Atchin." Messrs. Fabius Nierstrasz and Van de Putte were loud in their expressions of indignation. It was even asserted that official telegrams had been mutilated in order that the author might find grounds for his abuse of political men. Mr. Van de Putte declared that he had at first refused to believe that Mr. Loudon had given permission to Mr. de Rochemont to make use of private papers. But he was now obliged to acknowledge that this had been done, and he hoped that the Government would not let such conduct pass. The Minister said—after some members had spoken in the same sense—that the book had made a very painful impression on him. He, however, was of opinion that the contents had proved rather an accusation against than a justification of Mr. Loudon, and the Minister would consider whether steps ought to be taken to punish the author. Several members were of opinion that now that the official private documents had been partly published the Government ought to publish the whole. The Minister replied that he had not yet arrived at a decision on this point. Mr. Kuyper, the leader of the anti-revolutionary party, hereupon urged that our war against Atchin was anything but justifiable. It was his opinion that we had been punished by God, because we began the war unrighteously. This most interesting debate, of which I can only give you the barest outlines, ended in the carrying unanimously of the credit asked.

Contrary to my opinion, the pamphlet of Mr. de Rochemont has not been made much of by the press. Our editors take it—the *Vaderland* excepted—very coolly, and many newspapers do not say a word about it. Of course there are political or rather personal reasons for this. After having read the *brochure* I cannot agree that it is a book to throw away or to keep silence upon. If it does not unveil the truth about the Atchin war it most probably will lead to our knowing the truth. For the present I will be content with quoting only a few passages. I wish first to state that the whole contents are an *acte d'accusation* against the former Minister of the Colonial Department, Mr. Fransen Van de Putte, General Versypck, Colonel Van Daalen, Mr. Van Nieuwenhuyzen, and the press. The principal item is what was the origin of the war? Mr. de Rochemont assures us that the real cause was the fact that in 1856 the Dutch war schooner *Dolphyn* was captured by Atchinese pirates. Some other piracies having been committed subsequently, Mr. P. P. Van Bosse (then Minister of the Colonial Department) wrote the following despatch, of course after having obtained the abrogation of the treaty with England:—"Too long already has piracy in the Atchin waters been permitted to injure trade and shipping; and it is time that this will be brought to an end. There will be no aggression. Those States which, rightly or wrongly—perhaps against their will—form a part of the Kingdom of Atchin, must be protected, if they need our help. The Sultan of Atchin must conceive that we wish in the first place to live in peace and in harmony with him, but that we have the right to claim security for our shipping trade." On the 15th of February, 1873, the Governor-General received from the Dutch Consul at Singapore a telegraphic despatch, stating "that he had discovered *intrigues* between the Ambassador of the Sultan of Atchin and the Consuls of Italy and the United States, and that, according to his opinion, prompt measures had become necessary. The following day the Consul wrote that the Sultan had claimed assistance against us; that the two Consuls had intimated their willingness to render him this help, and that the American Consul, in the first place, had prepared a treaty consisting of twelve articles, promising that he would give immediate instructions in the matter to the commodore of the American fleet in China. He concluded by saying that the Italian and American men-of-war would be at once ordered to Atchin. The Governor-General informed our Minister of the Colonial Department of what had happened, and he received the following reply:—"*If you do not doubt* the accuracy of the communication of the Consul-General at Singapore, despatch a strong squadron to Atchin, request prompt explanations, and open negotiations with the Sultan in the sense of my despatch of 24th April, 1872. If Atchin gives no satisfaction to our demands, then the necessary forces must be brought together to support our claims. The intervention of any foreign country must be protested against. The Vice-President of the East India Council, Mr. Nieuwenhuyzen, can be charged to act as civil-commissary in the affair." Mr. Fransen van de Putte, who had in the meantime succeeded Mr. Van Bosse, asked at the same time for information from Rome and from Washington. He was soon convinced that there was no foundation whatsoever for the alarming statements of our agent at Singapore. It might be that the Atchinese had opened negotiations with foreign consuls, but neither Italy nor America dreamed of intervention. The Governor-General, however, was of a different opinion. On February the 21st the East India Council met. The members received communications of the several despatches from the Consul at Singapore and from the Minister, and the Governor-General asked their opinion upon the following proposals:—1st. A high functionary to start immediately to Atchin in his quality of civil commissary. 2nd. This official to be accompanied by an army-corps and a squadron strong enough to undertake a war with Atchin. 3rd. That the Sultan be requested to acknowledge the Dutch Sovereignty. 4th. If this should be refused the Commissary at once to declare war and commence hostilities. The members of the Council agreed with the proposals of the Governor-General, and the naval and military commanders in-chief promised to make so much haste that the expedition could start by the end of March. On the 22nd February Mr. Loudon forwarded the following despatch to the Minister:—"I have consulted the East India Council and the commanders of the army and the navy. Every one, without exception, agreed with me, that a Government Commissary, accompanied by an army-corps and a squadron, should start immediately for Atchin with this ultimatum: Acknowledgment of our sovereignty or war. The expeditionary corps will consist of four battalions. Nieuwenhuyzen will be civil-commissary." The Minister of the Colonies answered that he hoped that the troops would not disembark before it was positively proved that the Sultan of Atchin refused the ultimatum. On the evening of the 1st of March the Governor-General was informed that the Commander-in-Chief of the American squadron had received an order to proceed to Atchin. At the same time the Minister had telegraphed that Italy had no intention to intervene, and that he expected to receive a similar answer from Washington (which arrived later on.) Mr. Loudon, how-

Digitized by Google

ever, was still convinced that he had been correctly informed. On the 2nd of March the Council was again convoked and the ultimatum was approved of. The expedition started on the 7th of March. The Minister was informed by telegraph, but he replied at once that the ultimatum was too abrupt, and that, before demanding the acknowledgment of our sovereignty, negotiations ought to be opened. What has since happened is known to everyone.

But before leaving the Atchin question I must refer to the elucidations which were given by the Minister van Goltstein at the request of Mr. Nierstrasz about the strength of our East India army. He stated that on November 1, 1872, it numbered 28,600 men, at the same date in 1873 to 30,131 men, and on the 1st November, 1874 to 31,168 men. The expeditionary corps in Atchin was, after the second expedition had returned, 118 officers and 3,262 soldiers, and in August last its strength was 163 officers and 4,466 men, whilst it had since been increased to 6,010. The Java Government, however, asks for further reinforcements. They want 3,126 soldiers, and up to this moment 1,395 soldiers had been despatched, and it seems to be very difficult to provide the rest. According to the opinion of the Minister, the statements in the press have discouraged intending volunteers, and have made it very difficult to enrol the necessary number of men.

And now *je reviens à mes moutons*. After having dealt with the Atchin question the Second Chamber decided not to discuss the Railway Bill of Mr. Kappeyne (completing our railway-net) because the most promissory of all promising Ministers had promised a Bill of his own! Further, the Chamber have had a most important debate upon the Instruction question. It did not lead to any result, except that we know that Mr. Heemskerk has no sympathy at all with the restitution system, and that Mr. Kuyper has made his re-election pretty safe by his masterly speech on the occasion. The members have now left the Hague for the Whitsuntide recess.

The *Staats Courant* of this evening contains the statement that the Major General Hardenberg has been dismissed by the King from the secretaryship of the War Department. For several years he was the *omnes homo* of this department and the stumbling block for the Ministers. Colonel H. L. W. Rodi de Loo is appointed in his place.

H.R.H. the Prince of Orange has left the Hague for Carlsbad. Rumour says that there is still a question of a marriage with a lady of the Hague aristocracy.

The appointment as Consul for Japan in Holland of Mr. A. J. Bauduin, to reside at the Hague, has been approved of by the King.

AMSTERDAM, MAY 20.

According to the leading Conservative paper, *Het Dagblad*, Mr. de Rochemont, author of the brochure "Loudon and Atchin," will be summoned before a Military Council in consequence of certain accusations which are published by him in his book.

The report of the Chamber of Commerce of Almelo (the principal town of the Dutch cotton districts) states that the cotton industry has given last year much better results than in the two previous years. The shipments to Java were, notwithstanding the sharp competition of England, since the differential duties were abolished, very important.

PRODUCE MARKETS.

The transactions in our market for Colonial Produce have been very limited. Holders, however, are not inclined to operate at lower prices.

COFFEE.—The business has been of no importance, because buyers refuse to pay higher prices. The offers, however, have been anything but large. The trade is waiting for the result of the Trading Company's public sale, to be held to-morrow, when 82,600 bales Java will be offered.

TEA.—In waiting for the result of the sale by private tender of 5,458/4 and 16/12 ch. Java, which will take place on the 21st, no parcels have changed hands. Transactions have been limited to direct wants.

SUGAR continues dull. The favourable statistical position of the article has had no influence on the buyers. Holders, or course, keep firm.

RICE.—Of uncleaned only a lot of 830 bales table ex Jacob Roggeveen have been sold; 16,000 bs. Bassein, just arrived, are destined for the mills.

SPICES.—Nutmegs and Mace are in good demand, and prices are firm. The prices of Cloves have improved. Pepper looks rather dull.

JAVA TOBACCO.—The market is very firm, and the prices paid have been in general very high. The result of the last sales was as follows:—

COTTON.—The market has remained dull, and quotations are unaltered. There is an entire absence of speculative demand.

JAVA INDIGO is very quiet, and only a few small parcels have found buyers. The stock includes 949 chests. For Bengal there is no demand.

TIN.—Still very dull, and unsaleable except at much lower prices; 50½ is quoted for Banca on the spot, and for Billiton f. 47½ to f. 47¾.

HIDES.—Prices are kept too high to make operations possible.

SHIPPING.

ARRIVALS.—May 11, at Texel, from Batavia, Koning der Nederlanden (str.); at Flushing, from Rangoon, Eskdare (str.); 16, at Texel, from Batavia, Holland (str.).

DEPARTURES.—May 11, from Texel, for Batavia, Johannes; for Samarang, Bestevaer; 13, from Flushing, for Java, Mary; 15, from Texel, for Batavia, Prins Hendrik.

THE SILK HARVEST OF 1874.

The Syndicate of the Lyons Union of Silk Merchants have just published a report on the silk harvest of 1874 available for European consumption. The countries included in the report are, in Europe—France, with its dependencies Corsica and Algeria, Spain, Italy, Turkey, and Greece; and in Asia—Turkey, Georgia, Persia, India, China, and Japan. No attempt is made to estimate the total crops of India, China, and Japan, but only to ascertain the quantity exported to Europe.

Of European countries Italy is far the greatest silk producer; but the report being drawn up in Lyons, it is natural that most attention should be paid to the state of the industry in France. We find, then, that in the matter of production 1874 was as favourable to France as it was in regard to corn and wine, but the quality was inferior to 1873. A slightly smaller quantity of eggs was hatched than in 1873; but their yield was very much more productive. Of the eggs about 47 per cent. were of French origin, the remainder foreign, chiefly from Japan. The native eggs are chiefly produced in the Western Pyrenees, the Var, the Lower Alps, Corsica, and Algeria. In these districts there is little or no production of silk, the industry being almost confined to the rearing of eggs. And it is curious that the eggs as produced are turned to account only in the extreme south, the more northern departments being supplied for the greatest part from abroad, and especially from Japan. The season opened most favourably, but the frosts of the first half of May did some damage both to the worms and the mulberry trees. However, the fine warm weather of the last fortnight of the month repaired much of the injury, and the result was that the quantity of cocoons produced rose to 11,071,694 kils., being an increase upon the previous year of 2,711,052 kils. The quantity of raw silk yielded was 731,000 kils., being an increase on the previous year of 182,000 kils., or over 24 per cent. The number of serisiculteurs was 198,043, of whom 133,086 were cultivators on a small scale, and 64,957 on a large scale. The large cultivators are most numerous in the three departments of the Gard, the Vaucluse, and the Drome. The industry is almost confined to twenty-one departments, the Western Pyrenees, the Dordogne, Corsica, and Algeria engaging it only to produce eggs for sale.

The season in Italy was very similar to what it was in France, and the Italian crop, like the French, was abundant in quantity, but not equal to that of the previous year in quality. The total quantity of raw silk yielded was 2,860,000 kils., being nearly four times the outturn in France. The production of Spain amounted to no more than 140,600 kils., or about one-fifth of that of France. The production of Greece was 13,000 kils., or less than one-tenth of that of Spain; while the production of Turkey in Europe amounted to 369,000 kils., or nearly half the out-turn of France. If we add Turkey in Asia, the whole production of the Turkish empire was 539,700 kils., or over two-thirds of that of France. It will be seen from the above figures that the total production of raw silk in Europe last year amounted to 4,113,600 kils., of which Italy yielded not far short of three-fourths and France not much more than one-sixth; but France and Italy together yielded about seven-eighths. The production of Georgia and Persia combined reached 400,000 kils., somewhat more than that of Turkey in Europe, and more also than half the crop of France. The exportation from the port of Calcutta reached 425,000 kils., which did not greatly exceed one-seventh of the Italian crop. But, of course, the Indian crop must have exceeded the exports from Calcutta. The exports of raw silk from Japan amounted to only 550,000 kils., but a trifle more than the production of the Turkish Empire. The exports from China, however, reached 3,680,000 kils., or not very far short of the entire production of Europe; and of these exports, 3,290,000 kils. were from Shanghai, and 390,000 kils. from Canton. It appears, then, that the total exports from Asia amounted to 5,225,700 kils., or about one-fourth more than the total production of Europe, and of these exports China furnished somewhat more than three-fourths, and Japan a little more than one-tenth. The total supply of Europe, whether raised by herself or imported from Asia, amounted to 8,339,300 kils., and of this supply Italy produced over one-third, or, to be more exact, 34·3 per cent.; while China furnished a fraction over 44 per cent. But both together gave nearly 80 per cent. In other words, China and Italy supply four-fifths of the silk used in Europe.

CORRESPONDENTS' LETTERS FROM CHINA.

The Shanghai correspondent of *The Times* writes as follows under date Shanghai 1st April with reference to the dispute as to Customs dues at Tientsin:—The incident has importance beyond the actual deadlock it created, in the illustration it affords of the excessive taxation to which trade is being subjected in China. The *lekin*, or war taxes imposed to meet the expenses of the rebellion are being maintained, notwithstanding the return of peace, and, if we may judge from memorials in the *Peking Gazette* and the evidently crippled state of Chinese finances, exactions have reached a point at which they defeat their own object and cause an actual falling off in receipts by checking trade. That a country like China should need to borrow the paltry sum of £2,000,000 sterling in itself indicates that all ordinary and extraordinary sources of income must have been drained, and even the preparations which are being made for the re-conquest of Turkestan will not suffice to account for such embarrassment. The expenditure on arsenals and shipbuilding has, undoubtedly, been great, but there are many indications that excessive taxation is greatly to blame for the evident shortness of revenue.

With regard to Formosa the correspondent says:—Recent events appear to have opened the eyes of Government to the necessity for strengthening their hold on Formosa. The Special Commissioner for Formosan Affairs, Shen Pao-cheng, lately memorialised the Throne to withdraw certain restrictions on the emigration of Chinese into the island from the mainland. It is curious to learn that at the time the Chinese were nearly going to war with Japan for the possession of Formosa an enactment was in existence to the following effect:—"The

Digitized by Google

surreptitious crossing over to Formosa by the people of the mainland is forbidden. On any vessel making the surreptitious voyage being captured, the master and crew shall be punished in different degrees; punishment shall be inflicted on the civil and military authorities, and the soldiers and police shall be criminally dealt with." Surely this is rather a curious ordinance with regard to an island which was claimed as an integral portion of the Empire? Shen Pao-cheng now solicits the withdrawal of this restriction and the removal of similar ones on various branches of trade. An edict in the *Peking Gazette* of the 15th of February grants his request, and already I hear a number of emigrants are setting out from the ports of Amoy, Swatow, and Foochow, for the purpose of settling in the island. There have been several collisions between the Chinese troops and the aborigines since the Japanese withdrew, and it is likely that the inroad of new settlers will lead to others. There can be no question, however, that the perseverance of the Chinese will enable them gradually to press back the native tribes; and if only reasonable freedom is given to trade Formosa will soon become a very valuable possession. I deprecated the proposed abandonment of the Formosan forts at the time Sir Rutherford Alcock was negotiating at Peking a revision of the Tientsin Treaty, and the recent development of trade has fully justified my view. There is room, however, for vast improvement yet, and we may hope that the new policy which China seems inclined to follow respecting the island will conduce to this end. The only fear is that "attention" to Formosa may involve the introduction of a number of fresh officials and all the concomitant train of squeezes.

Monetary and Commercial.

The report of the Directors of the P. and O. Company for the half-year ended 31st March has been issued. It states that the operations of the Company have been less successful in that period than for many years. The profit that remains after making the usual deductions is not such as to justify the payment of an interim dividend. This falling off is set down to two causes—1, the reduction in the mail subsidies; and 2, a deficiency in receipt on the Company's lines to and from Bombay. This latter is the more serious in that the busiest traffic season lies between October and April, or mostly within the half-year in question. Freights have, however, been so low that the company has had to accept on the average about 20s. per ton less than for the corresponding six months of 1873-74. The opposition of the Austrian Lloyd's Company and of the Rubattino Company of Genoa has also told with considerable force against the "P. and O." Supported by their respective Governments, these each ran a fortnightly line to Bombay during the four best months of the year. The Directors hold out the hope of being able to effect considerable savings during the present year, and the revival of general business may by and by be expected to put them in a better position as to freights. The condition of the fleet is good and is being constantly improved.

Tenders for £700,000 in bills on India were received at the Bank of England on the 19th inst. The amounts allotted were —to Calcutta, £478,000; to Bombay, £211,000; and to Madras, £11,000. Tenders on all the Presidencies at 1s. 9⅜d. will receive about 7 per cent., above in full. These figures show a further reduction in the demand for remittances to the East.

The stoppage is announced of the Deutsche Brasilianische Bank of Hamburg, an undertaking established about two years ago, with a branch at Rio, where the losses have been chiefly made. The direct cause of their suspension is understood to be losses sustained on advances to Messrs. Maua and Co. The liquidation, however, is expected to be favourable, as Messrs. Maua, it is stated, will pay in full.

The report of the Deutsche Bank, to be presented to the shareholders at Berlin on the 22nd inst., states that the net profits for the year 1874 amount to 1,219,488 thalers, of which the directors recommend to appropriate 750,000 thalers to the payment of a yearly dividend at the rate of 5 per cent. per annum, and to add the remaining 469,488 thalers to the ordinary and special reserve funds, which will then stand at 780,523 thalers.

The report of the Trust and Loan Company of Canada for the half year ending March 31 states the balance at credit of revenue, including £2,924 brought forward, amounts to £23,499, out of which the directors propose to pay a dividend at the rate of 8 per cent. per annum, and a bonus of 1 per cent. (both less income-tax), carrying £7,450 to the reserve fund and £2,300 to the next account. The balance to the credit of the reserve fund, with the £7,450, will be £117,832.

The deliveries of tea from the London bonded warehouses during the week ended the 15th inst. were 3,405,455 lb., of which 2,095,269 lb. were for home consumption, 671,797 lb. were removed coastwise, 544,346 lb. were exported, 88,667 lb. were sent coastwise for shipment, and 5,376 lb. were for ships' stores. The amount of duty received was £52,382, being 3 per cent. less than in the previous week.

In the Manchester Market, owing to the holidays, the attendance of both buyers and sellers has been very limited, and the business of a merely nominal character. Quotations are unaltered.

The P. and O. steamer *Surat*, which arrived at Southampton on the 17th inst., brought £174,602 in Japanese gold coin.

The Silver Market is very flat and inactive, and quotations almost nominal, the nearest price being 56¾d. per oz. standard. Mexican Dollars have been sold at 56d. per oz., which is the present quotation.

The amount of bullion per P. and O. steamer *Deccan*, from Southampton on the 20th inst., was:—In gold, to Singapore, £10,000; in silver, to Hong Kong, £25,000; to Shanghai, £10,865; to Singapore, £4,430; total in gold, £10,000; in silver, £40,295.

ARTICLES OF IMPORT.

Business has been almost suspended during the past week, i consequence of the Whitsuntide Holidays. Transactions have been very limited in extent, and no changes have occurred in prices.

TEA.

Messrs. Goddard and Co.'s Circular says:—There is very little business to report, Whitsuntide interfering. In the public sales 2,747 packages have been offered, 2,347 "without reserve." This being Whitsun-week, the sales have been very small; an invoice of Moyune Greens was sold at easy rates for all kinds, and especially Hyson and Young Hyson. 1,080 boxes Scented Caper obtained 9d. to 9¼d. Deliveries from London, from 1st to 15th instant, inclusive, or thirteen days, 1875, 7,296,716 lbs., against thirteen days, 1874, 7,502,255 lbs. Imports, deliveries, and stocks in London, from 1st January to 30th April:—

Imports.		Deliveries.		Stocks.	
1874.	1875.	1874.	1875.	1874.	1875.
39,013,193	54,796,277	52,690,486	59,094,816	75,448,270	74,083,718

SILK.

Messrs. Kilburn, Kershaw and Co.'s Circular states that there is no change whatever in the market; prices continue firm for the lower and medium classes of Tsatlee, to which the demand is almost exclusively confined, and the scarcity of coarse Taysaams is somewhat felt. There is no alteration in the position of other Asiatic Silks, business being limited and prices unchanged. The first private telegrams from China, respecting the new crop, have just come to hand, and report a probability of the quantity being about the same as last season. From the South of Europe the reports of the crop are so far favourable, but the result cannot be known for another fortnight at least. Deliveries are good, and consumption of Silk goods on the increase. The clearances of Silk from the 1st to the 19th instant have been:—China, 2,115 bales; Japan, 179; Canton, 311; Bengal, 199; total, 2,804 bales.

COFFEE.—The result of the Dutch sale has not sensibly affected this market, which is steady, and small parcels at auction have gone off without change in value. Plantation Ceylon has sold, greyish bold at 107s. to 108s., low middling and middling at 102s. 6d. to 105s. 6d., small at 100s., peas at 123s. to 125s., and triage at 86s. to 94s. The Dutch Trading Company's auction was held on the 19th inst., 82,556 bags Java being offered. The sales progressed favourably, and went at ¼c. to 2¼c. above valuations, good ordinary ¼c. to 2½c., better kinds ½c. to 2¼c. above valuations. Average value of good ordinary, 56 to 56½c. The auctions proceeded as follows:—

Lying at Rotterdam.

		Bags.	Valued at.—Cents.	Result.—Cents.
No.	1	1,063	58½	60¼ to —
	3	4,372	55½	56 to —
	6	5,687	55¼	56¼ to 56¼
	7	8,853	56	56¼ to 57

Lying at Amsterdam.

No.	1	2,585	58½	60¾ to —
	3	2,338	57½	59½ to 59¾
	8	857	56	56½ to —
	9	2,524	55¾	56 to 56¼
	10	1,804	55¼	56 to 56¼

COTTON.—There has been a moderate business done. Arrivals are slightly in buyers' favour. The prices are:—Tinnivelly, 5⅞d. to 6d.; Western Madras, 4⅞d. to 5 5-16d.; Bengal, 4 9-16d.; West India, 8½d.

CHINA.—Preserved Ginger, 150 cases bought in at 6½d. and 20 casks at 6d. per lb.

COCOANUT OIL remains quiet at late prices; Ceylon, £37 10s. to £37 15s. per ton.

HEMP.—At the public sales 369 bales Manila were offered and 69 bales P.C. over R. sold at £28 10s.; rest taken in, P.C. No. 1 at £33 per ton.

PEPPER.—But few parcels have been offered, and met very little attention. Of 487 bags Singapore Black about two-thirds sold, good bright at 5½d., one lot at 5⅝d.; 543 bags Penang part sold at 4⅞d. to 4⅝d. for second and first-class damaged; sound out at 5d. Of 396 bags Singapore White 150 bags fair sold at 7⅞d. to 7⅝d. per lb.

RICE.—No sales have been reported. Some business has been transacted, particulars of which have not transpired.

SUGAR.—No transactions have been effected in East India kinds.

SPICES.—*Mace*: The trade continues dull, and the small parcels at sale were chiefly bought in, including 5 cases Penang at 2s. 6d. for palish red and 2s. for dark. *Nutmegs*: The few parcels brought to public sale were only partly sold, 5 cases 3 boxes Penang at 2s. 8d. for good brown, average 110, and 3s. 8d. for 82's. In other Spices no business had been done.

SAGO.—Of 797 bags offered about half sold at late rates, viz., good and fine small at 17s. 9d. to 18s. per cwt.

TAPIOCA has been quiet. 394 bags Pearl chiefly sold, fine small at 22s. 6d., bullets at 20s. to 20s. 6d. per cwt.; large bought in at 20s. 6d.; 630 bags Flake sold, fine Penang Alma mark at 2⅞d., fair Singapore at 2⅝d. to 2¼d.; 160 bags bought in at 2⅞d. per lb.

TIN.—There has been a steady demand, and prices have been firmly maintained. Quotations are, Straits on the spot and afloat £83, Banca £88, Billiton £83 per ton.

The current quotations for coal, &c., are as follows:—From Wear or Tyne, per keel—To Yokohama: £38. To Shanghai: £35. To Hong Kong: £26. To Singapore: £27. To Penang: £25, f.c. To Galle: £23. To Batavia and Sourabaya: 23s.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama: 37s. To Shanghai: 30s. To Hong Kong: 28s. To Singapore: 23s. To Colombo: 24s. To Galle: 25s. To Batavia and Sourabaya: 23s.

From Birkenhead, per ton.—To Hong Kong: 25s. To Shanghai: 30s. To Singapore: 19s. To Batavia and Sourabaya: 23s. To Galle: 21s.

CASUALTIES.

Advices from the Cape of Good Hope state that the Jupiter, from Singapore to New York, went ashore on the 19th April, twelve miles east of Bird Island, and became a total wreck.

The Koning der Nederlanden (str.), at Nieuwe Diep, from Batavia, took fire on the night of the 12th inst., but was soon extinguished by the aid of seven fire engines. The poop is partly destroyed.

The Durham, at Liverpool, May 11, from Cebu, reports, during the voyage experienced heavy gales and terrific sea, ship labouring, and flooding the decks fore and aft, starting water-tanks and donkey-engine, bursting open galley and mates' rooms, filling them with water, and carrying away several articles belonging to them, and one of the lifeboat's gunwales was completely smashed.

MISCELLANEOUS.

In consequence of the report of the surveyors, the owners of the Malay, at San Francisco from Hong Kong, have instructed the master of the vessel to advertise her for sale.

Passed GIBRALTAR.—May 10, Prinses Amalia (str.); from Nieuwe Diep, for Batavia; 14, Belgic (str.), from Liverpool, for Yokohama.

Glengyle (str.), from London, for China, arrived at Malta on the 18th inst.

TRIAL TRIPS &c.

The splendid iron screw-steamer J. B. Walker, built by Messrs. Raylton, Dixon, and Co., of Middlesborough, took her official trip on the 13th inst. The J. B. Walker has been built to the order of Messrs. J. B. Walker and Co., of Middlesborough, and is to form one of their "Star Ball Line" trading between this country and Java.

The official inquiry into the circumstances attending the stranding of the Border Chieftain steamer, of North Shields, from Colombo for London, near Dover, has been held at Greenwich Police-court, before Mr. Balguy, magistrate, and Captains Hight and Knox, R.N., assessors. After hearing the evidence the Court intimated their intention of returning Captain Bailey his certificate.

SUNDRIES PER "CREMONA," FROM NEW YORK, FOR HIOGO AND YOKOHAMA, APRIL 22.

Diploma of Merit, Vienna Exhibition, 1873.

YORKSHIRE RELISH

THE most delicious SAUCE in the world to CHOPS, STEAKS, FISH, &c. Sold by all Grocers and Oilmen in bottles 6d., 1s., and 2s. each. Trade mark—Willow-pattern plate.

PROPRIETORS:—
GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S BAKING POWDER.

THE BEST IN THE WORLD.—Makes delicious Bread without Yeast; Puddings, Pastry, &c., without Eggs, Butter or Lard. Bread made with this Powder is much easier to digest, and much more wholesome than that raised with yeast, and a larger quantity is obtained from the same weight of flour. One trial will convince the most sceptical of its superiority over others. Sold by Grocers, Chemists, and Oilmen in 1d. packets; 6d., 1s., 1s. 6d., and 2s. Tins. Prepared by GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S QUININE WINE.

THE BEST AND MOST AGREEABLE TONIC yet introduced. For the relief of Indigestion, General Debility, and Loss of Appetite it is INVALUABLE. Recommended for its purity by the *Food Journal*, Arthur Hill Hassall, M.D., Wentworth L. Scott, Esq., F.C.S., F.A.S.L., F.R.S.S.A., &c. Sold by Grocers, Oilmen, and Chemists, in large bottles at 1s., 1s. 1½d., 2s., and 2s. 3d. each. Prepared by GOODALL, BACKHOUSE & CO., LEEDS

HOTEL KRON PRINSEN, HAMBURG.

SITUATED on the Alster. A first-class House, at moderate prices.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, nd by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.
Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,
HOMŒOPATHIC CHEMISTS,
48, Threadneedle-street, and 170, Piccadilly. Works:—Euston road and Camden Town, London.

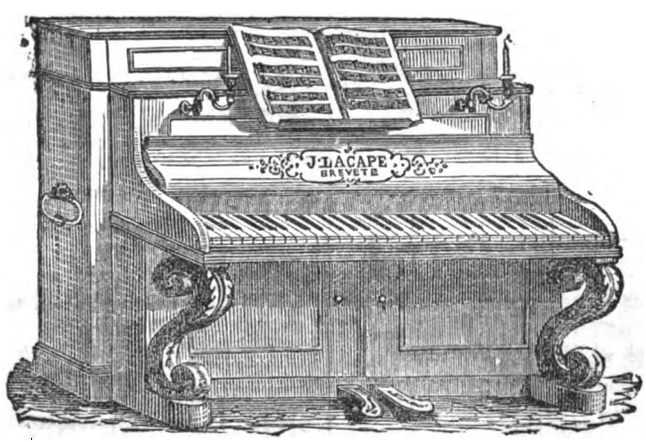
AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29, BOULEVARD ST. MARTIN, PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of seven octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.



ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.

Per steamer *Patroclus* (Holt's line), expected 5th June.—From Shanghai: Mr. Johnstone, Mr. Williams, Captain Kidley, Mrs. Knott, Mrs Behneck, Mrs. Burose. From Hong Kong: Lieut. Brown, 80th Regiment, and thirty-five soldiers. From Singapore: The Rev. W. and Mrs. Dale, Mr. McGrorty.

PASSENGERS OUTWARD.

Per P. and O. steamer *Deccan*, from Southampton, May 20.—To Ceylon: Mr. F. Saunders, Mr. R. McGill. To Singapore: Mr. A. C. Gaye. To Hong Kong: Mr. C. S. Sherwood, Mr. McNab, two officers, fifty-two seamen, two pensioners. To Shanghai: Mr. J. Krueger. To Yokohama: Mr. Baba.

Per P. and O. steamer *Hydaspes*, from Southampton, June 3.—To Ceylon: Mr. A. Carmichael, Mr. W. G. Inglis. To Hong Kong: Mr. J. Campbell, Mr. D. D. Murray, Mr. J. Wood. To Yokohama: Mrs. Rickerby and child.

Per French steamer *Iravaddy*, from Marseilles, June 6.—To Galle: Mr. T. Plate, Sir M. C. Swamy. To Shanghai: Mr. and Mrs. Mouillesaux de Vernieres, Misses Hovelt, Peter Orme. To Yokohama: Mr. Meier.

Per steamer *Priam* (Holt's line), from Liverpool, May 25.—To Hong Kong: Mrs. Williams and family, Mr. Booth.

Summary of News from the Far East.

CHINA.

TIENTSIN.

The correspondent of the *North China Herald* writes as follows from this port:—

Everything here is quiet in regard to political affairs. The Customs troubles are at an end; and business goes on in the former unruffled manner. The permanent Customs Taoutai, whoever he may be, has not yet made his appearance. As to Sun-sze-ta himself, he continues, as before, to fill the post of acting Customs Taoutai. There is a rumour, however, that the Central Government have appointed in his stead an official named Jin, who was formerly Prefect here, *vice* Le Chaou-tang, who was appointed last November, but who has been compelled, it is said, to resign on account of ill-health. Jin is said to be at present at Paouting. We are enjoying fine weather. On the 5th April swallows were seen here for the first time this year, which event tells of warm weather; yet next morning we had one-tenth of an inch of ice, the production of the previous night.

Amongst the foreign residents, the chief topic of conversation is the murder of Mr. Margary in Yunnan. As you will, however, be better informed on that matter than we can be here, it is unnecessary for me to say anything further on the subject, beyond expressing the general regret felt at the sad event, and the sincere hope that all concerned in the murder will be punished. I am told that H.M.'s Minister has taken the necessary steps for a strict investigation into the affair, and I have no doubt he will insist upon the Central Government doing full justice in the matter, by punishing all concerned in Mr. Margary's death.

For some few days back it has been the talk of the people here that the Governor-General has been moving the troops of the Southern Legion in this neighbourhood. During the last three days knots of men have been seen crossing over the ferry at the south part of the Settlement, either dressed in long red cotton gowns, or in short red jackets—who, I was told, were the men of the Southern Legion stationed at the Arsenal, which lies a couple of miles off, on the east side of the river opposite the Settlement. The men in long red gowns, I fancy, are sergeants, and those in short red jackets are rank and file. A great many of the men of the Southern Legion have also been seen going down the river in boats, or marching down the Taku roads; and are said to be proceeding to the fort called Sin-chung, lying above Taku. From the brilliant colour of their gowns and jackets it is evident they are quite new; it is, therefore, to be hoped that red shirtings have, this spring, been yielding a handsome profit in the Tientsin market.

The training of the ponies for our spring race meeting goes on regularly every morning at the new racecourse—a stretch of ground situated outside the ramparts, two miles south of the British settlement, which has been rented for one year from the owners in the adjoining village. Messrs. Bismark, Cordes, Jackson, Twinem, and Meadows were elected, at a meeting of the sporting members of the community, as stewards for the

Digitized by Google

current year. Thus everything, as far as we can see, is going on favourably for a successful meeting in the early part of May.

No notice has yet been given to the Consulates of the demise of the late Empress, the wife of the Emperor Tung-che, and visits can, as in ordinary times, be made to the territorial and Customs officials by the Consuls of the port.

SHANGHAI.

The present mail brings advices from this port to the 16th April; the French mail from London, Feb. 26, was received on the 14th April. The following summary of news is from the *North China Herald*:—

Mr. Medhurst has received a despatch from Mr. Wade, confirming the news of Mr. Margary's death, and stating that passports have been obtained to enable two English officers, accompanied by a Chinese official, to proceed to Yunnan to investigate the affair. Prince Kung has given a positive assurance that no one accused of participation in the outrage shall be sentenced until the officers sent by Mr. Wade shall have had an opportunity of hearing the evidence against them. This at least ensures that a strict inquiry will be made on the spot, by persons interested in arriving at, instead of disguising, the truth. We presume that the two officials in question will be members of the Consular or Diplomatic Service. The attack is stated to have happened near Momein, in the Chinese jurisdiction of Teng-yueh-chow. Teng-yueh-chow, or rather Teng-yueh-ting, is a town duly registered in the "Tsin-shen," or Chinese Civil List, as a residence of a "Ting" magistrate, under the Prefecture of Yung-chang-foo, in the province of Yunnan.

The S.S.N. steamer *Chihli*, which left Shanghai on the 7th April for Tientsin, when about 120 miles north of Shaweishan, and close to the scene of the recent disastrous collision between the steamers *Ocean* and *Fusing*, came across a mass of wreckage, evidently the remains and part of the cargo of the last-named vessel. Captain Paterson lowered his boats, searched the spot, and was successful in finding Captain Andrews's desk floating, and containing a barometer, sextant, and some books and other property; twenty logs of timber and two boat's breakers were also salved. The *Chihli* saw no bodies. As accounting for this wreckage remaining so long close to the spot where the collision happened, it is said there is very little current or tidal way thereabouts. The *Nanzing*, which had been sent out with a number of coffins, in the hope of recovering some of the bodies, has returned from her cruise, having been unsuccessful, although every part of the locality was well traversed, and look-outs were kept at the mast-head and deck, from daylight to dark, for two days.

A Naval Court of Inquiry was held on the 12th April, at the British Consulate, under the presidency of Captain Buller, of H.M.'s ship *Modeste*, to investigate the circumstances attending the collision. The finding was to the effect that the instructions of the Board of Trade as to speed, &c., had been complied with by the master of the *Ocean*; though, considering the locality and thick fog that prevailed at the time, the Court were of opinion that the speed of the *Ocean* might have been still more moderated. The efforts of the master, officers, and crew of the *Ocean* to save the drowning crew and passengers of the *Fusing*, and their care of the survivors, merited praise, and the certificates of the master and officers were returned to them. The non-entry of the occurrence in the official log was censured, and will, together with the slovenly manner in which the engineers' and ship's logs were kept, be brought pointedly to the notice of the Board of Trade. The voluminous evidence and the finding of the Court is to be transcribed and translated for the satisfaction of the Chinese authorities, who took the greatest interest in the proceedings, the Court being numerously attended during the investigation by native officials of various grades. We are credibly informed that one reason why the Chinese authorities took such interest in the proceedings before the recent Naval Court was that the wives of two of the rice-mandarins drowned on board the *Fusing* committed suicide on the receipt of the news of their husbands' deaths. They were resident at Soochow.

The annual meeting of the North-China branch of the Royal Asiatic Society was held on the 12th April. The reports of the outgoing Council, of the Librarian, and of the Curator were read, showing that much useful work had been accomplished during the past year. The following officers were then elected to serve for the present year:—President, Mr. Medhurst; Vice-Presidents, Messrs. Wylie and Seward; Hon. Secretary, Mr. T. G. Smith; Librarian, Mr. Cordier; Curator, Mr. Pryer; Treasurer, Mr. Reding. Messrs. Kingsmill, Little, Johnson, Taintor, Rev. J. Thomas and Dr. Macgowan, members of Council. Mr. Wylie then read a continuation of the notes of the Archimandrite Palladius, with reference to the travels of Marco Polo. The present portion was mainly occupied with the districts lying north-west and west of the capital. The palace of the Yuen dynasty at Shang-du, the city of Cambalu and the palace there, the paper money of the Yuens, and the religion of the Empire, with many more topics of interest, formed the basis of the paper. Its reading was unfortunately rather prolonged, so that little time was left for discussion, or for the reading of the second paper of the evening, by Mr. Kingsmill. Mr. Kingsmill identified the Yueti with the Ephthalites of the later Greek writers, and the Kiangs with the Kuru tribes of Indian tradition. The latter enabled him to offer a reasonable explanation of the myth of the Emperor Shen-ming, which he felt disposed to assign to the early part of the Han dynasty, when intercourse with India was constant.

We learn from the Minutes of the French Council meeting of the 31st March that terms of arbitration about the Yang-king-pang encroachment have been at last definitely agreed on. The English Council are not conscious of having made any encroachment, but are willing that the question whether they have done so should be included among the points to be submitted to the arbitrators. These points are, then, to be as follows:—

1. Is the Yang-king-pang bund between the Rue Dicry and the Rue Touranne, in its present position, an obstruction to the navigation of the Creek?
2. Does it really prejudice the interests of property owners along the line of the Creek?
3. Have the (English) Municipal Council made encroachments on the North Bank of the Yank-king-pang? If so, are these encroachments an obstruction to the navigation of the Creek? and do they really prejudice the interests of property owners?

The English Council suggested the 5th April for submitting the question to the arbitrators, but the French Council protest that the excess of office work incidental to the close of the year prevents them from agreeing to that date. The Consul-General has suggested certain modifications (which are not related) in the electoral proceedings. The Council think changes should not be made on the eve of the election, and cannot give an opinion on the merits of those proposed without further consideration.

We hear of a serious row between some opium-smugglers and *li-kin* tax collectors in the city. Three of the former undertook to convey nine balls of opium into the city, evading the *li-kin* collectors. They were armed with stout bludgeons and an iron bar, and when, about noon, they were confronted by the *li-kin* men, a determined fight ensued. The smugglers, who were reinforced by two others of their number, had at first the best of the fight, some of the *li-kin* men getting a severe thrashing and, in two cases we are told, broken limbs. Later on, however, some thirty more of the *li-kin* collectors having turned out, the smugglers were overpowered, their opium seized, and themselves lodged in prison, where they await inquiry and punishment.

The subscriptions for the races this spring meeting amount, we hear, to upwards of Tls. 3,000:—This sum, we believe, compares favourably with the amount subscribed last year for the comparative event. The entries for the various races have been closed, with the following result. First day: Chu-ka-za Cup, 13; the Criterion Stakes, 17; Griffins's Plate, 42; the Jockey Cup, 15; the Visitors' Cup, 20; the German Cup, 20; the Members' Plate, 13. Second day: The Shanghai Cup, 14; the Shanghai Derby, 33; the Merchants' Cup, 26; the Engineers' Challenge Cup, 19; the Race Club Cup, 19; the Tsatlee Cup, 22; the Hurdle Race, 6. Third day: The Great Northern Handicap, 17; the Taoutai's Cup, 19; the Ladies' Purse, 24; the Brokers' Cup, 19; the Consolation Cup, 45; the Champion Sweepstakes, —; the Steeplechase Cup, 14. Numbers like these should bring some good fields to the starting-post; and, judging from the animated scene presented in the neighbourhood of the Grand Stand during the morning pows, considerable interest centres in the forthcoming meeting, which promises, under the favour of fine weather, to be a very good one.

The sixth half-yearly meeting of shareholders in the North-China Insurance Company (1872-4) has been held. The accounts showed a profit on the half-year of Tls. 141,844. This is the last ordinary meeting of the company of 1872-4, and the directors were empowered to wind up its affairs. A special meeting will be called shortly to pass final accounts. The new company (1875-7) has been started, and is working satisfactorily.

The annual meeting of the trustees and subscribers to the Chinese Hospital has been held. The accounts show that the new building is clear of debt, and there were Tls. 509 at credit of general account at the close of the year. The report showed that the hospital is more and more resorted to, and by better classes of Chinese. The question of inducing the Chinese to support the institution was much discussed.

The Customs officer on duty at Ningpo, on the arrival of the steamer *Hupeh* there, on the 5th April, in the course of his duty, in examining the baggage of the Chinese passengers, found two baskets containing about $3,000 worth of native jewellery. The man that owned them disappeared, and the Customs' authorities, in conjunction with the police, still have the articles in their possession, in the hope of obtaining some clue. The story goes that a murder has been committed in Soochow, and that the articles found are a portion of the stolen property. We cannot, however, vouch in any way for the truth of the tale, which we give as it has reached us.

Mr. Wade, C.B., British Minister at Peking, Mrs. Wade, and family have arrived here. Mrs. Wade and family proceed to England, and Mr. Wade returns to Peking.

The French men-of-war *Montcalm* and *Volta* have passed out to sea. H.M.S. *Vigilant*, with Admiral Ryder on board, came up the river on the 12th April.

A special meeting of land-renters at Chinkiang is called for the 24th April to consider the question of repairing and strengthening the Bund.

Digitized by Google

HONG KONG.

Our advices by the present mail extend to the 22nd April; the P. and O. mail from London March 5 was received on the 16th April. The following items of intelligence are from the *Hong Kong Daily Press*:—

From a return published in the *Gazette* of the revenue and expenditure, it appears that the total revenue for 1874 was $854,799.91, and the expenditure amounted to $921,479.54, showing an excess of expenditure over revenue of $66,679.63. The increased expenditure was incurred on public works and buildings. At first blush this would appear far from satisfactory; but a careful study of a comparative statement for the years 1873-74, shows that there is nothing to complain of. On the contrary, there is ground for congratulation, inasmuch as the revenue for the past year exhibits an increase over that of its predecessor of $7,475.56. The increase in the expenditure is satisfactorily accounted for. It arises almost entirely on the outlay for public works. Thus, in the sum spent on public works and buildings there is an augmentation of $91,464.05 over the expenditure of 1873, and the roads, streets, and bridges have cost $2,353.57 more in 1874 than in the preceding year. The disastrous typhoon of September last is no doubt responsible for no inconsiderable portion of the above amounts. There are also two items included in the expenditure of the past year which occupied no place in that of 1873. There has been $35,110.64 expended on lighthouses, and $4,445 for the purchase of land and houses. The foregoing sums more than balance the increment shown in the expenditure for the past year over that of 1873, and a large part of it may be regarded as capital well invested, since the expense will not need to be incurred again. The Surveyor-General has greatly improved the appearance and condition of Hong Kong, and its residents will, in view of the benefits arising from his labours, not grumble at the cost. In most other departments of the public service there is a slight decrease recorded, but most of this is swallowed up in the increase on the pensions, retired allowances, and gratuities, which increase amounts to $4,069.19. In the police department there is a decline in the expenditure of $12,025.97. Altogether, it is apparent that some regard has been paid to economy, and that the increased expenditure has been necessary for the good of the colony. We are no advocates of false economy, and do not grudge the outlay for public works when they are needed; but we trust the Colonial Treasurer will next year be able to show a balance on the right side; and this without impairing the efficiency of any department of the public service.

If it is true, as the *Rangoon Gazette* is inclined to believe, that the King of Burmah instigated or was accessory to the attack on the Burmo-Chinese Expedition, it will considerably complicate matters. The British Government waits to hear what Mr. Wade has to communicate before taking action in the matter. Perhaps it has been resolved to despatch two English officials to Momein partly on this account, since it is probable they may be able to gain some information there that may throw light upon the matter, and show how far his Majesty of Burmah has really been involved in the outrage. From his antecedents it is extremely probable that the King was opposed to the project of opening up a trade route overland. It is known that he is, like every other monopolist, an enemy of free trade. If he has indeed been guilty of participating in the dastardly attack which cost Mr. Margary his life, and brought the expedition to a sudden and unsuccessful termination, he will assuredly be brought to book for it. We have had troubles with Burmah before. If its ruler either cannot or will not control his subjects, and if, above all, he is disposed to act the part of a treacherous friend, the British Government will know how to deal with him. If it is shown to be necessary, there is no particular reason why his kingdom should not be absorbed in British Burmah. Such annexation, though not desired by our Government, would inevitably operate to the benefit of the people of the country.

From the annual report of the Colonial Surgeon it is satisfactory to find that the health of the police and military is much improved. There has been less sickness during the past year among the former than in 1873, and the deaths in hospital have been eight, as compared with eleven in 1873. There have also been fewer deaths among the troops. A new civil hospital is much needed, and Dr. Ayres is pleased to announce that a site has been secured for it, and the plans have arrived from England. The number of admissions to this hospital has decreased somewhat. Considerable damage was done to the old civil hospital during the late destructive typhoon. The health of the prisoners in Victoria Jail has been fairly good, only one death occurring during the year. The Contagious Diseases Ordinance has worked well in the colony. During the past year the European and American women have been brought under it. The general health of the colony has been fairly good, the death-rate not having increased appreciably.

An emergent meeting of the shareholders of the China Traders' Insurance Company has been held, to consider the position which the failure of Messrs. Augustine Heard and Co. had placed them in. Mr. Ray read the notice calling the shareholders together, and Mr. Parker explained the reason for the meeting. Messrs. Fearon and Co.'s failure he knew would seriously affect Augustine Heard and Co., and cause them to suspend. An extraordinary meeting was called for the 7th May, but as the China Traders' would be without a head when Augustine Heard aud Co. ceased to exist, the present meeting was convened to resign the General Agency, appoint some one to conduct the business until the meeting of May 7 was held, and to make arrangements with regard to the debt due to the Company. He stated the position of Messrs. Augustine Heard and Co.'s affairs as far as known to him, and read a statement of the present position of the China Traders'. Mr. Parker further stated that Augustine Heard and Co. owed the China Traders' $200,000, and read a memo. of their liabilities and assets as far as known to him. He thought there would be a fair dividend, but as regards Fearon and Co.'s affairs he could not give any information.

Mr. Deacon then proposed that the resignation of Messrs. Augustine Heard and Co. be accepted. This was seconded and carried. Mr. Hayllar proposed that Mr. W. H. Ray be appointed to carry on the business of the Company under the superintendence of the Consulting Committee, till the meeting of the 7th May, and sign policies for the Committee. This proposition was seconded and carried. A resolution was then proposed that the shareholders should give their assent to Messrs. Heard's deed of assignment, and this was also carried, after some discussion. The shares held by the partners of Messrs. Heard and Co. it was decided should be forfeited.

The aborigines of the fair island of Formosa seem determined to make it warm for the Chinese there. Rumours have been received at Foochow of more fighting near Taiwanfoo, in which, as before, the Chinese troops have come off second best. The savages are evidently unawed by any display yet made of Chinese military power, and hold their foes in no little contempt. There can be small doubt that the Imperial troops are either very cowardly or officered by inefficient poltroons. Probably there is some truth in both suppositions.

STRAITS SETTLEMENTS.

SINGAPORE.

The present mail brings advices from this port to the 29th April. The French mail from London 26th March was received on the 26th April. The following summary of the news is from the *Straits Times*:—

The trial of the convicts concerned in the recent outbreak in the Singapore Jail, which resulted in such lamentable loss of life, was set down to come on on April 26 in the Supreme Court, before a special jury. The special jurors assembled in answer to their summons; the Attorney-General and Crown Prosecutor, as well as Mr. Bond, who undertook the defence of the prisoners at the request of Government, made their appearance, and his Honour the Chief Justice took his seat. The Attorney-General immediately addressed the Court, and, being for the most part inaudible, was understood to make an application for the postponement of the case, as the depositions had not been all copied out, and Mr. Bond had not had proper time to read them and prepare the defence, having been asked to defend the prisoners only the preceding day. Mr. Bond was understood to say he would be ready to proceed in the course of a couple of days or so, but the Chief Justice thought it would be more expedient, especially for the convenience of the special jurors, to postpone the case, which is likely to be a lengthy one, for a week. The case was postponed accordingly. The postponement is certainly convenient, under the present emergent circumstances of two home-going mails during the week, but we would mildly remark that both Government and gentlemen of the law have been guilty in this instance, we do not say intentionally, of trifling with the time of business men, without any ostensible reason or cause whatever.

The weather, of which the denizens of Singapore have been the victims during the last month or two, must certainly be pronounced to be most trying. First of all came down-pours of rain

"which rain-ed every day,"

to the discomforture and confusion of owners and trainers of horses for the Spring Meeting, and to the general discomfort and ill-temper of everybody, and this compulsory seething-bath has been followed by an equally disagreeable drought, and heat enough to demoralise the most enduring and equal-minded of salamanders. The oldest inhabitant, we believe, has no recollection of such hot weather at this time of the year as we have had during the last month.

The French war steamer *Sarthe*, from Toulon, has arrived at the Borneo Company's wharf, *en route* to Saigon.

Commercial Report.

(For dates see first page.)

IMPORTS.

CHINKIANG.—Messrs. Spencer and Wolff write on the 12th April:—During the week under review the market for 8¼ lbs. Grey Shirtings

Digitized by Google

and 7 lbs. T-Cloths has been rather quiet, and we can only account for this depression by the fact that our dealers, having no confidence in the stability of the late improvement in prices, are consequently refraining from purchasing.

HANKOW.—Owing to the spring races there was not much doing in the market.

CHEFOO.—There was a small business doing, but at low prices.

SHANGHAI.—Beyond the clearance of former settlements, there had been little done in Piece Goods between the foreigner and native; but the deliveries—for the North particularly—had been heavy, and there were considerable shipments still to be made ere the dealers would give much of their attention to further purchases. The cargoes of the steamers that had gone to the North since the arrangement of "the difficulty" had not been published by the Customs. The native advices from Tientsin were not unfavourable, and the market was not likely to be much affected by the large supplies lately sent thither.

MANILA.—The market for Plain Staples had undergone little change, and values remained in most cases the same. Coloured goods were in much the same position.

SAIGON.—Messrs. Behre and Co.'s Report says:—Only a small business has been done, and almost all denominations are weaker, with the exception of 6 lbs. Irish Linen, which has advanced a few cents, owing to small stocks at the moment. Quotations: Grey Shirtings, 8¼ lbs., $2.25 to 2.27½ per piece; ditto, 7 lbs., $2; Irish Linen, No. 150, $1.50; Grey Supers, No. 0, $1.80 to 1.85; ditto, No. 1, $1.90 to 1.95; T-Cloth, 6 lbs., $1.57; ditto, 5 lbs., $1.20 to $1.25; ditto, 4½ lbs., $1.10 to 1.15; ditto, 4 lbs., to $1 to 0.95.

BATAVIA.—Business continued very quiet, and there had been no change of importance in quotations.

THE MAILS.

PRESENT INWARD MAIL.—MARSEILLES, MAY 25.—The Messageries Maritimes steamer Pei-Ho, with the inward French mails from China and Japan, arrived here to-day at 11 A.M. She brings 120 passengers and a general cargo, including 197 bales of silk, 12,167 packages of tea, 484 of tobacco, 238 of straw plaits, and 353 of sundries for London, which part of her cargo will be forwarded to its destination per Company's steamer Euphrates, due in London on or about the 7th of June.

HEAVY PORTION OF LAST INWARD MAIL.—GIBRALTAR, MAY 25.—The P. and O. Company's steamer Peshawur, with the homeward India and China heavy mails, leaves here at 6 P.M. to-day for Southampton, where she may be expected on the 30th inst.

HEAVY PORTION OF LAST OUTWARD MAIL.—GIBRALTAR, MAY 25.—The P. and O. Company's steamer Deccan, from Southampton 20th inst., arrived here at noon to-day, and left at 4 P.M. for Malta and Port Said.

OUTWARD MAIL OF APRIL 16.—SHANGHAI, MAY 28.—The P. and O Company's steamer Zambesi, with the London mail of the 16th of April, arrived here yesterday.

COMMERCIAL POSTSCRIPT.

The Hankow Tea market continues active, and large settlements have taken place. Musters of new season's Teas have arrived at Foochow, but the market is not expected to open for some time to come. The departures reported are the *Andromache, Lotus, Fleurs Castle, Glencarn*, and *Strasburg*.

Samples of new season's Silks have been received at Shanghai.

TELEGRAMS FROM THE FAR EAST.

SIR DOUGLAS FORSYTH'S MISSION.

RANGOON, MAY 27.—Sir Douglas Forsyth and suite, accompanied by an escort of four officers and eighty-four British soldiers, have left Rangoon for Mandalay in the steamers *Nemesis* and *Talifoo*. They are expected to reach their destination in a fortnight.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—May 28, at London, from Colombo, United Service (str.); 24, at Hamburg, from Hong Kong, Carolina; 28, at London, from Colombo, Arab Steed.

DEPARTURES.—May 28, from Glasgow, for Java, Berbice.

LAID ON.—At London, for Penang, Singapore, Hong Kong, Shanghai, Yokohama, and Hiogo, Timor; at Liverpool, for Singapore, Altair, Eastern Monarch; for Hong Kong, Beemah; at Glasgow, for Manila, Olano, Aurora; at Greenock, for Batavia, Sourabaya.

SPOKEN.—Edeline, from London to Singapore, April 5, 31.45 S., 26.10 W. Johannes, from Amsterdam, to Batavia, May 19, 46 N., 8 W.

MISCELLANEOUS.—At Port Said, May 27, Leon, from Liverpool, for Manila; 28, Bowen, from Glasgow, for Singapore; Thomas Sorby, from Amsterdam, for Batavia.

SEA OF JAVA.—ISLAND OF CELEBES.—The commander of the corvette Victor Pisani reports that on his voyage from Batavia to Macassar, finding himself at four miles to the south of the Bank Saars or Boot, and having observed a change in the colour of the water, he caused various soundings to be taken, and found successively 24, 22, and 26 metres, with a coral bottom. It follows that a bank exists, which extends about a mile in the direction from east to west. Its geographical position is:—Lat. 6° 4′ 30″ S., long. 118° 18′ E. of Greenwich.—Hydrographical Office of the Royal Navy, Genoa, May, 1875.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

FOSTER—On the 28th May, at 9, Vanbrugh-park East, Blackheath, the wife of Thomas Foster, jun., of a daughter.

MAPPIN—On the 27th May, at Blackheath-park, Kent, the wife of John Newton Mappin, jun., of a son, prematurely.

RAPHAEL—On the 8th April, at Shanghai, Mrs. R. S. Raphael, of a daughter.

MARRIAGES.

RUSSELL—KOPSCH.—On the 27th May, at St. Mark's, Surbiton, by the Rev. Charles Burney, vicar of St. Mark's, Logan Russell, Maple-road, to Charlotte Elisabeth Kopsch, daughter of A. J. Kopsch.

WHITE—LOVELL.—On the 24th April, at St. Paul's Cathedral, Calcutta, James Gordon White, second son of the Hon. J. White, Member of Council, Colombo, to Annie Elizabeth, eldest daughter of Capt. H. P. Lovell, Superintendent of the P. and O. S. N. Company, Calcutta.

DEATHS.

CAREY—On the 24th May, at Doyle-road, Guernsey, of scarlet fever, Frederica Alice, aged four years and eight months, and Ælian de Jersey, aged two years and seven months; the beloved children of Arthur Edward Carey, of Ceylon. Ceylon papers please copy.

HALLETT—On the 12th April, at Shanghai, Lyttleton Hallett, M.R.C.S., in the 31st year of his age, sixth son of T. P. L. Hallett, of Lincoln's-inn.

PARLIAMENT.

—o—

HOUSE OF COMMONS.

—o—

THE CHINESE ATTACK UPON KASHGAR.

Sir C. DILKE asked the Under-Secretary for India whether the Indian Government had any information as to the Chinese attack on the dominions of the Ameer of Kashgar other than that which had appeared in the newspapers; and whether any instructions had been sent to the British Minister at Peking upon the subject.

Lord G. HAMILTON said two despatches had been received from India, one dated February 20, and the other dated March 15, containing letters from Mr. Shaw, an officer on special duty at Kashgar. He stated in the first despatch that there appeared to be no immediate apprehension of a Chinese invasion; and in the second that it was currently reported that some chiefs had sent to the Ameer asking for assistance against Chinese attacks. Since then the Government had received no communication on the subject. With regard to the second question, he (Lord G. Hamilton) had referred to the Foreign-office, and had found that they had received no information relative to a Chinese attack upon the dominions of the Ameer of Kashgar, and that no instructions had been sent to Peking.

THE CESSION OF SAGHALIEN.

Sir C. DILKE asked the Under-Secretary for Foreign Affairs whether he could inform the House if any consideration had been paid by Russia to Japan for the recent cession to Russia by Japan of her rights in the island of Saghalien.

Mr. BOURKE said negotiations with regard to the island of Saghalien had been carried on at St. Petersburg between the Japanese Minister and the Russian Government, and Her Majesty's Government were informed a short time ago by the Japanese Minister that a convention was signed on the 7th of this month between Japan and Russia, by which Japan agreed to cede a portion of the island, and received in exchange the Kurile Islands, which were eighteen in number, lying to the north of Japan. He might add that the Russians already possessed a large portion of the Island of Saghalien.

Naval and Military.

A reward for Distinguished Services is vacant by the appointment of Lieutenant-General Henry Hope Graham, C.B., to the Colonelcy of the 77th Regiment, vacant by the transfer of General Lord Rokeby to the Colonelcy of the Scots Fusilier Guards. Lieutenant-General Graham joined the Army October 15, 1829, and became Lieutenant-General, November 25, 1874. He served in China from 1852 to 1859, and commanded the troops at Hong Kong during a portion of that period; was second senior officer, and commanded the 2nd Brigade of the expeditionary force employed against Canton during the operations before that city, and its capture in December, 1857 (C.B.); proceeded in command of a force to the Peiho River in June, 1858, and was present at the assault and capture of Nankow on August 11 (medal with clasp).

Notice is hereby given to the officers, seamen, and marines, and to all persons interested therein, that the distribution of the bounty awarded for services against pirates between the 8th and the 11th of May, 1872, by Her Majesty's ship Nassau, will commence on the 28th inst., in the Prize Branch of the Department of the "Accountant-General of the Navy and Controller of Navy Pay, Admiralty, New-street, Spring-gardens, S.W." The following are the shares due to an individual in the several classes:—Commander, £183 9s. 2d.; third class, £65 8s. 8d.; fourth class, £43 12s. 5d.; fifth class, £26 3s. 5d.; sixth class, £21 16s. 3d.; seventh class, £15 5s. 5d.; eighth class, £8 14s. 6d.; ninth class, £4 7s. 2d.; tenth class, £2 3s. 7d.

The Admiralty having decided that the Fawn, 5, sloop, 1,045 tons, 434-horse power, shall be fitted out as a surveying vessel for the China Seas, it has been floated out of the repairing basin at Chatham Dockyard, and work will shortly be commenced on board.

Messrs. W. B. Rock and E. L. Carte, engineers, formerly of the Iron Duke, flagship on the China station, have been appointed as supernumeraries to the Asia, at Portsmouth.

Lieutenant Francis H. Chapman (1873), late of the Swifture, is appointed to the Victor Emmanuel, Hospital ship at Hong Kong.

The Iron Duke, late flagship in China, is to be recommissioned in July, to take the place of the Aurora in the Clyde.

Captain Grosvenor Stopford (1873) is appointed to the Hornet, on the China Station, vice Commander Cameron, invalided.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, MAY 26.

Only a fortnight will now elapse before the general elections take place, and one half of the members of the Second Chamber must appeal to their constituents for re-election. Of course in every district new candidates are brought forward, and many seats will be disputed most energetically. Still the struggle will be somewhat quiet, because there is no leading political question to agitate the electors. Some time ago the Anti-revolutionary party endeavoured to rouse up the nation by the so-called "restitution question" (repayment by the State of a part of the outlay on behalf of private schools), but since the Minister of the Home Department has declared that the movement did not obtain his support the question has been postponed by the promoters till a more favourable opportunity presents itself. The elections have therefore more of a personal than a political character; Liberals and Conservatives in some districts having formed a coalition in order to defeat the clerical candidates. I should be much surprised if much "new blood" is introduced into the Chamber. I need scarcely add that the elections being near on hand, the Parliamentary business has afforded but little interest. The Mad Dogs Suppression Bill was carried, after it had been altered by the Minister, to please the Opposition, in such a sense that it has lost its efficacious character. At this moment the members are busy discussing the Bill proposing to provide us with a gold coinage. In a few days the Chamber will take recess, and will not meet again before the latter end of June, when they will deal with the Railway Bill of Mr. Heemskerk, the object of which is to complete our railway system, and proposes to construct, on account of the State, no less than five important lines. The members of the First Chamber met the day before yesterday in order to confirm the several Bills which had been previously carried by the Second Chamber.

At the Bourse a sort of agitation prevails, in consequence of a rumour that the Dutch Trading Company will not pay a dividend for the past year. The newly-appointed director, Jhr. Hartsen, seems inclined to make what we call a "clean ship," and to write off all bad debts. The dividend has been sold and bought largely by speculators at prices varying between f.60 and f.5. The question remains whether the debtors will be obliged to pay if there is no dividend, because in that case the sellers will be unable to deliver what they sold.

Mr. Loudon has not yet arrived in Holland, and report says that he is suffering from dysentery.

Yesterday a meeting was held by the shareholders of the Steamshipping Company "Java." A dividend of 6 per cent. was declared, and a proposal of the directors to issue a loan of f. 2,000,000 at 5 per cent. to build new steamers was approved of.

A sum of f. 33,412 59c. has been collected on behalf of the victims of the last inundations in Java.

Prince Alexander is ill; but his condition does not give rise to any anxiety.

The market for colonial produce has fluctuated considerably, and transactions have been small. Prices, however, are in general well maintained. Java Tobacco is much sought after, and high prices are paid.

Miscellaneous.

ROYAL GEOGRAPHICAL SOCIETY.

At the annual meeting of the Geographical Society, held on Monday, the 24th instant, Sir Henry Rawlinson in the chair, the following medals were awarded :—

The President, addressing Count Beust, said he was proud to be permitted to deliver the medals into the hands of a statesman so well known and so universally respected throughout Europe. The occasion was one the more worthily associated with his Excellency's name, since it was the first time during a long series of years that the Council had decided to award both its medals to members of the same expedition —that expedition, moreover, led by Austrian officers and supported by the private munificence of Austrian subjects, not only bearing honourable testimony to the maritime enterprise of the nation, but having also achieved the most important geographical discovery of modern times. Lieutenant Weyprecht, of the Austrian navy, and Lieutenant Payer, of the Austrian military service, had been associated for several years past in Arctic exploration. The President concluded as follows : —"By general consent this expedition, conducted by Lieutenants Weyprecht and Payer, is one of the most remarkable that has ever been made in the Arctic regions. It has especially attracted our admiration in this country as a noble instance of combined daring, skill, and endurance. We are further indebted in some degree to its successful termination for having stimulated our own Government to send forth the *Discovery* and *Alert*. We sincerely congratulate Austria on the achievements of her gallant children, and we request your Excellency, in presenting the Founder's Medal to Lieutenant Weyprecht and the Patron's Medal to Lieutenant Payer, to assure them that their English brethren hail them with cordiality and joy as worthy fellow-labourers in our common field of geographical discovery and research."

Count Beust, in reply, said he was fully sensible of the flattering terms in which the President had addressed him, and was sure his countrymen would also appreciate them and be proud of the testimonial conferred upon them. It was a substantial pledge of the appreciation in which their labours were held, a pledge which both his Government and his countrymen would highly value. He was acting in accordance with the desires of both when he tendered their sincere good wishes for the success of the brilliant and gallant expedition which was soon to set sail from these shores to carry England's Union Jack and her brave sailors to the far north. (Cheers.)

The President then presented to Colonel T. G. Montgomerie, of the Trigonometrical Survey of India, a gold watch to be forwarded to Mr. W. H. Johnson, the explorer of the Kuen Lun and of the Khotan.—Colonel Montgomerie returned thanks, and gladly undertook the charge of sending the watch to Mr. W. H. Johnson.

The annual geographical medals offered by the Society to the chief public schools were then presented to the successful competitors as follows :—Physical Geography—Gold medal, Henry Alexander Miers, Eton College ; bronze medal, Archibald Edward Garrod, Marlborough College. Political Geography—Gold medal, Sidney H. B. Saunders, Dulwich College ; bronze medal, William C. Graham, Eton College.

While the ballot for the officers and council was proceeding, the President announced that the Council had that day nominated his Royal Highness the Duke of Edinburgh honorary president. His Royal Highness had intimated his willingness to attend the meetings from time to time, and to take the chair on occasions. It was, he said, a matter for congratulation that the Royal family took such interest in the Society. Her Majesty was patron, the Prince of Wales vice-patron, and now the Duke of Edinburgh was honorary president. The result of the ballot was shortly afterwards declared. Sir H. Rawlinson was re-elected president, and Lord Cottesloe was elected a vice-president, the list proposed by the Council being unanimously adopted.

The President then delivered his address, in which he congratulated the Society on its increased and ever-increasing prosperity. The register now exhibited the imposing total of 3,035 fellows, of whom 2,960 were ordinary and seventy-five honorary, and honorary corresponding members. The income had also steadily advanced, until it now exceeded £7,000 per annum, and if they might judge from the repeated references that were made to them on geographical subjects from all parts of the world, their reputation and influence had certainly not diminished. It must indeed be a gratifying reflection to the Fellows of this Society that it was mainly owing to the urgent and persistent arguments impressed by their successive presidents on Her Majesty's Government, and supported by the full weight of their unanimous approval, that the great national undertaking of a Polar expedition had been at length accomplished. The Council did not take any especial credit to themselves for the success which had thus attended their efforts ; but they did feel proud as representatives of the Society in having contributed to launch an enterprise which, as they believed, would not only yield the most valuable scientific results, but would redound to the honour of England, and raise still higher the professional character of British sailors. The losses by death during the period under review had been exceedingly heavy, the obituary list commencing with the honoured names of Sir C. Lyell, D'Avezac, and Sir H. Kellett, and closing within these few days with the names of Mr. Findlay and Admiral Sherard Osborn, who, beloved and respected in this society, were also among the foremost geographers of the age.

THE DINNER.

In the evening the members of the Society dined at Willis's Rooms —the President in the chair. Among those present were :—His Excellency the Swedish Minister, the Duke of Manchester, Lord Cottesloe, Lord Houghton, Mr. Robert Lowe, M.P., Sir T. F. Buxton, Bart., Sir Rutherford Alcock, Chevalier Charles de Scherzer, Sir Louis Pelly, Dr. Hooker, Admiral Ommanney, and Sir Bartle Frere.

The Chairman, in proposing "The Prince and Princess of Wales and the rest of the Royal Family," remarked that the Prince of Wales had been a great traveller, and was going to add to his knowledge of foreign countries by visiting India under the guidance of the late president, Sir Bartle Frere. (Cheers.) The Duke of Edinburgh had seen probably more of the globe than had three-fourths of the persons present. He had, moreover, accepted the position of honorary president of the Society, and had expressed his readiness to take the chair on evenings when subjects connected with his profession were treated of. The Duke of Connaught also had been a great traveller, and had but just returned from an expedition to the Upper Nile. (Cheers.)

"The Army, Navy, and Reserve Forces" was next given, and responded to by General Rigby for the army, Admiral Ommanney for the navy, and the Duke of Manchester for the reserve forces.

The President next gave "The health of the medalists, Lieutenants Payer and Weyprecht," who had been awarded the medals for their discoveries made in the *Tegethoff*. Lieutenant Payer had lain down a cape which he called Cape Vienna, in eighty-two degrees north latitude, the land furthest north as yet according to our knowledge.

The Chevalier Charles de Scherzer returned thanks for his countrymen, and added thanks for the frequent and important aids afforded him on his voyage round the world by the English Consuls in all parts. The Chevalier went on to allude to free trade, which he thought the true cure for the bad state of commerce, and concluded by the sentiment, "Prosperity and welfare to the British nation, the noble link of the great Anglo-Saxon race."

Sir Bartle Frere gave "Prosperity to the Universities—Oxford, Cambridge, and London," coupled with the name of Mr. R. Lowe, of whom he might say that all would agree in thinking that that young giant, the University of London, could not have made a better choice than in selecting him for its representative. (Cheers.)

Mr. R. Lowe said he thoroughly agreed with the last remark of Sir B. Frere, namely, that the University could not do better than continue him as its representative. (Laughter.) The Geographical Society was one which had his most sincere and hearty respect, for he thought it filled a want which ought to be supplied. We could tell the parallax of Sirius, but there was still a large portion of the surface of the earth which was still unknown to us. Some gentlemen had spoken of the support afforded to societies like this, but he (Mr. Lowe) could not call to mind that Government gave them any support. (Laughter.) He thought that this Society ought to put before rich people the fame and glory to be gained by fitting out such expeditions as that to the Arctic regions.

Sir Charles Nicholson gave "The British Colonies and the Geographical Society," for which Sir George Bowen returned thanks.

Sir Bartle Frere proposed "The health of the President, Sir Henry Rawlinson." The President, in returning thanks, said it was not altogether an easy matter to rule over 3,000 members. He could not manage it but for the help he received from the officers of the Society. He then proposed "The Travellers," coupling with the toast the names of Mr. Forrest, the Australian explorer ; Captain Chapman, lieutenant to Sir Douglas Forsyth in his Kashgar expedition ; and Sir Louis Pelly, each of whom returned thanks.

SAGHALIEN.

A letter from St. Petersburg to the *North German Gazette* explains at great length the value to Russia of the newly-acquired dependency, Saghalien, and gives some particulars of the island. It is, it appears, 892 versts long (that is, about 600 miles) and 136 versts broad (that is, about ninety miles). At one place it is only twenty-five versts (about fifteen miles) broad. Its population is no more than about 15,000 souls, of whom 3,000 are Russians, but only fifty are Europeans or Americans. There is a Russian garrison of 600 at Dhui, which is the principal settlement in the island, and also some artillery. The object of maintaining this garrison, at any rate during summer, is not apparent, for the deported persons detained at Saghalien could not escape if they tried. The sea all round is far too dangerous. At the time of the Crimean War the garrison was removed to the Siberian continent. In winter the sea is frozen over for the space of four months, and then the passage to Siberia is effected by sledges drawn by dogs. Russia appears always to have had a hankering for Saghalien, long before its value as a colony was known. Indeed, it disputes the priority of occupation with the Japanese. In 1807 the Russian Lieutenant Choostoff formally took possession of it as a Russian dependency, but in 1813 the Russian Government declared that occupation invalid (*non avenue*). Since then Japan has gradually acquired possession of the southern half, whereas the northern has always been indisputably under Russian Government. There has been a good deal of friction between Russians and Japanese concerning the possession of the island, but, valuable or almost invaluable as it is to Russia, it would be useless to Japan, owing to the difference of climate. The Japanese cannot acclimatise themselves in cold Saghalien ; to the Siberians it seems like home. Saghalien, though at present extremely poor—there is but one merchant's firm settled in the island doing any business to speak of—is valuable by means of its rich coal mines. It has inexhaustible treasures of sea coal almost equalling the best Newcastle, and also of anthracite, which is a very useful fuel. This fact alone would invest the island with importance as a site for a Russian naval station. But over and beyond this Saghalien holds a most enviable tactical position. It commands and protects the mouth of the river Amoor, a channel of communication with a great future, and also the sea of Ochotzk. It is therefore all-important for Russia to have possession of it. Saghalien itself has no good harbours, but the sea of Ochotzk has the best that could be found on the earth, and Saghalien protects them. Russia possesses no such second opportunity for giving a secure and advantageous basis to its naval power. Otherwise Saghalien is not favoured by nature. Corn will ripen only in a few sheltered valleys ; otherwise the climate is too severe, and much will have to be imported from the mainland. The same climatic influences hinder the breeding of cattle. But coal has, as observed, been found at numerous places. It is not known what *quid pro quo* the Czar has given for the possession of the valuable island, but it is not believed that Japan would have ceded its rights for nothing.

The *Daily Telegraph* says :—What inducement operated with the Japanese Government to surrender their moiety of the great Siberian island is not stated ; but the Mikado, or whoever transacted the affair,

Digitized by Google

must have known of the coalmines which render it so important; and Saghalien forms a part of the Japanese Archipelago, so that there must have been, one would imagine, a "consideration." The great difficulty with the Russian Navy has always been the want of suitable timber—the larch and fir woods which have been employed in building upon the Baltic and White Seas wear out very quickly in the fresh water—and we have not heard that Saghalien possesses iron. But the forests on the Amoor are immense, although the trees are small, and we shall see this acquisition followed by a quick increase in the navy of Siberia. Before the time of Peter the Great Russia did not own a single port except Archangel, and possessed only one small vessel of war; now she has six separate fleets—those of the Baltic, the Black Sea, the White Sea, the Amoor, the Aral, and the Caspian. Her latest settlement will give her the opportunity for a new development upon the wide waters of the Pacific, of which she is sure to make use; but it is with reference to Central Asia, China, and Japan that Saghalien is chiefly important. The Celestial Kingdom is certain to become more and more prominent in Asiatic politics; its huge population is seething with the impulse of emigration like a hive of swarming bees; its Government is at once unsettled and arrogant; and China means, be it remembered, a fourth part of the whole human race. To and fro across the Pacific will pass the greatest commerce of future years when the Southern islands are all brought into civilisation, and the young Empires of Australasia open active relations with the Old World shores of India and the East. Saghalien will be useful in those days if Russia has not become to big to hold together as a separate country, and if the Government at St. Petersburg knows how to utilise the advantages which nature conceals behind the mists and snows of the Siberian coast. There is no reason why we should envy the Czar the chilly acquisition which he has made; Russia civilises after a fashion, and breaks up the fallow of Asiatic heathenism—better, perhaps, than a finer implement. But there is much reason why our Foreign-office and its *employés* should watch and understand the course of these distant events, and they would be particularly well employed if they bore in mind the importance of the coal supply in connection with the future of trade and influence in these Pacific Seas.

THE SUEZ CANAL.

Consul West, in his report to the Foreign-office on the trade of Suez during last year, remarks:—"This year has brought to a termination the work at the docks, which are now as complete as they are ever likely to be, as the necessity for them, with the exception of the dry-dock, is now hardly felt, and one quarter of the money judiciously laid out at Suez would have been far more useful, and would have tended far more than the docks do to facilitate the local traffic, and consequently to develop the existing trade of the Red Sea. The number of vessels which pass through the Suez Canal continues slowly to increase, but to give a fair estimate of the increasing amount of traffic it is necessary to take the number of vessels and the total amount of gross tonnage, as such was the measurement adopted throughout the whole of the year 1873. For the last eight months of the year 1874 the Canal dues were levied on the register tonnage of vessels at an almost invariable rate of f.13 instead of f.10 per ton. The annexed statement, therefore, shows also, but approximately only, the register tonnage of vessels which entered the Canal during those last eight months, and from it the following conclusions may be drawn touching the result of the enforcement of the views of the International Commission during that period. In the course of the eight months ended Dec. 31, 1874, 812 vessels entered the Suez Canal, representing a gross tonnage of 1,600,892 tons, which, at f.10 per ton, would have produced f.16,008,920; or a net register tonnage of 1,087,989 tons, which, at f.13 per ton, would have produced f.14,145,857, making a difference of 512,903 tons, and a reduction to the company's income of f.1,865,063, or £74,602 in the eight months. This return also leads to the conclusion that, for the years 1875, 1876, and 1877, the dues will probably remain as they now are, at f.13 per register ton, after which period, having attained the yearly total of 2,100,000 tons, should the traffic still continue to increase in the same proportion, an annual reduction of f.1 for every register ton may be expected, should no further modification of the Canal Dues intervene."

"No amelioration whatever," remarks Consul West, "has taken place at Suez with respect to the filthy and neglected state of the town. The native population being no longer able to earn a livelihood by providing the necessary supplies and shipping accommodation for the pilgrims, and the effect of the Suez Canal having been to draw off all call for labour on the part of Europeans, there is now much dissatisfaction and even distress among the native inhabitants of the town, while, at the same time, they are subjected to very heavy local dues, from which, in former years, they were exempt; which dues, although levied on the townspeople, go to the Egyptian treasury on a system of centralisation which is neither conducive to the improvement of the town nor to the comfort of its inhabitants. Such innovations are at all times attributed to European influence and 'infidel' principles, and the feeling they create towards Christians in general and Europeans in particular is certainly not conciliatory. Religious manifestations are on the increase, and the feeling (such being the usual effect on the native mind of such a state of latent and morbid excitement) manifests itself in an overbearing and even at times threatening attitude on the part of the Moslems towards native Christians. It is true that there are always a certain number of men, military or naval, stationed at Suez, but whether such a force would tend to quell a disturbance or act in a contrary way is quite a matter of opinion, and must depend upon the views of the person in command of it. The prospect of a revival of trade at Suez would seem at present to hinge upon the desire of the Khedive to foster its development, but so long as he wishes to retain the monopoly of the Red Sea trade in his own hands the prosperity of Suez will continue to be held in check. Suez might become an *entrepot* of increasing importance were facilities given at the new docks for such traffic. Vessels, not unfrequently, would land cargo here destined for Jedda, while cargo from the Red Sea Ports would be brought to Suez for the purpose of further shipment to Europe on board vessels proceeding through the Canal. An *ad valorem* duty of 8 per cent. is leviable on all goods imported; the Treaty, however, stipulates that should such goods be exported within six months of the time of their being landed, seven-eights of the duty paid on them is to be refunded, leaving a transit duty of 1 per cent. only to the benefit of the Egyptian Custom-house. The disbursement of the 8 per cent. duty, in the first instance, is sufficient, to deter people from landing their goods in the country, while, at the same time, the prospect of a refund of any portion thereof, after the goods had been reshipped, would be very doubtful, as the machinery for meeting such a contingency does not exist. If the Egyptian Government were to erect suitable premises at the dock for the reception of such goods in bond under the simple payment of 1 per cent. duty, plus a moderate charge for store rent, I have little doubt that ere long they would be availed of, and Suez would probably become the emporium of an increasing transhipment traffic, which, if it did little towards increasing the Viceroy's revenue in a direct manner, would provide work for the natives, and be thus conducive to the prosperity of the place."

The *Eastern Budget* states that M. de Lesseps has again been in negotiation with the Powers respecting the Canal dues. The revenue of the canal being now more than f.30,000,000 a year, the tariff should, according to the rule laid down by the International Commission, be lowered. M. de Lesseps, however, argues that a reduction of the dues is impossible, as extraordinary expenses will have to be incurred this year for the canal. The entrance at Port Said is to be deepened and otherwise improved; the harbour at Lake Timsah must be enlarged, and the bend in the canal at Ramlej must be removed in order to facilitate the navigation. These works would alone cost at least f.30,000,000. M. de Lesseps has sent his son to Constantinople to continue the negotiations on this question.

THE IRON TRADE.—According to accounts from Wolverhampton "foreign competition was never severer. Belgian spike and bolt makers have just undersold Staffordshire by £8 a ton in an East Indian order, and by £5 a ton in a Finland order, while makers in France have shamefully beaten us in an order just distributed by the London, Brighton, and South Coast Railway; yet operatives here are demanding large concessions from employers." Much the same story has been heard lately from various other centres of the trade; here and there there are partial exceptions, but, on the whole, there is a general complaint of inactivity, and a general impression that, to judge from the present aspect of affairs, the process of recovery will be slow. It might have been expected that the long duration of the strike in South Wales would have cleared the market; this, however, does not seem to have been the case; the "make" is still ahead of the demand, and from one place we even hear "it is feared whether the manufactured iron trade will not be disadvantageously affected by the recommencement of work in Wales." The rate at which competition has been overtaking us may be estimated from a single example—that of the United States, where the production of iron has been quadrupled within the last twenty years. Mr. Lowthian Bell, late President of the Iron and Steel Institute of Great Britain, recently stated before the Society the results of his visit to the iron mines and iron works of the United States, and the principal results of his observations are so instructive as to merit more attention than, perhaps, at the moment they received.

RUSSIA IN THE FAR EAST.—At last week's conference of the Society of Arts a paper was read by the Rev. J. Long on "The Russian Advance in Central Asia, and its Aspects, Commercial and Social, toward India and the East." The chief topics dwelt on were the importance of maintaining good relations between England and Russia in the East, the danger from their proximity that threatened to disturb those relations; the social influences of Russia as a slave or semi-oriental Power in the East, and its gradual effects in undermining the false civilisation of Mohammedanism; the feudal influences of Asiatic chieftains, and the necessity of England regarding Indian questions from an oriental as well as an imperial point. Information derived from Russian sources was given, and the past commercial relations between Russia and the East and on the proposed railway to unite Eastern China with Russia, *vid* Mongolia and Central Asia, along the ancient trade route of the Black and Caspian Seas. The recent concession of a Tiflis and Teheran railway will facilitate this, and also serve as a basis for extending a railway line to the Indian frontier. The danger of the two great empires drifting into collision is so manifest and appalling, that it behoves us to be up and doing in all earnestness and without delay.

DR. GUNDERT'S Malayalam dictionary, which has just been published at Mangalore, on the Malabar coast of India, is a superbly-printed work, the Malayalam characters being rendered more clearly and uniformly than they have, perhaps, ever before, except in Dr. Burnell's subsequent pamphlets. It would be superfluous to praise the work, which is simply the result of the life-long labours of one of the ablest Orientalists who have made India their home. Dr. Gundert has done as much for Malayalam as Mr. C. P. Brown has for Telugu, Mr. Molesworth for Mahratti, Dr. Caldwell for the Dravidian languages, Mr. Hodgson for the Himalayan dialects, and Mr. Beames for the Prakrits.

THE GEOGRAPHICAL CONGRESS AT PARIS.—Lord Derby, in reply to Lord Houghton, stated that the Government had intimated to the Geographical Society their willingness to name as Commissioner to the approaching Geographical Exhibition at Paris any person whom that society might name, on the understanding that no expense was on that account to be borne by the public Exchequer. The Geographical Society did not think right to accept that offer, and he understood that they were now about to send out a gentleman on their own account.

WITH reference to the collision between the *Fusing* and the *Ocean* we learn by telegram that the Supreme Court of Shanghai has decided that the damages should be equally divided.

THE WESTERN CHINA EXPEDITION.

THE Duke of ARGYLL, as long as he was at the India-office, steadily resisted all the pressure put upon him to charge his Government with the responsibility and expense of surveying a trade-route across the Burmese frontier through the hill-tribes into China. And, now that disaster has overtaken Mr. MARGARY, there are, doubtless, many who will maintain that the Duke was right. Be that as it may, it is too late to balance the chances of success against the risks of failure; to compare and examine the competing routes towards the same goal; or to discuss the value of the possible trade which might be attracted from Sze-chuan to Bhamo. So far as our information at present extends, our Government is taking the right course to avenge Mr. MARGARY'S death. Two of the English officials in China — competent men both—are to proceed with a Chinese Commission into Yunnan, and carry out an inquiry into the outrage on the spot, in order that the offenders may be punished. What the Peking authorities would like best, if they were not ashamed to say so, would be to drag up five or six criminals from Yunnan, execute them as the nominal authors of poor MARGARY'S death, and pay £50,000 compensation to the murdered man's family; the British Government on its side tacitly acknowledging the folly of wandering in search of roads among untameable bloodthirsty mountaineers, and desisting for ever from attempts to interfere with that valued Chinese monopoly—that jealously-guarded treasure—the trade into Thibet. But Chinese ways are not English ways; we cannot allow anybody to be done to death without preliminary inquiry; so let us hope that Messrs. GROSVENOR and COLBORNE BABER will get at the truth of the matter, and see retribution brought home to the really guilty parties. That the King of BIRMA had any hand in the disaster we discredit. Pecuniarily it is all to his advantage to draw commerce down through his realms. He has everything to dread from the displeasure of Great Britain, and he at least knows our power, and that he is not too far off for us to deal with him. Moreover, just now, when a dispute has been brewing about a bit of frontier line, to plant a treacherous outrage upon our survey party would not be exactly the course to secure a friendly and advantageous settlement. LEE SIE, the Chinese *general*, significantly so called, is announced as a recent visitor at Mandalay, the bearer of despatches from Peking. This mountain chief commands one of those border-tribes which the Chinese treat with a long-settled policy, and have entirely under their control. Useful men these frontier hill-men have always proved themselves to their Celestial patrons as stop-gaps to intrusion from the West, and it was LEE SIE'S nephew, so at least we believe, who headed the attack on Colonel BROWNE. Of course LEE SIE has since shown himself at Mandalay, and tried, by "despatches from Peking," to compromise the King of BIRMA. If he had been acting all along under Burmese, and not under Chinese, orders we may be quite sure that he would done precisely the reverse; if the KING and he really laid the plot, LEE SIE would be skulking in his native jungle, and the King of BIRMA would be protesting that he was a wild desperado, outside Burmese jurisdiction, and that the whole blame must be laid at his door.

We feel very sure that whatever took place was entirely under secret instructions from China; the King of BIRMA'S complicity is merely a blind; the efforts of the Chinese officials will be exerted to conceal the truth, to raise doubts as to who ought really to be blamed, so that in the end no one may be punished. Thus the evidence provided at the local inquiry will all go to show that the attack was made by a few misguided savages, independent in their hill-fastnesses, and out of reach; while skilful attempts will all the while be resorted to that the current of suspicion may drift towards the Burmese Government. In the end, some one or other may possibly be punished; if nothing else serves, the local mandarin can be temporarily degraded, and there will of course be a pecuniary compensation paid; but the moral which the Chinese will seek to instil into our minds all through the proceedings is that no more foolhardy attempts should be made to pierce the jungles of these savage tribes. We sincerely hope that our Government will accept no such doctrine. Even if the undoubtedly great commercial interests at stake in this question are not sufficient inducement to us to persist in the work we have already taken in hand, we cannot afford to let the Chinese statesmen beat us by a resort to unscrupulous devices. Every check we submit to carries with it a loss of prestige, and whatever we lose in prestige must be made up for, sooner or later, by more costly and more forcible means. Successful in this instance, the Chinese will assuredly try the same game on us elsewhere when the occasion arises, and consequently we have but one statesmanlike and honourable course open to us—let a second expedition be at once set on foot to carry out the original instructions. We shall succeed this time, first, because those in charge of the party will not be so blindly and incautiously trustful of the natives and their friendly assurances; secondly, because when the Peking Government really sees that we are not to be deterred, that we really mean to carry the matter through, they will hardly think it worth while again to try and upset the train by laying a stone on the rail; or, in plain language, by sending a cowardly handful of ignorant savages to cut down one of the party when off his guard. To resume operations as soon as the cold season arrives is the one thing to be done; and as we notice a telegram —which, by the way, needs confirmation—that Colonel BROWNE has gone up to Shanghai, we may hope that the object of his journey is to consult with Mr. WADE, and make the arrangements necessary for a fresh expedition. Mr. ELIAS and Mr. ALLEN are said to be waiting orders at Rangoon. We cannot take leave of this subject without again dwelling on the importance—should any overland route to China be seriously contemplated—of strengthening our control over independent Burmah and her tributary Karen tribes. Great Britain alone can keep the road open, in a condition for traffic, free from robbers, and with no border chieftains to levy dues on commodities from stage to stage. Great Britain must, so to speak, take the road with her up to the Chinese frontier, and must, therefore, occupy, herself, a strip of territory sufficient for that purpose. Above all, we must urge that the commission stipulates that the original intentions of the expedition be carried out.

CHINESE ATTACK UPON KASHGAR.

IT seems somewhat extraordinary that no definite and positive information should be in the hands of H.M.'s Government respecting the supposed intention of the Chinese to attack Kashgar, of which rumours are current both in Europe and in the Far East. In reply to a question put to him on the subject in the House of Commons by Sir C. DILKE, Lord G. HAMILTON, speaking on behalf of the India-office, stated a few nights ago that all the information which his department had, other than that which had been published in the newspapers, was contained in letters from Mr. SHAW, an officer on special duty at Kashgar, which had been forwarded in recent despatches from the Indian Government. In his first communication Mr. SHAW remarked that there appeared to be no immediate apprehencion of a Chinese invasion, and in his second that it was currently reported that some chiefs had sent to the AMEER asking for assistance against Chinese attacks. This is all that our Government has to tell us on a not unimportant

Digitized by Google

matter, for, in answering another part of Sir C. DILKE'S question, Lord G. HAMILTON further stated that he had referred to the Foreign-office, and had ascertained that that department "had received no information relative to a "Chinese attack upon the dominions of the Ameer of "KASHGAR, and that no instructions had been sent to "Peking." We are bound to say that this strikes us as a little odd, for surely some trustworthy intelligence might have been procured at Peking at the expenditure of a very small amount of diplomatic ability and energy on the part of our representative. As regards Mr. SHAW'S communications, his second statement may possibly be explained by the St. Petersburg telegram of May 11, which informed us, on the authority of the *Turkestan Gazette*, that the Chinese commander-in-chief, with the forces under his orders operating against Kashgar, was expected to reach Shikho at the beginning of April, in order to besiege Manasse, and that at the same time another body of Chinese troops would commence operations against Urumtsi. Judging by all that we have recently been able to glean respecting the position of affairs in Eastern Turkistan, it seems a fair inference that the chiefs to whom Mr. SHAW alludes are those of the Tungans, who form the mainstay of YAKOOB KHAN'S power on the side of China. It will be within the recollection of our readers that we called attention to this very phase of the matter even before the arrival of the above-mentioned telegrams from St. Petersburg, our words being, "It is stated that the troops stationed at Barkul and Hami "will soon be set in motion against Kashgar, while others "are preparing to march against the Tungans of Umrutsi "and Manasse." Under all the circumstances of the case, and presuming, of course, that the Russian sources of information are trustworthy, it seems inevitable that some severe collision must take place during the present summer between the armies of Kashgar and China, and who can foretel what will be the result?

THE CESSION OF SAGHALIEN.

A FORTNIGHT ago we published a telegram from St. Petersburg to the effect that a convention had been signed there, by which Japan had agreed to cede to Russia her portion of the island of Saghalien, but no mention was made of the terms on which the cession had been made. Sir C. DILKE, however, who takes a very useful interest in matters relating to the Far East, has put a question on the subject in the House of Commons to the Under-Secretary of State for Foreign Affairs, and has elicited definite information as to what at first sight appeared a one-sided and rather mysterious contract. According to Mr. BOURKE'S reply, the Japanese Minister in London has informed our Government that by the Convention of May 7 Japan is to receive in exchange for her portion of Saghalien the Kurile Islands, eighteen in number, which lie to the north of Japan. We think that the Japanese have exercised a wise discretion in consenting to give up to Russia their rights, whether supposed or real, over the southern part of this long, straggling island, for the joint occupation of it by the two Powers must inevitably have led in the long run to difficulties and complications between them, the result of which it would not be a hard matter to forecast. Besides these prudential reasons, Saghalien is so placed as regards the Amoor territory that it certainly seems more natural and convenient that both should belong to the same Power. That the Russians will turn the island to much better account than the Japanese would ever have done there cannot be much doubt, and we already hear that its extensive coal-fields are to be worked by Russian engineers and miners, and that it is intended to employ for this purpose a large number of the convicts from Siberia. As regards her new possessions, the Kurile Islands, which extend from the northern shores of Yesso, across the mouth of the Sea of Okhotsk, to the Kamtschatka peninsula, it is not so easy to see what use they will be to Japan, but we suppose that it was only seemly that she should have a *quid pro quo*, and that Russia felt she could safely surrender them without doing herself any injury.

A STATEMENT has appeared in the City article of the *Daily Telegraph* to the effect that a Bill would be presented to the National Assembly of France with a view of annulling the contract and subsidy for the various mail services now performed by the Messageries Maritimes. The expectation is that a much lower rate of subsidy will be established. The statements and figures put forward are all more or less erroneous; in the first place the Bill is a private one, presented by M. GUICHARD, and not by the Finance Minister on behalf of the Government. The contract with the Government does not cease in July next, but at that time it is open to "notice" or revision. The comparisons made between the Messageries and the P. and O. Company are manifestly too absurd to require any refutation. As usual, the *Daily Telegraph* has drawn its own sensational conclusions, and stated them as facts.

THE report of the Directors of the P. and O. Company, which will be found in another column, announces that the working of the service for the half-year does not warrant the payment of any interim dividend. We are not surprised at this, and shareholders who are familiar with the ruling rates of freight to the East, will be able to appreciate the enormous reduction in the earnings of the company, and will commend the conduct of the Directors in postponing the question of dividend.

THE P. AND O. COMPANY.

The P. and O. Company's Report, to be presented at the meeting on June 8, states:—

The directors regret to state that the result of the operations of the half-year is less favourable than it has been for many years. After deducting from revenue the current expenditure, and after making the usual reserves for depreciation and insurance, there remains a profit on the working account, but not such as to justify the directors in recommending the payment of an interim dividend at the ensuing meeting. The causes which have led to this diminished profit are, first, reductions in the mail subsidies; secondly, and more particularly, a deficiency in receipt on the Company's lines to and from Bombay. With regard to the first of these circumstances, the directors have in previous reports explained that the Australian subsidy is £40,000 per annum less than formerly, and that the Imperial subsidy is £20,000 per annum less, besides being now subject to deductions for heavy penalties for delay arising from bad weather and other causes of detention over which the Company has no control. The result is a diminution under the head of Subsidy in the revenue for the six months ended 31st March, 1875, amounting to £22,000 as compared with the same period of 1874. The falling off in the earnings of the Company's Bombay Lines, outwards and homewards, as compared with the same period of 1874, is more serious, and to account for the unfavourable position of this Service, it is necessary to give some particulars of its working.

As most of the proprietors are aware, the Company maintains a weekly communication between Bombay and London, with a branch service to Brindisi and Venice. The bulk of the Bombay trade, taking the outward as well as the homeward business, is compressed into the period from October to April; and during the other five months of the year, from May to September, the shipments from either side are generally of a limited character, and the number of passengers small. It follows that the Company's steamers must run at a loss during this latter season of the year, when it is no uncommon thing for the steamers to be only half full of cargo, and to have but ten or twelve passengers on board. Against the loss thus incurred the Postal Subsidy can only be a partial set off. The busy season is therefore expected to leave such a profit as to recoup the loss entailed during the other months of the year; but during the past busy season the freights have been considerably lower than at any former period.

It will convey some idea of the condition of this trade to state, that outward freights from London to Bombay were seldom more than 25s. per ton between October and March this year, and that frequently steamers competing with the company were receiving goods in Liverpool at rates equivalent to 15s. per ton free on board at that port. A rate of 25s. in London only leaves 15s. for the 6,000 miles voyage to Bombay after deducting the charge for passing the Company's Steamers through the Suez Canal. But even at this freight it was frequently impossible to fill up the vessels, and when this could be foreseen the vacant space in the holds was filled with coals.

With regard to homeward freights from Bombay the comparison with last year also shows an unfavourable result. The Company has had to accept on the average about 20s. per ton lower freight than for the corresponding six months of 1873-1874, and the rate was then low. Upon the cargo tonnage despatched by the Company from Bombay in this period this depreciation represents a heavy amount. It may cause surprise that a trade of this kind has been carried on by private shipowners. But the fact is, that very few of the vessels competing with the Company on the Bombay line can be considered as regular traders. They are to a great extent chartered on speculation by European and Native firms to bring home cotton, and whatever loss they sustain is probably widely divided. A further disadvantage with which the Company had to contend last season was that the Austrian Lloyd's Company of Trieste, and the Rubattino Company of Genoa, respectively supported by the Austrian and Italian Governments, each ran a fortnightly line to Bombay during the four best passenger and cargo months of the year, namely, from January to April, and reduced their service to a monthly line when trade became slack. This arrangement necessarily interfered with the Company's freights, but as far as the passenger trade was

Digitized by Google

concerned, which these lines might be expected to affect, it is satisfactory to note that the Company took on the whole more passengers from Bombay than during the corresponding period of the previous year. On the Company's other lines there have been some variations, and there has been a general want of elasticity everywhere, owing to a prevalent dulness in trade; but the loss or gain in the other branches of the Company's operations, besides those above indicated, would not have materially affected the profit and loss account for the period in question.

The *Behar* has been sold in Japan; and the *Candia*, built in 1854, being no longer suited for the Company's requirements, has been disposed of. The *Deccan* has received new engines and boilers of 600 horse-power, constructed by Messrs. Hawthorn and Co., of Newcastle-on-Tyne, and in addition to a thorough overhaul of her hull, a large poop has been added to the vessel by Palmer's Shipbuilding Company, which increases the cargo capacity by 500 tons. The *Deccan* has returned from her first voyage to Calcutta after these alterations, and the result shows that the new engines effect a daily saving of twenty tons of coals, while maintaining the same rate of speed as before. The *Poonah* has also been fitted with new engines, which are duplicates of those supplied to the *Deccan*, and by the same engineers, and has returned from Newcastle to Sunderland in order to finish the shipwrights' work connected with the lengthening of the vessel 80 feet, which has been successfully completed by Mr. James Laing since the date of the last Report. These alterations will enable the ship to carry 1,000 tons additional cargo, and sixty more first-class passengers than she did formerly, and she is expected to be ready for sea in July.

The *China*, after receiving new boilers, has been at work since January last, and her performances are satisfactory. The *Bangalore* has recently been placed in the hands of Messrs. Denny and Co., to have her engines compounded and to receive the addition of a poop, which will considerably increase her freight capacity and improve her passenger accommodation. The Directors have entered into a contract with Messrs. Humphreys and Tennant to supply the *Travancore* with new engines and boilers of 400-horse power, which will increase the speed and capacity of that vessel and, at the same time, materially reduce her consumption of fuel. With the same object a contract has been entered into with Messrs. James Howden and Co., of Glasgow, to supply new engines of 450-horse power to the *Tanjore*. These contracts are for engines and boilers of the newest and most economical type. That such improvements are also absolutely necessary has been repeatedly pointed out in former reports.

MAIL AND GENERAL SERVICES.

Under this head the directors are enabled to report the safe navigation of the Company's steamers, during a winter of such severity as has not been experienced for many years. That some damage should be suffered by the Company's fleet under such circumstances might almost be anticipated, particularly as the new contract, with its absolute penalties, requires the utmost efforts to be made in posecuting the voyages under all conditions of weather. The directors are, however, happy to state that no damage has been sustained of such consequence as to entail a charge on the Proprietors' Underwriting Account.

HOME AND FOREIGN ESTABLISHMENTS.

In their last report the directors fully explained the circumstances which had necessitated two important changes in the working of the Company, viz.: the adoption of the Suez Canal route for the main lines to India, and the substitution of London for Southampton as the terminus of these lines. In pursuance of these alterations, the directors have since effected considerable reductions in their establishments, more particularly at Southampton and at Alexandria and Suez. The double mode of working the Company's traffic, both by canal and railway, still necessitates a considerable staff in Egypt, but it is estimated that the cost of the establishments hitherto maintained in that country will be diminished by nearly £10,000 per annum. At Southampton the establishment has been reduced to a minimum, and the saving there effected will not be less than £12,000 per annum in all departments. In carrying out this duty, the directors have had to assume the painful task of dispensing with the services of old and faithful officers, some of whom had been more than thirty years in the Company's employment. In dealing with such cases, the directors have granted either gratuities or pensions calculated upon a scale adopted in similar cases by various joint-stock companies in this City, and they trust that their action in this respect will meet with the approval of the proprietors.

The directors consider it right to mention, more particularly, the case of Mr. Andrew Lamb, the Company's Superintending Engineer, to whom, subject to the approval of the proprietors, they have granted a retiring allowance of £500 per annum, being at the rate of half the salary which he had received for many years. Mr. Lamb was not only the practical Engineering Superintendent at Southampton, but he had a general charge for more than thirty years of that department throughout the Company. In that capacity he held one of the most important offices in the service, and he also acted as the referee of the Board on all questions connected with machinery. His career in this Company dates from its foundation, he having previously served in the same position in the Peninsular Company, and the Board now gladly take this opportunity of recording their high appreciation of his merits, and his unflagging zeal for the interests of the proprietors.

Consequent on the radical change in the service of running the main lines *viâ* the Suez Canal, the majority of the ships will in future have their wages paid and be stored and repaired in this country instead of in India as hitherto. Although this alteration was foreseen and provided for to a certain extent before the Canal Contract was arranged by reductions at the principal foreign agencies, such as Calcutta, Hong Kong and Bombay, the directors have still important changes in progress both on shore and afloat, in addition to those now specified. Such changes must necessarily occupy some time in being carried out, and a longer period must elapse before their effect can be felt in the financial working of the Company. But as the object is to concentrate as far as possible the expenditure of the Company in this country, instead of its being spread throughout the East, as has hitherto been inevitably the case, and also to put that expenditure more on a level with an European than an Indian service, the directors trust hereafter to report an improvement in the Company's position arising from these arrangements.

FLEET OF THE P. AND O. COMPANY.

		Tonnage.	Horse power. Nominal.

THE MESSAGERIES MARITIMES SERVICE.

The following is the statement in the *Daily Telegraph* to which we allude in another column:—

It may be some consolation to the P. and O. Company, under the unfavourable circumstances stated in the report they have just issued, to learn that one at least of the rival lines trading to the East is likely to lose much of the peculiar advantage it has hitherto enjoyed in the possession of an enormous subsidy. It appears that the French Government has presented to the Assembly a Bill to terminate the contract with the Messageries Company for the conveyance of the mails in the Mediterranean and the Black Sea, as well as to India and China, the right to take this course coming into operation on the 22nd of July next. The preamble of the Bill, as we learn from the Paris

Digitized by Google

correspondence of the *Economist*, makes a comparison between the contract of the P. and O. Company with the English Government, and that of the Messageries with the French Government. The former, for a service of 1,171,092 miles, receives £430,000, while the latter, for 631,514 miles, or little more than half the distance, is paid, at present, exactly £399,838. The profits of the companies were in the same proportion—thus in 1873 those of the Messageries amounted to 19 per cent., of which 9 per cent. went to the shareholders and 10 per cent. to reserve, which at the end of that year amounted to £2,320,000, for a capital of £2,400,000 only; while the English company had never until the last two years made profit of more than 6 per cent., and had only a reserve of £400,000, including that for insurance. Accordingly it is proposed to put the mail services performed by the Messageries up for tender, satisfactory results having accrued from a similar course in other cases; and, moreover, the reduction of the subvention is expected to do good by opening the way to a healthy rivalry in the carrying trade to the East. Should M. Léon Say have the opportunity of seeing the last report of the P. and O. Company he will find additional grounds for declining to continue the payment of extravagant subsidies. Whatever reason there may originally have been in fostering this particular maritime enterprise, it is now clear that the grant of a heavy bonus for other than services rendered in the conveyance of mails only tempts the subventioned company to carry goods at rates that are ruinous to private traders. By cutting down the subsidy to an amount fairly equivalent to the work done, the French Government will accomplish an important administrative economy, and the motives to indulgence in extreme competition will be taken away, since the duty of the Messageries directors to their shareholders will then oblige them to seek freight on terms that will at least yield a small profit, even although, as is not unlikely, that end should only be obtainable by a transfer of shipping facilities from one market to another less overstocked.

Monetary and Commercial.

The report of Reuter's Telegram Company for the year ending 31st December last states that the net profits, after payment of current charges, writing off bad debts, and deducting rebate on unexpired subscriptions, amount to £6,330, including £245 brought forward from the last account. The usual interim dividend of 2½ per cent. was paid in October last, and the directors now declare a further dividend of 8s. per share, equivalent to 5 per cent., free of income-tax, making a total distribution of 7½ per cent. for the year.

In consequence of the continued rumours in regard to the stability of Messrs. David Sassoon, Sons, and Co., of London, Bombay, and China, the partners have announced that they are prepared to retire all their acceptances. This will assuredly be a complete answer to the rumours, and the partners have acted wisely in stopping the injurious reports which have been current for some weeks.

The suspension is announced of Mr. Alfred E. Westbeech, of Fenchurch-street, merchant, with liabilities amounting to £75,000, of which it is expected about £40,000 will run off or be covered by securities. The value of the assets cannot yet be ascertained. The business has been in existence seventeen years, and the failure is stated to have been occasioned by the rapid fall in prices in China.

A meeting of the creditors of Stephen Henry Emmens, of 8, Old Jewry, merchant and banker, trading as Emmens Brothers and Co., was held Thursday at the Cannon-street Hotel, when a statement of his affairs was submitted and read by Mr. James Cooper, of the firm of Johnstone, Cooper, Wintle, and Co., public accountants. The liabilities were stated at £89,000, with assets, principally in mines and shares (subject to realisation) amounting to £109,000. Liquidation by arrangement was resolved upon, and Mr. Cooper was appointed trustee to act with a committee of inspection chosen from the general body of creditors, Messrs. Crook and Smith being the solicitors to the proceedings.

The creditors of Messrs. Siordet and Co., who recently failed for £400,000, have unanimously agreed to accept a composition of 12s. 6d. in the pound, payable in three instalments. The resolution to that effect has been duly signed by a Registrar of the Bankruptcy Court.

During the week ended the 22nd inst. the deliveries of tea from the bonded warehouses in London amounted to 2,809,437lb., of which 1,643,625lb. were for home consumption, 589,130lb. were removed coastwise, 498,981lb. were exported, 74,708lb. were sent coastwise for export, and 2,993lb. were for ships' stores. The duty received during the week, which consisted of only five working days, was £41,091.

The directors of John Brown and Co. (Limited), Atlas Steel and Iron Works, Sheffield, at their meeting yesterday decided to recommend a dividend of 10 per cent. for the year ending the 25th of March last, less income-tax and the interim dividend paid in December, 1874.

Bar Silver has been sold at 56½d. per oz., the lowest price Silver has yet touched. There have been a few small parcels of Mexican Dollars received during the week, they have not been sold; the market is very quiet, and 56d. per oz. is the nearest quotation we can give.

*** *Companies omitted in the above list will be included if the particulars are forwarded.*

ARTICLES OF IMPORT.

Commercial transactions have suffered considerable interruption from the Whitsuntide holidays, and subsequently from the Epsom races. Public sales have been of less extent, and the total amount of business is moderate. Tea and Silk continue quiet. Sugar has declined. The continued heavy supplies of Coffee have caused a slight reaction, but prices are not lower than a fortnight ago. A further reduction in Rice has led to larger sales. In Hemp more business has been done. Spices are generally slow of sale, but prices exhibit only slight deviations. Extensive auctions of Coir Goods went off slowly, prices being frequently cheaper. Cutch and Gambier are in better request and Straits Tin is 10s. per ton higher.

TEA.

Messrs. Arthur Capel and Co.'s Circular says:—Business has been on a very limited scale, but with the exception of Green Teas and new season's new-make Congous there is no alteration to be quoted in prices. In the public sales during the fortnight 13,966 packages have been offered, of which 12,828 packages have been printed and sold without reserve. The deliveries for the fortnight, as compared with last year, are as follows, viz.:—

	1875. lbs.	1874. lbs.
Home Consumption	3,709,616	3,739,279
Coastwise	1,293,640	1,281,965
Exports	1,253,886	1,066,945
	6,257,142	6,088,189

Congous.—Red-leaf kinds: Siftings are scarce, and full prices are obtainable. Broken-leaf kinds from 9½d. to 10d. per lb. have been saleable; fair to good common have been dull of sale from 10½d. to 11½d. per lb. Fair Kaisow kinds from 1s. 1d. to 1s. 4d., good from 1s. 5d. to 1s. 7d., and fine from 1s. 8d. to 1s. 9d. per lb., have been in steady request, the supplies on offer being limited; finest meet with a slow sale from 1s. 10d. to 2s. per lb. In Pak Lin kinds there is no alteration. Black-leaf kinds: Common remain much as before, at 10d. to 10½d. per lb., the fair grades from 11d. to 1s. 1d. per lb. are difficult of sale, even at the reduced prices established. Fair to good medium from 1s. 2d. to 1s. 5d., good to fine from 1s. 6d. to 1s. 10d., show no change. In finest there have been but few sales. Canton-make kinds: Old season's remain as before; in new sales have been made from 1s. 3½d. to 1s. 8d. for fair to good and fine, being a further decline. Oolongs show no material change. The few sales of Souchong have been at about previous prices. *Scented Teas.*—Canton Capers: Although there has been less offered at public auction the prices of common to fair kinds show no improvement; the better kinds remain steady, but with only a limited demand. Orange Pekoes: The demand continues fair at former prices. Foochow Capers: The few sales made have been without change in prices. Orange Pekoes: Common kinds have sold ½d. per lb. lower, but there has been rather more inquiry for fair to good qualities. *Green Teas.*—The supplies are still in excess of the requirements of buyers. Privately it is very difficult to make sales. At public auction large quantities continue to be offered, and the prices show some irregularity, but generally ruling in favour of buyers.

SILK.

There is no alteration to notice in the position of the market. China Silk of the lower descriptions is still current of sale, and prices are well maintained. Cantons remain quiet. Japans are in moderate request, but recent sales show a slight decline in prices. Deliveries, 1st to 26th inst. inclusive:—China, 3,005 bales; Canton, 498; Japan, 357; total, 3,860 bales.

CUTCH remains firm, and by private contract sales have been effected at steady rates, including 800 boxes Pegue (from Calcutta) at 23s. 9d., and 300 cases (Cock mark) at 24s. At auction 1,000 boxes fair Pegue of the mark Flag BB just arrived from Rangoon were all sold at former prices at 23s., a few lots 23s. 3d., also 34 boxes and 2 tons loose ditto at 24s. 1,000 boxes fine fresh Pegue from Calcutta were bought in at 24s.

COIR GOODS.—The supplies at the periodical auctions were excessively heavy, comprising—Yarn 5,536 bales 265 tons, Fibre 1,581 bales 90 tons, and Rope 47 tons. The demand for Yarn was slow, but as holders were willing sellers nearly the whole was disposed of; the small proportion of good to fine qualities sold readily at full to rather dearer rates; coarse kinds of good colour also sold steadily, but mixed qualities were generally cheaper, common to the extent of 20s. per ton; roping, of which a larger supply was offered, was also 20s. lower. Good qualities of Fibre sold well, but medium were dull of sale and chiefly bought in, and inferior sold again lower. Rope was all sold, heavy at the recent advance, but medium sizes again easier. Ceylon Yarn sold, ordinary to good ordinary at £20 to £23 10s., medium to good medium at £24 15s. to £28, good to fine make and colour at £30 to £39, superior ditto at £46 to £46 10s., one lot roping at £24 10s. per ton. *Kitool Fibre:* 212 ballots 100 bundles (2 tons) Ceylon partly sold at 9½d. per lb.

CHINA PRESERVES.—150 cases 20 casks ginger were bought in at 6½d. per lb.

COCOANUT OIL.—Although no alteration has taken place in prices there has been no improvement in the demand, at £43 10s. to £44 as to packages for fine Cochin, whilst medium offers at £42. Ceylon in pipes is quoted, old at £37 10s. and new at £37 15s., puncheons £38, up to £38 10s. for hogsheads.

CAMPHOR.—Although there have been large arrivals of China the market has been steady; about 150 cases have been sold at 70s. and a few at 72s. 6d. At the close there are sellers at 70s. per cwt.

DRAGON'S-BLOOD.—The market has been quiet; of 20 cases at auction, only a few sold; Reed at £11 7s. 6d. to £11 10s. per cwt.

ESSENTIAL OILS.—*Aniseed* very firmly held; about 20 cases sold at 9s. 4d. to 9s. 6d., and 40 cases afloat at the latter figure. *Cassia* continues dull and very plentiful, few cases sold at 4s. 5d. *Nutmeg* also dull and plentiful; of 17 cases few sold at 7d. *Lemon Grass* quiet and easier; of 166 cases a small proportion sold at 2¼d. to 2½d. *Cinnamon* too plentiful, and no buyers, except at much lower prices; 7 cases Leaf mostly sold at 3d. to 3¼d. per oz. *Citronelle* quiet; and of 28 cases one-fourth sold at 1⅝d. to 1¾d. per oz.

EBONY.—Value unchanged: 10 tons good to fine Ceylon sold at £10 to £14 15s.

GALLS have continued dull; at auction of 160 cases China 20 cases good sold at 52s. 6d., being again easier. Privately 200 cases China have been sold at 51s. 6d. to 52s. per cwt.

GUMS.—*Benjamin* again easier and quiet; of 150 cases offered at public sale a few only sold—fair to fine Sumatra seconds at £10 to £12; false packed at £8 to £8 10s. *Copal* easier; 715 cases, &c., at auction retired, and mostly sold privately, at a price not allowed to transpire, and further lots more recently. *Damar* very steady and firmly held; and 227 cases good Batavia sold at auction at 59s. 6d. to 60s. 6d. per cwt. *Gamboge* easier, and of 61 cases one-fourth sold at £11 to £11 17s. 6d. for fair to good pipe, a little run.

GUTTA-PERCHA continues very quiet.

GAMBIER has been in good demand at fully previous quotations; on the spot about 250 tons have been sold at 25s. 4½d. to 25s. 6d. ex ship and ex quay and ex warehouse. For arrival 100 tons January-February sailing have been sold at 25s. 6d., 15 tons per steamer now due at 25s. 3d. ex ship, all faults. At auction 720 mats pale free cubes bought in at 42s. to 43s. per cwt.

HEMP.—There has been more demand for Manila, and sales to the extent of 2,000 bales have been effected at steady rates, fine brown at £28 10s., barely fair at £29 10s., fully fair £30 10s., good Zebu at £32 5s. to £32 10s. At auction of 369 bales Manila 69 bales fine brown sold at £28 10s. to £28 15s., the remainder being bought in at £33 per ton.

INDIARUBBER.—A manifest improvement has taken place in the market, and in these descriptions sales of Borneo have been made at 1s. 8½d. to 1s. 4d. per lb.

ISINGLASS.—The auctions included 47 packages Penang, which were for the most part sold—leaf, good thick dark, 4s. 6d.; thin pale, 4s. 11d. Pipe, middling to fine, 3s. 8d. to 4s. 7d.; ordinary, 2s. 9d. Purse, good to fine, 1s. 4d. to 1s. 8d. These prices are the turn easier.

JAPAN WAX.—A very limited business has been done at the previous value. Of 19 boxes fair saucers at auction 10 boxes sold at 52s., 18 boxes good bold slab were bought in at 53s. per cwt.

MUSK.—The market has been steady; of 50 caddies Tonquin Pod two-thirds sold; very damp to dry selected pods at 38s. to 40s.; rough and bally 15s.; wet pickings 20s. 6d. per oz.; 7 tins Grain were quitted privately before the sale.

ORCHELLA.—Ceylon is very scarce, higher and wanted; 326 bales at auction sold in the room, and subsequently at 42s. to 50s. per cwt. for good to fine quality.

PLUMBAGO.—At auction 243 barrels Ceylon were nearly all sold at steady rates, good fair rather earthy to fine bright small lump at 16s. 6d. to 18s. 6d., fine chips 11s. 6d. to 11s. 9d., good dust 9s. to 9s. 6d.

PEPPER.—*Black* has continued dull, with very limited sales, and is a shade easier. Singapore has realised 5¾d. to 5⅝d., closing with buyers at 5¾d.; Penang has been quitted at 4 15-16d. to 4⅞d. privately; of 1,050 bags in public sale, two-thirds sold; Singapore grey at 5⅝d. to 5½d.; Penang at 4⅞d. Afloat, nothing of consequence done. *White* has continued quiet, with small trade at 7⅜d. for fair, and of 400 bags offered, only a few sold at that price.

RICE.—The market has continued flat, but as holders have accepted a further decline of 1½d. to 3d. for floating cargoes, a larger business has resulted; at the same time there is little demand at the close. On the spot the sales consist chiefly of soft grain kinds for transhipment

Digitized by Google

to Liverpool, there being only a limited demand for any kind at this port. The quotations on the spot are Bengal, good to fine new 11s. 6d. to 12s. 9d., old 10s. 1½d. to 11s., Ballam 10s. 6d., old Rangoon 8s. 4½d., new ditto per J. Drake 8s. 10½d., old Bassein 8s. 3d., and Japan 8s. to 8s. 6d.

SPICES.—*Cassia Lignea:* Market steady, and about 300 cases sold at 54s. 6d. for unworked. *Buds:* Small sales at £5 5s. *Cloves:* Market steady, but quiet; 158 bags retired but subsequently quitted. *Ceylon Cinnamon:* Market steady; the periodical sales are fixed for the 31st inst. *Mace* dull; of 55 cases, few only sold; good at 2s. 10d., fair 2s. 3d. to 2s. 6d., middling 2s. *Nutmegs* steady, but quiet; of 26 casks and cases at auction, a few sold, 82's at 3s. 5d. to 3s. 6d., 110's at 2s. 8d.

SAGO.—Market quiet; in auction of 797 bags small pearl 380 bags were sold at previous rates—fair to good at 17s. 6d. to 18s., the remainder bought in at 18s.

SOY continues firm; 100 casks China have been sold at 2s. to 2s. 1d. per gallon.

STICKLAC.—Siam is rather easier; about 200 cases sold privately at £5 12s. 6d. per cwt. for fine quality, but 185 cases at auction retired.

SAPANWOOD has been very firm; 7 tons Manila realised £10 10s. to £10 12s. 6d. per cwt.; 8 tons Ceylon were withdrawn.

TAPIOCA.—Flake quiet; and of 890 bags offered, 400 sold; fine at 2¾d. Pearl easier; 330 bags sold; Bullets 20s. 6d. per cwt.; fine small 22s. 6d.; medium 19s. 6d. to 20s.

TIN.—During the week the quotation for Straits has advanced to £85 per ton, but at the close it has receded to £83 to £83 10s. Banca stands at £38 and Billiton at £83, showing no change.

ARTICLES OF EXPORT.

MANCHESTER GOODS.

Business may be said to have been quite suspended between the 18th and 24th inst., on account of the holidays, and even since there has been but a scant attendance of both buyers and sellers, and the transactions have been of a very limited character. Steadiness as regards prices has, however, been maintained, and last week's rates ruled. Beyond a little more inquiry for the common descriptions of Grey Shirtings, 6, 7, and 8¼ lbs., there is little to notice, the demand, generally, being quiet, but producers steadily maintaining their quotations.

From Birkenhead, per ton.—To Hong Kong: 25s. To Shanghai: 30s. To Singapore: 19s. To Batavia and Sourabaya: 20s. To Galle: 21s.

CASUALTIES.

The Sirius (str.), from Colombo, for London, arrived at Malta, May 24, with crank shaft broken.

MISCELLANEOUS.

The Mandalay, steamer, which put into Lisbon some days ago, having been on fire, has arrived at Glasgow. She was on a passage from Rangoon to the Clyde with 20,801 bags rice, 1,000 cases cutch, 1,000 bundles rattans, and 1,894 blocks of teakwood. The damage done to the cargo is considerable, but not so great as was expected; 2,400 bags of rice have been completely destroyed.

The Prins Hendrik (str.), from Nieuwe Diep, for Batavia, passed Cape St. Vincent on the 21st inst.

Arrived at MALTA.—May 22, Torrington (str.), from Batavia, and left on the following day for Rotterdam.

The Lorne, from Rangoon for London, arrived at Port Said May 25.

The Erl King, from London, for China and Japan, and the Emiliano, from Manila for Liverpool, arrived at Suez on the 25th inst.

The Chinaman, M'Kenzie, arrived at New York, May 10, from Hong Kong. encountered a heavy S.W. gale, lasting twenty-four hours, in lat. 30 N., long 72 W.

LAUNCHES, &c.

The Pacific Mail Company's screw-steamer City of San Francisco was launched at Chester, United States, on the 6th instant, from the yard of Messrs. John Roach and Sons, who have two other steamers nearly completed for the same company.

The superintendent of the Mercantile Marine Office at North Shields has received from the Board of Trade an album containing a number of photographs belonging to Captain Reed, of South Shields, of the ship Maitland, which vessel was wrecked, and there is too much reason now to fear the whole of the crew have perished. This album, which the superintendent is directed to hand to Mr. Kelso, as one of the executors of the late Captain Reed, was found on board the wreck of the Maitland by the captain of a French vessel on the island of Huon. The superintendent of the Mercantile Marine Office has also received the original letter written by Mr. Reed and deposited in a bottle on the island of Huon, where it was subsequently found.

DANGEROUS REEF AND SANDBANK.—SINGAPORE, APRIL 22.—Captain Griffin, of the British ship Nil Desperandum, reports a dangerous reef and sandbank in the Banda Sea, not indicated on the charts. This bank lies in lat. 6.37 S., long. 130.5 E., the Peak of Nila bearing S.W. by W. ½ W., Serwa N.E. by N., both these islands being on the chart fifteen miles W. of their true position, supposing Banda Harbour in 130 E.

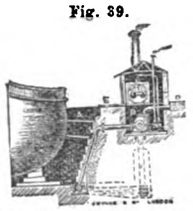
GWYNNE and Co., Hydraulic and Mechanical Engineers,

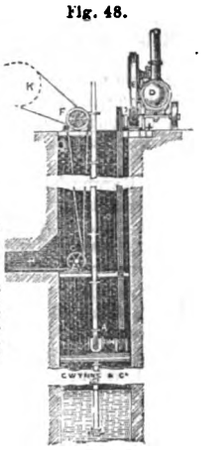
ESSEX STREET WORKS, STRAND, LONDON, W.C.

Fig. 39.



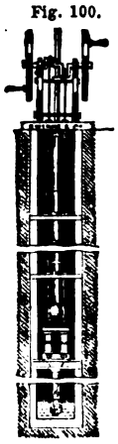
GWYNNE & CO.'S PATENT PUMPING MACHINERY, AS APPLIED TO EMPTYING DOCKS.
The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be given

Fig. 48.



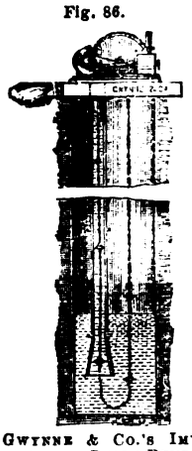
GWYNNE & CO.'S IMPROVED PATENT CENTRIFUGAL PUMP.
Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of Water

Fig. 100.



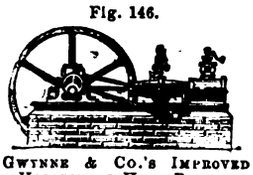
GWYNNE & CO.'S IMPROVED DOUBLE BARREL DEEP-WELL PUMP,
For Hand-power, adapted for ordinary wells of any depth, of most careful construction, and on the most approved system

Fig. 86.



GWYNNE & CO.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.
These Pumps work without valves or packing, and raise a considerable quantity of water. They will lift sand, mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.

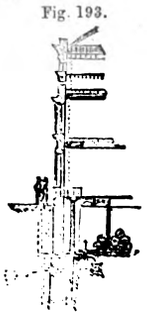


GWYNNE & CO.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.
With or without Expansion Gear, for economical working.
From 4 to 100-horse power

Fig. 154.

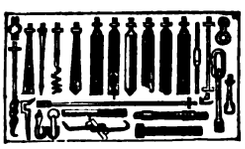
GWYNNE & CO. IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.
These boilers are simple and compact. They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler.

Fig. 193.



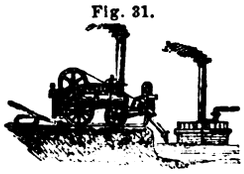
GWYNNE & CO.'S IMPROVED HYDRAULIC LIFTS.
Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine, or other produce, into or up from cellars, or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.
Prices on application.

Fig. 121.



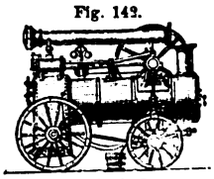
GWYNNE & CO.'S BORING TOOLS.
Of greatly improved construction. The figure represents those most frequently used, but the form and number vary much with the nature of the soil, and size of the bore hole.
G. & Co. can confidently recommend these as the best in the market.

Fig. 31.



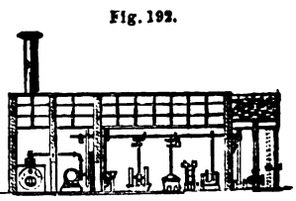
GWYNNE & CO.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR.
In which the Pumps are furnished with hose for distributing the water over the adjoining plantations. Made in all sizes.

Fig. 142.



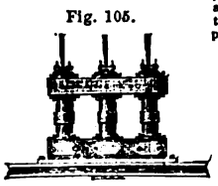
GWYNNE & CO.'S IMPROVED PORTABLE STEAM ENGINE.
Light, simple in construction durable, and economical, and very superior to "Agricultural" Engines.
From 2½ to 30-horse power

Fig. 192.



GWYNNE & CO.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES, FAT, &c., &c.
The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motion power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added to lift water or any purpose required.

Fig. 105.



GWYNNE & CO.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.
These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and comparison with those of other makers is challenged. Gwynne & Co. make single and double-barrelled pumps upon the same principles.

Fig. 207.

GWYNNE & CO.'S IMPROVED DREDGING MACHINERY.
The boat can be constructed so as to draw only 18 inches of water, if required. The machinery is extremely simple, yet thoroughly effective. The workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Diploma of Merit, Vienna Exhibition, 1873.

YORKSHIRE RELISH

THE most delicious SAUCE in the world to CHOPS, STEAKS, FISH, &c. Sold by all Grocers and Oilmen in bottles 6d., 1s., and 2s. each. Trade mark—Willow-pattern plate.

PROPRIETORS:—
GOODALL, BACKHOUSE, & CO., LEEDS.

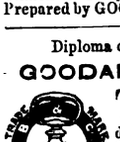
Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S BAKING POWDER.

THE BEST IN THE WORLD.—Makes delicious Bread without Yeast; Puddings, Pastry, &c., without Eggs, Butter, or Lard. Bread made with this Powder is much easier to digest, and much more wholesome than that raised with yeast, and a larger quantity is obtained from the same weight of flour. One trial will convince the most sceptical of its superiority over others. Sold by Grocers, Chemists, and Oilmen in 1d. packets; 6d., 1s., 1s. 6d., and 2s. Tins. Prepared by GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S QUININE WINE.



THE BEST AND MOST AGREEABLE TONIC yet introduced. For the relief of Indigestion, General Debility, and Loss of Appetite it is INVALUABLE. Recommended for its purity by the *Food Journal*, Arthur Hill Hassall, M.D., Wentworth L. Scott, Esq., F.C.S., F.A.S.L., F.R.S.S.A., &c. Sold by Grocers, Oilmen, and Chemists, in large bottles at 1s., 1s. 1½d., 2s., and 2s. 3d. each. Prepared by GOODALL, BACKHOUSE & CO., LEEDS

THE FRIEND OF ALL!!

HOLLOWAY'S PILLS

These famous Pills PURIFY the BLOOD, and act most powerfully, yet soothingly on the LIVER, STOMACH, KIDNEYS, and BOWELS, giving TONE, ENERGY, and VIGOR to the whole system. They are wonderfully efficacious in all ailments incidental to FEMALES, Young or Old, and as a general FAMILY MEDICINE, for the cure of most complaints they are unequalled.

* By Pacific mail *via* San Francisco.

THE MAILS, &c.

The P. and O. mail, bringing the above advices from China and the Straits Settlements—which, owing to the change of monsoon, are only two days later than those by last mail—was delivered, *via* Brindisi, this morning, its due date. The next inward (French) mail, with advices Yokohama 31st, Shanghai 25th April, Hong Kong 1st, Singapore 10th May, which is due, *via* Marseilles, on Monday next, the 14th inst., left Suez on the 30th ult., being five days early, and may be expected on Wednesday next.

List of Passengers.

PASSENGERS INWARD.

By this mail to Venice, per P. and O. steamer *Sumatra*, arrived June 6.—From Shanghai: Mr. F. N. May, Mr. A. N. Brown. From Singapore: Captain Wickham. To Southampton, per P. and O. steamer *Khedive*, expected to arrive June 13.—From Yokohama: Mr. T. Duick. From Hong Kong: Captain Schaschtel, Mr. J. Inglis. From Singapore: Mr. C. Willicombe, Miss Scott, Mr. J. Beerman. From Penang: Mr. W. Parlam.

PASSENGERS OUTWARD.

Per French steamer *Iraouaddy*, from Marseilles, June 6.—To Galle: Mr. T. Plate, Sir M. C. and Lady Swamy. To Saigon: Mr. Treres. To Shanghai: Mr. and Mrs. Mouillesaux de Vernieres, Misses Hovelt, Peter Orme. To Yokohama: Mr. Meier and one second-class passenger.

Per French steamer *Sindh*, from Marseilles, August 1.—To Batavia: Mr. Van B. Vaanders.

Per P. and O. steamer *Hydaspes*, from Southampton, June 3. -To Ceylon: Mr. A. Carmichael, Mr. W. G. Inglis, Mrs. Caulfield, Mr. N. W. Grieve, Mr. H. J. Wharton. To Hong Kong: Mr. J. Campbell, Mr. D. D. Murray, Mr. J. Wood, Mr. H. F. Whitford, Mr. W. Riddell. To Shanghai: Mr. R. B. Mostyn. To Yokohama: Mrs. Rickerby and child.

Per P. and O. steamer *Pekin*, from Southampton, June 17.—To Hong Kong: Lieut. F. H. Chapman, Commander G. Stopford.

Per steamer *Glenroy*, from London, May 30.—To Singapore: Mr. Donald Moore, Mr. Alex. D. W. Dowling.

Per steamer *Menelaus* (Holt's line), from Liverpool, June 3.—To Singapore: Mr. and Mrs. Roche and family. To Hong Kong: Mr. and Mrs. Campbell, Mrs. Bradshaw and child.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present P. and O. mail brings advices from this port to the 14th April, and by the Pacific mail we have twelve days later news, viz., to the 26th of April; the French mail from London Feb. 26 arrived out on the 15th April. The *Japan Herald* supplies the following summary of news:—

The agitation for further political change which has for some time prevailed both within and external to the Government has at length borne fruit in the shape of an Imperial manifesto. This utterance, though apparently coming from the Mikado himself, must be regarded as emanating from his Cabinet;—just, in fact, as Royal speeches, which, though delivered by Sovereigns as their own, are written by the responsible advisers of the Crown, who put such words into the Royal mouth as they deem expedient to reach the ear of the nation. The abolition of the Sa-in and Se-in is notified, and by the same decree two fresh assemblies, the Gen-ro-in and the Tai-Shin-in, are established. The native papers have had congratulatory articles on this change, which they look upon as equivalent, apparently, to representative government. The foreign journals have, however, pointed out that at present nothing is known either as to the functions or composition of these assemblies. If they are to be composed entirely of Government functionaries, it is useless to imagine that there will be any real or free criticism of the ministry or its measures, for the innate servility of a Japanese towards his superiors is absolute. On the other hand, even although the members composing this assembly were freely elected by the people, yet, if no power and no authority is granted to it, it is difficult to see what check can be exercised on the government. Until, therefore, full particulars are announced as to these points, foreigners judge it to be wiser to refrain from passing an absolute opinion as to the advantage of these changes. Meanwhile Goto Sojiro and Soyejima, two of the Ministers who left the Government last year in consequence of its reactionary tendencies, have had an interview with the Mikado, and are, it is said, about to join the ministry. Further changes are expected.

The quietude of our settlement has received a disagreeable and most unexpected shock. At an early hour on the 19th April the unpleasant discovery was made that two of the *employés* of the Comptoir d'Escompte, Mr. V. Cantelli, cashier, and Mr. W. S. Swaby, sub-accountant, had disappeared, and some outside information having been obtained by a friend of M. Vouillemont, the manager, that gentleman was informed of the suspected robbery; search was at once instituted, and on the duplicate keys of the safe (which were kept at the O.B.C.) having been procured, it was found that a sum of some $37,000 in notes had been abstracted. It would appear from information which was subsequently obtained that the two absconding *employés* had embarked in a three-masted schooner called the *Iris*. This vessel had arrived some short time previously under German colours, but four days ago she was transferred to the English flag, her nominal owner being Mr. C. Adds. As this person had previously been a livery-stable keeper, and then a storekeeper, and had failed as both, and more recently had been officiating as billiard-marker at the Grand Hotel, it is supposed that he was an accomplice in the robbery, and that the purchase money—it is said $11,000—was advanced him by his confederates. On these facts being ascertained, the necessary depositions were at once sworn to, and warrants for the apprehension of Mr. Swaby, on a charge of embezzling $37,000, and of Mr. Adds, and of Withers, the captain of the vessel, as accomplices, were issued by Mr. Robertson, whilst a similar warrant for the apprehension of Mr. Cantelli was issued by the Italian Consul. These

Digitized by Google

were intrusted to the English Consular Constable, Mr. White, and the steamer *Sea Gull* having been chartered for that purpose, she left the harbour in pursuit of the *Iris*. As a precaution in the event of any resistance an application was made to the senior naval officer, Captain Woolcombe, and a sub-lieutenant with an armed boat's crew were placed on board the *Sea Gull*. The *Iris* was unable from want of wind to get clear of the land, and when the pursuing steamer rounded Kanmonsaki she was observed some short distance ahead, in tow of Japanese boats. On the near approach of the steamer Messrs. Swaby and Cantelli descended to the cabin, and put an end to their existence. The former, who expired immediately after the arrival of the Consular Constable, Mr. White, shot himself through the heart, but Mr. Cantelli, although shot through the forehead, remained in a state of semi-insensibility until midnight, when he too breathed his last.

The *Iris* was towed back, and after communicating with the authorities the two supposed accomplices, Adds and Withers, were detained in custody, and the bodies of the two deceased brought on shore. They have since been interred. Adds and Withers have been lodged in gaol, pending an inquiry into their supposed complicity with the perpetrators of the robbery. They stand remanded until the 28th April and bail to the amount of $5,000 has been accepted for the appearance of Withers. Much astonishment is felt as to what could have been the reasons which induced this conduct on the part of two men holding responsible positions, and whose conduct had hitherto been irreproachable. Mr. Cantelli, although young, had been eight years in the service of the Comptoir, and was most highly thought of by his chief; whilst Mr. Swaby had also been, we believe, some five years in the Bank. Meanwhile it is, of course, impossible to tell whether the $37,000 in notes is the entire amount of the defalcation. as until the books are made up and balanced it is difficult to tell if any or what other amount has been extracted.

The *Echo du Japon* mentions that on the 3rd April a severe typhoon visited the province of Echizen, during which several villages were nearly entirely destroyed by hailstones, which are said to have fallen for hours, and many of which were of the size of a nut, and weighed ten grammes.

The news of the suspension (it is hoped only temporary) of the American house of Aug. Heard and Co. has been received with much sympathy by all.

Our Amateur Dramatic Corps gave a performance at the Gaiety Theatre on the 14th April, which was entirely successful.

H.M.'s ship *Challenger*, on a scientific cruise round the world, anchored in our port on the 11th April.

The *Japan Gazette* contains the following items of intelligence :—

H.M.S. *Thalia* left for Hong Kong on the 22nd April, *via* Kobe and Nagasaki, conveying the balance of the camp equipage and stores left behind by the Battalion Royal Marines, and the Senior Naval Officer's pennant is now flown on the *Frolic*. While the *Thalia* was getting under way an accident occurred. Part of crew were engaged in "catting" the anchor, when the purchase carried away and the heavy leading-block flew back, striking three of the men who were heaving at the capstan. Two of them, named John Hickey and Francis Hill, each sustained a fracture of the left leg, and were sent on shore to the hospital.

The P.M.S.S. Co.'s new steamer *City of Tokio* reached us on 21st April, after a smart passage of twenty days. This was her maiden trip across the Pacific, and, besides a considerable freight, she brought a large number of steerage passengers, and no less than fifty-eight in the saloon. Mr. A. Center, formerly Agent for the Company at Kobe (Hiogo), and afterwards General Agent, *ad interim*, here, on the departure of Captain Lane, arrived by her, to take over the supreme control of the interests of the Company in Japan and China. Considerable satisfaction is expressed at the intelligence that the semi-monthly service is to be continued, notwithstanding the withdrawal of the subsidy.

The police stations of the capital are now connected by wire, and when a fire breaks out in any part of the city intelligence is at once communicated to each office, the superintendent of which is required to exhibit on the outer gate the name of the street where the fire is raging, and other particulars in connection with it of interest to the public.

A Chinese gambling den has been entered by the police, and sixteen Chinese were caught in the act of gambling; they were apprehended and taken to the Police Station. The police searched the place, and found a lot of silver, several dice and packs cards, and a considerable quantity of opium.

The Government is in a state of embarrassment in consequence of the action of the Lew Chewans, its vassals, in continuing to send a tribute ship to China.

Two shocks of earthquake were felt on the 21st April, one shortly after two P.M., and the other, a rather severe one, at about half-past six o'clock. No damage was done.

General Capron, adviser to Kaitakushi, has been presented to the Mikado, prior to his departure for America.

Baron Von Holleben, the new Chargé d'Affaires for Germany, has arrived.

CHINA.

—o—

TIENTSIN.

The correspondent of the *Celestial Empire* writes as follows from this port :—

The recent excitement in consequence of the exactions of Sun, the Customs' Taoutai of this port, has at length completely quieted down. It is now positively known that the course of the Taoutai is wholly disapproved by the Viceroy, who was so suddenly summoned from Paoting-fu, the provincial capital, last week, by means of an Imperial courier, who is said to have accomplished the whole distance, about 360 *li*, in eight hours. The Viceroy is reported to have memorialised the Emperor on the subject of the action of the Taoutai, and it is supposed that the results of the bold measures of the latter will prove most disastrous to this avaricious official, and will lead to his permanent degradation from office; of this, however, one might speak with the more confidence after the event. During his short incumbency, or rather incumbrancy, he has expended a large part of his energies in demonstrating the old proposition, that a new broom sweeps clean—altogether too clean, in fact, as the event proved. It is now understood, that in consequence of the technical responsibility of the Viceroy for his *protege*, no formal proclamation will be issued by an official for explicitly retracting the three orders of Sun, so often referred to, but that the claims he set up are to be quietly allowed to drop. The wide extent of the suffering caused by even a temporary interruption of trade is scarcely realised until felt. Even the candy-peddlers and peanut stands were obliged to close up, being unable to replenish their stock from the great hongs, whose doors were closed.

An immense Imperial granary, which has been long in construction, and which is situated just below the Settlement on the right bank of the river, approaches completion. It is designed for the tribute rice, and consists of three vast godowns joined like the notches in a saw, each one hundred and twenty feet long and broad in proportion. If the reports of the Chinese may be depended upon, this structure is not a triumph of architecture, as a part of the walls fell down one night owing to imperfect foundations, and were replaced by violent exertions in a few hours. It is to be feared that the precious skull of the superintendent was not under them at the time.

For several days there has been an extreme scarcity of water, —at the very point where water is principally needed in this region—on the Taku bar. Owing to this dry fact, the U.S.S. *Palos*, which left the bund March 29th, did not finally escape the bar until midnight of the 1st April. The *Appin*, which left on the 31st, had passed only into the "everlasting bend," when she met with one of those "unpleasantnesses" characteristic of this and similar rivers. She backed into a post, or other obstruction, and broke her rudder or rudder-post in a manner which caused the wheel to take charge, knocking several quartermasters right and left, but fortunately killing nobody. The *Appin* was towed down the river to Taku for repairs by the *Midge*, which left for Newchwang on the 1st of April.

Dr. S. W. Williams, who has been the United States Secretary of Legation at nine different times, covering a period of twenty-five years, and has not visited his native land for fourteen years, goes south with his family *en route* for Europe, a well-earned vacation. Whether he will return at some future day to give this Empire the benefit of his unrivalled knowledge of China is not definitely known.

On April 3rd the Viceroy's Adjutant-General was present at an experiment in exploding a torpedo at Taku. The explosion was a success. The torpedo was exploded by electricity operated from the south fort. It threw a column of water over one hundred feet high—a grand sight, so said the Europeans who witnessed it. The torpedo was brought here by some Danish engineers who are trying to sell the Viceroy some telegraphs, torpedoes, or anything of a warlike character which he may wish to purchase.

The *North China Daily News* correspondent forwards the subjoined items of intelligence, under date 9th April :—

Since the end of the last moon we have been having extremely boisterous weather, no matter from what quarter the wind might come. After blowing a gale from the south, from daylight to nearly 4 P.M. on the 7th April, the wind suddenly changed to the north; afterwards we had a dense dust storm for an hour. It indeed became so dark a few minutes after 4 P.M. that it was necessary to light the lamps to see to write and read. To-day it is blowing a strong gale from the south. The thermometer has gone down these last few nights below the freezing point; this morning it stood at 29 deg. About two A.M. on the 7th April a large meteor was seen; it made its appearance in the north-west part of the sky, and travelled towards the south-east, where it apparently exploded.

Thomas Featherstone, the Constable of H.B.M.'s Consulate at this port, has died very suddenly. He came to this country as a private in the 67th Regiment, in 1860, fifteen years ago, and being a steady, well-conducted, trustworthy man, when a constable was required, on the Consulate being established at this port in 1861, Thomas Featherstone was recommended as a suitable man for the post. The coffin was followed to the cemetery

Digitized by Google

by almost every member of the community, showing that the deceased had gained the respect of the foreign residents here by his good conduct. He has left a widow and two children, and although both he and his wife were careful people, still the pay of a constable is not such that with a family they could possibly save but a small sum of money.

A rescript in the Peking *Gazette* of the 6th April announces that Li Hung-chang had, in a memorial to the Throne, requested the Regents that orders be given to the functionary appointed to the office of Customs Taoutai at Tientsin urging him to repair immediately to his new post. Le Chau-tang, the official in question, being at present at Kwangtung, the Regents command the Governor-General of the Two Kwang provinces and the Governor of the Kwangtung province to order the said official to lose not a moment in proceeding by sea to Tientsin, where his presence is required to attend to important affairs.

SHANGHAI.

The present mail brings only two days later advices from this port, viz., to the 18th April; no later mail from London had been received. The following summary of news is from the *Celestial Empire*:—

A murder is suspected to have been committed in a sampan at a place some six or seven *li* from the Settlement, on the way to Woosung. A sampan took up its quarters for the night at a small wharf, under which another and larger boat was lying. The owner of the small sampan during the night heard cries proceeding from the other boat, as if some one was being killed, and in the morning he went with his suspicions to the Tipao of the nearest village. The suspected boat was searched, but no person was found in it. What was discovered however, was a knife covered with blood, and marks of the same evidence were traced to the back of the sampan, where were found two boxes, one containing four-hundred cash, and two chits, one in Manchu, and the other, according to our informant, foreign, or in a foreign envelope. No clothes or bedding were found in the usual place for such articles, and it was evident that the sampan-man had absconded. The Tipao gave information to the Che-hsien, and the latter has sent to the neighbourhood detectives to make investigation. A good deal of interest attaches to the mystery, as it is supposed that the victim, if there be any, was probably connected with some foreign ship. Of course, a proper system of registry for sampans under Chinese jurisdiction would facilitate the discovery of the sampan-man on such occasions; and such a system ought to be insisted on, at any rate on rivers where foreign sailors are in the habit of going about in native boats.

On the 15th April at the Mixed Court a momentous case was decided between two natives as follows:—A coolie who wanted to send a chit through the Local Post-office, and was asked for the forty-five cash to pay for so doing, borrowed the sum from a friend who was a coolie in the employ of the Post-office; and forgot to pay it back. Seeing him pass some time afterwards with some pounds of meat in his hands, the creditor stayed his progress demanding his forty-five cash. The debtor had not the sum on his person, but offered the meat instead, which being accepted, he went straight to his (foreign) master, and informed him that the materials for his breakfast had been impounded for his servant's liability. Communications had between the Europeans owning the services of the Chinese thus complicated resulted in the appearance of both before Chen. He, considering both to blame, was for administering eighty blows to each; but some suggestions being made to him to the effect that if the cash were refunded on the one hand, and the *viande* restored on the other, and the respective masters chin-chinned for the trouble given them, all might be settled,—the worthy Chen forewent the bamboo, and arranged the difficulty as proposed.

A stabbing case, fortunately, we believe, not attended with serious results, has occurred on the bund. Two sailors were in a jinricksha spinning along the bund, when they came to the barrier erected where a portion is to be re-metalled, between Nanking and Peking Roads. Being as is supposed somewhat elevated, they insisted on breaking through the barrier, when the watchman stationed there ran out and stopped them. One of the sailors got out of the jinricksha and shoved the watchman; he resisted; and then the second sailor jumped out, and stabbed the Chinaman in the shoulder with a small knife. He wore thick wadded clothes, and the wound was not dangerous; the two seamen made off, and have not yet been discovered.

A rather curious rumour reaches us privately from Hankow. It is said that the French missionaries in the neighbourhood had received information—we imagine from their colleagues in Szechuen—that the authorities of Manwyne had previously declared their intention to interfere with the progress of the Rangoon Expedition, and were awaiting its arrival in the city to put a stop to it altogether. This is on all fours with the facts of the case as we have received them. The moment the leaders of the van appeared upon the scene in the persons of the unfortunate Margary and his Chinese attendants, they were seized and killed; and there is little doubt that the same fate would have befallen the remainder of the party had they ventured after them into the lions' den. The whole affair seems to have been pre-arranged, and this version is borne out by the story in the *Daily News* that a Burmese mission had arrived in the city immediately previous, emanating, according to the idea of the *Rangoon Gazette*, from the King of Burmah himself. It is curious how neatly each link in the chain fits into its proper place, should these surmises be found correct. The King of Burmah, opposed to free trade from interested motives, first threw difficulties in the way of Major Sladen's expedition; it is not likely that he would view a second attempt with greater favour; just before this second expedition sets out we find a Burmese mission, travelling in the same direction, having started; the English party arrive, and find the formerly friendly city awaiting them with treachery and murder; and subsequently we hear from other sources that the entire affair was premeditated, and so far public that it had reached the ears of the French missionaries. The evidence seems almost conclusive. We are further informed that the Fathers communicated the intelligence to the Consul for France at Hankow, but of course he was powerless to take any precautionary measures. So that altogether it seems to involve a very pretty complication between England, China, and Burmah, and we shall await the effect of Mr. Wade's representation to the House of Parliament with the keenest interest and anxiety.

A Challenge Cup will be shot for by members of the Mih-ho-loong Rifles on the 19th April, under the rules and conditions of the S.V.C. Spring Meeting. The ranges are to be at 200, 400, 600, and 800 yards, five shots at each; winners or holders of any Challenge or Champion Cup to be handicapped five points. The entrance fee is two dollars, and the best score is to take half of the money and to hold the Cup for the time being;—for the complete possession of the prize it must be won twice consecutively or three times in all. Second score is to take the other half of the entrance fees, excepting on the occasion when the Cup is finally won, when they will be divided between second and third.

A good deal of interest is beginning to be felt in the approaching races, and the training on the course in the early morning is largely attended. Although changeable, the weather is on the whole brilliant, and the country looks well. Rehearsals are going on actively at the Lyceum Theatre for the next performance, which is to consist of *Cool as a Cucumber* and *Payable on Demand*.

An express circulated by the Great Northern Company informs the community that the Shanghai-Amoy cable having been repaired telegraphic communication between Shanghai, Amoy, and Hong Kong had been re-established.

HONG KONG.

Our advices by the present mail extend to the 24th April; the French mail from London March 12 was received on the 22nd April. The following items of intelligence are from the *Overland Trade Report*:—

On the evening of the 21st April H.M.S. *Hornet* was placed at the disposal of the Surveyor-General, for the purpose of ascertaining the exact distance at which the Cape D'Aguilar light could be seen. The Surveyor-General, the Harbour-master and the Assistant Harbour-master were on board when a course was taken from the light in a south-westerly direction. The light was lost sight of at a distance of twenty-one nautical miles. It was a bright moonlight night, or probably it might have been seen at a greater distance. The trial proved satisfactory to all on board, who spoke highly of the brilliancy of the light.

A Chinese merchant, writing to the *Shun-pao*, protests against the attempt being made to run the foreign steamers off Chinese waters through the agency of the China Merchants' Steam Navigation Company. He thinks the Government of Peking does wrong in not accepting the tender of the foreign companies to convey the tribute grain to the North, as by doing so they would save some 100,000 taels per annum, and points out the inconsistency of the Government, who pleaded, when it was transported by junks, that by transferring the trade to the foreigners a large population must suffer, while they are willing to subsidise the China Merchants' in spite of this circumstance. The writer is not inclined to answer the appeal for support which the China Merchants' Company has made to native merchants, and calls attention to the fact that the endeavour to oust foreigners from the country is a serious blunder, and would result, if successful, in constituting a tyrannical monopoly, which would be productive of high freights, heavy duties, and manifold drawbacks to the security and extension of trade and commerce.

We are informed that the line of couriers between Foochow and Amoy will be re-established on the 1st May. The couriers will start from both ends at noon daily, and complete the journey in forty-five hours (three hours less than last year). The service is so arranged that there will be an interval of three hours between the daily arrival and departure of the couriers. By an arrangement with the Great Northern Telegraph Company, and Reuter's Telegram Company's Agent at Amoy, we understand that subscribers will be furnished daily with all telegrams addressed to them. Non-subscribers will be charged at

Digitized by Google

the rate of $5 per cover. The subscription is fixed at $15 per month. The enterprise is a private one, and unconnected with the Great Northern Telegraph Company.

A large fire broke out in the southern suburb of Foochow at about midnight on the 4th-5th April. More than 100 houses were burnt, and several lives lost.

A rumour has been current that one of the Foochow Arsenal gun boats had been lost at sea, but the report requires confirmation.

H.B.M.'s steamer *Kestrel* returned to Foochow from Formosa on the 13th April.

STRAITS SETTLEMENTS.

SINGAPORE.

The present mail brings advices from this port to the 1st May—three days later. No later mail from London had been received since the 26th April: but the P. and O. mail of 2nd April had left Penang and was expected on the 2nd May. Nothing of importance had transpired since the departure of last mail.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—The chief feature of the fortnight had been some recovery in common Grey Shirtings, and in good 28/32 Yarns. Victoria Lawns had been in good demand, and Mousselines maintained their position. In Drills and T-Cloths a little had been done. There had again been a very small business in Metals; quotations for Bar Iron were weaker, and assorted Nail Rods showed a further decline; small Nail Rods continued neglected.

HIOGO-OSAKA.—The Chamber of Commerce Report says:—The inactivity noticed in last month's report report still continues, and deliveries for the most part are even upon a smaller scale. Cottons.—Yarns: A slight improvement may be noticed in the demand for 16-24. Grey Shirtings: The advance in China has not as yet been responded to, and prices show little or no improvement. Deliveries have been confined almost exclusively to 7lb. goods. Turkey Reds: Clearances have been fairly large, but consist principally of former contracts, and current quotations must be reported as weaker. Black Velvets continue to decline, being now almost unsaleable. Victoria Lawns have been placed to some extent, but it is believed that recent purchases are upon Chinese account for re-export. Taffachelass, being out of season, is not quoted. Worsteds and Woollens: Black Orleans continue saleable, but prices are with difficulty sustained. Checked and Striped Lustres are still neglected, and quotations entirely nominal Mousselines de Laine continue to be largely taken, and with the exception of a slight weakness in Plain Goods, values are well maintained. Iron: No improvement can be reported at present in this article.

HANKOW.—The market had been quiet, at prices which had ruled about on a par with those at Shanghai.

SHANGHAI.—There has been little done in this market. 7 lbs. 8¼ lbs. Grey Shirtings closed slightly lower with limited demand. Heavy goods unchanged. T-Cloths had been inquired for, especially the commoner kinds, which were 2 or 3 candareens higher in value. Mexican T-Cloths were steady. In American Drills, no transactions are reported. In English Drills and Jeans there had been some business at former rates. Sheetings, firm. White Shirtings quiet; 52 to 56 reed being rather easier in price; 60, 64 and 66 reed declined 2 to 3 candareens, while those of 72 reed were quoted the same as before. Fancy Cottons: Neglected. Woollens: Market very quiet. Prices for Assorted Long Ells lower, and for other goods unchanged.

HONG KONG.—The market had been quiet during the period unde review, and prices showed but little change. Clearances had fallen off very considerably, and only a small business was reported.

CANTON.—Lead had slightly declined, and L.B. was quoted $8.20 to $8.25, and W.B. $8.30 to $8.35 per picul. Sales amounted to 800 piculs common quality, leaving in stock 400 piculs of this brand, and 900 piculs W.B. Quicksilver was quoted $152 per picul.

SINGAPORE.—Messrs. Boustead's Circular says:—The arrivals with general cargoes are steamers Glenearn from London, and Deucalion and Antenor from Liverpool. Piece Goods have been in less request during the past ten days, and clearances have been on a small scale. In prices there is little change to note, though in some cases they are rather weaker.

PENANG.—Very little business had been done, except in 7 lb. T-Cloths, which had been in very good demand, and fair transactions were reported at an advance. Other goods had been dull; business small and prices unchanged.

EXPORTS.

TEA.

YOKOHAMA.—The Chamber of Commerce Report says:—There is little of interest to report in connection with this market, only a spasmodic business having been done, chiefly in execution of San Francisco orders, and prices, therefore, have been regulated more by the actual requirements of buyers than with any regard to a recognised standard of value. No doubt purchases have been made considerably below the quotations last given, and under existing circumstances it appears advisable to record present values as purely nominal. Stocks of old leaf probably do not exceed 1,000 to 1,500 piculs. Garden musters of the new leaf are coming in daily, but are only interesting because giving promise of small lots in bulk within the next ten days. Natives are confident in their assertions of a plentiful crop, of unusually good quality, the weather lately having been extremely favourable.

HIOGO-OSAKA.—The few transactions that had taken place during the month had been chiefly confined to low class teas, and settlements of 500 piculs are reported. Stocks were reduced to about 1,000 piculs. Total settlements to date were 50,250 piculs, against 40,400 piculs at the corresponding period of last year. The weather had been favourable to the new crop, and small parcels of new leaf were expected to arrive to market during the first week in May.

CANTON.—Deacon and Co.'s Report says: Little of interest has transpired in our Tea market during the interval under review. Settlements of Congou are represented to be about 4,500 boxes, at Tls. 21½ to 27, showing much the same value as previously current. A few musters of Scented Teas are on show with the view of eliciting buyers' ideas, but looking at the poor quality of the bulk so far produced, there is not likely to be any haste displayed in responding to the range of prices now talked of. At Macao business in Congous has been moderate, and, with the exception of some irregular purchases, prices have been the turn in favour of buyers. The following are the shipments of New Season's Congou to date: Total as per last statement, 427,196 lbs.; April 13th, s.s. Patroclus, 417,792 lbs.; April 15th, s.s. Pera, 117,420 lbs.; total to date, 962,408 lbs. The following is the comparative Export from the Canton Waters for the past three seasons: Season 1874-75, 19,837,585 lbs,; 1873-74, 15,751,597 lbs.; 1872-73, 20,471,906 lbs.

SILK.

SHANGHAI.—Since the departure of the last P. and O. mail, a large business had been done in Re-reels, at prices which showed a considerable decline. The export of this class was large, and the quality of some of the shipments poor. In Tsatlees, the only purchases reported had been Choping's Chops at Tls. 387½ for No. 3, and common No. 5 at Tls. 255 to 265. About 100 bales of Shaouhing and a few bales of Hangchow made up the balance of the settlements. The unsold stock was much reduced, and was chiefly composed of Re-reeled Silk. Settlements for the fortnight:—Chinas, 1,100 bales; total settlements since 1st June, 1874, 71,100 bales, against 1873-74, 56,500; 1872-73, 55,900. Comparative unsold stock on this market, on the 16th April, 1875, 500 bales; 1874, 600; 1873, 300.

CANTON.—143 bales had been taken during the fortnight. These purchases were likely to be the last of the season, as no Silk of desirable quality remained in stock. The weather was all that could be desired for producing, and should it continue so, an abundant first crop was confidently expected by the natives.

VESSELS LOADING.

At YOKOHAMA.—None.
At HIOGO.—For London, Evelyn, Gaucho.
At SHANGHAI.—None.
At HONG KONG.—None.
At SINGAPORE.—For London, Windermere; for Marseilles, Hesperia, Maximos; for New York, Our Annie, Ivalo; for Boston, Juno.
At PENANG.—For London, Brisbane, Pauline.

FREIGHTS AND CHARTERS.

From YOKOHAMA.—To London, per steamer, tea £4 5s. per ton of 40 cubic feet.
From SHANGHAI.—To New York, £3 per ton of 40 cubic feet.
From HONG KONG.—To London, per steamer, £3 15s. per ton of 40 cubic feet; to New York, by sailing vessel, £2 15s. per ton of 40 cubic feet.
From SINGAPORE.—To Liverpool, by sailing vessel, £2 7s. 6d. offered for dead weight; to New York, per sailing vessel, tin £1 15s.; for other dead weight, £2; for light freight, £3; to Boston, dead weight, £2 10s.; light freight, £3.
From PENANG.—To London, by sailing vessel, bag sugar, £2 12s. 6d.; basket sugar, £2 15s.; black pepper, £3 5s.; hides, £3 15s.

THE MAILS.

PRESENT INWARD MAIL.—BRINDISI, JUNE 3.—The P. and O. Company's steamer Sumatra, with the homeward India, China and Australian mail, arrived at 1, and the mail left at 1.50 P.M. for London.

NEXT INWARD MAIL.—SUEZ, MAY 30.—The Messageries Maritimes Company's steamer Meikong, with the inward French mails from China and Japan, left here to-day for Port Said and Marseilles, at which latter port she may be expected on the 7th of June.

HEAVY PORTION OF LAST INWARD P. AND O. MAIL.—SOUTHAMPTON, MAY 30.—The P. and O. Company's steamship Peshawur, arrived this evening with the heavy India and China mails, 208 passengers, 25 packages of specie, 5,622 chests of tea, 502 bales of silk, and 9,462 packages of sundries. She left Calcutta on the 22nd, Madras 26th, and Galle 30th April.

INWARD MAIL DUE JUNE 28.—GALLE, MAY 30.—The Messageries Maritimes steamer Sindh, with the inward French mails from Yokohama on the 5th of May, Shanghai 9th, and Batavia 20th, left here to-day for Aden.

OUTWARD MAIL OF MAY 28.—SUEZ, JUNE 4.—The P. and O. Company's steamer Kashgar left here at 5, and the Deccan at 6 P.M. to-day, for Bombay and Calcutta respectively, with the outward India and China mail of 20th-28th May.

OUTWARD MAIL OF MAY 7.—GALLE, MAY 31.—The Messageries Maritimes steamer Ava, from Marseilles 9th ult., left here to-day for Singapore.

MR. MARK STEWART has put a notice of motion on the Opium Trade in the House of Commons, "To call attention to the evidence given before the East India Finance Committee of 1871 with reference to the Opium Traffic." We understand that the motion is to come off on the 25th inst. The prize or award for the "Opium Essays" has not yet been delivered.

WE regret that the Committee of the Oriental Congress at St. Petersburg have announced that they are compelled to postpone the meeting until September, 1876. This is a most extraordinary and vexatious proceeding, and we trust it will be annulled.

COMMERCIAL POSTSCRIPT.

Business in the Shanghai and Hankow Tea Markets is reported by the latest telegrams to be somewhat less active. The Foochow market has not yet been regularly opened, but small settlements of Congous have been effected at prices averaging three taels above those at the opening of last season. The Canton market exhibits a declining tendency. The steamers *Glenartney*, *Glenearn*, *Fleurs Castle*, and *Bengal*, with new season's teas, have reached Singapore.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—June 2, at Greenock, from Batavia, Stavers; at New York, from Ilo Ilo, Henry S. Sandford; 6, at London, from China, Patroclus (str.); 4, at Rotterdam, from Batavia, Torrington (str.); 6, at Liverpool, from Rangoon, Amarapoona (str.).

DEPARTURES.—June 2, from Southampton, for Batavia, Friesland; 2, from Rotterdam, for Batavia, Liberaal; 1, from Bordeaux, for Batavia, Dupuy de Lome; 3, from London, for Hong Kong, John C. Munro; from Liverpool, for China, Menelaus (str.); 2, from Shields, for Singapore, Timour; from Amsterdam, for Samarang, Ferdinand and Lois; 3, from Shields, for Java, Coomassie; 2, from Amsterdam, for Macassar, Christine; 3, from Hamburg, for Hong Kong, America; 5, from Liverpool, for Manila, Rona;

LAID ON.—At London, for Singapore, Hong Kong, and Shanghai, Quang-se (str.); for Shanghai, Titania, Albert Victor; at Liverpool, for Singapore, Banian.

CASUALTIES.—Rio Janeiro, May 9. The Eliza Shaw, from London for Shanghai, which put in here March 27, with damage, after collision, has discharged and sold her cargo of coals, and is now repairing.

MISCELLANEOUS.—Port Elizabeth, May 7.—The wreck and cargo of the Jupiter T., from Singapore to New York, ashore east of Point Padrone, were sold, April 30, for £9,500. As the vessel still holds together it is expected that a considerable portion of her cargo will be recovered. The Pioneer and the G. T. Kemp are on the spot to take in the cargo salved. Port Said, June 5, arrived, Argyll, from London, and left same day for China; passed Gibraltar, June 4, Glenroy (str.), from London, for China.

BANKS AND COMPANIES CONNECTED WITH THE FAR EAST.

Peninsular and Oriental Steam Navigation Company, 122, Leadenhall-street, and 25, Cockspur-street, Pall-mall.
Messageries Maritimes (Head Office in Paris), 97, Cannon-street, and 51, Pall Mall.
Netherlands India Steam Navigation Company, 13, Austinfriars.
Hong Kong and China Gas Company, Gresham House, J. C. Walduck, secretary.
Singapore Gas Company, 8, St. Mary Axe, Robert King, Secretary.
Singapore Patent Slip and Dock Company, Paterson, Simons, and Co., agents, 21, St. Swithin's-lane.
Singapore Johore Steam Saw Mills Company, Paterson, Simons, and Co., agents, 21, St. Swithin's-lane.
Amoy Dock Company, John Pook, agent, Lime-street-square.
Hong Kong and Whampoa Dock, Morrison and Co., agents, 4, Fenchurch-street.
North China Insurance Company, 25, Cornhill, J. S. Mackintosh, manager.
Canton Insurance Company, Matheson and Co., agents, 3, Lombard-street.
Union Insurance Company of Canton, M. P. Jukes, manager, 82, Broad-street.

TELEGRAMS FROM THE FAR EAST.

THE BURMAH MISSION.

RANGOON, MAY 31.—Sir Douglas Forsyth and the members of the Burmah Mission reached Henzada on the Irawaddy yesterday morning.

CALCUTTA, JUNE 3.—The position of affairs in Burmah appears to be somewhat more critical, and anticipations of a peaceable settlement are less confidently entertained. The Chinese General, the supposed instigator of the attack on the Yunan Expedition, has visited Mandalay, and has been received with great honours by the King. Sir Andrew Clarke is expected here to-morrow.

HURRICANE AT MACAO.

(ORIENTAL TELEGRAM.)

HONG KONG, JUNE 2, 8 P.M.—A very serious hurricane has occurred at Macao. The steamer *Poyang* has foundered.

THE LATE GOVERNOR OF SINGAPORE.

CALCUTTA, JUNE 5.—Sir Andrew Clarke, the newly-appointed Public Works member of the Governor-General's Council, has arrived here from Singapore.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BIRLEY—On the 30th May, at Woodbank, Pendlebury, Manchester, the wife of Arthur Birley, of a son.

MITCHELL—On the 23rd April, at Yokohama, the wife of A. Mitchell, of a daughter.

RETZ—On the 12th April, at Yokohama, the wife of F. Retz, of a daughter.

WADDELL—On the 17th April, at Tsukidji, Tokio, the wife of the Rev. Hugh Waddell, of a son.

MARRIAGES.

BOULET—ESDALE.—On the 14th April, at Yokohama, by W. C. Van Oordt, H. N.M.'s Acting Consul, and afterwards at Christ Church, by the Rev. E. W. Syle, Johannes Herman Boulet to Jessie Esdale.

LUNHAM—HOWEY.—On the 20th May, at St. John's, Southall-green, county Middlesex, by the Rev. J. M. S. Brooke, M.A., assisted by the Rev. W. Lantear, M.A., vicar, Robert D Lunham to Mary, youngest daughter of the late G. W. Howey, of Wooler, in the county of Northumberland.

SCOTT—PARKES.—On the 2nd inst., at All Saints' Church, Blackheath, by the Rev. W. H. Stokes, M.A., Rector of Denver, assisted by the Rev. J. D. Nairne, B.A., Curate of St. Mark's, Reigate, Charles James Scott, of Dimbula, Ceylon, second son of James Nairne Scott, of Blackheath-park, to Emily, younger daughter of the late Rev. William Joseph Parkes, M.A., Rector of Hilgay.

DEATHS.

COTTER—On the 29th May, at Holly Lee, Row, Dumbartonshire, Alice, the beloved wife of Surgeon S. K. Cotter, M.D., Staff, Pietermauritzburg, Natal, and daughter of Capt. Jamieson, P. and O. S.S.C.

DOW—At Shanghai, previous to May 21, James Dow, formerly of Glover, Dow, and Co., and Blenkin, Rawson, and Co., China.

FEILBERG—On the 12th April, at Enterprise Estate, Delli, of cholera, Neils Hartwig Feilberg, aged 34 years.

MILNE—On the 30th May, at 77, Caversham-road, N.W., William, son of the late William Milne, Glasgow and Ceylon, in his 21st year.

TOWNEND—On the 29th May, at 37, Pennington-road, Southborough, Tunbridge Wells, of typhoid fever, Emily Sarah, the dearly-beloved wife of Edward Townend, of Hankow, China, in the 39th year of her age, youngest daughter of Henry Wood, Brooklands, Lewisham.

THE NEW AUSTRIAN CONSUL.

We have much pleasure in noticing the appointment of Chevalier Charles de Scherzer as Consul-General for Austria and Hungary, in succession to M. Schaeffer, who was last year made Envoy to China and Japan. Dr. Scherzer was brought up for the literary and political profession. During the great revolutionary movement in Austria in 1848 he played a conspicuous part; liberal in mind and principle, he left, as did many others, his country in 1849, after the revolution was put down, and a reign of the sword and the priests recommenced. He intended to migrate and settle in England, for which he had always particular sympathies, and where he had already lived for a length of time. However, the climate did not agree with him, and he left England again for a journey to Italy. In 1851, during the Great Exhibition, he revisited London, and, invited by the late Sir David Brewster and Rev. Dr. Henry Richard, he attended in August the Peace Congress in Exeter Hall. He spoke in that meeting of the friends of universal peace, and so fervently against standing armies, that on his return to Vienna he got again into trouble with the authorities and the martial law. In the Spring of 1852 Scherzer left Europe in company with another naturalist, Professor Maurice Wagnes, from Munich, on a scientific voyage to the Native States and Central America. Both friends made extensive travels in the then yet unexplored region of North America, from Upper Canada down to the Gulf of Mexico, and then embarked in New Orleans for Nicaragua. The next two years, 1853-54, we see the two scientific friends wandering through the wild primeval forests of the five States of Central America: Nicaragua, Costa Rica, Honduras, San Salvador and Guatemalra. In the latter place they got an invitation from the trustees of the British Museum to explore the ruins of Quirignia and Vetu, in Guatemala, and had placed a considerable sum at their disposition in case they should find it worth while to purchase for the British institutions some of the ancient monuments. The report turned out to be an unfavourable one, as the ruins are of a very coarse and frail material, and would not have supported the transport to Europe. Scherzer returned home through the Wistondis, and now began to publish in the Transactions of the Swiss Academy of Sciences a series of treatises on his voyage, which attracted the attention not only of learned societies, but also of the educated classes in general. His books of the United States of America (three vols.), on Costa Rica, and on Nicaragua, San Salvador, and Honduras (the latter also in the English language), were much read, and still more appreciated. The late Archduke Ferdinand Maximilian took a lively interest in the author, and invited Dr. Scherzer to join the Novara Expedition as the head of the scientific staff. He accepted, under highly favourable and distinguishing conditions, the offer, and sailed in April, 1857, on board the Austrian frigate *Novera*, on an exploring tour round the globe. He was entrusted with the narrative of the expedition, and with the ethnographical and statistical part. Returned in Autumn 1859, he settled, at the desire of the Archduke Max, at Trieste, who wished to follow the progress of the public favour; and now began for him a most laborious time. Within less than two years he had published the narrative of the expedition in three volumes in German and read the proof sheet of the English translation, most ably done by the late Mr. Hume Greenfield; he prepared, moreover, the richly collected anthropological and statistical material for print, and was afterwards occupied in putting in order and cataloguing the ethnographical and craniological collection brought back by him. The descriptive part of the Expedition was such a success that five editions were published, and more than 26,000 copies were sold of it. Archduke Maximilian wished Dr. Scherzer to follow him to Mexico, which the latter refused to do, stating that he had too little faith in the success of an expedition undertaken under the auspices of a man like Louis Napoleon and the so-called black party (clerical party), against the wish and even in opposition of the majority of the Mexican people. Notwithstanding this refusal, the Archduke, and afterwards Emperor of Mexico, entertained the most keen relations with Dr. Scherzer, and gave him the most extraordinary proofs of kindness and sympathy.

In 1866 Dr. Scherzer, although he never parted with his political principles and liberal ideas, was appointed ministerial Councillor in the Ministry of Commerce, and entrusted with the statistical department. It is one of the highest ranks in Austrian bureaucracy, and under common circumstances is only attained after thirty or more years' services. Not the liberal principles of Dr. Scherzer but those of the Government had changed. It was not longer the Government of the Concordat and the sword, but the Constitutional Government, under which the Austrian people began to enjoy the most extensive political and religious rights. Only under such circumstances a Protestant and a pronounced Liberal as Dr. Scherzer could obtain such a high official position.

In 1868 Dr. Scherzer was again entrusted with a mission to the East. He was appointed chief commissioner of an expedition sent out by the Austro-Hungarian Government to Lyons, China and Japan, with the purpose to negotiate and conclude with the Government of the mentioned states treaties of commerce. Also from his second voyage to the Far East Dr. Scherzer brought back a rich scientific material, and his book on the said mission, like that on the statistical and commercial results of the Novera Expedition, have become standard books in Germany and Austria for every one who takes an interest in matters of the Far East.

On his return, Dr. Scherzer was appointed Consul General at Smyrna, where he had lived for the last three years, and published a very useful monography in German, and printed on the principal Emporium of Asia Minor. At his own request he was removed from that out of the way place to the centre of civilisation, where Dr. Scherzer may easier be able to use his knowledge and his experience for the benefit of his countrymen and for humanity in general.

Naval and Military.

The 57th Regiment, now stationed in Ceylon, is to be sent to an Indian station to complete its period of foreign service.

The following officers, whose last period of service was on the China station, have been appointed as under:—Lieutenant C. V. Strange (in the Cadmus, from 1871 to 1874) to the Victor Emanuel, receiving ship at Hong Kong; Mr. R. Brown (in the Victor Emanuel, from 1873 to 1875) to the Vanguard, reserve ship at Kingstown; Mr. J. T. Robinson, engineer (in the Avon, from 1874 to 1875) to the Indus, flagship of the Admiral-Superintendent at Devonport; Dr. W. R. Bennett, staff-surgeon (in the Princess Charlotte, from 1872 to 1875) to the Pembroke, reserve ship at Chatham; Dr. W. H. Colahan (in the Hornet, from 1871 to 1875) to the Royal Adelaide, flagship at Devonport; Mr. C. Feltham, surgeon (in the Frolic, from 1874 to 1875) to the Duncan, flagship at Sheerness; Mr. E. Mulcahy, surgeon (in the Thistle, from 1870 to 1875) to the Victory, at Portsmouth; Mr. B. C. Scott, assistant-paymaster (in the Thistle, from 1871 to 1875) to the Indus; Mr. E. V. Sharpe (in the Iron Duke, from 1874 to 1875) to the Duncan; Mr. F. G. Grant, boatswain (in the Teazer, from 1871 to 1874) to the Revenge, flagship at Queenstown.

Lieut.-COL. Charles Pratt Kennedy, late Political Agent at Simla, died at Cheltenham on the 28th ult. Lieut.-Col. Kennedy, who was uncle to Sir Arthur Kennedy, Governor of Hong Kong, entered the Bengal Artillery in 1806, and was shortly after nominated to the only troop of Horse Artillery then existing in India, with which he served in the Nepaul campaign, under Gen. Sir R. Gillespie, who was killed by his side whilst storming the gate of the hill fortress of Kalunga. He revisited England in 1818, and on his return to India in 1820 was appointed by the Marquis of Hastings, then Governor-General of India, to the political agency of the Hill States at Simla, where he was well known. Such was the confidence reposed in the diplomatic ability, sound judgment, and discretion of the "Regal Artilleryman," that he continued in the Agency of the Hill States down to the close of his sojourn in India in 1836, when, as Major Kennedy, after nearly thirty years of active duty, he retired from the service.

At the *levée* on Monday last Vice-Admiral Sir Charles F. A. Shadwell, K.C.B., F.R.S., late commander-in-chief on the China Station, was presented on promotion and return from foreign service. At the same *levée* Sir Charles presented the following officers who had served with him in his flagship:—Commander (flag-lieutenant) F. R. Dicken, Secretary A. B. Hutchison, Secretary's Clerk C. E. Gifford, Captain W. Arthur, Commander J. L. Way; Lieutenants C. C. Drury, C. J. Norcock, G. W. Russell, and H. S. Clarke; Lieutenant A. M. Lambert, R.M.A.; Chaplain and Naval Instructor Rev. W. W. Parry, M.A.; Fleet-Surgeon A. Watson, M.D., and Surgeon G. J. Irvine.

General Sir John Michel, G.C.B., colonel of the 86th Regiment, will succeed Lord Sandhurst in the Irish command. Sir John Michel joined the army as ensign 1823; became lieutenant, 1825; captain, 1826; major, 1840; lieutenant-colonel, 1842; colonel, 1854; major-general, 1858; lieutenant-general, 1866; general, 1874; and colonel of the 86th Regiment, 1862. He was nominated a C.B. after the termination of the Kaffir war in 1853, in consideration of his distinguished services in the Kaffir wars of 1846-47, and of 1851-53. General Michel commanded a division of the Army in the campaign of 1860 in China, and received the medal with clasp for the Taku Forts.

In the account of the homeward passage of the Iron Duke from China, recently given in the *London and China Telegraph*, it was stated that *ten* deaths had occurred during the voyage. The number was a misprint for *two*.

Lieutenant Francis H. Chapman (1873), late of the Swiftsure, is appointed to the Victor Emmanuel, Hospital ship at Hong Kong.

H.M.S. Adventure arrived at Capetown on the 28th April, with the battalion of Marines from Yokohama.

The German gunboat Cyclops, from Plymouth on the 24th ult., has arrived at Gibraltar, *en route* to China and Japan.

Miscellaneous.

DEPARTURE OF THE POLAR EXPEDITION.

The Polar Expedition of 1875, the object of such general interest and solicitude, and upon which so many national hopes are concentrated, left Portsmouth on its adventurous voyage at 4 P.M on Saturday last, the 29th ult. The multitudes who assembled at Portsmouth to witness the sailing of Captain Nares and his brave companions, and the unparalleled enthusiasm with which they were received, indicate pretty clearly that a true chord has been struck, and that the sympathies of all, from the Queen downwards, go with them. There was little to see. It was the spectators who made the show. Two small vessels leaving their anchorage and sailing slowly to the eastward do not constitute of themselves a spectacle to attract an immense crowd from all parts. But underlying all was the consciousness that the crews were about to enter upon a battle with Nature in her sternest aspects, and that it was for the honour of the country that this should be so.

The Lords of the Admiralty arrived at the Landport Terminus about ten o'clock, and were conveyed to the dockyard in carriages. The party consisted of the Right Hon. G. Ward Hunt, Admiral Sir Alexander Milne, Lord Gilford, Sir Massy Lopes, and Mr. Vernon Lushington. After breakfasting on board the *Enchantress*, Admiralty yacht, their Lordships proceeded on board the *Alert* and the *Discovery*, where they were received by Captain Nares and Captain Stephenson, the whole of the officers and men being drawn up on the upper deck. Having made an inspection of the ships, the officers and crews were individually introduced to their Lordships, who cordially shook each by the hand. The First Lord, addressing the officers and sailors, said they had everything on board which could be desired for their safety, well-being, and comfort, that the eyes of the whole civilised world were fixed upon the Expedition, and that the prayers and best wishes of all their countrymen would go with them for their success in their arduous undertaking. In conclusion, the First Lord wished the crews of each ship God-speed, and, with his colleagues, shook hands with their captains. Three hearty cheers having been given in response to his lordship's parting salutation of "Good-bye, men!" as he went over the side, the inspection terminated. No sooner had the excitement caused by the visit of the Lords Commissioners ended, than the enthusiasm of the crews was raised by a thoughtful telegraphic farewell from Her Majesty at Balmoral, addressed to Captain Nares. The Royal Message was as follows:—I earnestly wish you and your gallant companions every success, and I trust that you may safely accomplish the important duty you have so bravely undertaken." To this proof of Her Majesty's sympathy with the Expedition Captain Nares promptly telegraphed the following reply:—"I feel deeply the great honour Her Majesty has done myself and the other members of the Expedition in wishing us success. Her Majesty may depend on all doing their duty." Subsequently a packet from the Queen was received on board each vessel, addressed to the respective commanders; but, as they were reverently laid aside for the present, and will not be opened until the ships are well out to sea, it is impossible to state the form which Her Majesty's regard has in this instance taken.

As the hour of sailing approached, the stillness in the crowded harbour became positively oppressive. At last four o'clock sounded from the dockyard clock, and with the very first stroke the two ships moved from the jetties. The transfiguration which thereupon ensued was startling and overpowering. The decks of the ships that lined the jetties, the yards and ratlines of the men-of-war in the stream, and the shores on both sides were clad with people. "Good-bye and best wishes for your success" was signalled from the flagship. "Thanks and farewell" was signalled back, and as the *Alert* and the *Discovery*, piloted by the *Fire Queen*, with Admirals Elliot and M'Clintock and Captain Sullivan on board, and accompanied by the *Heather Bell* and other steamers, sailed down the harbour channel, such cheers upon cheer rent the air as were never before heard in Portsmouth. The excitement communicated itself to the crews of the Expedition, for soon some adventurous seamen clambered to the mastheads, and skylarked upon the verge of the yardarms, while Captains Nares and Stephenson, Commander Markham (who is accompanied to Disco by his brother, Mr. Clements Markham), and the other officers acknowledged the plaudits of the multitude from the bridge. Turning up the eastward channel to the Spit buoy, the scene that met the eyes of the crews was truly unique. Not only were the piers crowded to suffocation, but the sloping foreshore from the Round Tower to beyond the Breakwater opposite Southsea Castle displayed an unbroken mass of waving hats and fluttering handkerchiefs. Every square inch of shingle down to the water's edge was covered, the outer boundary of the crowd being defined by a red fringe of soldiers, the sounds of whose bands playing "Auld Lang Syne" were only faintly heard upon the water. The water, too, was covered with all manner of craft. The day was dull and hazy, but the wind, which blew from the north-east, was highly propitious for the Expedition. Had it blown from the westward the results would have been serious, for while the *Alert* was submerged 15ft. at the fore and 16ft. aft, the draught of the *Discovery* was 15ft. and 17ft. The *Valorous*, which got under way from Spithead on the appearance of the ships, and followed them at a respectful distance, was still more deeply laden. As the breeze freshened, the courses were set, jibs and flying jibs were run up, topsails and topgallant sails were bent, and the ships made rapid progress through the water. The last to leave the *Alert* was the little daughter of the Captain, who, after being tenderly embraced by her father, was deposited in the pilot's gig and brought back. The admirals waved the ships a last good-bye at St. Helen's, and gradually the accompanying gunboats, yachts, and launches parted company, after giving the crews a last cheer.

CHINESE AND JAPANESE WORKS OF ART.—The most recent acquisitions of the South Kensington Museum consist of a fine series of examples of Japanese art workmanship from the collection of the well-known author of *Tales of Old Japan*. The principal of these works is a magnificent sea-eagle wrought in iron by Miyōchin Muniharn, a Japanese artificer of the sixteenth century. "Under Heaven there never was a smith the equal of Miyōchin Muniharn."—(*Japan Cyclopædia.*) The bird has apparently just swooped down with wide-spread wings, and settled down upon a rock. The animation shown in the form of the creature is really fine, and tells us, if any evidence were necessary, that Japan must have boasted of artists of no mean talent three centuries ago. The other acquisitions are a tazza supported by a dragon, in bronze, by Tō Un, eighteenth century; a tazza decorated with cranes, in bronze, by Sei Min, eighteenth century; a tazza decorated with dragons, in bronze, by Ts Un, eighteenth century; a tazza with Indian decorations supported on four elephants' trunks, in bronze, by Sei Min, eighteenth century; a toy halberd, consisting of a dragon's head, in bronze, eighteenth century; a small fish, in bronze, by an artificer of the Tokugawa family, eighteenth century; and a group of a dragon and tiger fighting (emblematic of the wars of the elements), by Sei Min, eighteenth century. In the same glass case is a collection of Chinese and Indian works of art in jade (some jewelled) and in bronze, purchased at the sale of the late well-known collector, Colonel Guthrie.

THE VACANT COLONIAL BISHOPRICS.—It is understood that the appointments to the two long vacant colonial bishoprics—Brisbane, by the resignation of the Right Rev. Dr. Tuffnell; and Colombo, by the resignation of the Right Rev. Dr. Jermyn—will be made in the course of a few days. Brisbane was separated in 1859 from the diocese of Newcastle, being Queensland up to twenty-one degrees south latitude, with a population of 126,000, an extent of 678,000 square miles, and eighteen clergy. Dr. Tuffnell was the first bishop. The bishopric of Colombo was founded in 1845, and consists of Ceylon. It has a population of 2,500,000, is 24,700 miles in extent, and has upwards of sixty clergy. The income from colonial funds is £2,000 a year. Colombo has had three bishops, all of whom resigned and are now in England, namely, Dr. Chapman, fellow of Eton College and rector of Wootton Courtney: Dr. Claughton, Archdeacon of London; and Dr. Jermyn, who, before his consecration, was vicar of Barking.

THE INTERNATIONAL CONGRESS OF ORIENTALISTS.—The third Session of the International Congress of Orientalists will be held in the month of September, 1876. The sanction of the Emperor of Russia for holding the third Session of this Congress was granted in April last, and the Russian Committee appointed for carrying out the programme find that it is utterly impossible to finish the preparatory labours in time for holding a Congress in the month of September this year. It has therefore been decided that the Congress shall be held at St. Petersburg in September, 1876.

THE annual conversazione of the National Temperance League was held last week in the Memorial Hall, the proceedings attracting a numerous company. After tea in the library there was exhibited a number of microscopes and works of art, with a valuable collection of Chinese curiosities. In an adjoining room a mammoth stereoscope attracted considerable notice. The large hall was well filled, where Mr. Huleatts delivered a lecture on "China." The lecturer's descriptions of Chinese life excited considerable interest.

AN ENGLISH OFFICER MURDERED IN BURMAH.—A telegram to the *Times* states that Colonel T. C. Hamilton, Inspector-General of Police, has been shot dead by Burmese Dacoits. Mr. Davidson was wounded seven days before, but is progressing favourably.

PROFESSOR DOUGLAS has delivered a lecture at the Royal Institute on "The Chinese Language and Literature," which was well attended.

THE last mail from Hong Kong reported the arrival of Lady Howard de Walden, accompanied by her son and daughter, *en route* to Japan, San Francisco, &c.

A TELEGRAM from Paris states that M. de Lesseps will shortly publish all the documents and correspondence relating to the construction of the Suez Canal from the time of the first negotiations with the Khedive, the Sultan, and England.

THE Rotterdam Lloyd's steamship *Friesland*, Captain Antony Bik, sailed from Southampton on the 2nd inst. for Batavia, Samarang, and Sourabaya, taking out 66 passengers from Rotterdam, about 80 Dutch troops, and a full cargo.

THE collection of Japan Curiosities and Works of Art of A. B. Mitford, Esq., formerly of the Legation at Yedo, will be sold by Messrs. Christie, King-street, on the 8th inst.

THE Eastern and Australian Company's steamer *Normanby* sailed from Singapore on the 30th ult. with Australian mails from London of the 30th April.

CHINESE COOLIES IN CUBA.

A Blue-book has been issued containing the "Diplomatic and Consular Correspondence" which has passed with reference to "Slavery in Cuba and Puerto Rico and the State of the Slave Population and of the Chinese Coolies in those Islands." The principal paper in the correspondence is an interesting report from Acting Consul General Crawford, giving statistics connected with the emigration of Chinese coolies to Cuba, from which we extract the following :—

Since 1847 no less than 138,156 of these labourers have been shipped in China for that destination, out of whom 16,346 died during the passage, leaving 121,810 as the number landed. The average of deaths to embarkations was thus 11·83 for the whole period of years. Taking the various flags under which this traffic was carried on, the lowest percentage of deaths is found in the case of Belgium, whose figure is 1·42. Next comes San Salvador with 4·33, then Russia with 6·9, and next Austria with 7·7. These four States, however, took but little part in the trade, the number of ships standing against their names being only 22 out of a gross aggregate of 342. Among the Powers doing an important business in Chinese coolies, the United States had the smallest percentage of deaths, the average figure for 34 ships being 9·8. Next came Spain, with 78 ships, and a percentage of 10·43, then Germany and Italy with 13 vessels jointly and a death rate of 11·21, and then Portugal with 21 ships and a percentage of 11·70. All these nations, it will be observed, kept the death rate under the mean average of 11·83. Slightly in excess of it came Holland with 19 ships and a percentage of 12·09, while France, the greatest carrier of all, sailed 104 ships, with a rate of mortality amounting to 12·31. England figures for 35 ships and a percentage of 16·31, Norway for 19·18 per cent., Chili 19·76 per cent., Peru 23·38 per cent., Denmark the alarming percentage of 38. But as the four last named Powers only sailed 16 ships between them, the aggregate loss of life was not so great as in the vessels under English colours. For instance, Denmark, with such a terrible death-rate as 38 per cent., only sailed one ship, on board which 179 coolies died out of 291 embarked.

Mr. Crawford supplements the statistics with the following remarks :—

Since the passing of the Chinese Passenger Act, and other regulations, which preclude British and American ships from being engaged by the speculators here, the trade has been chiefly carried on by French and Spanish vessels. Several of the other nationalities which appear in the list are, however, mere substitutes, their flags covering British or American ships that have been transferred in China for the purpose of evading our restrictions. The trade is almost entirely confined to Macao, where it seems there is every facility for crimping and fraud. There is no doubt that the coolies are cheated in every possible way, and that they are completely deceived regarding the nature of their contract and the treatment that awaits them here. Numbers of Chinese who have fulfilled their contracts have been sent off to work on the new line of defence which the Government is constructing between Baga, on the Bay of Nuevitas, and Santa Cruz, called "la segunda trocha." It would almost seem as if the Spanish officials were doing their best to stir up discontent and rebellion among the coolies, and to foment insurrection in the island. If the importation of Chinese is to continue, and there appears every probability that it will, I would suggest that, as Macao is the chief port of embarkation, the Portuguese Government should be urged to insist upon the following clauses being added to the contracts of all coolies who are shipped from that place, viz.:—1st. Salary to be paid in gold or its fair equivalent. 2nd. At the expiry of this contract, a copy of which must be delivered to the Portuguese Consul at Havana, he shall be entirely free to remain in the island of Cuba, and to exercise any lawful calling he pleases, in the same manner as any other white foreigner. I have talked over this suggestion with the Portuguese Consul-General here, and he heartily concurs in it. It would be necessary, however, to provide against the possibility of improper "regulations" which might be framed for the purpose of circumventing such a stipulation in the Chinese contracts, to induce the Spanish Government to agree to it, and to repeal all the rules and regulations affecting the Chinese in Cuba, substituting in their room a fixed law, requiring no explanation or subsequent ("reglamento") regulations, which would protect all parties.

With reference to those Chinese who claim British protection, as coming from Hong Kong, it is a very difficult matter to judge of their right to such protection, or to be registered as British subjects. With half-a-dozen exceptions, all those I have seen have no papers to prove it, and the simple declaration of the coolie that he is a native of Hong Kong is not to be relied on, for these people have in general very little regard for the truth. Of course in a question of this kind one feels inclined to give them the benefit of the doubt ; but I have always been opposed to raise any dispute with the local authorities here by obtaining "cedulas," or papers for Chinese whose right to British protection was questionable. I do not see in what way protection can be afforded the Chinese coolies by foreign consuls as the law now stands. As I have before stated, the Spanish Government should repeal all enactments regarding Chinese up to date, and should frame a concise and just law, not subject to local or other regulations, which would put these emigrants upon a proper and equitable footing, secure the rights of master and man, and provide against vagrancy or future trouble to the State. The authority given by the late Captain General Valmaseda to Mr. Strauss, to act as a semi-official agent here for the Chinese who had fulfilled their contracts, in order to assist them in getting out their protection papers and passports, has been withdrawn at the instance of the "Board of Colonisation," so that these poor people are without any recognised agent or protector except the "Board."

It must not be forgotten that the question of labour must always be one of paramount importance here, and that considering the heterogeneous mixture of races in Cuba, it will require great tact and firmness in adopting laws which will at once protect individual rights and secure order and industry in the island. The wealth of Cuba depends upon its agriculture, and field labour is always fatiguing and arduous ; so that regulations, which might elsewhere appear arbitrary and harsh must be allowed to carry with them somewhat of compulsion here, in order to keep up the cultivation; but they need not on that account be devoid of justice between man and man. Without any reliable data on the subject, it is supposed that there are at present about 100,000 Chinese coolies in Cuba.

DEPUTATION TO LORD DERBY.

A deputation from the Anti-Slavery Society waited upon the Earl of Derby on the 1st inst. at the Foreign-office, in reference to the claims of England upon Spain, on the subject of the slave trade and slavery in Cuba. The deputation, which was introduced by Sir John Kennaway, M.P., included Sir T. Bazley, M.P., Mr. P. A. Taylor, M.P., Mr. J. Corbet, M.P., the Hon. Evelyn Ashley, M.P., Mr. J. W. Pease, M.P., the Hon. A. Kinnaird, M.P., Mr. R. N. Fowler, Sir Charles Wingfield, &c. A memorial was presented, in which the Society urged that Her Majesty's Government ought to take some decisive steps in the way of friendly mediation to bring about an equitable termination of the Civil War in Cuba, which was fast culminating to a successful issue on the side of the insurgents, and must result in a further fearful slaughter and a vast destruction of property. The memorialists also urged the Government to take steps for the abolition of slavery and the slave trade in the island.

Sir John Kennaway said it appeared from advices recently received that the more moderate among the slaveholding inhabitants of Cuba were willing to consent to emancipation on reasonable terms of compensation. With regard to the importation of Chinese coolies into the island, it was clear that some restrictive measures were necessary in order to prevent this importation being attended with all the evils of the slave trade. The Hon. E. Ashley thought the present moment was opportune for intervention on the part of England on the old lines of the anti-slavery policy. There was springing up in Spain a strong anti-slavery party, and, as America had given up the idea of annexing Cuba, the good offices of that country might be relied on in support of emancipation. Mr. R. N. Fowler, speaking on behalf of the Aborigines' Protection Society, urged upon the Earl of Derby the importance of taking some steps to put an end to the atrocities which were committed in connection with coolie emigration to Cuba. Sir Charles Wingfield supported the appeal of Mr. Fowler, and confirmed his statement as to the atrocities connected with the coolie traffic. The Hon. A. Kinnaird concurred in thinking the present an opportune time for dealing with the Cuban question. Mr. Edmund Sturge quoted a passage from the official paper published in Havannah on the 21st of April last to show that the Society was backed up authoritatively in its view that the war was culminating in favour of the insurgents.

The Earl of Derby, in reply, said he would very carefully consider all the suggestions which had been made. With regard to the question of coolie emigration, he thought, speaking offhand, that Her Majesty's Government had no right to interfere in the matter. The only Government which, strictly speaking, had a right to take up the cause of the coolies was the Chinese Government, which at the present moment did not prevent the emigration of Chinese subjects to foreign countries, but which also failed to watch over their interests afterwards. It was not to be expected that much would be done by the Chinese Government. With regard to the general position of the Chinese emigrants in the various countries of the world, he apprehended that the real remedy to be applied—and he felt sure that it would in time be applied—would be to make the Chinese Government and people understand clearly the position in which emigrants from their country were placed in the countries to which they went. The free emigration of Chinese had been increasing very rapidly of late years. As was generally known, they were pouring very rapidly into California; and he thought free emigration was destined to supersede the old system of emigration under contracts. For his own part, he did not absolutely and unconditionally condemn this system, but he thought it required very careful watching. When it was carried on by a Government which sanctioned and continued the practice of negro slavery, he had no doubt it was open to very gross and grave abuses. However, he did not see that the Government could do more on the subject than bring to the knowledge of the Spanish Government any well-authenticated cases of oppression and abuse which came to their knowledge. With regard to the other questions, he must own to a feeling of difficulty in expressing any opinion with regard to the insurrection in Cuba. It had lasted a long time, had been conducted with very great pertinacity, and down to recent dates very little progress had been made in putting it down. On the other hand, he thought it at least premature to say that the war was "fast culminating to a successful issue on the side of the insurgents," as stated in the memorial, and he did not think any proposal on the part of Her Majesty's Government at the present time to mediate between Spain and the insurgents would be looked upon in a favourable light by Spain. The feeling of patriotism in Spaniards was very strong, and it was true of them, as of other people, that they did not always accurately measure their own strength. If Her Majesty's Government were to make any suggestion to Spain, their answer would probably be, "We have got two civil wars on our hands at the same time, and our efforts are divided between the two. Let us finish with the Carlists, and then we shall have all our forces disposable to put an end to the war in Cuba." That, he had no doubt, would be the answer, and he could not blame the Spanish Government for making it. At the same time, if any prospect opened up of putting an end to the existing state of things, Her Majesty's Government would be very glad to avail themselves of it. With regard to emancipation, he had no doubt that sooner or later it would come, and that the same conviction existed in the minds of slaveowners themselves, who were only fighting for a continuance of the system for a few years longer. At the same time, he believed that emancipation in Cuba could not be accomplished by itself, but must be a part of a general and complete scheme for the pacification of the island. He could not, there

Digitized by Google

fore, admit that the present time was specially favourable for English interference. If an opportunity should arise in which the good offices of England could be available, they would be most readily given. In dealing with the domestic and internal affairs of other countries it was not so wise to rush forward with advice as to wait until it was asked for. He believed that what had been said in reference to the fact that the United States had no desire to annex Cuba was perfectly true; but, at the same time, he believed that the American Government and people would receive with considerable suspicion and jealousy any attempt on the part of England to interfere between Spain and Cuba, and would be apt to put a wrong construction upon it. He was sorry if he might have seemed to speak in a vague and undecided manner in reference to the questions brought before him. He could not, however, speak more positively. He had endeavoured to make clear the difficulties of the case, and for the rest he could only say that his sympathies and those of his colleagues were entirely with the objects which the deputation had in view.

The *Standard*, in a leading article referring to the propositions put forward by the deputation, says :—

The demand of the Anti-Slavery Society—most of the members of which are probably staunch adherents of the political doctrine of non-intervention, and perhaps members also of the Peace Society—is, in fact, that Great Britain should constitute itself the protector of slaves and foreign emigrants all over the world—that it should undertake the amendment of the domestic institutions of Cuba—that it should assume the guardianship of Chinese citizens abroad—finally, that it should aid in depriving Spain of the island of Cuba. To a proposal so extravagant as this Lord Derby could, of course, give but one answer. The emigration of coolies from China to Cuba is a matter which cannot concern the British Government. The only Power which has a right to take up the cause of the Chinese emigrants is the Government of China; and if it is careless or ignorant of its duties to its own citizens, it is absurd to suppose that any blame can accrue to England. It is very probable that there are many abuses in the treatment of Chinese immigrants in the Island of Cuba; but it is no more our business to meddle with the system than to interpose on behalf of the Chinese immigrants in the United States. Surely the Foreign-office has enough to do to look after the interests of British citizens abroad without also undertaking the championship of the citizens of all other countries who may happen to be residing in foreign countries. The Chinese Government is perfectly well able to take care of its own subjects, and perhaps it would resent any interference of ours in their behalf. As for the Government of Spain, it would have still greater reason to complain of us did we venture to interfere in the manner proposed by the Anti-Slavery Society in the affairs of Cuba. We cannot doubt that its answer would be as Lord Derby has suggested. No philanthropic motive could excuse a step so ungenerous as a remonstrance to Spain, in the time of her present trouble, on behalf of the Cuban insurgents, nor should we be surprised were some Spaniard, having before him the memorial of the Anti-Slavery Society, to taunt us with the fact that our friendly mediation is given as much in view of the "vast destruction of invested capital" as of the injury to humanity in the prolongation of the Cuban civil war. Indeed, we do not know anything better calculated to spoil the effect of any attempt at friendly mediation with Spain on the subject of Cuban slavery than the interest which is openly avowed by the Anti-Slavery Society in the cause of the Cuban insurgents. No Government with any sense of self-respect would listen patiently to a remonstrance based on the ground that it was incapable of maintaining its authority over its own subjects. It would probably tell us to mind our own business; nor can we think it would be any gain to the cause which the Anti-Slavery Society professes to represent to receive such an answer. For that cause we have the profoundest respect, but we cannot imagine anything more likely to bring it into contempt, to make it unpalatable to foreign countries, and to defeat its prospects in the future, than the rash and ignorant zeal of such deputations as that which waited upon Lord Derby.

RUSSIA AND JAPAN.

The St. Petersburg correspondent of *The Times* writes as follows, under date 24th ult. :—

By the recent Treaty, in virtue of which Russia cedes the Kurile Islands to Japan in exchange for all the Japanese rights to Saghalien, the dispute between Russia and Japan as to the ownership of this island, now lasting for more than half a century, has at last been happily terminated. The voyages of La Perouse in 1787 and of Krusenstern in 1805 had made the world acquainted with the general shape of the Island of Saghalien, but Krusenstern, following Broughton, supposed it not to be an island, but to be connected with the mainland at a place now called the Tartar Gulf. Although a Japanese navigator, whose account was afterwards published by the naturalist Siebold, subsequently sailed through the Straits, yet the fact that Saghalien was an island was not generally recognised until the expedition of Captain Nevelsky in 1849. Up to the middle of the last century Saghalien was in the nominal possession of the Chinese, and after they had abandoned it, Japanese fishermen and colonists went there as early as 1780. The Japanese, in the statements of their claims to the island assert, on the basis of obscure passages in their annals, that they had visited the island as long back as A.D. 650, and subsequently in 720, and it is indisputable that in 1786 and for many years after Japanese Government officials were sent there to take charge of the colonists. In 1807, after the voyage of Krusenstern, the island was visited by the Russians, and Lieutenant Khrostof annexed it to Russia, but a few years later, during the imprisonment of Golodhin in Japan, the Russians officially gave up all claims to the island, and declared the act of Khrostof to have been without authority. In 1853, when, after the occupation of the mouths of the Amoor, a Russian expedition discovered coal-mines on the island, Russian posts were established there in various places, but were subsequently withdrawn on account of the Crimean War. The discovery of coal gave Count Putiatin, then on a mission to Japan, an idea that the island might be important to Russia, and in the negotiations for a Treaty of Commerce at Simoda in 1852 and 1854 he endeavoured to induce the Japanese, whose rights to the island were thus recognised, to agree to a boundary line between the Russian and Japanese settlements. The Japanese Commissioners proposed the fiftieth parallel of latitude, thus cutting the island in halves, but Count Putiatin was unwilling to give more than the Bay of Aniva in the south and the Island of Iturup (one of the Kuriles already in Japanese possession). No agreement being reached on this point, it was established in the treaty of Simoda in 1855 that the Island of Iturup should belong to Japan and Urup and the rest of the Kurile Islands to Russia, while "as concerns the Island of Kurufto (Saghalien), it shall remain undivided between Russia and Japan as it had theretofore been." In 1860 Mouravieff, the Russian Envoy at Yeddo, again began the discussion as to the boundary. He proposed that the boundary line should be through the Straits of La Perouse, between Saghalien and Yesso. This the Japanese Government refused, and no agreement was made. In 1862 a Japanese Embassy came to St. Petersburg, and as the Japanese still insisted on the line of fifty degrees and the Russians on the Straits of La Perouse, it was finally agreed to leave the matter to a Special Commission.

Owing to the internal troubles of Japan, and to the flight of the Tycoon to Kioto, this agreement was never carried out, although the Russians claimed to have sent their Commissioners. In 1866, another Japanese Embassy on this subject arrived in St. Petersburg. As the result of negotiations at that time a Convention was signed in March, 1867, in which it was stated that the Russians proposed to keep the whole of the island of Saghalien, and to give to the Japanese the island of the Kurile Group called Urup, with three small islets adjoining, but that in case the Japanese Government did not agree to this, the previous joint occupation of the island should be continued, and that both Russians and Japanese should be allowed to settle and colonise in any parts they pleased. The Russians, however, soon took measures to restrict the Japanese to a small portion of the southern end of the island, in consequence of which, in 1870, the Japanese Government formally applied to the Government of the United States to act as mediator in the matter. This application was based on the second article of the treaty with the United States of 1858, in which it was stated that the President of the United States, at the request of the Japanese Government, would act as a friendly mediator in such matters of difference as might arise between the Government of Japan and any European Power. The Russian Government, however, refused to accept any proposal of mediation or arbitration, and since that time the Japanese have been entirely driven off the island.

The feeling of the Japanese about their rights to the Island of Saghalien has always been very strong, and more especially so since the recent development of the military and naval power of Japan, and it has of late been frequently suggested that the Japanese might exercise their forces in an attempt to recover the sland. But the Russian Government was no less anxious than the Japanese to come to some final arrangement, and took occasion from the establishment of a permanent Legation at St. Petersburg to renew its former proposition of compensating Japan for Saghalien by the cession of two or three of the nearer Kurile Islands. The Japanese Legation, knowing the excited state of public feeling at home, was unwilling to take less than the cession of the whole of the Kurile group, including the Island of Paramushin, which on account of its seal fisheries may perhaps be of some value, and after considerable negotiations at last succeeded. A treaty was drawn up with the approbation of the Home Government, and was signed and ratified by the Emperor before his departure for Germany. The final ratifications, it is expected, will soon be exchanged in Yeddo. This arrangement of the matter is much to the credit of Admiral Enomoto, the Japanese Minister. He saw perfectly well that it was impossible to recover Saghalien from the Russians, and he has succeeded in obtaining a sufficiently large compensation to satisfy the patriotic feeling of his countrymen, and has thus avoided a possible cause of trouble in the East.

The northern part of Saghalien is inhabited by Ghiliaks, the same race as the natives on the Lower Amoor, while the southern half is populated by Ainos, the race which inhabits the Kurile Islands. Besides the Russians and a few Japanese, there are a very few Chinese brought over as workmen in the coal-mines. The sole value of the island to Russia lies in its coal, of which there are vast deposits of excellent quality, better than Australian. The best coal-mines on the island were for some years successfully worked by the houses of Olyphant and Co., of Shanghai, under a concession given by Admiral Kroun, the Russian Governor of the Amoor Region. When the Russian Government decided on sending convicts to the island it was found inconvenient to allow foreigners to work these mines, and, advantage being taken of a clause in the concession by which the proprietors of the mines were subject to the Russian laws, a new law was made that in places set apart for penal settlements foreigners should not be allowed to work mines. The concession was therefore annulled, and several thousand tons of coal which had already been dug and stored were confiscated. As yet no metals of any kind have been discovered. According to Colonel Veninkof, in his "Military Survey of the Russian Boundaries in Asia," published in 1873, the Island of Saghalien has not the slightest strategical importance to Russia, because, owing to the depth of the channel it does not defend the mouths of the Amoor, because it has not a single safe port, because its defence is impossible, and because on account of its climate it cannot produce grain enough to support the garrison and convicts. The colonisation and commerce of the Amoor, in spite of the line of steamers supported by the Government, has by no means corresponded to the ideas which were at first entertained, and owing to the fact that the harbour of Nicolaiefsk is closed by ice for eight months in the year, the naval, military, and Government centre of the whole coast has lately been changed from Nicolaiefsk to Vladivostock, where there is open water for the chief part of the year.

Literature.

The North Star and the Southern Cross. By MARGARETHA WEPPNER. Two volumes. London: Sampson Low and Co. 1875.

Narratives of trips round the world by both male and female travellers, all of whom seem equally anxious to give their "personal experiences, impressions, and observations" to the public, are becoming so common that their authors are evidently getting somewhat puzzled to find fresh titles for their works. In a little more than twelve months we have had "A Ramble Round the World," "Meeting the Sun," "Voyage en Asie," "Fifty Thousand Miles of Travels Round the World," &c., and now we have "The North Star and the Southern Cross," which is, perhaps, the most whimsical title of all. Before inviting him to accompany her on her two years' journey, Miss Weppner not unnaturally introduces herself to the reader by a brief sketch of her previous life, and by showing how she, "a lone woman, undertook so perilous an enterprise," being, in point of fact, almost driven to it by force of circumstances, for she was not, as she tells us, impelled by a desire to travel. Her story is sad and painful in the extreme, but it proves conclusively that, much as we may laugh about unprotected females, woman is a "helpful" creature after all. Having surmounted many troubles and difficulties, Miss Weppner started from Havre to New York, and thence eventually made her way to San Francisco, visiting, amongst other places on the way, the Falls of Niagara and Salt Lake City. From the Golden Gate she crossed over to Japan in the ill-fated s.s. *America*, having among her fellow passengers General Tom Thumb and his family, and spent three months partly at Yokohama and partly at Yedo. As may well be imagined, the life of a lone woman at a Yokohama hotel was the reverse of pleasant, while to add to her difficulties Miss Weppner appears to have been persecuted by her fellow-countrymen in a most scandalous manner. In this portion of her work she arrives at a fairly accurate estimate of the character of the Japanese and the Chinese, which we must presume was in part based upon her after experiences in the Celestial Empire. "The Japanese adapt themselves," she says, "very readily to what we are pleased to term our culture and civilisation; the Chinese are less pliant, but I question whether in their reception of impressions they are not more susceptible and less superficial than the Japanese." She was inexpressibly shocked at the general indelicacy of the natives, and does not speak in high terms of the moral atmosphere of the European settlement at Yokohama; indeed, her statements and conclusions are such that we earnestly hope that her own trials warped her better judgment and made her unnecessarily censorious. After a few excursions in the neighbourhood, Miss Weppner embarked on Feb. 21, 1870, on board the s.s. *Oregonian*, bound for Shanghai, and "left the material and moral slush of Yokohama behind her with a feeling of general satisfaction. "Nature," she adds a little further on, "has made Japan an Eden, men have made it a hell!" After a pleasant voyage through the Inland Sea, &c., we are taken to Shanghai, of which she naturally speaks in somewhat glowing terms, for people were kind to her there, and treated her with a consideration which must have been very grateful after her Yokohama experiences. In a couple of months our author left for the north, and in due time arrived at Tientsin, but "the Heavenly Ferry is a dismal, dreary hole, quite unworthy of any description." She afterwards, however, goes out of her way to tell us that Tientsin is the second city of the Empire, and is situate in the province of Shantung (!), facts of which we were not previously aware. Next we come to Peking, where Miss Weppner had a very pleasant time of it, on the whole, thanks to the kindness of her English friends, but even here the conduct of one or two of her fellow-countrymen, incited by some of her former persecutors in Japan, embittered the latter portion of her visit, and made her more or less uncomfortable during the whole of the remainder of her time in China. With Peking itself our author was naturally grievously disappointed, as many others have been before her. From her youth up, from the days when she learned geography at school, and was emphatically told that it was the largest city in the world, "Peking played a great part in her imagination," and to her mind's eye has always appeared as the abode of splendour and magnificence; the reality was consequently all the more startling. "Dante alone," she exclaims, "could do justice to the ordure, miasma, and the really infernal stench of this so-called paradise of the Celestial Kingdom. It would be utterly impossible for any European who has not been in China to give anything like an approach to an idea of the horror and filth of the capital." Miss Weppner is quite right, and we may go further,—having had personal experience of the delights she alludes to,—and say that very few of those who have only visited the treaty ports of China can form a correct notion of the condition of Peking. Under able guidance Miss Weppner saw most of the leading sights of the capital and its immediate neighbourhood, and did not forget to make an excursion to the inner Great Wall and the Ming Tombs. On her way down to Tientsin she fortunately met the courier bearing the despatches from the British Consulate, which reported the massacre of 1870, and was induced by his odd gestures to retrace her steps; had she not done so this book would most assuredly never have been written. Eventually our author got safely through Tientsin and was landed at Chefoo, where her stay seems to have been "sad and solitary." Having paid another short visit to Shanghai, Miss Weppner made her way down to Hong Kong and Canton, where she met with much kindness, that large-hearted man, Archdeacon Gray, acting as her *cicerone* at the latter place, and thus enabling her to see comfortably most of the sights and curiosities. We have devoted so much space to our author's stay in China and Japan that we can only briefly indicate her further movements. On leaving Hong Kong she went to Saigon, Singapore, and Java, and returning to Singapore, next proceeded to Calcutta; thence, after visiting various places in India, she found her way to Bombay, and so on to Alexandria and Trieste.

Considering the nationality of the writer, these volumes are wonderfully free from solecisms in style and grammar, and it is abundantly evident that Miss Weppner is an accomplished linguist. Defects there are, it is true, and in China, especially, she comes to serious grief over the names of places, &c.; the Shanghai river, for instance, appears under three or four different names, not one of which is approximately right. The book will do good service in attracting public notice and condemnation to the low tone of morality prevailing in some parts of the East; but it is to be regretted that the writer has given people's names quite so freely, and at best has only attempted to conceal them under the thin cloak of initials. When at Shanghai she told a lady friend that "it was her intention to write the history of her travels, and with the proceeds to succour the declining years of her mother's life;" and in this very laudable object, despite the occasionally wearisome prolixity of her narrative, we heartily wish her all success.

Travels in the Philippines. By F. JAGOR. With numerous Illustrations and a Map. London: Chapman and Hall. 1875.

"Few countries," says the writer of these pages, "are so little known and so seldom visited as the Philippine Islands, although there is no more pleasant one to visit than that lavishly endowed island-kingdom," and he has done good service to all classes, to the merchant and the mere traveller alike, by directing public attention to the subject in the handsome volume before us. We are inclined to think that the title of the work is decidedly a misnomer, for although "copious notes, made on the spot, have served as the basis of that part of the work which refers to the travels" (undertaken, by the way, as far back as 1859 and 1860), Mr. Jagor is indebted for a large part of the superstructure built up on these notes to the archives placed at his disposal by the Spanish Colonial Minister, which yielded valuable information, especially as regards the government, the taxes, the duties, the tobacco trade, &c., and to sundry "ponderous tomes and monkish chronicles" in the libraries of Berlin and London.

The Philippines were first discovered by Magellan in 1521, but it was not till 1564 that the Spaniards actually took possession of them in the name of Philip II., from whom they derive their present name. The history of these islands for the last two centuries and a half "is, in all its particulars, quite as unsatisfactory and uninteresting as that of all the other Spanish-American possessions. Ineffectual expeditions against pirates and continual disputes between the clerical and secular authorities form the principal incidents." Mr. Jagor thinks that the proper field for their commerce is not yet open to them, and he expects that in the future their trade will be intimately bound up with that of the west coast of America and of Australia, to the entire exclusion of their present traffic with China, and "with those westward-looking countries of Asia, our own far east, which lie nearest to the Atlantic ports." The contents of this work are comprised in twenty-seven chapters, and the information contained therein is conveyed in so desultory a manner that it would be impossible to give a correct idea of its value without analysing each individual chapter. A sufficiently accurate notion, however, of the varied information which Mr. Jagor places before us may be obtained by a brief indication of the contents of a few of the more noteworthy sections of the work. Chapter III., for example, treats of Manila, life in town and suburb, cock-fights, and dress of the different classes; Chapter V. of the geography of the Philippines, their meteorology, internal administration, population, and dialects; and Chapter X. of cacao, coffee, religious festivals, &c. Chapters XIV. and XXII. deal with the manners and customs of the Bicol and Bisayan Indians respectively. Although the bulk of the volume is a miscellaneous, but at the same time interesting, nature, the concluding chapters comprise a digest of valuable information on some subjects of considerable importance. Chapter XXIV. is devoted to abaca, or Manilla hemp, and describes its cultivation, the mode of obtaining the fibre, &c., to which Mr. Jagor adds some remarks respecting paper material. In Chapter XXV. he deals with the tobacco monopoly, which he styles "invidious and pernicious." "Tobacco," he says, "was introduced into the Philippines soon after the arrival of the Spaniards by the missionaries, who brought the seed with them from Mexico. The soil and climate

Digitized by Google

being favourable to its production, and the pleasure derived from it being speedily discovered by the natives, naturally assisted in its rapid adoption. Next to the Cuban tobacco and a few sorts of Turkish it is admitted to be the best; and in the colony it is asserted by competent judges that it would soon surpass all others, if the existing regulations were abolished and free trade established." Not having had any opportunity of acquiring a personal knowledge of the cultivation of tobacco, Mr. Jagor furnishes his readers with an extract on the subject from the *Cartilla Agricola*. It will not be without interest to state here that the cultivation of tobacco appears to have been introduced into China from the Philippines, not improbably by way of Japan, at the end of the sixteenth or beginning of the seventeenth century. The next chapter is devoted to the Chinese, who form so important a section of the population of the Philippines, and "who are destined to play a remarkable part, inasmuch as the development of the land cultivation, demanded by the increasing trade and commercial intercourse, can be effected only by Chinese industry and perseverance." For various reasons there can be little doubt that there was communication between China and these islands long before the advent of Europeans; indeed, there is a tradition that the Philippines were at one time tributary to China. Notwithstanding the evident usefulness of the Celestials, the Spaniards have always treated them very badly and endeavoured to limit their numbers. The Chinese settlers have frequently been massacred, for the last time in 1819, and many attempts have been made to drive them out althogether. In more recent years the Spanish officials have done their best "to suppress their activity by means of heavy and oppressive taxation." On this point the following statement would appear almost incredible, were it not that Mr. Jagor makes it on the authority of a late British Consular Report:—At the end of 1867 the Chinese shopkeepers were annually taxed sixty dollars for permission to send their goods to the weekly market; this was in addition to a tax of from twelve to a hundred dollars on their occupations; and at the same time they were commanded to keep their books in Spanish! After all the Spaniards are not alone in their short-sighted policy towards the Chinese, for the unfortunate Celestial fares but little better in the Western States of North America. Some day, perhaps, the necessity will be seen in both countries for allowing them to pursue their industrious occupations in peace and quietness. In conclusion, we may mention that Mr. Jagor provides his readers with a species of vocabulary of the "Foreign terms of frequent occurrence," and that his volume contains a number of woodcuts, but we cannot say very much in favour of the map, which appears to be needlessly overcrowded with names.

The Russian Government have announced the following appointments:—As Consul-General of Russia at Shanghai and for all Chinese ports, State Councillor Constantin Skatchkow; as Consul of Russia at Tientsin, Court-Councillor Charles Weber; as Vice-Consul at Yokohama, Baron Roman de Rosen, College-Assessor, functionary of the 8th class in the Asiatic Department; as Pupil Interpreter to the Russian Legation of Yedo, M. Alexander Pelikan, B.A., from the University of Kharkow. Honorary Councillor Alexandre Olawsky, Acting Consul at Hakodadi, is transferred in the same capacity to Nagasaki.

By a decree of the President of the French Republic, dated 20th May, M. Esquer, Councillor at the Court of Appeal of Saigon, is appointed Procureur of the Republic (Public Prosecutor) and Head of the Department of Judicial Affairs for the French Settlements in Oceania. The seat left vacant by M. Esquer in the Court of Appeal of Saigon is filled by M. Lasserre, President of the Superior Tribunal of Noumea, New Caledonia. M. Joseph Boutroy, Administrator of 2nd class in the service of Native Affairs in Cochin-China, and M. Etienne Aymonier, Auxiliary Administrator of the same class in the same service, have been appointed Administrators of the 1st class, to take rank from the 1st April last.

A member of the French Geographical Society sends us word that at the forthcoming Exhibition, to be held at Paris simultaneously with the Congress on Geographical Science, a large map of French Cochin China will be shown. This map is made up of twenty separate sheets, and has been prepared by Captain Bigrel, of the French navy. The same map on a smaller scale, reduced to one sheet, in fact, will also be on view. The Exhibition will be held at the Palace of the Tuileries, and is to be opened on the 15th of July. The Geographical Congress commences on the 1st of August. Any of our readers who may wish to contribute works of their own, or collections made by them, to this Exhibition should write without delay to the General Executive Committee of the International Congress on Geographical Science *(au Commissariat Général de Congrès International des Sciences Géographiques)*, at the Palace of the Tuileries, Paris. Printed works, or manuscripts, views, drawings, photographs, and so forth, or collections, maps, and the like, will be gladly received.

We hear that Mr. Thompson, our well-known artist of China, is likely to be attached to the suite of the Prince of Wales to India. A better selection could not be made, and we are sure he will do justice to it.

HOLLAND.

—o—

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, JUNE 2.

The members of the Second Chamber have taken recess, after having voted the Coinage Bill, by which gold coins (pieces of ten guilders only) will be brought again into circulation, and also the Bill by which the Government obtains a credit of f.8,000 for the preparatory works for reclaiming a portion of the Zuiderzee, by which the superficial area of our kingdom will be considerably increased. Towards the close of this month the members will meet again in order to deal with a few unimportant Bills, and then the session will be finally closed. Of course we are now under the influence of an election-fever, but, nevertheless, unusual calmness prevails, and it is only in a few districts that the contest will be warm. I never remember such a disruption of parties; Liberals back Conservative candidates, Catholics are voting with Liberals. The result of the elections will be, I think, a most curious one, and perhaps it will tend to lengthen the artificial life of the present Ministry.

Some days ago a section report of the First Chamber was published upon a Bill to increase the East India Budget for 1875. It states that several members have complained about the most unsatisfactory results of the regulation of the opium trade, which was organised by Mr. de Waal and Governor-General Myer. The great difficulties attending the recruiting for our East India army has led to the consideration whether it is not desirable to abolish the system of substitution in the army. The principal contingent is now furnished by foreign countries. Some members are surprised that nothing is heard any more of the East India brigade. The establishment of this brigade had been strongly recommended as a means for providing the necessary men for our service in Java. I do not expect that all this skirmishing in the sections will lead to anything good.

The telegram from Batavia stating that Major-General Pel has obtained leave of absence for three months, in order to restore his health, has, of course, created some impression. People are thinking that this is the preparatory step for his repatriating. By a singular accident, on the very day that this telegram arrived, it was published that General Verspyck would start by the next mail for Java, to remain there for some time "for private business."

I regret to record the death of Mr. H. Rahusen, Member of the First Chamber. He died at Wiesbaden, where he had remained for some weeks to restore his health. Most alarming rumours have been current about Prince Alexander, who was said to have been attacked by typhoid fever. Happily this is not true; he was suffering from slight indisposition, but is now quite well.

Mr. H. Bezoet de Bie is approved of by the King as vice-consul of Sweden and Norway at Sourabaya.

The shareholders of the Steam Shipping Company Java met some days ago. The balance-sheet for last year was approved of, and a dividend was declared of 6 per cent. The managers were authorised to issue a Five per Cent. Loan for two millions, in order to liquidate certain debts and to buy new steamers.

On the 25th of May a retired soldier of the East India army died at Bronbeck, where he had lived for some years with other old soldiers. He was a Swiss by birth, and had served from 1858 to 1873, when he was pensioned off, with the rank of sergeant-major. His pension amounted to f. 272 a year. Julius Disteli—such was his name—died rather suddenly, and it created much surprise that in his possession was found not only a sum of 500 francs in napoleons, but documents stating that he had at his disposal in a Zurich bank a sum of one hundred thousands francs, and that he owned much valuable property beside; his papers further stated that he had served in the Swiss army from 1840 till 1853, and had obtained the rank of lieutenant. He asked for his dismissal, and became a soldier in the Papal army, from which, in 1857, he was pensioned as second lieutenant, and in the following year he was enrolled in our East Indian army.

According to the *Utrechtsch Dagblad*, Captain W. B. F. Esscher will replace Captain H. B. Kip as commander of our naval forces in Atchin.

PRODUCE MARKETS.

Last week produced very little alteration in our market for Colonial Produce. The transactions have been very limited, though the auctions have gone off very satisfactorily.

COFFEE.—The market is firm, and the general opinion is that prices will rise, because imports will be relatively small.

TEA without transactions in first hands. There has only been demand for direct consumption. On the 4th inst. 777/4 and 21/12 chests Congou, valued at 88c. to 120c., 2,183/12 chests Souchong, valued at 94c. to 110c., all ex Sea Gull, from Foochow, will be brought under the hammer.

RAW SUGAR has met with a livelier demand. Buyers can be found for parcels on the spot at f.¼ to f.2¼ under November prices. Inferior quality is, however, almost unsaleable.

RICE is very quiet. A floating cargo of Rangoon has been sold for London market at 8s. 2½d.

SPICES.—Very limited transactions in Nutmegs and Mace. Quotations are nominal.

JAVA TOBACCO.—Important parcels have been sold by private tender at most satisfactory prices. The imports have also been very considerable. Large lots will shortly be brought into the market.

COTTON.—Holders being disinclined to lower their prices transactions have become impracticable.

DRUGS have been dull, and no parcels of importance have changed hands.

JAVA INDIGO has been in limited demand. Only a few small parcels have been sold. The stock amounts to about 1,015 chests.

BANCA TIN.—The auction, at which 22,834 slabs were offered, went off at an average price of f.50.20, and no transactions have taken place since.

LONDON: MONDAY, JUNE 7, 1875.

FALLING OFF IN THE TRADE OF HONG KONG.

IT is always a matter of difficulty to ascertain how the trade of Hong Kong is progressing, or, rather, if we are to describe it during the last few years, we fear we must say retrogressing, and any accurate returns tending to elucidate the point are, therefore, always welcome. How difficult it is to ascertain the true state of affairs was admirably illustrated at the public meeting which took place in Hong Kong last year with reference to the blockade question, when we found mercantile men of high standing diametrically opposed to one another in their views with regard to the junk trade. The Harbour Master's Report for the year 1874 affords us some clue as to how matters have been going on, and we fear leave only too good ground for concluding that at last the unfavourable character of the China trade, which has been so long and so bitterly complained of, is beginning to become apparent in a way which cannot be mistaken. Mr. THOMSSETT points out that there has been a falling off of 654,764 tons in the shipping, and adds that although the disparity between the measurement and carrying capacity of vessels will, in a degree, account for the great decrease in tonnage in foreign bottoms, and the typhoon of last September will account for some of the very serious reductions in the number of junks frequenting the port, "there is no doubt that "the trade with the colony has considerably dimi- "nished during the last three years." This is a very serious statement in regard to a place where we might justly look for an increase instead of a decrease in the trade were it not for external causes exercising an adverse influence upon it. Mr. THOMSSETT evidently does not come to his conclusion in a hurry; and if his statement is to be relied upon, and there is no reason for not accepting it, it is certain that the plan of the Viceroy of Canton—in which, according to his own statement, Sir BROOKE ROBERTSON acquiesced with so much readiness as almost to suggest his having himself proposed it—of placing barriers round the colony has produced the most detrimental effects. With this undeniable fact before us, we cannot but again most strongly deprecate the line which he thought fit to adopt in that matter. Whatever he might rightly or wrongly consider the merits of the question to be, he ought certainly not to have offered encouragement to the Chinese officials to take a step which was likely to produce such pernicious results. When once a trade has become diverted from a given channel it is a difficult matter to bring it back again; and this is especially the case in respect to trade in China. It may therefore be quite a question whether the unfortunate course which was taken may not be found to have permanently injured the trading interests of the colony. It is true that Sir BROOKE may plead as an excuse that Sir RUTHERFORD ALCOCK proposed in his convention for the revision of the treaty that a Chinese Consul should be appointed in Hong Kong, and this suggestion was not followed by the Home Government; but this really does not form a valid excuse, as, although the appointment of a Chinese Consul to the colony might be one solution of the difficulty, it was not the only one possible. So detrimental a course, therefore, as that to which Sir BROOKE encouraged the Chinese authorities to resort ought never to have received the countenance of a British official. If a Consul found the Chinese were determined to take such a line of action, and that it was beyond his power to stop it, his duty was clearly to call the attention of the Home Government to the state of affairs, and lay before them all the plans which could be suggested for remedying the evil.

THE BRINDISI ROUTE.

ALTHOUGH it is now more than eight years since the Brindisi route was opened for the conveyance of the P. and O. Company's mails to India and China, it is an undoubted fact that even up to the present day a large number of people connected with the East are still very ignorant as to what the route really is, or in what manner the journey can be accomplished. Many, indeed, scarcely have any ideas as to where Brindisi is, beyond a general notion that it is somewhere in Italy; and those who are in any way acquainted with the route over the Continent, or the length of time required to accomplish it, are, comparatively speaking, extremely rare. We trust, therefore, that, although it is somewhat late in the day to speak upon this subject, a few remarks will not be out of place at the present time. Many may not be possessed of a file of this Journal, but those who have it, however, will find in the number for May 28, 1866, a full description of the journey, which may still be perused with advantage, allowance being, of course, made for certain alterations which have taken place since that time.

To begin at the beginning, the object which the passenger *via* Brindisi has in view on leaving England is to transport himself in the most convenient manner to the heel of Italy's boot, at almost the extremity of which lies Brindisi, where he will catch the P. and O. steamers to convey him to India, China, or Australia, as the case may be. The following example of the journey will give an idea of what it is. If the passenger leave London at 7.40 A.M. on Thursday morning, he arrives in Paris in ten hours twenty five minutes, or at 6.5 P.M. the same day. He can remain there nearly seventeen hours, leaving at 11 A.M. on Friday for Turin, which he will reach in twenty-two hours, that is, arriving there at 9 A.M. on Saturday. At Turin he can remain ten hours twenty minutes, leaving at 7.20 P.M., and he will arrive in Bologna in seven hours thirty minutes, at 2.50 A.M. on Sunday, remain there ten hours and ten minutes, leaving, that is at 1 P.M., and after a journey of fifteen hours down the East Coast of Italy he arrives at Brindisi at 3.55 A.M. on the Monday, having thus accomplished the journey in four days, during which he has had a stay of some hours in Paris, Turin, and Bologna. The P. and O. steamers leave at 5 A.M. for Alexandria.

It is, of course, possible, by shortening the stoppages, to accomplish the journey more rapidly; as, for example, by omitting the stay in Paris it is possible to leave London thirteen hours later, and arrive at Brindisi by the same time as in the route detailed; but for a pleasant enjoyable trip, for which the journey affords so good an opportunity, it is not desirable to hurry on more than by the time specified. The traveller by this route passes through the Mont Cenis Tunnel, and the scenery along the route from Rimini—the point at which the line commences to run along the Adriatic to Ancona and Brindisi—is magnificent, and railway travelling is extremely pleasant, the vibration being but very slight. The number of associations which are connected with all parts of Italy add greatly to the pleasure of the journey. Space does not permit our describing all the points of interest in detail; but a reference to MURRAY'S guide-book will be sufficient to show the beauties of the route, and to how great an extent the journey to the East, which in former days was so much dreaded, is now turned into an agreeable pleasure trip. This pleasure would be much enhanced if the convenience of passengers was more studied by the Italian railway companies. Complaints of treatment at Modane continue to reach us.

THE unfortunate position in which the China Traders' Insurance shareholders have found themselves in consequence of the suspension of Messrs. AUGUSTINE HEARD and Co. ought to act as a warning of the extreme danger

Digitized by Google

of allowing the funds of a large company to remain in the hands of any private firm. From the accounts received by the mail it appears that there is a debt of $200,000 due from Messrs. HEARD to the Company. It is especially undesirable that the funds of an institution such as an Insurance Company should be placed in private hands, as the barest possibility of their not being forthcoming at any given moment, if required, is sufficient to injure the credit of the concern materially. We trust that the loss which the China Traders' Company will have to sustain will not ultimately prove so large as there is at first sight reason to fear. Our readers will recollect that it is not very long since one of the most eminent China firms so fully recognised this principle that they voluntarily proposed to resign large funds of a company left in their hands, that they might be invested in a manner more in accordance with the principles as to investment usually adopted in regard to public funds.

WE cannot find any foundation for the statements put forth by the *Post* and other contemporaries as to the construction of torpedo vessels and other harbour and coast defences on behalf of the Chinese Government, under the direction of General RIPLEY, an American artillery officer, whom, it is stated, proceeds shortly to China to superintend the works.

BY the last mail information was received of the arrival at Bangkok of Mr. KNOX, Consul-General, but the report of Mr. EDWARDS, who was despatched from the Consulate for the purpose of inquiring into the practicability of establishing a British Consul at Chengmai, has not yet been received. Mr. PENDER, M.P., will put a question on the subject to-night.

IT is announced that a French naval station is about to be established in Tonking. It is to consist of gunboats sent from Saigon, and manned by the naval divisions of Cochin-China. This flotilla is to be commanded by a frigate captain, under the authority of the Governor of Cochin China.

THE appointments of Mr. WILLIAM HASTINGS ALEXANDER to be a member of the Executive Council of Hong Kong, and Mr. HENRY LOWCOCK to be a member of the Legislative Council of that colony are gazetted.

THE MESSAGERIES MARITIMES SUBSIDY.

The Bill presented by M. Guichard to the Assembly of Versailles, and which was voted "urgent," consists of a single article, running thus :—

The Government, making use of the right reserved to them in the existing contract with the company of the Messageries Maritimes, shall give notice, on or before the 22nd July next, of the cancelling of the said contract.

The preamble of the Bill points out that, as provided by the Article 42 of the convention of 22nd April, 1861, the duration of the contract between the Company and the Government is to be twenty-four years. But, according to the Article 7 of the same convention the Government may, by giving a year's notice, cancel the contract after the twelfth year. Should they not make use of that right, the contract is to hold good for the remainder of the twenty-four years. The twelfth year from the date of the concession expires on the 22nd July, 1876, so that the Government must give notice of their withdrawal from the convention before the 22nd July next, or remain bound by its clauses till the 22nd July, 1888. The annual subsidy paid by the French Treasury to the Company of Messageries Maritimes amounts to £123,043 for the Mediterranean and Black Sea mail service, and £399,838 for the Indo-China mail services (exclusive of the Brazil and River Plate services, which are subidised to the amount of £92,246.) The annual receipts for the State from the services rendered is only £76,080. The contract with the Messageries was made privately, without publicity or competition, in the teeth of the resumption of the decree of 31st May, 1862, and all the former laws. There are, besides general considerations, some peculiar circumstances which would justify a reduction of the subsidies granted to the Messageries. Since the opening of the Suez Canal the Company of Messageries has been able to reduce the expenses of its mail service for Indo-China in such a proportion as to increase its net profits beyond expectation. The saving that accrues to navigators through the use of the Suez Canal is such that the English Government has only renewed its contract with the P. and O. Company on the basis of a greatly reduced subsidy. M. Guichard institutes a comparison between the situation of the P. and O. Company and that of the Messageries Maritimes, and between their respective contracts with the English and the French Government. The P. and O. Company, for a service of 1,171,092 miles, receives a subsidy of £430,000; while the Messageries, for 631,514 miles, receives £399,838, or not far from the same amount for about half the distance. The contract with the Messageries has still thirteen years to run, unless the Bill is voted. The contract with the P. and O. Company has four years, at the end of which the subsidy is to cease. The profits of the Messageries belong, in their entirety, to the shareholders; while the English company shares with the Government the net profits beyond 6 per cent. In 1873 the profits of the Messageries amounted to 19 per cent., of which 9 per cent. went to the shareholders, and 10 per cent. to the reserve fund; while the English company had never, until the last two years, made more than 6 per cent. net profit. The reserve of the Messageries, at the end of 1873, amounted to £2,320,000, and had all but extinguished the original capital of £2,400,000, while the P. and O. Company had only a reserve of £400,000, including insurance fund. That comparison puts in a strong light the damage that would result, to the interests of the State, from the maintenance of the existing contract till 1888. It is to be remarked that the ground on which such exorbitant favours were granted to the company of the Messageries was that she should not be left in an inferior position relatively to the English company. A report of the Chamber Syndicate of the export trade for 1875 contains the following :—

It is impossible to hope for the great development of our steamshipping as long as French maritime enterprise is crushed between foreign competition and the monopoly of our subsidised lines; both having the same interest to ruin any new line, and combining for the purpose.

Time is running short. There are barely two months left before the last date for giving notice. By the adoption of the Bill a sum of £280,000 to £320,000 a year may be saved to the Treasury, amounting in all to something like four millions of pounds. It may be objected against the cancelling of the contract, that the Government is bound in that case to buy a part of the fleet of the Company. But, by treating with any new company, the Government might transfer to it the onus of the acquisition.

A special commission of fifteen members has been elected to examine M. Guichard's Bill. The Minister of Finance, M. Leon Say, has already been heard by the Commission. He stated that the Government had previously instituted an inquiry into the contract with the Messageries Maritimes, but was content, since M. Guichard had brought the question before the Chamber, to leave entirely the matter into the hands of the latter, and abide by its decision. The directors of the Company were heard by the Commission last week.

The above preamble, which has been translated, contains many errors, which we notice in another column.

RAILWAYS IN THE DUTCH EAST INDIES.

Mr. Van Goltstein, the Dutch Minister of the Colonial Department, though a Conservative in name, is a promoter of the movement which exists in Holland to extend railway communication in Java. In November last he laid before the members of the Second Chamber of the Dutch "Staten General" a Bill proposing to build a railway from the seaport of Sourabaya to the inland town of Pasaeroeang (the centre of the principal coffee-producing district in the island), and thence to Malang. The necessary preliminary credits were asked for this purpose, and likewise for the surveys to be made in other districts of Java, commencing with that which lies between Batavia and the plain of Badong. In his "Memorandum" appended to the Bill the Minister said that he proposed to construct the lines at the expense of the State, not because he was convinced that the Government would prove the best contractor, but because there was a lack of private enterprise. Several predecessors of the Minister had wasted many years in waiting for an opportune moment for the grant of a concession; therefore, Mr. Van Goltstein argued, there was no other choice than for the Government itself to build the railways. The total length of the proposed new line is 115 kilometers, and, according to an estimate prepared by a civil engineer in the employment of the Department of Public Works at Batavia, it is calculated that the cost of the line in question would be about ten millions of guilders, whilst about four years would be occupied in its construction. In the month of February last the Bill was brought forward, and the main question of debate was whether the construction by Government was desirable or no. Almost every member was convinced that Java most urgently needed railways, but the most absurd arguments were brought forward during the debate to place stumbling-blocks in the way of the Ministerial plan. It was even asserted that the construction of the required lines would impose too heavy a burden upon the Dutch Treasury, which annually receives hundreds of millions from Java. The Bill was, however, carried by forty-four against twenty-one votes. What will be done next?

THE MESSAGERIES MARITIMES COMPANY.

The annual report of the above-named Company, which was submitted to the meeting on the 29th ult., gives some interesting details concerning its working during the year 1874. The dividend for that year amounts in total to f.35 per share. The nett profits, after deducting all expenditure, interest, &c., amount to f.4,427,673, and after passing f.221,384 to reserve fund, and a balance of f.6,289 to new accounts, leaves a sum of 4,200,000f. for dividend, at the rate of 35f. per share, of which 15f. were paid as an interim dividend in December last. The statement of affairs sets forth the total value of the Company's fleet as f.108,822,390 on the basis of the cost, when *new*, of the vessels afloat or in the yards. At the end of 1873 this figure stood at f.108,525,522, and the first-named figure thus shows an augmentation in favour of 1874 of 296,868f., which is made up as follows :—

Vessels in the yards—increase	f.1,842,092
Vessels afloat—decrease	1,545,224
Nett increase	f.296,868

The reduction in the value of the vessels afloat results from the condemnation of the three vessels, the *Balkan*, the *Vatican* and the *Carmel*, which have for some years past been out of service, and were ordered to be destroyed. It also includes the elimination from the list of the fleet of the steamer *Nil*, which was lost on the coast of Japan. On the other hand, the value of the fleet has been increased by the addition of the *Orenoque*, and by the alteration of several other vessels. Thus the *Indus*, the *Tanais*, and the *Provence* have been completely re-made and have received new machinery, capable of sustaining high pressure. In December last there were still either fitting or being finished in the yards, the *Djemnah* and the *Equateur*. The former made its first voyage in the Indo-Chinese Seas on the 11th of April ; and the *Egateur* will be launched towards the end of this year. The report lays some stress upon the fact that the vessels are placed in the stock account at the prime cost, and that to arrive at the actual value of the fleet it is necessary to make the necessary deductions for depreciation, loss, &c. This fact, it states, has been much overlooked, although the basis of the account, which is held to be perfectly simple and natural, is thoroughly understood by the shareholders. The system has the advantage of constantly placing under the eyes of the shareholders the prime value of the vessels ; and as the *material* is always kept in a state of perfect repair, its value for utilisation remains unaltered in regard to all the vessels on active service. Article 39 of the constitution of the company provides that the profits will be divided only after the deduction of a reserve of 5 per cent. on the amount to be distributed, to form a fund to meet unforeseen contingencies, and to provide for depreciation. The Account for Assurance stands at f.5,482,209, against f.6,217,738 at end of 1873, or a diminution of f.735,529. The liquidation of the steamer *Nil* has imposed a heavy charge upon the fund, and there have also been several average claims, which have had to come out of it. The sum to which the fund is reduced, namely, five and a half millions of francs, is, however, sufficient to cover the company against the loss of three of its largest vessels, and if the current year passes without disaster it will be no doubt possible to replace the insurance reserve at the figure at which it previously stood. The reserve fund of the company stood at the end of 1874 at f.3,064,976, against f.2,677,867 at end of 1873, or an increase of f.387,109. Under the heading of the report referring to the voyages it is noticed that an average of over eleven knots an hour speed has been realised on the route to China ; of 10·73 on the chief Mediterranean lines, and that the average on all lines has been 10·23 knots. The details of profit show for Brazil and La Plata an increase of 7·67 per cent. ; for the Indo-Chinese line, an increase of 3·91 per cent. ; and for the Mediterranean a decrease of 7·16 per cent. On all lines the profits on carriage of passengers have fallen off. The smallest, on the Atlantic line, is insignificant ; on the Indo-Chinese line the falling off reaches 9 per cent. ; and in the Mediterranean it is 10½ per cent. In these proportions the decrease has, however, only partially wiped out the increase in 1873 on the passenger traffic, which remains better in 1874 than in 1872. Regarding the profits on cargo the report states that circumstances of an unfavourable but transitory nature have weighed against the carriage of merchandise in the Mediterranean ; but in compensation the product of cargoes on the Atlantic has augmented 16 per cent., and on those of the Indo-China line 11 per cent. On the whole of the navigation there is an increase of 4·95 per cent. compared with 1873. It is noticeable that the increase in the quantity of merchandise transported (10 per cent.) is much above the profits on transport. The rate of freight has thus decreased ; the mercantile interest obtain the benefit, and it was only by increasing the facilities of transport in their vessels that the Company have been able to obtain a portion of this amelioration. The working expenses show an increase on the previous year, consequent mainly on the coal crisis in England. But for this they would have been inferior to those of the preceding year.

Referring to the question of the subsidy to the company, the report has the following :—The Hon. Mr. Guichard proposes to the Assemblée Nationale to decide that the State, in virtue of Art. 7 of the Convention of the 22nd April, 1861, shall cancel the contract which it has concluded with the company for the execution of the postal service of the Mediterranean and Indo-China. According to the proposition, these contracts will entail upon the State an annual expenditure of thirteen millions, and will not produce more than a receipt of f.1,500,000. By cancelling them, the State will effect a saving of from seven to eight millions of francs annually, which should produce more than 100 millions up to 1888. Since the service was inaugurated, the diminution of the expenses of navigation between Europe and the extreme East, consequent on the opening of the Suez Canal, was such that the English Government, when it renewed its contract with the English postal company, would have reduced by three-quarters the original subsidy.

The report states that these conclusions, being based upon inexact figures, are absolutely erroneous ; that the subsidy which the Messageries continue to enjoy (calculated on the basis of a decreasing scale), represents an annual average of f.11,553,552 (of which f.8,477,460 is for the Indo-Chinese line), and not, as stated, an annual expenditure of more than thirteen million francs. It adds that from 1881 (the special contract for the Mediterranean coming then to an end), the subsidy for the Indo-Chinese service will continue to decrease from year to year, up to 1888, when it will not be more than f.7,944,117. It is, therefore, materially impossible to hope from this service, in continuing it, an annual economy of seven to eight millions, which in twelve years should save the Treasury one hundred millions. The report also sets forth that the reduction made by the English Government on renewing its contract with the P. and O Company was not, as Mr. Guichard says, three-quarters of the original subsidy, but less than a twentieth. The French Company is no longer under the necessity of taking into account the facilities offered to navigation by the opening of the Suez Canal ; this has long been done. In 1868, shortly after the opening of the Canal, an additional Treaty was concluded between the State and the Messageries to double the Indo-China service. This Treaty decreased by 30 per cent. for the total of the newly regulated journeys the amount previously allowed for mileage ; and one of the reasons which, in its foresight, the Department of Finance advanced for causing the Company to undergo so large a diminution of the financial support on which it based its original calculations was precisely the diminution of the cost of carriage which might be expected in consequence of the opening of the Canal. The English Company paid for the right of going through the Canal 4½ per cent. of its subsidy, and the Messageries in 1868 underwent a reduction of 30 per cent. In conclusion, the Report urges that although the traffic has largely increased during the twelve years the Company has been established, the profits only slightly exceed the returns at the earlier days. After making the reserves absolutely necessary for assurance and depreciation, the Company has been able to distribute to its shareholders only an average dividend of 40f. per share of 500f., while the Peninsular and Oriental Company has paid its shareholders 7 per cent. per annum. In England this remuneration is scarcely considered sufficient on capital invested in vessels ; and in France it is evidently less so. The Company offers to assist the Government in a full examination of the accounts on which the figures above given are based, and awaits with confidence the conclusions at which the Government will arrive after this examination.

SUPPRESSION OF THE OPIUM TRADE.

The following letter, signed by sixteen of the missionaries in the Canton district, has been addressed to the President and Committee of the Anglo-Oriental Society for the Suppression of the Opium Trade, and appears among the contents of the current number of the *Friend of China* :—

We, the undersigned Protestant missionaries in Canton, beg to offer you our most hearty sympathy, and to assure you that we are one and all earnestly desirous to further by all legitimate means the objects of your Society. Hoping that our united testimony may be of some weight with the Government and people of England, whom it is your object to influence, we now forward to you the following statement of our views in regard to opium. 1. The Empire and people of China are daily becoming more and more demoralised and impoverished by the increasing use of the drug. The moderate use of opium, granting that such a use is possible, is uniformly regarded by Chinese Christians as a sufficient reason for refusing admission to the Church ; and though none of us enforce such a rule in regard to the use of spirits, we do all believe that the danger of excess is so much greater in the case of opium that this rule in regard to it is necessary. 2. The moral sense of the people of China, whether addicted to the vice of smoking opium or not, is opposed to the traffic, and condemns all concerned in the importation of the drug. 3. The fact that people of Christian nations engage in the traffic, and especially that Great Britain to a large extent supplies the China market with opium, is constantly urged as a plausible and patent objection to Christianity. The heathen acknowledge the superiority of the Christian theory of morals to their own, but ask triumphantly, "Where is the superiority in practice?" They, of course, buy the poison and inhale it, but "Why do Christians bring it here and sell it?" It comes, as it were, with a recommendation from Christian nations. 4. British India has lately been visited by famine, and may at any time suffer from the same calamity. But although a part of the soil of British India is diverted from its proper use in order to produce a deleterious drug for the China market, the exportation of rice from China is prohibited by the Government. It is really a wrong, therefore, to the natives of India to compel them to produce opium, or to license them to do so in order to fill the Imperial exchequer, and to gratify a morbid and ruinous appetite of the Chinese. On the other hand, if the patriotic sentiments of the Chinese were met by the abolition of the opium trade, they might reasonably be required to sanction the free exportation of rice, in case of scarcity in any neighbouring country. 5. The demand for useful British and American manufactures is kept at a low figure in China by the impoverishing and enervating effects of opium ; and it would no doubt be greatly to the advantage of the manufacturing interests of these countries to have the supply of opium to China stopped. 6. The hitherto growing demand for foreign opium has already been sensibly checked by native cultivation, and it may gradually cease altogether from this cause, while the consumption continues to increase. There is therefore now an opportunity which may not last long, for Great Britain, by a noble act of self-sacrifice, to give a check to the ruinous consumption of opium in China, by immediately reducing or stopping

Digitized by Google

the supply. The effect would be all the greater the more prompt and decisive the action taken. And, on the contrary, delay or very gradual reduction of the supply would, by giving time for the native growth proportionately to increase, be fatal to the success of your benevolent enterprise.

It is therefore our earnest prayer that through your efforts the British Government may be moved to adopt a new and vigorous policy at once; and if possible to secure contemporaneous action on the part of the Chinese to mitigate and ultimately eradicate this great evil.

THE MURDER OF MR. MARGARY.

The Rangoon correspondent of *The Times* writes as follows, under date 2nd ult. :—

So many rumours have been circulated regarding the King of Burmah's acts and intentions that it is difficult to elucidate the truth, and these rumours, whether true or false, have had the effect of entirely paralysing the import trade of the province and of causing a panic among the native merchants. The import "godowns" here are crammed with piece goods, and Manchester must sooner or later feel the stoppage of such a large outlet as this place offers to the trade. Captain Cooke, the Political Agent at Bhamo, arrived here on the 30th ult., having brought with him ninety-five Panthays who had taken refuge in the Residency at Bhamo. Among them are two sons of Tah-sa-Kone, the former Panthay Governor of Momein, who, with many thousand Panthays, was so barbarously murdered by the Chinese about April, 1873. These men came into the British Residency in the middle of the night of the 4th of April last, and asked for British protection. Their wives had been murdered or taken prisoners by the Chinese, and these were the remnants of the band which had escaped into Burmese territory. But it appears that the Burmese had an old feud to settle with the Panthays, as their officials had not forgiven them for the aid which Tah-sa-Kone had granted to Sladen when its expedition was nearly stopped by the machinations of the Burmese. Whatever may have been their intent, the Political Agent found his house surrounded by a large body of Burmese troops, whose commander insolently demanded that all the Panthays should be at once given up. He even threatened to take them out by force. Captain Cooke armed himself with a revolver, and refusing to be bullied into giving up the Panthays, informed the commander that he should keep them under his protection until he received orders from his own Government as to their disposal. He then added, "If you try and take them by force from the Residency, you will have to fight before you can do it." Captain Cooke appears to have done his duty well, for the Residency is but a garden surrounded by high wooden stakes, with a wooden house in the centre, and, with the exception of the ninety-five Panthays, who were all armed to the teeth, there were but fifteen decrepit old policemen to aid this single officer against the probable attack of 300 or 400 troops. It is probable that he would have been taken at his word and compelled to fight or surrender the Panthays had not the Burmese official been unwilling to bring matters to an issue until he reported for further orders to the King at Mandalay. In the meanwhile, Captain Cooke was also able to report to Captain Stroued, who communicated with the British Government, and the matter has ended for the present in Captain Cooke having been allowed to leave Bhamo with the Panthays, and they are all now in Rangoon. Mr. Elias is temporarily appointed to Bhamo as Political Agent, but it is not considered safe to send him there at present. The King of Burmah specially stipulated that the Agent of Bhamo should not have a guard or escort, and with affairs so disturbed there would be a risk to the life of any European who singly had to occupy such an isolated post as Bhamo. At the same time, there is great difficulty involved in the fact of its being temporarily abandoned. Poor Margary's death and the insolent behaviour of the frontier officials to the Agent will cause it to be believed that the English have been frightened away. Such apparent weakness as this on the part of the British tends to hasten on a war. For the other side get emboldened by what they consider behaviour which would never come from a nation able to defend itself. Upon a European who was at Bhamo some time after Margary's death remarking to a Burmese official that trade across the frontier seemed to be going on as usual between the Burmese and Chinese, notwithstanding the murder of Margary and apparent commotion in the country, the answer he obtained was, "Oh, what is the murder of a *Kulla*, after all? Why should that stop the trade?" The word *Kulla* generally means "foreigner," but the speaker only understood it to mean "Englishman" when he used it.

It is astonishing to notice the sudden good feeling and attachment the King has shown lately for the Chinese. Not only has he removed any doubts as to the nationality of the town in which poor Margary was slain by publicly stating that he could not in any way be responsible, for the murder did not occur in his territory, but he has allowed the Chinese to place fortified outposts within thirty miles of Bhamo, and has thus virtually handed over to them a large slip of his own country. Some say that he is only carrying out on a larger scale the policy which he has so successfully initiated in his own palace—that is, to pit one of his relations against another and benefit himself by the misunderstanding. In this case China may be the catspaw. He denies having ever issued any orders from the palace, or stirred up any one against the Western Chinese Expedition. But there is an order purporting to emanate from the palace, which is either a forgery or it implicates the King seriously. As a rule, the King never writes or signs any orders, but all orders are issued from the palace, and underneath is written—"This is by the King's order, and written by so and so." It is certain death, with first the loss of the right hand, for any one to forge such an order, and at first sight there appears no reason why there should be a forgery when such risk was involved. But we hear of no attempts to find out the forger or to trace the document, and the probability is that there never will be such an attempt made. It is clear that the Chinese Government at Peking could not have had time to be communicated with between the time Margary passed through Manwyne and his return to that place; and if the Chinese Government had meant treachery they might have had Margary murdered on his way to Bhamo, when he was unescorted and friendless, and not have waited until he returned with the Expedition. But the Chinese Governor of Nantien is half a Burman, and his wife lives at Mandalay, and is a frequenter of the palace. This half Burman was the prime mover in the *emeute* against Margary and Colonel Browne. This, with the fact that the hostility shown by the Chinese to Margary (whom they had before so cordially welcomed) arose immediately in the wake of the Burmese Embassy, points strongly to the King of Burmah as the instigator of all the opposition to the expedition, and the subsequent murder of Margary. As the genuineness of the Royal mandate will form the subject of official investigation, I refrain from discussing that. But even without it the King if innocent is most unfortunate in having facts so combined in appearance against him. After the preparations the King has made for war, and our movements of troops to the frontier, if affairs are left as they are at present, and a strict investigation is not made into the charges of the King's complicity in Margary's murder, our political relations in Asia will be seriously endangered.

Monetary and Commercial.

The Great Northern Telegraph Company announce, that according to information received from Foochow, an agreement was entered into and signed there on the 21st May, between the Chinese Government, represented by the Imperial Commissioner, Shen Panchen, Viceroy and General in the Province of Fokien, charged with full powers by Tsung-li-Yamen, Minister for Foreign Affairs in Peking, and the Company, to the following effect:—

The Chinese Government pays the Company full compensation for the damage done to the Foochow-Amoy line in January last. The Company to erect a line of telegraphs between Foochow and Amoy for account and risk of the Chinese Government. Inland telegraph stations to be established in Amoy, Foochow, and the two intermediate towns, Hinghua and Chuenchan. The working of the line to be undertaken by the Company for account of the Chinese Government.

Tenders for £700,000 in bills on India were received at the Bank of England on the 2nd inst. The amounts allotted were —to Calcutta, £548,200; to Bombay, £149,800; and to Madras, £2,000. Tenders on all the Presidencies at 1s. 9⅜d. will receive about 19 per cent. These figures show a considerable falling off in the demand for remittances to the East, the price at which tenders were received showing a reduction of 1 per cent.

A prospectus has appeared of the Standard Fire Office (Limited), with a capital of £1,000,000, in 100,000 shares, of which 20,000 are now issued. The company is established to do fire insurance business on the non-tariff principle, premiums being fixed at rates adequate to the risks.

The directors of the Bank of British North America announce that they are now in a position to declare a dividend at the rate of 10 per cent. per annum, payable on the 3rd July. The Rest has also been increased from £240,322 to £250,248.

An order for the compulsory winding up of the City and County Bank has been granted by Vice-Chancellor Bacon, who remarked that it was indisputable that the company had ceased to carry on business and was wholly insolvent. It appeared that three other winding up petitions had been presented against the company —two in the Rolls Court and one in the Court of Vice-Chancellor Malins.

Mr. Lewis Balfour (formerly a member of the firm of Vivanti, Annett, and Balfour, of St. Mary-axe, who suspended payment in October, 1867, with liabilities of about £300,000 and subsequently arranged a composition of 10s. in the pound with their creditors) has announced, through Messrs. Baggs, Clarke, and Josolyne, the accountants, a further voluntary payment of 3s. 4d. in the pound, on account of the liabilities of that firm.

The traffic receipts of the Eastern Telegraph Company for the month of May amounted to £30,602, against £30,225 at the corresponding period of 1874; and of the Eastern Extension Australasia and China Telegraph Company to £17,773, against £18,879 last year.

A contract has been concluded by the Eastern Telegraph Company with the Telegraph Construction Company for the laying of a cable to connect New Zealand with the Australian lines.

The market for Bar Silver is very depressed, the India Council drafts having been sold at ¼d. per rupee lower—viz.. 1s. 9⅜d. —rendering a demand for India unlikely, unless at a further reduction in price. Mexican Dollars have been sold for China at 55⅜d. per oz., a decline of ¼d. from previous prices.

ARTICLES OF IMPORT.

TEA.

Messrs. Arthur Capel and Co.'s Circular says :—We have had a quiet market, notwithstanding the large deliveries and the absence of arrivals, with the exception of green teas and new season's Canton teas. Prices do not generally show material change, although fair black-leaf congous

Digitized by Google

and most kinds of green teas have sold at lower rates. In public sale on the 1st inst. 16,200 packages were offered, of which 15,703 packages were printed and sold without reserve. Yesterday, 2,420 packages green and scented teas were also sold without reserve.

Congous.—Red-leaf kinds: Siftings are very scarce, and full prices are obtainable. Broken leaf kinds and common kinds are saleable at 9½d. to 10d. per lb., but fair to good common are only saleable at 10¼d. to 11½d. per lb., and that with difficulty, being relatively cheap. Fair Kaisow kinds from 1s. 1d. to 1s. 4d., and good from 1s. 5d. to 1s. 7d.; fine from 1s. 8d. to 1s. 9d. remain firm, being in moderate supply; finest are only saleable in small parcels from 1s. 10d. to 2s. Pak Lin kinds: A few fine, from second hands, have sold at public sale at lower prices. Black leaf kinds: Common to fair common meet with a slow sale from 10d. to 10½d. per lb.; fair grades have been taken from 11d. to 1s. per lb., being a shade lower prices; fair medium, from 1s. 1d. to 1s. 3d., sell slowly; good medium to fine, from 1s. 4d. to 1s. 8d., have been firm; finest have sold from 1s. 9d. to 1s. 11½d. per lb. at public sale. Canton-make kinds: Old season's have sold from 10¾d. to 11⅝d. for common to fair, 1s. 3d. to 1s. 4d. for fine. In new sales have been made from 1s. 3d. to 1s. 5d. for good, 1s. 6d. to 1s. 8d. for fine, being rather lower prices. The few sales of Oolong show no material change. Souchongs: Common have sold rather lower, fair to good at previous rates, fine also showing no change. *Scented Teas.*—Canton Capers: Privately sales are difficult to make; at public auction prices have ruled rather lower—common 8½d. to 9d., fair 9½d. to 10½d., good 11d. to 1s. 1½d. per lb. Oorange Pekoes: Common Foo Chow make have sold lower, but the long-leaf kinds remain steady at previous prices. Foo Chow Capers show no improvement. In Orange Pekoes, common kinds have sold rather lower, but there has been some inquiry for good qualities from 1s. 5d. to 1s. 6d. per lb. *Green Teas.*—The supplies offering have been large, and chiefly at public sale, it being hardly possible to sell by private contract. Prices for nearly all the better kinds have ruled lower, but the commoner kinds show no further fall, the range of prices established being very low.

SILK.

Messrs. Durant and Co.'s Circular says:—The market is without material change. There has been fair moderate business throughout the month, but nothing more—just sufficient to keep prices without change for all Silk of current quality, but scarcely sufficient to satisfy holders of classes beyond the general demand, so that in them there have been one or two forced sales. The deliveries are upon the improved scale of April—especially in China Silk, causing again a large reduction in the stock—4,500 bales in the two months. Japan Silk continues neglected, notwithstanding the very low prices which holders re content to accept. The next periodical public sales are fixed to commence on the 23rd instant.

Messrs. Waitman, Hogg, and Co.'s Circular says:—The market has undergone very little change during the month just ended; business has again been on a moderate scale, and prices of some descriptions have slightly given way. China Silk of the medium and common classes has been in fair demand, and prices have been well maintained; but the better classes have attracted scarcely any attention, although comparative rates appear decidedly in their favour. Cantons have been dealt in to a very small extent at weaker prices; the same may be said of Bengals. In Japan Silk some transactions have taken place; but at rates showing a decline on those obtained in April. The deliveries may be considered satisfactory, and the stocks of all descriptions are being gradually reduced.

	Stocks. May 31.		Imports. Jan. 1 to May 31.		Deliveries. Jan. 1 to May 31.	
	1874. Bales.	1875. Bales.	1874. Bales.	1875. Bales.	1874. Bales.	1875. Bales.
China	25,460	21,990	11,156	7,957	13,919	16,670
Canton	5,738	5,317	940	2,605	3,276	2,413
Japan	6,609	5,437	4,543	2,526	3,310	2,609

COFFEE.—The auctions have offered heavy supplies, and prices have given way 1s. to 2s. per cwt. for East India, the small quantity of Plantation Ceylon selling at 1s. per cwt. cheaper. The prices paid for Plantation Ceylon have been small at 98s. 6d. to 99s. 6d., low middling 100s. 6d. to 101s. 6d., middling to good middling greyish 102s. 6d. to 105s. 6d., ditto coloury at 103s. 6d. to 106s., bold greyish 105s. 6d. to 106s., coloury 107s. 6d. to 110s., peaberry 123s. to 127s., and triage 83s. to 94s. No business is reported in Native Ceylon.

CINNAMON.—The quarterly sales have gone with fair spirit, the common qualities rather above, and fine sorts rather under last sale's rates. The quantity of Ceylon offered was 912 bales 36 parcels 34 boxes, and about two-thirds sold. The larger portion of the superior firsts was bought in at 4s. 6d. to 4s. 8d. The prices realised were for common to fine Ceylon, first at 2s. 7d. to 4s. 1d., ditto seconds at 2s. 4d. to 3s. 2d., ditto thirds at 2s. 2d. to 2s. 10d., and fourths at 1s. 7d. to 2s. 4d. Of 1,230 bags chips about half sold at 4¼d. to 6½d. per lb.

CUTCH.—In public sale 600 boxes G.W. and Co. were bought in at 24s., and 2,000 boxes Elephant at 24s. 6d.; 905 boxes Cock mark sold at 23s., and a lot or two B.B. flag at 23s., out of 1,000 boxes offered.

CHINA PRESERVES.—Of 30 casks 126 cases Ginger offered a lot or two sold at 6d. to 6¾d.; 5 packages Chow Chow at 5½d.; and 4 packages Comquats at 7d. per lb.

HIDES.—Messrs. Dyster, Nalder, and Co. report as follows upon the transactions of the past month:—The market is inactive, there is little inquiry, and business has been further restricted by the absence of public sales in the regular course on the 20th ult. Only a very limited business was done at the sales in the early part of the month; prices were irregular, but averaged about ¼d. per lb. decline. The sales by public and private reach 153,823 Kips in the Hair and Tanned, and the stock in brokers' hands is 571,682 Hides. Singapore, Penang, and Rangoon, &c., Ox and Cow Hides met with little demand at the public sales, and only a limited business was done at a reduction of fully ¼d. per lb. The sales are 3,845 Singapore; light thirds 7¾d. to 8¼d.; fourths 5½d.; heavy, seconds, 8½d.; extra heavy 6⅝d. to 8½d. per lb. 1,555 Rangoon, light, thirds 8d.; fourths 5d.; extra heavy 6½d. to 7¾d. per lb. Singapore, Penang, &c., Buffalo hides, have been in fair request at previous rates, and the sales consist of 3,152 Singapore and Penang; Slaughtered, 1st heavy, average 41½ lb., 6⅛d.; seconds 4¾d. to 5⅜d.; fair, 1st heavy, average 27⅞ to 33⅜ lb., 5½d. to 5⅝d.; seconds 5d. to 5½d. per lb. 125 Rangoon, heavy, average 37⅜ to 39⅝ lb., 5d. per lb. Java Hides: No Ox and Cow have been offered, and there is hardly any demand for Buffalo hides, the only sale being 47 unshaved, mixed 5⅜d. per lb.

RICE.—The market has experienced no alteration on the spot. Floating cargoes meet a steady inquiry, the market ruling weaker. The sales announced comprise 7,000 bags famine Rice on spot, at 8s. 3d. per cwt., ex-quay, while the following floating cargoes have been placed:—A cargo Necransie, June sailing, containing 900 tons, at 7s. 10½d., open charter; one Rangoon, at 8s. 1½d., open charter; one ditto (Ngakyouk), June sailing, at 8s. 1½d., July at 8s., Liverpool quay terms; since which a cargo Rangoon is reported to have been sold at 8s. 0¾d., open charter.

PEPPER.—*Black:* The market continues very quiet, and full supplies at public sale were nearly all bought in, meeting only reduced offers. The catalogues comprised 3,440 bags Penang, which were bought in, excepting 140 bags West Coast, which sold at 4⅜d.; 1,098 bags Siam withdrawn; of 750 bags Singapore 80 bags good clean sold at 5½d. to 5⅝d.; rest bought in at 5⅝d. to 5⅜d. for fair. *White* has declined ¼d. to ½d. per lb. Of 957 bags Singapore offered 40 bags sold at 7½d. and 88 bags at 7d. to 7⅛d. per lb. for brownish quality.

SUGAR.—There has been a good demand for refining qualities of British West India at rather firmer prices. The only sale of East India kinds during the week has been 3,200 bags date Penang at 16s. 6d. per cwt.

SPICES.—*Cassia:* 20 cases Japan sold at 27s. to 28s. per cwt. *Cassia Buds:* 69 cases China withdrawn. *Cloves* have met only a limited demand, and were mostly retired. *Mace* is dull; of 16 packages a lot or two sold, palish red Penang at 2s. 11d., Dutch at 2s. 8d., chips at 1s. 4d. per lb. *Nutmegs:* The parcels at sale were chiefly retired, from absence of demand; 8 packages Penang were bought in, 112's at 2s. 11d. and 117's at 2s. 10d.

SHELLS.—In public sale 62 cases 272 bags Cowries sold at 7s. to 7s. 6d. per cwt.; of 383 baskets and loose Green Snail part sold—large at 9½d. to 10½d., medium at 5½d. to 7d., small at 4d. to 4½d. 1,130 bales Japan Ear part sold at £23 10s. to £35, small at £14. 2,000 helmet bought in at 1s. each. 11 mats Loochoo sold at 4d. to 4½d. each.

SAGO is dull, and rather easier. Of 1,386 bags about 300 bags sold, good large at 17s., medium at 16s. 6d., and small at 17s. 3d. per cwt. *Flour* has met very little attention, and 1,514 bags Singapore were all bought in at 13s. 3d. to 13s. 6d. per cwt.

SAPANWOOD.—4½ tons Ceylon sold, sound at £12 10s., stained at £7, splinters at £7 per ton.

STICKLAC.—In sale 92 cases Siam half sold at £5 12s. 6d. per cwt.

TAPIOCA.—With full supplies, prices of pearl and the medium grades of flake rather favoured buyers. Of the former 1,070 bags were offered and a large portion sold, fine white medium at 21s., good large at 20s., and bullets at 20s. 6d. per cwt. Of flake 2,196 bags offered and part sold, fine Penang, Alma mark, at 2⅜d., Singapore at 2⅛d. to 2¼d., ordinary at 2d. 43 bags flour sold at 2½d. per lb.

TIN.—Messrs. French and Smith's Circular says:—The deliveries of Foreign in May were again very large; from London 1,188 tons, from Holland 815 tons = 2,003, from which deducting 61 tons received here from Holland, leaves a net delivery of 1,942 tons. The London stock, though still heavy, shows a reduction of 80 tons from the previous month. The quantity of Straits and Australian floating, we estimate at 400 to 500 tons less than at the beginning of May; the Australian floating is about 1,100 tons.

Stock of	June 1, 1875. Tons.	June 1, 1874. Tons.	June 1, 1873. Tons.
Foreign in London, estimated at	5,866	2,384	1,970
Banca in Holland, Warrants	963	870	1,530
Billiton in Holland	705	970	360
	7,534	4,224	3,860

ARTICLES OF EXPORT.

MANCHESTER GOODS.

Last week closed with a languid tone, and the market continues in a dull state, the announcements of commercial embarrassments having an adverse influence, without, however, causing any noticeable depression. As regards prices, the tendency is in buyers' favour, though offers have been declined at a moderate reduction on the last prices paid. What little demand exists is principally for the lower qualites of Grey Shirtings. Yarns are in little inquiry.

GIBRALTAR.—June 3, passed, Gaelic (str.), from Liverpool, for China and Japan.

The Flintshire (str.), loading in the South West India Dock for the Straits, China, and Japan, will take out to Hong Kong 150 tons of gunpowder.

THE WHITE STAR LINE OF STEAMERS.—The three steamers of the White Star line—the Oceanic, the Belgic, and Gaelic—under charter to the Occidental and Oriental Steamship Company of San Francisco, are now all *en route* for their new station, viz., the San Francisco, Japan, and China trade, the last steamer, the Gaelic, having taken her departure. *vid* the Suez Canal, on the 29th ult. The Gaelic has been fitted up in all respects similar to the Belgic, and can accommodate forty first-class passengers and a great number of coolies.

Diploma of Merit, Vienna Exhibition, 1873.

YORKSHIRE RELISH

THE most delicious SAUCE in the world to CHOPS, STEAKS, FISH, &c. Sold by all Grocers and Oilmen in bottles 6d., 1s., and 2s. each. Trade mark—Willow-pattern plate.

PROPRIETORS:—
GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S BAKING POWDER.

THE BEST IN THE WORLD.—Makes delicious Bread without Yeast; Puddings, Pastry, &c., without Eggs, Butter or Lard. Bread made with this Powder is much easier to digest, and much more wholesome than that raised with yeast, and a larger quantity is obtained from the same weight of flour. One trial will convince the most sceptical of its superiority over others. Sold by Grocers, Chemists, and Oilmen in 1d. packets; 6d., 1s., 1s. 6d., and 2s. Tins. Prepared by GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S QUININE WINE.

THE BEST AND MOST AGREEABLE TONIC yet introduced. For the relief of Indigestion, General Debility, and Loss of Appetite it is INVALUABLE. Recommended for its purity by the *Food Journal*, Arthur Hill Hassall, M.D., Wentworth L. Scott, Esq., F.C.S., F.A.S.L., F.R.S.S.A., &c. Sold by Grocers, Oilmen, and Chemists, in large bottles at 1s., s. 1½d., 2s., and 2s. 3d. each. Prepared by GOODALL, BACKHOUSE & CO., LEEDS

HOLLOWAY'S OINTMENT

Mr. J. T. COOPER,

In his celebrated TRAVELS IN CHINA, published in 1871, says:—

"I had with me in my travels a quantity of "Holloway's Ointment. I gave some to the people, "and nothing could exceed their gratitude: and, in "consequence—milk, fowls, butter, and horse-feed "poured in upon us, until at last a teaspoonful of "Ointment was worth a fowl and any quantity of "peas, and the demand became so great that I was "obliged to lock up the small remaining stock."

This fine OINTMENT is invaluable in the cure of BAD LEGS, BAD BREASTS, OLD SORES, wounds, ulcers, gout, rheumatism, and all skin diseases.

GUERLAIN,
15, RUE DE LA PAIX, PARIS.

VERITABLE AMBROSIAL CREAM for shaving.
FASHIONABLE PERFUMES for the handkerchief.
STILBOIDE for the hair.
EAU DE COLOGNE (préparation spéciale).
POUDRE DE CYPRIS for the complexion, ni fard, ni bismuth, ni produit chimique.
CREME DE FRAISES (new Cold Cream).

To Ship Owners, Ship Brokers, and Surveyors, Shipping and Emigration Agents, Merchants, &c.

A GENTLEMAN holding a Master's Certificate in the Merchant Service, thoroughly competent, desires a BERTH on shore, where his previous training would be available, but would accept a general clerkship; age thirty-three; active and temperate; can correspond in French; understands some Spanish; can keep mercantile books; writes a free and expeditious hand; is even-tempered and of good address. Would be satisfied with moderate remuneration.

Apply to AMBROSE PARSONS, Esq., Solicitor, 4, Fenchurch-buildings.

NERVA, MARCHAND, & Cº
GENERAL COMMISSION MERCHANTS,
MILITARY EQUIPMENTS, &c.

J. THOMSON, Chairman.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, nd by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette*.

Made simply with boiling water or milk.

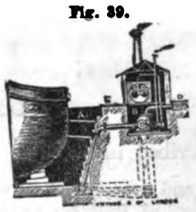
GWYNNE and Co., Hydraulic and Mechanical Engineers,

ESSEX STREET WORKS, STRAND, LONDON, W.C.

Fig. 39.

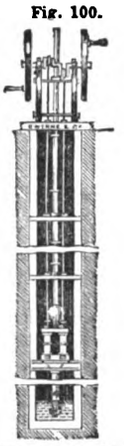


GWYNNE & CO.'S PATENT PUMPING MACHINERY, AS APPLIED TO EMPTYING DOCKS.
The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be given

Fig. 48.

GWYNNE & CO.'S IMPROVED PATENT CENTRIFUGAL PUMP.
Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of Water

Fig. 100.

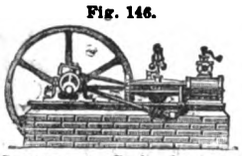


GWYNNE & CO.'S IMPROVED DOUBLE BARREL DEEP-WELL PUMP,
For Hand-power, or adapted for ordinary use, wells of any depth, most careful construction, and on the most approved system

Fig. 86.

GWYNNE & CO.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.
These Pumps work without valves or packing, and raise a considerable quantity of water. They will lift sand, mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.



GWYNNE & CO.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.
With or without Expansion Gear, for economical working.
From 4 to 100-horse power

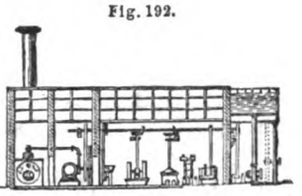
Fig. 154.

GWYNNE & CO. IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.
These boilers are simple and compact. They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler.

Fig. 142.

GWYNNE & CO.'S IMPROVED PORTABLE STEAM ENGINE.
Light, simple in construction, durable, and economical, and very superior to "Agricultural" Engines.
From 2½ to 30-horse power

Fig. 192.

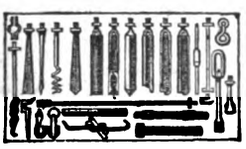


GWYNNE & CO.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES, FAT, &C., &C.
The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motion power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added to lift water or any purpose required.

Fig. 193.

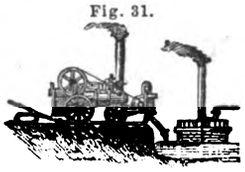
GWYNNE & CO.'S IMPROVED HYDRAULIC LIFTS.
Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine, or other produce, into or up from cellars, or may be modified for lowering figure represents those most frequently used, bankers' and jewellers' safes but the form and number vary much with the strong rooms. The nature of the soil, and size of the bore waste water runs into the hole. sewer.
Prices on application.

Fig. 121.



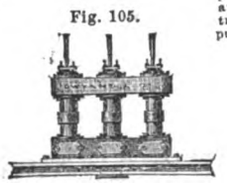
GWYNNE & CO.'S BORING TOOLS.
Of greatly improved construction. The G. & Co. can confidently recommend these as the best in the market.

Fig. 31.



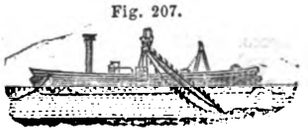
GWYNNE & CO.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR.
In which the Pumps are furnished with hose for distributing the water over the adjoining plantations. Made in all sizes.

Fig. 105.



GWYNNE & CO.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.
These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and comparison with those of other makers is challenged. Gwynne & Co. make single and double-barrelled pumps upon the same principles.

Fig. 207.



GWYNNE & CO.'S IMPROVED DREDGING MACHINERY.
The boat can be constructed so as to draw only 18 inches of water, if required. The machinery is extremely simple, yet thoroughly effective the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Large Illustrated Catalogue with many Estimates, and upwards of 200 Engravings, post free for Twenty-four Stamps to any part of the world.

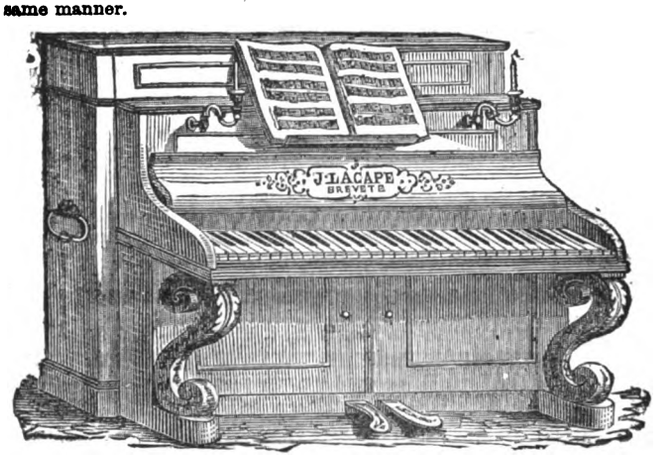
AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29, BOULEVARD ST. MARTIN, PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of seven octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.



ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.

DINNEFORD'S FLUID MAGNESIA.

THE Medical Profession for Thirty Years have approved of this Pure SOLUTION OF MAGNESIA as the best remedy for ACIDITY OF THE STOMACH, HEARTBURN, HEADACHE, GOUT and INDIGESTION; and as the best mild aperient for delicate constitutions, for LADIES, CHILDREN, and INFANTS, and for regular use in WARM CLIMATES

HIS HIGHNESS THE NIZAM'S STATE RAILWAY COMPANY.

ISSUE OF £500,000 SIX PER CENT. GUARANTEED STOCK,

Being one half the Capital of One Crore of Rupees, or £1,000,000 sterling, the balance of which has been subscribed in India.

Secured by the guarantee of H.H. the Nizam's Government to pay £6 per £100 per annum half-yearly in London, and as an additional security always to maintain a deposit of 15 lakhs of rupees, equal to about five years' interest, in securities of the Government of India, in the names of Trustees, at the Bank of England. The interest will be payable without any deduction, except British Income-tax.

THE TRUSTEES OF THE GUARANTEE FUND ARE—

The Right. Hon. Lord LAWRENCE, G.C.B., G.S.C.I. (late Viceroy and Governor-General of India).
HUGH M. MATHESON, Esq. (Messrs. Matheson and Co.), 3, Lombard-street.

A Committee has been formed in London to represent the holders of the present issue, the members whereof will be subject to re-election at the first General Meeting. The following gentlemen have agreed to act as the first Committee :—

General the Right Hon. Lord SANDHURST, G.C.B., G.C.S.I. (late Commander-in-Chief in India).
Sir GEORGE U. YULE, K.C.S.I. (late British Resident at the Court of Hyderabad).
Colonel HENRY HOPKINSON, C.S.I. (late Commissioner in Assam).

Bankers—Messrs. GLYN, MILLS, CURRIE, and Co., 67, Lombard-street, E.C.

Solicitors—Messrs. NORTON, ROSE, NORTON, and BREWER, 6, Victoria-street, Westminster, and 24, Coleman-street, E.C.

Brokers—Messrs. P. CAZENOVE and Co., 52, Threadneedle-street.

The Railway Share Trust Company (Limited) is authorised to receive Subscriptions for the above Stock in 5,000 Certificates to bearer of £100 each, each Certificate representing four fully paid-up shares of 250 rupees, or £25 each of the above Company, on which the guaranteed interest of 6 per cent. per annum is payable at the fixed exchange of two shillings per rupee, or £3 per cent. half-yearly, on the 30th June and 31st December in each year, the first payment falling due on the 31st December, 1875, in London, at the agency of H.H. the Nizam's State Railway Company, 17, Leadenhall-street, E.C.

The price of issue is par, or £100 per Certificate, payable as follows :—

£5	..	...	...	on Application
£15	...	...	...	on Allotment
£40	...	...	...	on 30th June
£40	...	...	...	on 31st July
£100				

Subscribers may pay up in full after allotment under discount at the rate of 4 per cent. per annum, on any day when an instalment falls due.

The Nizam's State Railway has been constructed in accordance with an agreement entered into on 19th May, 1870, between the British Government and the Government of H.H. the Nizam, for the construction of a railway from the Great Indian Peninsula Railway to Hyderabad.

This agreement provides, among other things,—

That the Government of the Nizam will, with the aid of the shareholders in the railway, provide all the capital required for the construction, maintenance, and working of the Railway.

That the British Government construct and manage the Railway through the Resident at Hyderabad, on behalf of the Nizam's Government, furnishing the Nizam's Government with periodical accounts, and with a statement of the income of the railway every six months, the latter Government receiving all the profits derived from its working.

H.H. The Nizam's State Railway Company was duly incorporated with limited liability by edict of the Nizam's Government of the 18th October, 1873, supplemented by an edict of the 3rd March, 1875, by which edicts, and by a contract duly executed between the said Government and the Company, the Company received a grant of the rights of the Nizam's Government, and of the profits of the railway, and provision was made for the creation and guarantee of a capital of one crore of rupees, or £1,000,000 sterling.

By this contract the Nizam's Government has undertaken :—

1. To guarantee payment of a clear dividend of 5 per cent. per annum upon all capital subscribed by shareholders who shall retain a right to participate in the profits of the railway over 5 per cent.

2. To guarantee payment of a clear dividend of 6 per cent. per annum on all capital subscribed by the shareholders who shall waive their right to participate in the profits over 6 per cent.

3. To provide a fund of 15 lakhs of Government of India Four per Cent. Securities, being about the estimated equivalent of five years' guaranteed interest at 6 per cent. per annum on the £500,000 issued in London, to be retained from the proceeds of this issue, and lodged with Trustees in London, as a special guarantee fund for the shareholders in the present issue, the Nizam's Government further undertaking that in the unforeseen event of any of these securities having to sold to pay the interest, the amount so sold shall forthwith be replaced, so that the full amount of the said guarantee fund in Government of India Securities shall always be maintained.

Half the capital, or £500,000, has been subscribed in India, principally in Five per Cent. Shares, with a participation in further profits ; and the Company has decided, with the consent of the Nizam's Government, to issue the remaining £500,000, with the absolute guarantee of the fixed rate of six per cent. per annum, without any deduction (except British Income-tax), or any participation in profits beyond six per cent., which is now offered for public subscription in London.

The State of H.H. the Nizam has, under many years of enlightened administration, become a highly prosperous and well-ordered country. The following particulars are taken from the British Resident's Administration Report, dated 31st October, 1871, which is the latest published official statement on the subject :—

"The total annual revenue realised from all sources cannot have fallen short of, in round numbers, Rupees 2,39,50,000 (£2,395,000) ; of that sum Rupees 95,78,000 (£957,800) were collected by British officers in the assigned districts and other somewhat similarly circumstanced tracts, while the remainder, or 60 per cent., represents the public revenues raised by the native Government itself."

Valuable coal and iron mines have been recently discovered in the interior of his Highness's dominions, to which it is in contemplation to extend the railway system of the country. The development of these can hardly fail most beneficially to affect this line of railway, both by providing cheap fuel for itself, and by affording it a large traffic in addition to what it at present possesses, in carrying coal for the supply of the Great Indian Peninsula and Madras Railway Companies.

The Railway is completed, and was open for traffic in October last.

It is constructed on the same gauge as the Great Indian Peninsula Railway, by which line it is worked, and the traffic is promising. The line is 121 miles in length, and is the main artery of communication between Bombay and Hyderabad, which is the capital city of a fertile country of 13,000,000 inhabitants, with considerable and rapidly increasing trade and resources ; while the line has been constructed at about half the average cost per mile of the leading British Indian Railways, so that there is every prospect that the net revenue from traffic will soon cover the guarantee.

Provisional certificates will be issued in exchange for bankers' receipts, which will be exchanged for the definitive certificates as soon as possible after the date fixed for the completion of the payments.

In the event of the payments not being made at their due dates, all previous payments will be liable to forfeiture.

Applications on the annexed form, accompanied with a deposit of £5 per certificate, must be made to Messrs. Glyn, Mills, Currie, and Co., 67, Lombard-street, E.C., the Bankers of the Company.

Prospectuses and forms of application can be obtained at the office of the Railway Share Trust Company (Limited) ; of Messrs. Glyn, Mills, Currie, and Co., 67 Lombard-street ; of Messrs. P. Cazenove and Co., 52, Threadneedle-street ; and of Messrs. Norton, Rose, Norton, and Brewer, 6, Victoria-street, Westminster, and 24, Coleman-street, City, where certified copies of the documents referred to can be seen.

No. 5, Lothbury, E.C., London, 2nd June, 1875.

HIS HIGHNESS THE NIZAM'S STATE RAILWAY COMPANY.

ISSUE OF £500,000 SIX PER CENT. GUARANTEED STOCK,

Being one-half of the capital of one crore of rupees, or £1,000,000 sterling, the balance of which has been subscribed in India.

FORM OF APPLICATION

(To be retained by the Bankers).

To the Railway Share Trust Company (Limited), No. 5, Lothbury, London, E.C.

Having paid to your credit at your bankers, Messrs. Glyn, Mills, Currie, and Co., 67, Lombard-street, E.C., the sum of £ , being £5 per cent., on an application for £ Six per Cent. Guaranteed Stock of H.H. the Nizam's State Railway Company, I request you to allot me that amount, and I engage to accept the same or any lesser amount you may allot me, and pay the instalments due thereon according to the terms of your prospectus, dated 2nd June, 1875.

DEUTSCHE BANK, BERLIN.

ANALYSIS OF THE DIRECTORS' REPORT,

Presented to the SHAREHOLDERS at the FIFTH ORDINARY GENERAL MEETING in Berlin, on the 22nd May, 1875.

The net profits for the year 1874, amounting to Th. 1,219,488.24.6, represent 8·13 per cent. on the capital, and have been appropriated as follows :—

Th. 469,488	24	6	... ...	To the Ordinary and Special Reserve Funds.
750,000	0	0	... ...	To Yearly dividend of 5 per cent. to Shareholders.
Th. 1,219,488	24	6		

The stagnation in the industry and commerce of Germany, dating from the year 1873, continued in 1874. The diminution of the country's production reacted unfavourably on business in general ; new failures occurred and caused losses, whilst the low rates of interest resulting from want of confidence and dulness of trade rendered the advantageous employment of capital difficult.

Nevertheless, the Bank's business, taken as a whole, made steady progress, the total amount turned over increasing to Th. 1,836.000,000 from Th. 1,255,000,000 in the preceding year.

As regards the transmarine business, the London, Bremen, and Hamburg Branches did fairly well, and satisfactory results were likewise obtained in New York, notwithstanding the somewhat critical state of affairs at the latter place.

On the other hand, the Branches in China and Japan had to contend against difficulties, arising chiefly from the persistently unfavourable course of exchange and generally unprofitable state of trade in the East. The prospects for the future not being encouraging, the Directors think it advisable for the Bank to withdraw from Shanghai and Yokohama, where the Branches will accordingly be closed in the course of the year.

The arrangement alluded to in the Report for 1873, by which the Bank, in acquiring Shares to the extent of One Million of Thalers at par, becomes interested in the management and business of the Deutsche-Belgische La Plata Bank, was ratified. In consequence of the revolutionary events in the States of the River Plate, the combination has yielded no notable profit so far, but the Directors look upon the causes of this disappointment as merely temporary, and consider that the importance of the commercial relations between Germany and the above States justifies better expectations, in this drection, for the future.

The inland transactions of the Bank in Germany, consisting chiefly in commission and account-current business, show a marked and profitable development. Many valuable connexions have been acquired, and new accounts opened.

As a provision against possible losses by three failures which took place in New York, Leipsic, and Berlin, a special guarantee fund has been formed amounting to Th. 176,534.15.3.

Though the directors entertain no apprehension as to the soundness and intrinsic value of the Bank's carefully selected investments, they consider it—from a conservative point of view—desirable to employ a considerable part of the year's earnings to the strengthening of the reserve funds, as a protection against eventualties. They therefore recommend to declare a yearly dividend of 5 per cent. only, which on 75,000 Shares of Th. 200 each, will absorb Th. 750,000, and to add the surplus profits, of Th. 469,488.24.6, to the ordinary and special reserve funds, which will then stand at Th. 780,523.0.7 (£117,078 sterling).

H. WALLICH, }
M. STEINTHAL, } Managers.

Berlin, May, 1875.

The LONDON AGENCY, 50, Old Broad-street, E.C., will PAY the 1874 COUPON, amounting to 10 Thalers or 30 Reichsmark, at exchange of R.m.20.70, say £1 8s. 11d., less income-tax, sterling.

TANJONG PAGAR DOCK COMPANY
(LIMITED).

VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all description of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

LONDON AGENTS.

Messrs. MACTAGGART, TIDMAN, and Co., 34, Leadenhall Street.

E. M. SMITH, Manager.

GLEN LINE OF STEAM PACKETS.—For SINGAPORE, HONG KONG, and SHANGHAI, taking goods at through rates for Java and Japan ports. the magnificent, Clyde-built s.s. QUANGSE, 100 A1, 2,788 tons register, 400-h.p. nominal; now loading in the South West India Dock. Will receive goods up to the 18th June, sailing the following day. This steamer has superior accommodation for saloon passengers.

Apply to M'GREGOR, GOW, and Co., No. 1, East India-avenue, London, E.C.

N.B. Shippers are requested to send in their bills of lading before sailing of the steamer.

GLEN LINE OF INDIA, CHINA, AND JAPAN STEAMSHIPS.—The undernamed powerful Clyde-built BOATS, specially adapted for the India, China, and Japan trade, are intended to be despatched on their advertised dates for SINGAPORE, HONG KONG, and SHANGHAI, taking goods at through rates for SAIGON, YOKOHAMA, NAGASAKI, and HIOGO:—

Steamers.	Class.	Tons.	Horse-power.	Date of Sailing.
Glenartney	100 A1	2,016	330	June 18
Glenfinlas	100 A1	—	—	To follow
Glenfalloch	100 A1	2,126	275	To follow
Glencarn	100 A1	2,120	330	To follow
Glenlyon	100 A1	2,119	275	To follow
Glencagles	100 A1	2,120	330	To follow
Glengyle	100 A1	1,676	200	To follow
Glenroy	100 A1	2,121	250	To follow

For terms of Freight and Passage apply to McGREGOR, Gow, and Co., No. 1, East India-avenue, London.

ROBERTSON and CO.'s INDIA, CHINA, and JAVA LINES of STEAM and SAILING SHIPS:—

Port.	Ship.	Class.	Dock.	To sail.
Hong Kong.	Chusan	A1 14 yr.	S.W.I.D	With des.
Yoko.& Higo.	Flying Spur.	A1 15 yr.	S.W.I.D.	With des.

Apply at 5, Newman's-court, Cornhill, London, E.C.

ROBERTSON and CO.'S INDIA, CHINA, and JAVA LINES of SAILING SHIPS.—For HONG KONG, the CHUSAN, A1 14 years, South West India Dock, with despatch. For YOKOHAMA and HIOGO, THE FLYING SPUR, A1 15 years, South West India Dock, to follow.

Apply at 5, Newman's-court, Cornhill, London, E.C.

GELLATLY, HANKEY, SEWELL, and CO., will despatch the following high classed SCREW STEAMSHIPS as under:—

Ports.	Ship.	Class.	Tns.	Dock.	Sailing.
Pen., Sing., H.K. Shang and Japan...	Timor	100 A1	2209	V.L.D.	June 15
Pen., Sing., Hg. K., and Japan	Lorne	100 A1	1614	V.L.D.	June 29
Pen., Sing., Hg. K., and Shanghai ...	Teviot.....	100 A1	1946	V.L.D.	July 3

For Freight or Passage, apply to GELLATLY, HANKEY, SEWELL, and Co., 1, Fenwick-street, Liverpool; Bridgewater-buildings, Albert-square, Manchester; 51, Pall-mall, S.W., and 109, Leadenhall-street, London, E.C.

Steam via the Suez Canal; last shipping day, 15th June

FOR PENANG, SINGAPORE, HONG KONG, SHANGHAI, YOKOHAMA, and HIOGO. The splendid screw steam ship TIMOR, 100 A1, 1,440 tons register, 2,209 tons gross register, 200-h.p. nominal, 1,000-h.p. effective; J. BROWN, Commander: Victoria Docks. This fine high-classed steamer, built by Messrs. C. Mitchell and Co., of Low Walker-on-Tyne, engined by Messrs. C. Maudslay, Sons and Field, is favourably known in the Indian trade for her rapid passages.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., 1, Fenwick-street, Liverpool; Bridgewater-buildings, Albert-square, Manchester; 51, Pall-mall, S.W.; and 109, Leadenhall-street, London, E.C.

Steam via the Suez Canal. Last shipping day, 29th June

FOR YOKOHAMA and HIOGO, calling at Penang, Singapore, and Hong Kong, the splendid Clyde-built screw steam ship LORNE, 100 A1, 1,614 tons gross register, 1,035 tons register, 150-h.p. nominal, 750-h.p. effective; M. J. BUTCHER, Commander; Victoria Docks. This fine high-classed steamer, owned by Messrs. John Warrack and Co., of Leith, is favourably known in the Indian trade.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL and Co., 1, Fenwick-street, Liverpool; Bridgewater-buildings, Albert-square, Manchester; 51, Pall Mall, S.W.; 109, Leadenhall-street, London, E.C.

FOR CHINA AND JAPAN.—The following splendid first-class STEAMERS and SAILING VESSELS will be despatched as under for:—

Port.	Ship.	Class.	Dock.	To sail.
Sing., H. K., Yokohama, & Hiogo ...	Paraguay, s.s	90 A1	S.W.I.D.	June 12
Pen., Sing., Hg. Kg., & Shanghai..	Benledi, s.s.	100 A1	S.W.I.D.	June 22
Shanghai ...	Mikado	A1 16 yr.	E.I.D.	To follow

For Freight or Passage apply to NORRIS and JOYNER, 126, Bishopsgate street Within, E.C.

Steam via the Suez Canal.

TO SINGAPORE, HONG KONG, YOKOHAMA, and HIOGO, taking cargo for transhipment to Java, Australia, &c., at through rates, at shippers' risk, last shipping day, 12th June, the favourite full-powered screw-steamer PARAGUAY, 90 A1, 1,179 tons, 180-horse power nominal; W. G. WILLIAMS, Commander; South West India Docks. This magnificent steamer offers the most favourable opportunity for goods and passengers, the elegant and spacious cabins being replete with every comfort.

For Freight or Passage, apply to A. G. ROBINSON, Esq., 20, Mark-lane, E.C.; SMITH, SUNDIUS, and Co., 33, Gracechurch-street, E.C.; or to NORRIS and JOYNER, 126, Bishopsgate-street Within, E.C. (corner of Cornhill).

With quick despatch.

FOR SHANGHAI DIRECT, the splendid composite clipper ship MIKADO, A1 16 years, 643 tons register, J. ILBERY, Commander; loads in the East India Docks. This magnificent clipper is celebrated for her very rapid passages and sound delivery of cargo.

For Freight or Passage apply to NORRIS and JOYNER, 126, Bishopsgate-street Within (corner of Cornhill), E.C.

Steam via the Suez Canal.

TO PENANG, SINGAPORE, HONG KONG, and SHANGHAI, taking cargo for transhipment to Java, Japan, Australia, &c., at through rates at shippers' risk. Last shipping day, 22nd June. The favourite Clyde-built full-powered screw steamer BENLEDI, 100 A 1, 1,657 tons gross, 1,000 tons net; 160 horse-power nominal; J. W. BUCHANAN, Commander. South West India Docks. This fine steamer is well and favourably known in the China trade, and has splendid accommodation for saloon passengers.

For Freight or Passage apply to NORRIS and JOYNER, 126, Bishopsgate-street Within, E.C. (corner of Cornhill).

CHINA

THE following SPLENDID First-class SHIPS will be despatched as under:—

Port.	Ship.	Class.	Dock.	To sail.
Hong Kong	Marina	A1 12 yr.	W.I.D.	With des.
Shanghai ...	Agnes Muir..	AA1	E.I.D.	With des.

Apply to KILLICK, MARTIN, and Co., 10, George-yard, Lombard-street, E.C.

SHAW, WILLIAMS, and CO. will despatch the following high class vessels as under:—

Ports.	Ship.	Class.	Tns.	Dock.	Sailing.
Hong Kong	Birker.....	100 A1	1008	S.W.I.	With des
Shanghai ...	Albert Victor...	A1 13 yr.	858	E.I.	With des
Shanghai ...	Titania ...	A1 16 yr.	879	S.W.I.	To follw.

For Freight or Passage apply to SHAW, WILLIAMS, and Co., 2, Royal Exchange-buildings, Cornhill, E.C.

With quick despatch.

FOR YOKOHAMA and HIOGO, the well-known China clipper ALBUERA, A1 17 years (owned by Messrs. John Willis and Son), 774 tons register; R. E. HARRIS, Commander; South West India Docks. This fine vessel is confidently recommended to shippers, and has excellent accommodation for passengers.

For Freight or Passage apply to J. D. WILLIS and Co., 115, Leadenhall-street, London, E.C.

SHORT SEA ROUTE to AUSTRALIA, via Marseilles and Singapore, by STEAMERS of the EASTERN and AUSTRALIAN MAIL STEAM COMPANY (Limited), under Postal Contract with the Queensland Government, leaving every four weeks.

Offices, No. 34, Leadenhall-street, London, E.C.

YOKOHAMA AND HIOGO (loading in the West India Docks), the splendid clipper ship WESTERN CHIEF, newly metalled, A1 14 years, 750 tons register, J. P. HILL, Commander. This favourite ship, known to be one of the fastest in the China trade has excellent accommodation for passengers.

KNEVITT and Co., 3, Sun-court, Cornhill.

* By Pacific mail *via* San Francisco, received 5th June.

THE MAILS, &c.

The French mail, bringing the above advices, was delivered, *via* Marseilles, on the 9th inst., being five days early. The next inward (P. and O.) mail, with advices Yokohama 28th April, Shanghai 2nd, Hong Kong 8th, Singapore 16th May, is due, *via* Brindisi, on Monday next, the 21st inst.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messagerics Maritimes steamer *Meikong*, arrived June 8.—From Yokohama: None. From Shanghai: Messrs. Cooke, Cardwell, King, Gibbon, Sichel, Thoms, Goelean, Juvet, Mr. and Mrs. Tenk. From Hong Kong: Four Japanese, Messrs. Mellish, Thomas, Hughes, Parker, Sanders, Bertrand, Morales, Mr. and Mrs. Cullsen, Mr. and Mrs. Schiller. From Saigon: Messrs. Saleta, Lothaire, De Premenil. From Singapore: Mr. and Mrs. Becker, Messrs. Anteguerra, Torrontegni, Barrera, Kening, Somaria, Festa, Parra, Benzal, Paterson, Vries, De Geer, Bankineger, Wyngana, Valen, Rappard, DeJongh, Ernest, Metyer, Bossihart, Van Vielpen, Hymans, Alvarez, Tardevilla, Bona. From Galle: Messrs. Leantier, Thackwell, Campbell-Rose, Hermenegild, Boyd, Sterling, Murray, Westfield, Neville, Badham, Henderson, Copper, Ross, Chovel, Bedin, Bennett, Georges, Beckt, Jules, Mr. and Mrs. Bourdon, Mr. and Mrs. Faron, Mr. and Mrs. Cremazy, Mrs. Paillard, Mrs. Willis, Mrs. Jackson, Mrs. Pillay, Mrs. Scott.

PASSENGERS OUTWARD.

Per P. and O. steamer *Pekin*, from Southampton, June 17.—To Hong Kong: Lieut. F. H. Chapman, Commander G. Stopford, Mr. W. McMicken, Mr. Pyke.

Per P. and O. steamer *Baroda*, from Brindisi, June 28.—To Singapore: Mr. T. C. Easton.

Per French steamer *Peiho*, from Marseilles, June 20.—To Singapore: Mr. Lemache and three second-class passengers.

Per French steamer *Meikong*, from Marseilles, July 4.—To Batavia: Mr. Rombouts.

Per French steamer *Amazone*, from Marseilles, July 18.—To Yokohama: Mr. Chapsal.

Per French steamer *Sindh*, from Marseilles, August 1—To Batavia: Mr. Van B. Vaanders.

Per steamer *Flintshire*, from London May 10. To Singapore: Captain and Mrs. Lingard, the Misses Burrows. To Hong Kong: Mr. Peter Holme. To Hiogo: Mrs. Durham and three children.

Summary of News from the Far East.

JAPAN.

Our advices from the Japan Ports by the present mail have been anticipated by the Pacific mail, which was received, *via* San Francisco, on the 5th inst.

CHINA.

TIENTSIN.

The correspondent of the *North China Herald* writes as follows from this port:—

In regard to the Chinese official who will form part of the Commission for the purpose of making investigations into the assassination of Mr. Margary in a yamên of a Chinese territorial mandarin in the Province of Yunnan, and into the subsequent brutalities committed, I am now able to report to you with accuracy. His Excellency Li Hung-chang, the Governor-General of this Province and the Commissioner for Foreign Affairs, has appointed a man called Sung Paou-hwa as the officer deputed, on the part of the Chinese Government, to proceed to Yunnan for the above-mentioned purpose. Sung Paou-hwa will leave here in the S.S.N. Company's steamer *Chihli* forShanghai.

Sung Paou-hwa is a native of the Ningpo district, and was formerly in the employment of the Ningpo merchant Tae-kee (Yang-kee-tang), in his mercantile establishments of Shanghai and Ningpo; and can speak the jargon known as "pidgin" English. When Li Hung-chang was formerly engaged in fighting against the Taeping rebels, and Tae-kee was likewise engaged in some fashion in aiding to put down the rebellion, his employé, Sung Paou-hwa, became known to Li Hung-chang. Soon after Li Hung-chang came to Tientsin in his position of Governor-General of this province of Chihli, Sung Paou-hwa made his appearance here as an attaché on his staff; and since then has been employed by Li Hung-chang in various subordinate capacities. He has latterly—for four or five months—been stationed at the village of Koku, situated on this river half-way from Taku, in overseeing some Custom-house or other such like business. His name will not be found in the list of mandarins published in the Red Book, as he does not hold any territorial position. He has no literary rank, and does not belong to the official lawyer class. As to the button which a Chinese may wear in his hat, such, now-a-days, does not indicate his position as an officer in the Government service. I can only add further that we have known Sung Paou-hwa for the last four years at Tientsin as an attaché on the staff of the Governor-General of Chihli, without any territorial rank.

I know not if the appointment of such a subordinate official as Sung Paou-hwa will be deemed by the British Government as an ample share, on the side of the Central Chinese Government, in forming "a powerful Commission." I may ask the question, however, what influence is it likely that Sung Paou-hwa will have over the Chinese territorial authorities in the province of Yunnan, when they become aware of the subordinate position which he fills at Tientsin—in carrying out a strict investigation into such a crime as Mr. Margary's assassination? I will presume to give a reply, and that is that he will not be able, from his known subordinate position in the Government service, or rather the service of the Governor-General of Chihli, to effect what the British Envoy desires to know—namely, what share the Chinese functionaries in Yunnan had in committing the murder, in order that all those connected with the perpetration of it shall be punished. When we, for a single instant, reflect over the dastardly and cruel act committed on Mr. Margary, an officer in H.B.M.'s service, and a gentleman of education, who could speak the Peking mandarin language, the bearer of a duly-sealed passport, and of despatches to the territorial functionaries on the route—in the yamen of a territorial authority; and after that, for only a single instant, reflect on the invaluable aid Mr. Wade, H.B.M.'s Envoy, lately rendered to the Chinese Central Government in their Formosa difficulty—will the British people consider the appointment of such a subordinate officer as Sung Paou-hwa—to proceed to Yunnan to investigate the case, and take steps that the perpe-

Digitized by Google

trators of the murder be arrested and brought to condign punishment—a proper one? I have no hesitation in saying on my part, that, taking the gravity of the case and all the circumstances in connection with it into mind, I consider the appointment of a subordinate officer of the position of Sung Paou-hwa as a gross insult to the British nation.

Sung Paou-hwa is well known to all here, as to his abilities and position; and the Chinese people even, with whom I have lately conversed, and who see clearly the gravity of the Yunnan affair, have not hesitated to speak of the appointment with disgust. Putting even altogether aside his subordinate position as a Chinese officer, by his stinted education and his limited experience of official business—he has no literary degree, and he does not belong to the lawyer class of China—he is totally unfit to fill the position of a colleague of the British officers whom Her Majesty's Minister deputes to Yunnan. The mandarin whom the Central Government should have appointed should have been of the rank of a Provincial Governor, or a junior member of the Tsung-le-yamen. He should have been an official whom, from his rank, the territorial functionaries of Yunnan would have feared and respected. What influence can such a subordinate officer as Sung Paou-hwa possibly have over the authorities of Yunnan? In the opinion of even the educated Chinese here, to say nothing of the foreigners who know him well, none whatever, even over the most petty official in Yunnan. Consequently, Sung Paou-hwa will not be of the smallest assistance to the British officers; but, I fear, rather a detriment and obstacle to them in obtaining accurate information.

The *Peking Gazette* of the 27th March contains an edict announcing the death of the young Empress, widow of the Emperor Tungche, and extolling her virtues. Another edict, in the *Gazette* of the 29th, adopts the recommendation of the officials deputed to select a site for the mausoleum of the late Emperor. A spot near the Eastern Hills is selected.

Li Hung-chang is said to be massing troops all around Tientsin. He has brought in a number of regiments of the so-called Southern Legion, and has even brought in soldiers from Shantung. New forts are also being constructed.

SHANGHAI.

The present mail brings advices from this port to the 25th April; no later mail from Londonhad been received. The following summary of news is from the *North China Herald*:—

We have the Customs Report on the trade of Shanghai for the first quarter of 1875. It shows a considerable increase in the quantity of shipping, both as regards number and tonnage, compared with the corresponding quarter of 1874. The import of Grey Shirtings was considerably less—1,276,000, against 1,615,000 pieces; the figures for other qualities vary, the total import of Shirtings of all kinds being some 350,000 pieces less than in 1874. A great decrease is shown under several other headings—notably Chintzes, Velvets, and Lawns and Muslins. In other cases, however, there is a marked increase. White Shirtings figure for 213,000, against 136,000 pieces, T-Cloths for 389,000, against 216,000, Turkey Reds 39,000, against 11,000. A more or less considerable increase is shown in the import of all kinds of Woollens, except Lustres, which figure only for 37,000 pieces, against 67,000. The increase is chiefly notable in Long Ells, which figure for 21,900 pieces, a larger import than in the corresponding quarter of either of the three previous years. Opium shows a slight increase. Foreign Coal a decrease of one-third; while Native Coal figures for 60,000, against 26,000 piculs. 1,256 Transit Passes were issued, against 737 in 1874. The most notable increase seems to have been in the quantity of Nail Rod Iron so covered—10,092 piculs, against 5,710; the quantity of Lead, on the other hand, having decreased by more than half. Kerosine Oil, again, of which 2,000 gallons were sent inland under transit pass in the first quarter of 1873, and 4,000 in 1874, figures only for 10 gallons in 1875. The Revenue shows a large and steady increase—Tls. 763,460, against 656,482 in 1874, and 649,910 in 1873.

We are able to publish a copy which has reached us from London of Mr. Hart's famous memorandum on the Woosung Bar, in which he predicts the closure of Shanghai, its supercession by Chinkeang, decadence of foreign interests, and an early display of Chinese flags in the docks of Liverpool and London. The memorandum was known to be in existence, but was veiled, with the secrecy peculiar to Peking, from the eyes of those most interested in its contents. We are glad to be able to lift the veil, and to show what enormous nonsense can emanate even from Peking. The whole superstructure of prophecy seems built on the huge misconception that a channel exists round the north end of Tsung-ming—the channel which actually does exist to the south of Tsung-ming, between it and Bush Island, having apparently become misplaced in Mr. Hart's imagination.

Judgment has been delivered at the U. S. Consulate-General, in a cause Henry Savage *v.* A. F. Tyree, which involves a rather curious point. The plaintiff sued to recover on a time bargain in lead. Defendant alleges that he never made the contract. There were two brokers concerned — Mr. Gore-Booth, who sold to Mr. Savage, and Mr. Limby, who says he sold through Mr. Gore-Booth on behalf of the defendant; both the brokers' contract notes were handed in; but they differ in date and in price, and Mr. Limby's note mentions—not a specific qnantity of lead sold to plaintiff, but a lump quantity of 200 tons sold to "Sundry Foreign Merchants." The Court decided against plaintiff, holding that one broker cannot employ another to do business entrusted to him, without authority from his principal, and that the act of Mr. Gore-Booth cannot therefore bind the defendant.

The hulk (late *Esberne Snare)* at Kiukiang, belonging to the China Merchants' Steam Navigation Company, was totally destroyed by fire on the night of the 13th April. The hulk was full of cargo, and it is said that the fire originated in the main hold, through the coolies smoking below. We are informed that nothing was saved from the vessel, as the flames spread with great rapidity, and she burnt until she sank at her moorings.—We hear that Mr. W. E. King, Vice-Consul at Kiukiang, will shortly go home on leave, and will be succeeded by Mr. W. G. Stronach.—A correspondent writes:—Two firms have opened this year, and I expect a good many tea-tasters will visit this market in the season.—The water is falling, after a great rise during March.—The forts at Hukow will soon be commenced, and appliances in the shape of foreign pile-drivers have already arrived by the river steamers. It is stated that a grant of about half a million taels was sanctioned when the trouble with Japan arose, but now, although the Futai is aware that there is no longer urgent need for these costly defences, he does not like to state that the appropriation is no longer required, so he is bound to spend the money. Doubtless many of the petty officials will grow rich in disbursing this sum. The Krupp guns have been ordered, and wood for piles, &c., is being purchased at Hankow.

The steamer *Europe*, Captain Beckett, reports having been in collision with the steamer *Hochung* in the Peiho river, at 9 A.M. on the 13th April. The *Europe* received considerable damage, the *Hochung* having made a clean sweep of boats, davits, awning stanchions, &c., starting the bridge house on the starboard side, and damaging the rail nearly the whole length of the ship. It is not known what damage was done to the *Hochung*. The *Europe's* troubles did not end there; for, on coming up the river, when nearly abreast of the Naval Yard, she again came into collision with a large junk that was proceeding down the river with a fair wind. The *Europe's* starboard bow was stove in, the iron plates having been broken short off, with little or no bend in them. We are told that a quarter-master, who was sleeping in his bunk at the time of the collision, was thrown out of his berth with the force of the blow. What was the cause of these disasters we cannot of course judge, and pending the usual inquiry merely state the facts as reported to us. We hear that the junk, too, is badly damaged, and had to anchor.

At this time of the year great crowds of people from all around the country go to the Loong-hwa temple to worship, and the creek is crowded from end to end with boats. It is rather notable to see small steamers plying between the Arsenal and the Powder-works, running several times a day through this crush. If foreigners suggest small steamers on inland waters, injury to vested interests, danger of collisions, and fifty valid reasons for refusal are at hand. When the mandarins want to run steamers themselves, the objections melt; just as the Arsenal chimneys appear not to interfere with Feng-shuy, while telegraph poles are fatal to that—myth.

At the Municipal Council meeting of the 12th April several topics of interest were discussed. A proposal to make the municipal year co-terminal with the calendar year will be brought up at the next meeting of ratepayers. It was decided to place an appropriation of Tls. 1,500 for the Shanghai General Hospital on the budget for the nine months ending on the 31st December next. The proposed sum is three-fourths of the usual grant of Tls. 2,000—the alteration of course having reference to the proposed change in the financial year. An invitation from the trustees of the General Hospital, to the Chairman of the Municipal Council to become *ex-officio* member of their Board, was accepted. It appears that some firms importing goods in the C.M.S.N. Company's steamers object to pay wharfage dues, on the ground that their goods are covered by the Taoutai's commutation. The Taoutai's commutation payment, however, was calculated before the C.M.S.N. Company was instituted; and the Council very rightly purpose addressing the Consular body on the subject. In view of the expression of opinion in Mr. Seward's judgment on the Municipal Council *v.* Fogg case, it was resolved to postpone further steps for recovering the tax due, pending reference to the ratepayers at the forthcoming meeting. The Taoutai has consented to the lowering of the Hongkew Creek bridge two feet. • Lieut. Mylne having resigned his commission in No. 3 Rifle Company, Major Hart was requested to take the usual steps for the election of a successor.

The minutes of the meeting of Treaty Consuls held on the 16th April have unusual interest. Certain Harbour regulations were first discussed, and three new rules were resolved on:—1. That no vessels except men-of-war are to use swinging booms, and that these shall be rigged in between sunset and sunrise. 2. That buoys must be lighted between sunset and sunrise. 3.

Digitized by Google

That vessels having explosive or imflammable materials on board shall anchor at least a mile below the lower limit, and fly a red flag. The first two rules, it will be remembered, have reference to a letter from the Taoutai representing that accidents have occurred to native boats through neglect of such precautions. It was decided to make no change in the existing pilotage system. This question, it will also be remembered, had been brought up by a letter from a number of pilots, suggesting that the standard number should be reduced.

Messrs. Annecke, Medhurst and Seward have been elected to form the Court of Consuls for the current year.—An agreement has been made with certain engineers at Yokohama, to survey the Woosung Bar for Tls. 2,500. The Taoutai will provide Tls. 1,000; the remainder will be forthcoming from the various local steamer companies and from the community. Some correspondence passed between Messrs. Medhurst and Seward and the Taoutai, on the subject. This shows that the duty of the Chinese Government to provide the necessary outlay was strongly urged upon the Tauotai. It was with difficulty, however, and only after reference to Li, that Tls. 1,000 was forthcoming, "as a matter of favour." The sum has been received under protest that the whole expense ought rightly to be borne by the territorial authorities. Consultation has been had with the committee appointed by the ratepayers to revise the Land Regulations, and certain amendments are recommended, which are too concisely stated in the Report to bear further condensation. The amendment passed at the last ratepayers' meeting in regard to proxy voting is thought to want more precise definition. This is a question of detail, and can be settled at the meeting next month.

The crew selected from the Shanghai Rowing Club to row the challenge race at the Nagasaki Regatta are Messrs. Wyatt, bow; Johnston, 2; Mackenzie, 3; and Glass, stroke; with Cory, coxswain. Kobe will also send a crew, but we hear that Yokohama cannot, owing to various obstacles. The date fixed is the 6th of May, and the distance a mile-and-a-half. Both Nagasaki and Kobe will, it is said, send exceptionally strong crews, and considerable interest is manifested in each of the settlements as to the result of the race. There are also to be double and single sculling matches pulled between the rival crews. Could Nagasaki and Kobe be induced to send crews to our ensuing Spring Regatta.

At a meeting of No. 3 Company of the Volunteer Corps Captain Tucker announced the resignation of Lieutenant Mylne, and said he had received intructions from Major Hart to proceed to the election of an officer to supply the vacancy. He added that the Council desired, through him, to tender the thanks of the community to Lieutenant Mylne for his services and for the interest he had taken in the corps. He proposed Sergeant Yeo, who, he said, felt great interest in the welfare of the corps. Private Fonseca seconded the proposition, and it was carried unanimously.

We hear that Major Hart has asked the trustees of the Recreation Fund to level the interior of the race course, in order to make it more suitable for volunteer drill. It is not supposed that they will have funds to level the whole area at once, but the outlay of a few hundred taels would improve a large space, and the work could be continued as means permit. That something should be done to utilise the large space now lying waste has been often urged, and we hope that the trustees will see their way to undertake the work.

The March number of the *Wan Kwo Kung Pau* contains an article on a very important matter, which we have not seen noticed elsewhere. According to the writer, Li Hung-chang has memorialised the Throne, asking that foreign learning and the sciences may be placed on a par with the standard subjects in the literary examinations of the Empire; and a correspondent writes to us that he has reason to believe the memorial will receive the sanction of Government. The importance of such an innovation is great, and if it be really carried out, good results will certainly follow.

We hear of another change of officials in charge at the British Consulate, Chinkiang, making the third since the beginning of the year, without counting the interregnums when the residents were left to the tender mercies of the constable—a very worthy man in his own sphere, but hardly suited to impress the Chinese with a sense of the dignity of the official he represented. A gentleman who has seen long service as Acting Vice-Consul has been appointed to the port, but we hear is disinclined to come, as the accommodation is so bad.

Most of our readers will remember the lecture delivered some years ago by Mr. Lang, under the title of "Shanghai Considered Socially." It was afterwards printed in a pamphlet, and had a considerable sale among the community. The demand continued after the first edition was exhausted, and we are told that Mr. Lang was about reprinting it when he died. The intention has now been carried out, and we have before us a copy of the second edition. It is printed in good clear type, and covers sixty-four pages. Its contents will be fresh in the memory of old residents. To later arrivals who wish to acquaint themselves with the local and social history of the place we strongly recommend it. They will learn from it out of what a swamp the present well-ordered settlement has been created; how it has grown in population, and through what adventures it has passed.

Information has been received at the United States Consulate-General from the Superintendent of Foreign Mails in Japan, that the steamers of the Mitsu Bishi Company are now practically mail steamers, under the postal convention between the United States and Japan, as contemplated by Article V. of the new Treaty. The mails will be made up in the ordinary way, and passed through the United States Consulate-General. It is also notified that the officers of the steamers are no longer permitted to take cognisance of loose letters.

We understand that an arrangement has been effected between Mr. Seward and the P.M.S.S. Company, under which articles intended for exhibition at Philadelphia will be forwarded to New York *viâ* Panama, at 4½ cents a pound, which is about half the usual rate. First-class and steerage passengers, commissioned by the Chinese Government to attend the Exhibition, will be taken to New York at $250 and $90, instead of $410 and $160.

At a special meeting of the Yacht Club, it was resolved that yachts competing for the Challenge Cup should continue to set one China sail only; and that in future Corinthian Races three members of the Club should be empowered to elect a member if necessary, at the time of the race, to ensure the completion of a crew.

The Chinese have circulated a rumour that one of the old Empresses had died; they even went so far as to fix the 28th day of the 2nd Moon (4th April) as the date of the occurrence. But this very precision seems enough to upset the report; for we have seven days later news from Peking, and no mention of such an incident. We put it down therefore as a *canard*.

The French Municipal elections have resulted in the election of Messrs. Seaman (172), Maignan (160), Scott (121), and Leroy (107); 172 electors voted out of 204 registered.

We hear that the *Modeste* is likely to leave for Hankow towards the end of the week.

We take the following from the *Celestial Empire*:—

We are informed from a source that is described to us as of very high authority, that the Chinese Government at Peking received early official information from Manwyne of the death of Mr. Margary; that the deed was reported by the mandarin by whose orders it was done; and that the said mandarin's despatch on the occurrence was in a tone of satisfaction, and even of exultation, as expecting praise and rewards for his action. This, if true, of course disposes at once of the question of responsibility; there can be no possible doubt that a central government is answerable for the actions of an officer whose notions of his duties to his superiors must have been the outcome of the general tenour of his instructions. We do not mean to assert that this particular act was expressly ordered from Peking, but the manner in which the provincial mandarins have been taught to regard foreigners, and the sort of proceedings which they therefore imagine will please the Peking ministry, are abundantly manifest, both in the assassination itself and in the manner in which the assassin has communicated the crime to those who he thinks will promote him for his boldness and patriotism. A correspondent writing from Nanking on the 14th April mentions that the murder of Mr. Margary was known in native quarters there for some weeks before any intimation of the event reached Shanghai. We are informed that the local mandarins expressed an opinion that the traveller would not succeed in getting through to India; and on finding that he had done so, and was on his way back, they spoke of his death as an accomplished fact several weeks before the news reached the ears of foreigners by any other channel.

We are given to understand that a memorial is being drawn up, addressed to the Treaty Consuls, on the subject of the overcrowding of the Chinese in the foreign settlement. A few weeks ago some wag set a rumour afloat that the Agra Bank was to be pulled down, and the vacant space covered with Chinese houses, and the dismay of those living in the immediate neighbourhood was comical in the extreme. But there is absolutely nothing to prevent this or any similar step being taken, as things are going on at present; there is no law against the grossest conceivable abuses being put in force, and the Municipal Council are simply powerless to stop the evil. We can only trust that the memorial in question will be extensively signed, and record our heartiest sympathy with the effort now put forward in the direction of reform. There are probably few persons in the settlement, not being personally interested in Chinese property, who do not share the feeling of dissatisfaction that we have so often expressed; and who are not conscious of some sense of indignation when they think of men living luxuriously in England on the proceeds of what is a pest and a danger to the entire community. But measures are now being taken of a more decided nature than any yet put forward, and we believe that a very few days more will see the memorial in circulation among the residents of Shanghai.

We have before us the Medical Reports for the half-year ending September 30, 1874, published by order of the Inspector-General of Customs, and forming the sixth part of the *Customs Gazette*. It is not, however, our intention to review it at length, as we cannot but consider its publication on the whole as a

Digitized by Google

doubtful advantage. As a record of the health of the various foreign communities in China it is certainly valuable, and there are many particulars in it of public interest; but we may be permitted to question the expediency of scattering broadcast, for everybody in the place to read, the minutiæ of cases where the identity of the patients is nearly always patent to the reader. We don't know what members of the Customs staff think about the practice; but we are sure that there are very few members of this or any other service or community who really care to have all their ailments, and all the ailments of their wives and families, trotted out and expatiated upon in this unceremonious fashion, particularly in so small a place as Shanghai. There is a want of delicacy in the whole thing that shocks us. Such details as are gone into should clearly be reserved for the perusal of professional men, and their popularisation is, to our mind, an eminently unprofessional proceeding. While, however, we deprecate this especial feature in the reports, and record our objection, not to the analyses themselves, but only to their unlimited promulgation, there is much that may be studied with profit by all.

The Chinese have a report among themselves, said to be founded on a letter from Peking, that the Empress Dowager had handed over to Prince Kung what is practically the supreme power of the State. He will thus be, according to this account, the head of the Chiun Chi office, and will in future wield the *Vermilion Pencil*, which, with the exception of two years during which the late Emperor used it, has remained in the sole hands of her Majesty Tsze-An since the death of Hien-fung. The man who is invested with this power is to all intents and purposes Regent of the Empire; and it is said that other Princes and high Ministers at Peking are showing fear and jealousy. But it is quite possible that there may be nothing in the rumour after all, as there have been many almost equally startling current lately in Shanghai.

That amiable Che-hsien Yeh, so long the *præsidium et dulce decus* of the district of Shanghai, will not long distribute the favours of his mild sway among a a grateful people in this part of the world. His term of office is up, and we trust that bamboos, ancle-hammers, and thumbscrews may then have a period of rest. He has, it seems, bought the rank of Taoutai, and hopes soon to be appointed to a rule wider than that which he made so feared, if not respected, as our neighbour.

The meeting of the Shanghai and Honkew Wharf Company has been again postponed, and now stands for the 29th April.

A torch-light proccession of the Fire Brigade has been ordered to take place on the 27th April, at 9 P.M.

HONG KONG.

Our advices by the present mail extend to the 1st May; the P. and O. mail from London March 19 was received on the 26th April, and the overdue P. and O. mail of March 5—delayed by the breaking down of the steamer *Gwalior*—arrived on the 30th April. The following items of intelligence are from the *Hong Kong Daily Press*:—

A meeting of the shareholders in the Hong Kong, Canton, and Macao Steamboat Company (Limited) has been held at the office of the company. After discussion the following resolution was carried: "That the Board be authorised to appoint and discharge a paid secretary and agents at Macao and Canton; that the paid secretary, under the absolute control of the directors, be authorised to sign scrips, cheques, and other matters, that by the articles of association were formerly done by Messrs. Aug. Heard and Co., until the articles are altered legally; and that such secretary is not to have any connection with any firm in the colony."

At the adjourned Criminal Sessions before Chief Justice Smale, Captain William Hoseason, who had pleaded guilty to having libelled Captain Moss in an article which appeared in the *Hong Kong Times*, was brought up to receive sentence. An affidavit by the defendant, expressing his regret for having written the article, was read, after which the Chief Justice proceeded to pass sentence. The following is a summary of the judgment:—

I think it right now to repeat in substance what I said at the conclusion of this trial, that to the liberty of the press, by universal consent, the Anglo-Saxon race owes its political pre-eminence; but it is a dangerous liberty, ever tending to licentious excess, which would destroy all its advantages. Untruthful and malicious attacks even on public men must be restrained. Society would be unendurable if malicious attacks on private character should go unpunished. In the libel to the publication of which you have pleaded not guilty, and have pleaded an ill-conceived justification, there is malice demonstrated not only from the internal evidence of its tone but by the fact that Captain Moss had superseded you in the command of the *Imogen*, at which you were angry, about a month only before the publication of the libel;—malice accompanied by cowardice, in publishing the article at a time when you believed Captain Moss had left on a voyage which necessitated his absence for months from this colony. The mere publication of such statements as the libel contains, even if true, was in no respect for the public benefit. If Captain Moss had made fradulent insurances, or if he had fraudulently obtained an undue price for his property at Koti, or if he had so defrauded the Sultan there as to be liable to imprisonment, if you did anything you might have been justified in prosecuting Captain Moss, provided you could secure his conviction. Instead of attempting to do that, you in your anger invented a narrative, a tissue of lies and of unsupported imputations, and published it in a newspaper. I will not enlarge on the libel, but I am constrained to say that as to every charge in the libel, Captain Moss and Mr. Howard appear to me not only to be free from blame, but to have acted most honourably; and as to the winding-up of the Hong Kong, Singapore, and Borneo Company, their conduct is especially praiseworthy and honourable. The sentence of the Court on you, William Hoseason, is that you be imprisoned for the period of six weeks. I bear in mind that, for want of your being able to give security to answer the civil action for this libel, you have already been detained for a period exceeding one month. The conduct of the proceedings arising out of this libel reflects great credit on Captain Moss and his advisers, including their forbearance towards the proprietor of the *Hong Kong Times*.

The mail steamer *Gwalior* arrived on the 30th April, being towed in by the *Bombay*, and anchored off the West Point Patent Slip. It appears that she was, on the 16th April, ninety miles S.W. of Gap Rock and 100 miles from Hong Kong, when suddenly the high pressure cylinder cover smashed into six pieces. Sail was set to make for Hong Kong in all possible haste, but a strong wind was blowing at the time, and the vessel made no progress, but drifted to leeward. On the following day, on opening the circulating pump, the discharge valve got jammed open, and the engine room and stoke hole were immediately flooded with water, which put out the fires. The boats were at once got out and provisioned, and the passengers placed in them and sent to leeward of the vessel. The captain, officers, and engineers remained on board endeavouring to stop the leak. The discharge valve was closed in about an hour and a half, and the boats were then recalled alongside. The passengers were got on board and boats taken in, and the hand pumps set to work, all available hands assisting to bail her out. After a considerable time the water was so far got under as to enable the fires to be lighted under the donkey boiler, and steam having been got up she was pumped out by the donkey steam-engines. During this time the *Gwalior* was drifting in a high sea and strong wind from the N.E. Whilst the boats were out one of them swamped in a high sea, and a Lascar and a Chinaman were drowned, through, it is supposed, being over-weighted with dollars. The others were picked up by the remaining boats.

The *Gwalior* continued to drift, able to get up steam, till the evening of the 19th, when she anchored in thirty-five fathoms of water off Taya Islands, on the coast of Hainan. The next evening a boat was sent away manned by the second officer, Mr. Seymour, six Chinese boatmen and six Italian deck passengers, the latter volunteering their services to procure assistance from Macao or Hong Kong. Finding they had drifted to the westward amongst a fleet of junks, they accepted a tow astern of a junk, the people on board saying they were going to Macao. They had not been in tow long before two pirate vessels came bearing down on them, and asked where they were going, when the junk people replied that they were going to Macao. The pirate vessels then came alongside and cut the tow rope, and took the boat in tow themselves. The second officer, Mr. Seymour, sent on board to ask the pirates what they wanted, when they replied the $3,000 which they heard was on board. Notwithstanding that they were told there was no such amount on board, the pirates wanted to break open the air-tight compartments in the life-boat in search after the money. They took away all the spare clothing, a rifle, a revolver, and attempted to carry off the compass, sextant, and chronometer, but Mr. Seymour entreated that he might be allowed to retain these instruments. The pirates, however, took his watch, and having finished their search, still persisted in towing, but the officer declined their assistance, and pulled away for Macao, and subsequently came over to Hong Kong.

As soon as the lifeboat was despatched from the *Gwalior* to Macao, another boat was sent to one of the islands to endeavour to get provisions, but was unsuccessful. The steamship *Bombay* hove in sight on the morning of the 27th April, and took the *Gwalior* in tow. The Portuguese gunboat *Tejo* arrived two hours afterwards, and put back again, after ascertaining that assistance was not required. The *Bombay*, with the *Gwalior* in tow, having got under way, experienced fine weather for the first twelve hours, but nightfall brought strong winds from the N.E. and a high sea, which lasted till the evening of the 29th. During the strongest gusts the vessels made very little progress. We understand that the male passengers on board the *Gwalior* deserve considerable praise, as they seconded the praiseworthy efforts of the captain, officers, and engineers on board to save the vessel, by rendering valuable assistance at the pumping.

A disturbance broke out at the South Camp, near Foochow, on the 17th April. The tumult originated, we are informed, with some Northern soldiers, who attacked with stones and mud the foreign drilled troops under Mr. J. P. Macmahon. The officers on both sides successfully prevented the use of firearms, and finally, fresh troops arriving on the ground, the Northern men were moved off and locked up in a neighbouring Joss-house—to ruminate in sadness over their breach of discipline. It is to be regretted that these blustering sons of Mars are not promptly permitted to join the expedition against the Formosan aborigines; they would then have an opportunity, to say the

Digitized by Google

least, of indulging to their heart's content in the tug of war. We suspect, however, that real fighting would be somewhat distasteful to their minds.

We regret to have to announce the very sudden death of Inspector Stroud, of the Colonial Police Force. The deceased was on duty on patrol, and whilst coming down Square-street he suddenly reeled and fell to the ground, where he expired a few minutes later. He had shown no signs of indisposition through the day. The funeral was attended by a large number of his comrades, by whom he was much liked and respected. The deceased was an efficient officer, and rendered valuable service during the time he was in charge of the water police.

The Pacific Mail Company's new steamer *City of Tokio* arrived on the 29th April. She left San Francisco on the 1st of April, thus having made the passage in twenty-nine days, which is a very good run. This big boat is an exact counterpart, in construction and fittings, of her sister ship, the *City of Peking*. Her length is 425 feet; beam, 48 feet; depth of hold, 38 feet; and registered tonnage 5,079. She is commanded by Captain J. Maury, and is a most valuable addition to the fine fleet of the Pacific Mail Company.

The members of the Choral Society have given an evening concert at the City Hall. The room was filled to its utmost capacity. Among those present were his Excellency the Administrator (the Hon. J. Gardiner Austin), Sir Brooke Robertson, Sir John Smale, Mr. Justice Snowden, the Bishop of Victoria, and a majority of the leading residents. The pieces set down in the programme were all given, with an additional solo by a highly popular lady amateur, which gave great and, because unexpected, additional gratification to the assembly.

Matters in Formosa have assumed a quieter aspect, although the native authorities at Foochow continue to send detachments of troops across to Taiwan.

A Customs' notification announces the commencement of a new lighthouse outside the Amoy harbour.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 8th May; the P. and O. mail from London 2nd April was received on the 2nd May. The following summary of news is from the *Straits Times*:—

The prison murder case came on for trial at the Supreme Court on the 3rd May, before a special jury, all the prisoners committed being arraigned. Previous to empannelling the jury, the prisoners were asked the usual question, whereupon eleven of them pleaded guilty to the charge, and were therefore ordered to sit down. The remainder pleaded not guilty. Mr. Phillipo, Attorney General, prosecuted for the Crown, the prisoners being defended by Mr. I. S. Bond, at the request of the Court. The trial will doubtless be long and tedious, there being a number of witnesses, who, in addition to giving their evidence through an interpreter, will be subjected to a searching cross-examination.

The Legislative Council has not yet been closed. The only question at present pressing for attention is a Bill for the Immigration of Coolies from India, and as the Indian Government imposes its own terms, which are ridiculously elaborate and strict, all the Council can do is to accept or reject the Bill, discussion being useless. There is also a Bill for the construction of a Sea Wall in Penang by Government on the same terms as Cavenagh Quay was constructed here, which will be doubtless passed in due course, without opposition or discussion. We are glad to learn that the seat in Council vacated by the retirement of Mr. W. H. Wood has been offered to and accepted by Mr. R. B. Read. Mr. Read is a very old resident, and represents the oldest mercantile firm in the colony, and he is, moreover, an essentially popular man. We understand that the seat was offered to Mr. J. R. MacArthur, but that gentleman signified his inability to accept the appointment. The representation of Penang will most probably again devolve upon Mr. Walter Scott, who will return from Europe about the end of the year, and would have been re-appointed by Sir Andrew Clarke had he remained as Governor of the Colony.

The trustees of the Raffles Institution have published their annual report, showing the school to be efficient in its work and flourishing in funds. In the latter respect the trustees are indebted in no small degree to the interest taken in the institution by Sir Andrew Clarke, who seems to have thoroughly entered into the views of Sir Stamford Raffles in founding it. Certainly during the short time of his Governorship he has done more to carry them out practically than any other Governor since Sir Stamford's departure. One of Sir Stamford's main objects was to educate the sons of Malay rajahs and chiefs. No steps have ever been taken to effect this somewhat delicate and difficult object, but now a new wing is to be added to the Institution-buildings for the special behoof of youthful rajahs, Ungkoos, and Panghulus. No wiser measure could be taken to make permanent the new order of things in the Peninsula—the reign of law, the security of life and property, and consequent material and moral prosperity.

The complaints of the cultivators and land tenants of Malacca, which have been urged upon the Government in various petitions for some time past, have been carefully and patiently considered by the Governor, who found the problem of how to remedy the discontent, while protecting the forests and the Government interests, extremely difficult of solution. H.E. has, however, at last succeeded in devising a compromise of the timber question, with which the petitioners express themselves perfectly satisfied.

The new order of things seems to be succeeding in all the Native States; labour and capital are flowing in, and the revenue is increasing. This is especially the case in Laroot and Perak. In Salangore progress seems to be slower, but this is not to be much wondered at considering the length of time during which anarchy prevailed there, and its bitterness. It takes time to restore confidence, but with tact and firmness on the part of the residents, prosperity is a matter of certainty in a short time through all the Peninsula.

Notice is given by the Dutch Vice-Consul here that the Governor General of Java has prohibited the import, export, and transit of arms, ammunition, and gunpowder, or any other implements of war, into, from, or in all such places or ports of Atchin and its dependencies as have acknowledged the supremacy of the Netherlands.

A Bill to amend the Contagious Diseases Ordinances of 1870 and 1873 is published, and the amendments appear to be two in number. A magistrate is in future to try in camerâ offences under this Ordinance instead of the Registering Officer; and all proceedings must be initiated at the instance, or with the sanction and approval, of the Registering Officer.

The Singapore Rifle Association have held another competition, which began on the 24th April and concluded on the 1st May. This last match differed materially from the previous ones, inasmuch as the contestants were divided into two classes; these who have won prizes or made twenty-five points and upwards at the last competition were entered in the first class, and those who had not won prizes, or had scored under twenty-five points, were classed as second-class shots.

Among our visitors has been the Hon. Sir Arthur Gordon, who arrived by the French mail on the 26th ult., on his way to take up his appointment of Governor of the Fiji Islands.

ENTERTAINMENT TO SIR ANDREW CLARKE.

Any doubt as to the feeling of the community towards Sir Andrew and Lady Clarke must have been instantly dispelled by a visit to the Town Hall on the occasion of the ball and supper given by the community in their honour, which took place on the 5th April. Notwithstanding the short time allowed for preparation the committee had done their work thoroughly, and admirably justified their selection by the perfection of their arrangements. Outside the hall all the approaches were brilliantly illuminated with various designs in gas, lighting up the roadway and the building itself as in a clear full moon. The sub-committee entrusted with the decorations called in the able assistance of Mr. Lawrence Niven, manager of the Botanical Gardens, who personally superintended all the details, and carried out his difficult and laborious task with consummate taste, converting the entire Town Hall into a lovely arbour of evergreens. The unsightly open space dividing the staircases was ingeniously hidden by a profusion of evergreens and flowers, and the half-way landing, front portico, side verandah, and ladies' dressing-room, were transformed into fairy boudoirs,—teeming with tasteful decorations and rate exotics, to which, besides supplies obtained from other sources, the gardens of some of our wealthy Chinese residents liberally contributed. The ball-room itself was very handsomely decorated. Festoons of evergreens and baskets of flowers adorned the walls on all sides, and the doorways were ornamented with tasteful designs, while over the central entrance door was affixed a tasteful monogram, embracing the letters "A. M. C.," being the initials of Sir Andrew and Lady Clarke. The band of the 1-10th Regiment, which was present on the occasion, was stationed in the gallery at the upper end of the room.

The lower room was fitted up as a supper room. Here were spread tables affording accommodation for all the ladies and the greater part of the vast company present, on which were displayed a great abundance of the most tempting viands, amply sufficient for all and to spare. Instead of entrusting the supplying of the table to one of the hotels, as has been customary on former occasions, we understand the committee this time supplied the table themselves, each contributing a share, only indenting upon other sources for such additions as were deemed necessary. The experiment proved remarkably successful, and the committee are to be complimented upon the result. There was a very large attendance, all classes of the community being represented. Sir Andrew and Lady Clarke arrived at nine o'clock, and were ushered up the staircase into the hall amid the enlivening strains of "God Save the Queen." Dancing commenced soon after, and was kept up without intermission until past midnight. when the company repaired to the lower hall for supper, which was served in excellent style.

After the table had been cleared, the Chairman, the Hon.

Digitized by Google

Thomas Scott, M.L.C., rose and proposed the health of Her Majesty the Queen. The toast having been duly honoured, Mr. Scott again rose, and proposed the toast of the evening, in the following terms :—

You all know why we are met here to night, and in asking you to join in showing to his Excellency the Governor and Lady Clarke the high esteem and great regard in which they are held by all—by the cordial way in which you receive and respond to the toast which I have the honour to propose, I am conscious that any words of mine will be but a poor and feeble expression of your sentiments. The best testimony which can be presented to the Governor and Lady Clarke of their great popularity is the presence of you all here to do them honour. Sir, before you left England, you were entertained at a banquet by the merchants of the Straits Settlements ; and we are now met to endorse and confirm the very favourable opinion which was then formed of the manner in which the administration of the Government of the Straits Settlements would be conducted by your Excellency. At that banquet there would seem to have been shadowed forth what has been the distinguishing feature of your Governorship ;—your policy towards the Native States of the Malay Peninsula. The success which has followed the measures which, with great tact and ability, you took, has so far been most encouraging, and though it can scarcely be expected that no difficulties will ensue in the future, it is believed and hoped that the policy which you have so successfully inaugurated, if carried out with firmness and discretion, will secure that peace and protection for life and property which is so essential to the happiness of the people, and to the progress of these rich countries. Then, Sir, it cannot be doubted but that your success with the Malay princes and chiefs created such a favourable impression in surrounding countries, that it led to your friendly intervention being invited by their Majesties of Siam. In [this [most delicate negotiation you were singularly successful, and speedily overcame the difficulties which at one time threatened to have such serious consequences. To the interests of commerce you have been most watchful, and, as a merchant, I should be singularly wanting in duty if I failed specially to record the thanks of the mercantile community for the care and consideration you have given to questions influencing or affecting the commercial prosperity of the Settlements. The same could be said in regard to other matters which concern the welfare of the colony, but suffice it to say, that to everyone who has come in contact with you, you have been most frank and courteous, securing a feeling of mutual confidence which has given to the people of this colony a sense of peace and rest, and a freedom from agitation and disquiet, which has been most comforting and beneficial, and has made you popular in the best sense of the word. Lady Clarke's many quiet and unobtrusive acts of kindly friendship, while they have endeared her to all to whom they have been paid, have made all feel that in any trial they had one sincerely sympathising friend. All know with what grace and tact the liberal hospitalities of Government House have been dispensed.

Ladies and gentlemen, I ask you to drink the health and happiness of his Excellency our Governor and Lady Clarke, and with all the honours.

The toast was drunk with cheers three times three, the band playing "Auld Lang Syne." Sir Andrew Clarke, in replying, spoke substantially as follows :—

In replying to the kind expressions of your regard which I have just heard from the lips of your chairman, I cannot find words to express what I feel. The terms in which you have spoken of myself and my wife on this occasion will long be gratefully remembered by both of us, and we shall look back with pleasure and sincere regret to the happy days spent in this place. From the date of my first appointment to the administration of the affairs of this colony, from the kind and cordial greeting which I received from people connected with the Straits in London, to this hour, myself and my wife have experienced nothing but the most cordial kindness, proving beyond all question that it is possible, though they may hold different opinions and have different interests, to maintain unbroken good relations and the heartiest co-operation between the governing and the governed. You have been pleased to speak of what I have done, but I know and feel what I have *not* done ; and it is my great regret that in leaving you so soon, after a sojourn of only about eighteen months in the colony, I am unable to carry out many works which I had intended, and must leave unfinished others which I have undertaken. I ask you, on behalf of my successor, to extend to him that cordial co-operation and confidence that has been accorded to me. I assure you that we shall both carry with us to India, and to that quiet home in England which we hope for as the reward of long service, a grateful, a proud remembrance of the kindness, the honour, you have done to us this night, and shall always look back with pleasurable regret upon the happy days we have spent with you in Singapore. Ladies and gentlemen, on behalf of my wife and of myself, I sincerely thank you for the manner in which you have drunk our healths.

After supper dancing was resumed and continued until about three in the morning. Sir Andrew and Lady Clarke left about 2 o'clock, after which the ladies began one by one to retire, and ere long the ball-room was deserted. The ball will long be remembered as one of the pleasantest and most successful public entertainments ever given in Singapore.

THE Committee of the French National Assembly, to which the motion of M. GUICHARD to cancel the contract of the Government with the Messageries Maritimes was submitted, has reported in favour of the rejection of M. GUICHARD'S proposition.

THE appointment of Dr. ERNST BIEBER as German Consul at Singapore has been approved by the QUEEN.

THE MAILS.

—o—

PRESENT INWARD MAIL.—MARSEILLES, JUNE 8.—The Messageries Maritimes steamer Meikong, with the inward French mails from China and Japan, arrived here yesterday at 8 P.M. She brings 108 passengers and a general cargo, including 17,549 packages of tea, 242 bales of silk, 299 packages of sundries, and £26,995 in gold, for London, which part of her cargo will be forwarded to its destination per the Company's steamer Indus, due in London on or about June 21.

HEAVY PORTION OF LAST INWARD MAIL.—GIBRALTAR, JUNE 11.—The P. and O. Company's steamer Khedive, with the homeward India, China, and Australia heavy mails, leaves here at 7 A.M. for Southampton, where she may be expected on the 15th inst.

INWARD MAIL DUE JULY 5.—GALLE, JUNE 11.—The P. and O. Company's steamer Lombardy, from China, arrived on the 7th, and the Golconda, from Australia, on the 8th inst., with the China and Australia mail. The Mongolia left for Suez yesterday. Australian gold for Europe, £480,000.

HEAVY PORTION OF LAST OUTWARD MAIL.—GIBRALTAR, JUNE 8.—The P. and O. Company's steamer Hydaspes (from Southampton, June 3), with the outward India, China, and Australian (heavy) mails, arrived here at 7, and left at 10 A.M., for Malta and Port Said. Experienced fine weather.

OUTWARD MAIL OF APRIL 30.—SHANGHAI, JUNE 9.—The P. and O. Company's steamer Nizam, with the London mails of the 30th April, arrived here to-day.

Marina: 700 tons sugar, 227 tons hemp, 16 tons sapanwood, 190 mil. cigars. France: 500 tons sugar, 262 tons hemp. Lyra: 406 tons sugar, 140 tons hemp, 6 tons sapanwood, 11 cwts. mother-o'-pearls. Emiliano (str.): 1,000 tons sugar, 33 tons coffee, 25 tons hemp, 25 tons sapanwood, 24 cwts. mother-o'-pearls, 216 mil. cigars. Estrella: 570 tons sugar, 230 tons hemp, 12 tons sapanwood. Invincible: 500 tons sugar, 356 tons hemp, 12 tons sapanwood, 240 mil. cigars. Araby Maid: 1,190 tons sugar. Angostura: 547 tons coffee: Penrith: 800 tons sugar.

Naval and Military.

It is announced that Sir Garnet Wolseley has decided that it will be quite unnecessary to land the battalion of Royal Marines from Japan at Natal, and the Adventure will bring the battalion to England forthwith. The Adventure arrived at Capetown on the 28th April.

The Elk, gunboat, arrived at Spithead on the 9th inst. from China, and has gone into Portsmouth harbour to be paid off. She was commissioned at Portsmouth in December, 1868.

Her Majesty's ships of war in harbour at Hong Hong on May 1 were the Audacious, Egeria, Charybdis, Hart, and Ringdove. Her Majesty's ship Hart arrived on the 26th of April. Her Majesty's ship Thalia left Yokohama for Hong Kong, *viâ* Nagasaki, on the 22nd of April. Captain Colomb and the officers of Her Majesty's ship Audacious gave an "at home" on board on the 29th of April.

The Board of Trade has ordered the Iron Duke, late flagship on the China station, to be surveyed, in order that proceedings may be taken against the Suez Canal Company to recover excessive dues which were levied on the vessel on her passage home, and paid under protest by the Admiral.

THE Victoria and Albert, Royal yacht, sailed from Portsmouth yesterday for Gravesend, where she will embark the Prince and Princess Louis of Hesse for Antwerp. The yacht has been renovated and redecorated at a cost of between £3,000 and £4,000.

A detachment of Royal Engineers, who had been serving in China with the 24th Company, arrived at the School of Military Engineering at Chatham on the 7th inst. These men have been absent from England more than ten years.

Captain C. J. Matthews, 57th Regiment, will shortly take up the duties of aide-de-camp to Major-General J. A. Street, C.B., commanding the troops in Ceylon.

The Dutch war despatch vessel Bromo, Captain Scholten, for Atchin *viâ* Gibraltar and Suez, has put into Plymouth to coal.

The Russian frigate, Bogatyr, Capt. Schaffroff, arrived at Falmouth on the 7th inst., from China.

Literature.

n an Indian Institute. By FORBES WATSON. Allen and Co. 1875.

We notice that Dr. Forbes Watson has, at a very suitable moment, published a pamphlet, in which he advocates the establishment of an Indian Institute in connection with the India Museum and Library. An Indian Institute of this sort, it is argued, by the delivery of lectures, by stimulating inquiry, and by instruction given to classes, would do much to spread a taste for Oriental studies in England, and to promote higher education among the natives of India; while the difficult question of how best to train candidates for the Civil Service might thereby receive a practical solution. On this last subject Dr. Watson declares himself in favour of raising the age of candidates, so as to allow men who have already obtained a University degree to compete; and secondly, of assimilating the system of examination to that in use at the English Universities, so as to abandon mixed examinations in a variety of subjects, and award the appointments for special acquaintance with some particular subject, to one for classical, to another for mathematical knowledge, and so on. The raising of the age would in itself prove a most important change, for the men actually sent out to India would thus arrive there with minds and bodies more developed, and characters more formed, than sometimes happens under the existing rules. The young gentlemen who now reach India at the not very mature age of nineteen or twenty are hardly fit to be entrusted with arduous, responsible duties, on the efficient performance of which the welfare of many thousands may depend. The old theory was that it was essential to secure complete acclimatisation to send men out at an early age; but all recent experience makes against this notion, and it is found that the more mature a man is the stronger will be his resisting powers in an uncongenial climate.

Dr. Forbes Watson is further of opinion that so far as the natives of India are concerned our system of high education, which has been in operation in India for nearly twenty years, has not fulfilled all that was expected of it; its effects have been negative rather than positive; public spirit has not been awoke to any but an insignificant degree among the natives of rank and wealth; and there are some high authorities who share Dr. Watson's view, that we ought by some means to draw a much larger proportion of the upper-class youth from India to England, so that by residence among us they may discover how much public-spirited people are doing to benefit society and learn European modes of action, as well as European modes of thought. Towards these ends the proposed Indian Institute might render conspicuous service. Of course there is the question out of what funds the necessary buildings are to be erected, the chairs endowed, and the other expenditure met. Dr. Watson thinks with respect to this that too much should not be attempted at first; four lecturers might be appointed to begin with, and as the public perceives the advantages of such an institution generous men, with means at their back, will be sure to come forward with contributions. No pressing demand is made on the Chancellor of the Exchequer; at the same time when we remember what very large sums are annually voted for educational purposes it seems hard that some trifle should not be spared out of the superabundance to satisfy the claims of India. We cannot close this brief notice without a tribute to the energy and ability which Dr. Watson has displayed in the arrangement of the newly-opened India Museum. The South Kensington Galleries and the wooden cases in which the Collection is stored were neither of them specially built for the purposes for which they are now used; and therefore the greater credit is due to those who have made so much of the means supplied them. Defects there are, of course, some of which a little care will easily remedy; but on the whole there has been an immense improvement; we can at any rate see our national Oriental treasures now, which was more than we could do as we groped among the cock-lofts and cellars at the India-office.

Miscellaneous.

SALE OF CHINESE AND JAPANESE PORCELAIN.

On the 8th inst. Messrs. Christie, Manson, and Woods sold at their rooms, King-street, St. James's-square, the collection of objects of art formed by Mr. A. B. Mitford, formerly Second Secretary to the British Legation in Japan, and author of "Tales of Old Japan." Amongst the objects submitted were:—A set of three old Japan jars and a pair of vases, £25 4s. Chinese porcelain: A yellow basin and a crimson do., with arabesques in colours and landscapes, £25 4s.; a pair of fluted jars enamelled with female figures, £34; a pair of jars and covers, deep blue ground, ornamented with gold and enamelled with flowers in medallions, £82; a fine large cistern enamelled with dragons and waves, date Chêng Hwa, 1465-1488, £85; a pair of purple birds, £33 12s.; a pair of turquoise kylins of large size and brilliant colour, £199 10s.; a fine turquoise bottle, with ornaments and foliage in relief, £47 5s. Chinese enamels: A pair of circular boxes and covers, with birds, animals, and ornaments, in white and colours, on black ground, the cloissons of gold—very rare, £135; a pair of storks, of black and white enamel, with golden cloissons, £194 5s.; a large vase, with gilt dragon handles, turquoise ground, with butterflies in colours, and with birds in medallions, golden cloissons, £152 5s. The two last lots were given out of the Winter Palace by the Empress Mother to a favourite eunuch, from whom they were obtained by Mr. Mitford; they belong to the early years of the 17th century. A pair of wooden cabinets inlaid with slabs of enamel with dragons and ornaments in colours, £60 18s. Japan Lacquer: A tortoiseshell cabinet, with plants in gold and with silver-mounted door, enclosing drawers, £40 19s.; a beautiful screen, with large black and gold lacquer panel, a group of storks under a tree with Fujiyama, the peerless mountain in the background on one side, and a group of flowers and quails on the other side, £168. A number of nétsuké were sold at various prices, from £22 each and under. Nétsuké are buttons attached to the end of a string of silk used to keep the purse or the medicine box in the girdle. They are carved in ivory or wood with the most delicate workmanship, with illustrations of Japanese legends, and are much esteemed by Japanese dandies; and connoisseurs make large collections of them, giving high prices for the work of famous artists.

CHINESE COOLIES IN PERU.—A letter from Lima in the *Cologne Gazette* says:—It is known that the Portuguese Government, acting on the urgent representations of England, has forbidden the coolie traffic which formerly existed between the Potuguese colony of Macao and Peru. The Peruvian Indians, however, are so indolent that the land-owners are entirely dependent on Chinese workmen for the tillage of their fields, and there is reason to fear that when the existing contracts with the coolies have expired there will be no workmen left to cultivate the land. The efforts made at great expense by the Government to attract immigrants to Peru from Europe have totally failed. Even the Italians, who were given a free passage to Callao, refuse agricultural employment. An attempt is now to be made to induce an immigration from China, and the Government has proposed to Congress that an annual subvention of 150,000 soles should be granted to a society which is being formed for gratuitously conveying Chinese colonists from the Asiatic ports to Callao. It is certainly no advantage to the Peruvian nation that people of so different a race and religion, and sunk in superstition and ignorance, should settle down in such numbers among them; but they are driven to this measure by sheer necessity, and the Government promises to do its utmost to protect the Chinese against the abuses from which they suffered under the coolie system. The preparations for the election of a new President are going on without any disturbance of order, and the Government carefully avoids any interference in the matter. By far the most popular candidate is General Prado, who arrived from Chili on the 25th of April.

ANGLO-ORIENTAL SOCIETY FOR THE SUPPRESSION OF THE OPIUM TRADE.—The following circular has been issued:—Mr. Mark Stewart's notice that he "will call attention to the evidence given before the East India Finance Committee, 1871, with reference to the opium traffic, and move a resolution," stands second on the orders of the day for the 25th inst. Permit me, on behalf of this society, to urge that you should *at once* write to your representative in Parliament, and impress upon him your sense of the importance of this question, both to our national honour and the welfare of humanity; and your earnest hope that he will be in his place in the House on that night, to help to secure Mr. Stewart an audience. If you are able to bring influence to bear upon any other members of Parliament for the like object, either directly or through the medium of friends, I hope you will not fail to do so. Every effort should be made to ensure for this grave subject a candid and and patient hearing in our Legislature.—I am, &c., F. S. TURNER, Secretary.

THE CHINESE LANGUAGE.—Professor R. K. Douglas delivered a lecture last week at the Royal Institute on "The Chinese Language and Literature." He commenced with an allusion to the great interest shown by Englishmen in everything connected with China, and went on to say that the difficulty of learning the language had been greatly exaggerated. Chinese is the chief language of the monosyllabic group. It is unflexional; its substantives are undeclinable, and its verbs cannot be conjugated; moreover, it is without an alphabet. The language may be divided into two parts, the characters and the sounds. The character, originally hieroglyphic, became eventually ideographic, and ultimately phonetic. The composition of the characters is identical with that of the Egyptian ideophonetic and Assyrian cuneiform. The deficiency of its sounds is evidenced by the fact that there are only five hundred sounds to represent thirty thousand characters. The grammar is peculiar; a word may be a substantive, an adjective, a verb, or an adverb.

THE will, dated July 22, 1874, of Rear-Admiral Sherard Osborn, C.B., late of No. 33, Charles-street, Berkeley-square, who died on the 6th ult., was proved on the 24th ult. by Thomas Falkner Allison, James Hallet, and Henry Ashington, the nephew, the executors, the personal estate being sworn under £35,000. The testator gives legacies to his godchildren and others; settles £6,000 upon each of his daughters, Agnes Angela Mary Osborn and Helen Kate Georgiana Osborn, and leaves the residue to the daughters of his two sisters, Mrs. Frances Denton Ashington and Mrs. Eliza Fuller.

UNDER the auspices of the Gaelic Society of London, a meeting has been held to promote the establishment of a Celtic chair for Edinburgh University. The Marquis of Huntly, who presided, announced that the Queen had promised to contribute £200 towards the object in view; and a letter from Mr. Gladstone, expressing sympathy with the scheme, was read. Afterwards resolutions in favour of the cultivation of the Celtic language by the means proposed were adopted.

AT the monthly meeting of the National Bible Society of Scotland. Mr. Robert Lilley, agent at Chefoo, reported the completion of a journey of 133 days in Western China, during the course of which he had travelled 3,133 miles, and sold 4,766 volumes of the Scriptures. It was stated that Mr. Lilley is now on his way to Japan, with instructions to organise colportage there.

MR. HART ON THE WOOSUNG BAR AND THE FUTURE OF SHANGHAI.

Mr. Hart's marvellous memorandum on the Woosung, Bar the Future of Shanghai, and other kindred topics, bearing date "Peking, March, 5, 1874," has just been unearthed and made public at Shanghai, after a hole-and-corner existence of more than a year. Of course it has long been known that such a document did exist, and, indeed, an elaborate and lengthy criticism of it, to which we shall allude presently, had been privately circulated, in the form of a counter memorandum, both in China and elsewhere, as far back as last September. Our Shanghai friends, now that they have this precious document of Mr. Hart's before them, and are free to comment on it, are not unnaturally loud in their complaints at having been so long kept in the dark, no less than at the dismal future prophesied for them by the Inspector-General of Customs; and in both respects we deeply sympathise with them in their righteous wrath and indignation at this, the severest snub which they have met with since their port was first opened to foreign trade.

Premising that the memorandum before us, considered as a whole, is almost beneath serious criticism, we proceed to glance, briefly at its leading features. Mr. Hart is of opinion that the Woosung Bar question may be viewed in two ways, (1), as it affects and is affected by the natural and artificial agencies that are working at the mouth of the Yangtsze; and (2) as a mere dredging operation. Viewed, he says, as affecting and affected by other agencies, the question calls for a consideration, of (1) the action of nature at the mouth of the Yangtsze; (2) the action of nature in the Shanghai river; (3) the results of the combined action and the future of the river; and (4) the future of trade. His remarks on "the mouth of the Yangtsze" are the corner-stone of the superstructure which he afterwards builds up, and of them it will be sufficient to say, in brief, that they are mainly based upon an astounding blunder. How a man in Mr. Hart's position, and with all the means and appliances at his disposal, could have been betrayed into stating that the channel to the north and east of Tsung-ming Island, in the estuary of the Yangtsze, has of late been used occasionally, and is spoken of with growing approval, probably only Mr. Hart himself can explain, for, as a pure matter of fact, the channel is not navigable at all except by small native craft! Surely the crass ignorance displayed on so vital a matter is of itself a good argument for the removal of the Inspectorate General of Customs from the cobwebs and intellectual fogs of Peking to the clearer and more practical atmosphere of Shanghai. It is, perhaps, needless to say that Mr. Hart blunders over a channel which does exist to the *south* of Tsung-ming Island, and which, in certain conditions of the tide, is sometimes used by steamers running between Shanghai and the northern ports. Having blocked up its present mouth to his own satisfaction, Mr. Hart proceeds to give us his views in regard to the Shanghai river, and they are of such a nature that, if they were sound, they would tend to depreciate very materially the value of property at Shanghai. Happily his views are not sound, and their fallacy is ably exposed in the counter-memorandum to which we have referred. Having satisfied himself that the conclusions at which he has arrived augur badly for the future of the Shanghai river, he asks sententiously, "What of another class of considerations—*e.g.* commercial?" and forthwith he takes up his parable on "the future of trade." The gist of this paragraph lies in his expectation that competition of a certain nature will tend to give foreign trade more and more to the steamers which do not call at Shanghai. "Even the P. and O. preference," he says, "for Shanghai will have to move on, and keener competition will weaken the influence of Shanghai's priority and vested rights. Add to all, the competition coming from the Chinese side, which, in ten or twenty years' time, will have swept the foreign flag from the coasting trade of China, and displayed the Chinese colours in the London and Liverpool docks. The highway of trade for Central and Northern China will be the Yangtsze. Teas will be shipped at Hankow and Kiukiang, and Shanghai silks and Ningpo teas at Chinkiang." Verily, this is the "most unkindest cut of all," that poor, despised Chinkiang is to supplant her giant rival! That Chinkiang has a prosperous future before it we do not doubt, but we are sceptical as to its ever taking the place of Shanghai. The produce just mentioned will be, we are further informed, "the return cargoes of the steamers which carry what China *may continue to demand from Europe.*" The words which we have placed in italics are so oracular in their nature that we cannot pretend to interpret their meaning.

Having thus drifted about in the realms of fancy and theory, and having had a final cruel fling about, "the means of making the last days of Shanghai a little more comfortable than they would otherwise be," Mr. Hart comes to the consideration of "the Woosung Bar, as a mere dredging operation." Can it be dredged, he asks? Of course it can, he replies. Can the channel, he further asks, be kept deep enough for such vessels as navigate the remainder of the river? Certainly, he replies. Then why, in the name of fortune, we ask, has not the one been done, and why is not the other being done? Cannot Mr. Hart and his Chinese superiors bring themselves to part with their hoarded reserve fund of unexpended tonnage dues? Let them set to work at once, and lose no more precious time in shilly-shallying. When dredging operations are once under way, there will be no fear for the channel of the Shanghai river; means will then be found for keeping it clear.

We have written rather more fully than we had intended on the subject of Mr. Hart's memorandum, and have left ourselves but little space to speak of Mr. Consul General Seward's memorandum upon it. Suffice it to say that, although it is, perhaps, a little too diffuse in its construction, it is a masterly refutation of all the statements and arguments put forward by Mr. Hart on behalf of his superiors. Mr. Seward makes an especially good point against the Chinese in regard to the conservation of harbours and fairways, and he expresses the very right and sensible opinion "that the situation and importance of Shanghai are such that no reasonable expenditure at Woosung could be misplaced."

RELIGION IN JAPAN.

(PALL MALL GAZETTE.)

The recent measures of the Japanese Government in regard to religion have been much misunderstood. The hostility shown to Butsŭ-dō or Buddhism has not amounted to a total disestablishment, but merely to what the Japanese apologists call a purification of the Kami or Shin-to shrines. This "purification" is found to mean that wherever the two religions existed together, corruption—that is, Buddhism—crept in, and that the Mikado, always the fountain of power, was bound, since his restoration to full executive, to remove the contamination and purge the shrines, as head of the Kami cult. No general edict has been issued against Buddhism, but it is indisputable that the present rulers of Japan discourage it as a dead thing, whose priests are a herd of able-bodied men living in idleness and only too often contravening the rules of their faith.

Travellers who touch at Yokohama generally visit Kamakura and Fujisawa on the tōkaido. At the former, where there was a mixture of the two religions, the temples have been purified and stripped of the Buddhist images, Shinto shrines taking their place; but at Fujisawa, where there was and is pure Buddhism, no change is visible in the great temple. In Satsuma, where an iron rule prevailed under an intensely military provincial Government, Buddhism was summarily abolished quite seven years ago, and the people were ordered to return to Shintoism, the religion of their forefathers. The temples, the number of which was small, were closed; some, among them that bombarded by our ships at Kagoshima in 1862, under the impression that it was a palace, were turned into schools, and the priests were sent back to their families in order that they might let their hair grow, marry, and enter upon other ways of life. They took gladly to a new and more active existence, and have since been quietly absorbed into the general population, who received this decree with apathy. Secret Buddhism no doubt still exists in Satsuma, but it is said to be confined to the powerful Monto sect, which has been prohibited in that province for three centuries because some of its priests betrayed the stronghold of the same Kagoshima to the famous Hideyoshi (1536-1598) in his war with the Shimadzu family in 1587. The Monto priests are learned and wealthy, and have been compared by Japanese, because of their social influence, to the Jesuits of the West; but they marry, and it is understood that the priesthood is hereditary. In other localities, where the measures were not, as the Mikado had commanded, taken with the concurrence of all concerned, both peasantry and priests, disturbances occurred, and the local authorities met with the severe censure of the Government. But, except where the Buddhists have clearly long had the upper hand, the ease with which the Japanese revert to their ancient cult is worthy of remark, especially when attested by such well-informed writers as Mr. Adams, the author of the "History of Japan" (published by Messrs. King and Co.), and Mr. Satow, probably the first living Western Japanese scholar.

"The amiable priest of the village of Miyagase, at whose house many foreign travellers have rested, was formerly of the Buddhist sect called Shingon, and celebrated its rites and preached its doctrines to the villagers. But after the restoration of the Mikado's power, his temple was shut up, the images were put into a godown, and the Buddhist priest, letting his hair grow, became the Kannushi, or Shinto minister of a shrine which had always existed in the village. The example of the pastor was followed by all his flock, who have since been content to restrict themselves to the worship of the Kami." After all, the Japanese have been very much accustomed to worship Buddhist and Shinto deities indiscriminately. This last statement could be supported from many sources. In the well-known moral discourses of Okuda Raioj, of the Shingaku sect, the Kami and the Hotoke, or Buddhist deities and saints, are constantly referred to indiscriminately as objects of prayer and worship, and a verse of poetry says:—

Hotoke ni mo
Kami ni mo hĭto wa
Naru mono wo
Nado adani
Motsŭ ono ga Kokono wo!

"While one may become a *Hotoke* (perfect Buddha) or a *Kami*, why think lightly of one's own heart?" A sentiment which will obtain illustration farther on. But there is nothing new in the present hostility to Buddhism in Japan. It is of old date, and has broken out from time to time. In the days of Nobunaga (1533-1582), Hideyoshi's celebrated leader, the Buddhist monasteries had become so wealthy and the number of their dependants so numerous, that they were enabled, when their interests required, to take the field and aid the cause of one or other of the military chieftains in the civil wars of the time. Nobunaga determined to arrest their arrogance, and in 1571 destroyed the most important of their establishments, Hiyeizyn, not far from Kioto, which was founded in the seventh century, and is said to have contained as

Digitized by Google

many as 500 temples, which he burnt, putting to death all the priests. He favoured the Christian religion as a counterpoise to their extravagant pretensions (Francis Xavier had landed at Kagoshima in 1549), but his great successors Hideyoshi and Iyeyasu (1542-1616) found the Jesuits just as troublesome. All this clearly points to the fact that Buddhism has never, since its introduction from Corea in the sixth century, been fully and generally assimilated by the Japanese population. The place it might otherwise have attained was occupied by a more powerful sentiment, the Kami doctrine.

The origin of the Kami gods is bound up with the myths of the earliest cosmogony of Japan, which are highly interesting as comparative studies. So far as the writings of the native "fatheis" have been investigated, suggestions of the coincidence of phallic ceremonies with the production of Japan by the Kami, of the lingam, of the duality in unity of certain Kami, and the trinity in unity of one, together with the idea of an incarnate Kami, have been clearly traced. These cannot be pursued here, but we may give from a privately printed essay by Mr. Satow, the value of which it would be difficult to exaggerate, some brief sketch of the maxims, domestic ritual, and prayers of the religion :—

"Everything depends on the spirit of the gods of heaven and earth, and therefore the worship of the gods is a matter of primary importance. The gods who do harm are to be appeased, so that they may not punish those who have offended them, and all the gods are to be worshipped, so that they may be induced to increase their favours." "First serve the gods, and afterwards deliberate on matters of government." "At morning and evening the wise resolve to do honour to the gods is carried out with diligence." "According as all things arrive at maturity they shall be offered up first to the gods, but things shall not be presented by Buddhist monks and nuns, or persons under an interdict." "As the number of the gods who possess different functions is so great (a publication of the year 927 gives the names of 3,132 worshipped by the Mikado's Court, either personally or by envoy, in 2,861 temples) it will be convenient to worship by name only the most important, and to include the rest in a general petition." "In praying to the gods, the blessings which each has it in his power to bestow are to be mentioned in a few words, and they are not to be annoyed with greedy petitions; for the Mikado in his palace offers up petitions daily on behalf of his people, which are far more effectual than those of his subjects." "If you desire to practise true virtue, learn to stand in awe of the Unseen, and that will prevent you from doing wrong. Make a vow to the god who rules over the Unseen, and cultivate the conscience implanted in you, and then you will never wander from the way. You cannot hope to live more than a hundred years under the most favourable circumstances; but as you will go to the realm of the god of the Unseen after death, and be subject to his rule, learn betimes to bow down before him." "The spirits of the dead continue to exist in the unseen world which is everywhere about us, and they all become gods of varying character and influence. Some reside in temples built in their honour, others hover near their tombs, and they continue to render services to their prince, parents, wife, and children, as when in the body."

Every Japanese, with the exception of the more bigoted members of the Buddhist sects named Nichiren and Ikkō, has in his house a kamidana or shrine, in which are worshipped the Penates. It contains various tablets covered with paper, on which are printed the titles of the gods of Ise and others in whom the householder places his trust. Before these tablets are offered up at the new year, and on the 2nd, 15th, and 28th of the month, sake, rice, and the leafy twigs of cleyera japonica. Every evening a lighted wick floating in a saucer of oil is placed in the shrine. Then there is the shrine, a wooden cupboard, in which are deposited the monumental tablets of ancestors and deceased members of the family. Fresh flowers are offered up from time to time, and the first portion of the rice boiled for daily household use, besides a first portion of any fruit or cooked food which the deceased are known to be fond of. The tomb of a parent or other member of a family is visited every month on the date of the death. The home of the spirits of the dead is in the household shrine; but they are present wherever they are worshipped, being gods, and therefore ubiquitous. The origin of the worship of ancestors is carried back to the mythical period. It is the duty of a subject to be diligent in worshipping his ancestors, whose minister he should consider himself to be. Devotion to their memory is the mainspring of all virtues. No one who discharges his duty to them will ever be disrespectful to the gods or to his living parents. He will also be faithful to his prince, loyal to his friends, and kind and gentle with his wife and children. The essence of this devotion is, in truth, filial piety.

Among the ancient Shinto practices which have decended to the present day is the presentation of newborn infants to the local deity who is called the family god, the inhabitants of his district being the children of his family. On change of residence these family gods make arrangements between them for the transfer of their children, and it is proper to take leave of the old and to pay a visit to the temple of the new god as soon as possible after coming into his district. Mr. Satow gives from a work written in 1811 by the Shinto scholar, Hirata Atsutane, the ritual of prayers to be said. Those whose daily affairs are so multitudinous that they have not time to go through the whole of the morning prayers may content themselves with adoring the residence of the Emperor, the domestic gods, the spirits of their ancestors, the local deity or family god, and the god of their particular calling in life. Rising early in the morning, the face and hands should be washed, the mouth rinsed, and the body cleansed. Then turn towards the province of Yamato, strike the palms of the hands together twice and worship, bowing the head to the ground. The proper posture is kneeling on the heels as ordinarily assumed in saluting a superior. The first prayer is to the god and goddess of Wind :—

"From a distance I reverently worship with awe before the kamis to whom is consecrated the palace built with stout pillars in Yamato. I say with awe, deign to bless me by correcting the unwitting faults which, seen and heard by you, I have committed, by blowing off and clearing away the calamities which evil gods might inflict; by causing me to live long, like the hard and lasting rock; and by repeating to the gods of heavenly and earthly origin the petitions which I present every day, along with your breath, that they may hear with the sharpearedness of the forth-galloping colt."

The next prayer is to the gods who dwell in the Sun, and merely calls upon them by name. The lower classes seem to believe that the sun is actually a god, and on rising they may be seen turning towards it, placing their hands together and reciting prayers. Then there are prayers to the gods in the Moon, the gods of Ise and certain adjacent subordinate deities, the god of the Unseen, the goddess of long life, the gods who keep off pestilence, the god of wisdom, the goddess of happiness, the gods of harvest, of the gate and front court, of the kitchen fireplace, of the well, of learning—without, of course, forgetting the local deity, the domestic gods, and the spirits of ancestors. Altogether it is a very lengthy piece of devotion.

Mr. Satow's essay is of very great interest. It gives the plain results of the investigations of a really competent scholar into a subject which has hitherto been so obscure as to be chiefly matter for speculation, a subject which yet remains to be studied *au fond*, and one which will no doubt amply repay the comparative mythologist.

BURMAH AND WESTERN CHINA.

Mr. T. T. Cooper writes :—

Will you allow me to answer some observations, involving my name, made by Mr. J. Coryton in his paper on "Trade Routes between Burmah and Western China?" On page 234 of No. 4 of the proceedings of the Royal Geographical Society published April 30th, 1875, Mr. Coryton makes the following statement :—

"While at Ta-tsian-loo Mr. Cooper, writing to the editor of the *North China Daily News*, thus expressed himself as to the project in which Bhamo is considered the natural outlet for trade from the district of the Upper Yang-tse. The present trade, he observes, between Chungching and Yun-nan and Kwei-chew is only temporary, on account of the closure of the Bhamo and Tali route, and as soon as this route is opened so surely will Burmah take to herself the trade of these provinces, and if, as is probable, British merchants establish themselves at Ava, a rivalship for the trade of Sz-chuan between China and Burmah seems almost certain, the result telling probably in favour of the latter, both in exports and imports. Trade by this route has flourished before without European enterprise, and as soon as it is reopened the trade between Hankow and Chung-ching will be lessened one-third."

Now, Sir, when Mr. Coryton read this paper before the Society, he omitted this paragraph, and thus deprived me of the opportunity of replying on that occasion, a proceeding of which I think I have some right to complain, as Mr. Coryton must have been aware that since writing that letter eight years ago I have, from extended travel, and a fuller knowledge of the principles on which the Western China trade exists, entirely changed my views on the subject of Sz-chuan trade. The letter quoted by Mr. Coryton was written wholly from missionary information, which I had not then been enabled to verify by personal observation. Immediately on my return to Shanghai, in 1869, I stated publicly, before a meeting of the North China Branch of the Royal Asiatic Society, "that it was only necessary to open the upper ports of the Yang-tse to destroy the chance of Burmah taking the Sz-chuan trade," and during the last six years I have, before the Royal Geographical Society and various Chambers of Commerce in China and England, maintained that from certain economical causes Sz-chuan produce must always go to the Eastern provinces of China and not to Burmah. I have, also, in the same manner, contended that the want of population in Yunnan must necessarily delay the trade which will hereafter arise between that province and Burmah. Lastly, in the first chapter of my recent work, "The Mishmee Hills," I have combated the idea conveyed in my letter referred to by Mr. Coryton. I have only to add that members of the Chambers of Commerce have noticed the apparent discrepancy between my views expressed to them and those conveyed in the passage referred to, and this alone compels me to seek the publicity of your columns for my reply.

Mr. Coryton writes in reply :—

My paper read before the Geographical Society on the 22nd March was a long one, reviewing no less than thirteen separate outlets of S.W. China trade. I took the routes in order (from W. to E.), described them to the best of my ability, gave the history of their respective explorations, and what opinions on their merits I had been able to gather. Long before I had got through the paper, the chairman, Sir Henry Rawlinson, reminded me that time was running on, and that several speakers were anxious to take part in the discussion. I at once told the meeting what the Chairman had said, expressed my regret at having to pass over much interesting matter I had collected, and told them any such omission on my part would no doubt be made good by the gentlemen they would hear advocating the several routes. I then, resuming my paper, passed over with a few words the remaining details of the expedition on the Mékong, the routes of the Sonkoi and by way of Canton, and in conclusion referred very briefly to the enterprise of Mr. Margary on the Yang-tse and Mr. Cooper's bold attempt eight years ago to reach Burmah by way of the Thibetan mountains—the last of the routes in order. I quoted (or hoped I quoted) Mr. Cooper's opinion, written on the spot, to a China newspaper as to the prospects of that route. The extract (from the *North China Daily News*) I read to the meeting as I thought entire. Mr. Cooper says I did not, and that members of the Chambers of Commerce have noticed the apparent discrepancy between his views expressed to them and those conveyed in the passage referred to, *i.e.*, in his letter to the *North China Daily News*, which they now, I must infer, see for the first time in a print of my paper in the proceedings of the Geographical Society. In the discussion that ensued on my paper, several speakers were heard, and Mr. Cooper at some length. One would have thought that he would have taken that opportunity of

Digitized by Google

stating his opinion or change of opinion, the meeting being held for the very purpose of eliciting opinion. I was by the lateness of the hour, I may remark, precluded from having—what I believe the reader of a paper usually has—the last word. It is fortunate perhaps for me, as matters, have fallen out, that I was. That my paper might contain only what I had actually read, it was returned to me, at my request, before it was printed. I went through it carefully and cut out (or rather, until I saw your issue of Saturday, thought I had cut out) everything except what I actually read. I hope Mr. Cooper will accept my assurance that I was not aware that he had "entirely changed his views on the subject of Sz-chuan trade," and will allow me to hope that if he entirely changes them again it will be for views in favour of the route through British Burmah.

OUR DIFFICULTY WITH BURMAH.

(THE TIMES.)

The progress of the Mission at the head of which is Sir Douglas Forsyth is for the moment stopped, and the Burmese Court must explain the welcome it gave to the Chinese General within whose jurisdiction lay the scene of Mr. Margary's assassination before the British Government will condescend to treat with it as a friendly Power. Even if this initial difficulty be overcome, the intelligence of Sir Douglas Forsyth's reception will be awaited with some anxiety, for the Monarch has a character for reckless and impulsive audacity, and the mob of his capital are turbulent and fanatical in their hatred of Europeans. Possibly it was with a view to the complications which might arise out of these conditions that the British Envoy has been provided with a military escort of eighty well-armed Sepoys. He will also be independent of Burmese hospitality, as he can continue to reside on board the British steamer which conveys him from Rangoon to Mandalay. If the Burmese were endowed with common prudence, there would be no necessity for such precautions; but experience has shown that neither the Government nor the people of Burmah have any adequate perception of proportion in politics. After the wars of 1824 and 1852 they ought to have learned how overwhelming was the strength of the British power in India when once aroused to action; but their language and their acts during the recent negotiations prove them to be as arrogant as though they had never been compelled to surrender Arracan or to submit to the annexation of Pegu. It is possible that the English in British Burmah, both officials and traders, do not look with any reluctance upon the prospect of war, and that, therefore, the reports which we receive of Burmese insolence and menaces and warlike preparations lose nothing in the transmission. It may be well, therefore, while the issue of Sir Douglas Forsyth's negotiations are still uncertain, to receive with some caution the rumours of the Burmese preparations for war. Nevertheless, it would be idle to deny that there are some very serious indications of trouble. Indeed, if a grave difficulty had not arisen, the Viceroy would not have given importance to the negotiations by the scale upon which Sir Douglas Forsyth's mission has been organised, and by the publicity which has been given to the fact that an *ultimatum* is to be presented to the Burmese Monarch.

The precise nature of Sir Douglas Forsyth's instructions was not known when the last mails left India; but it was believed that on the boundary question, at all events, he was to insist upon a decisive and immediate reply to his demands. The Government of India has made up its mind that the only way to put an end to the encroachments of the Burmese in the Karennee territory is to mark out anew the boundary line fixed by Lord Dalhousie's Treaty, and to forbid the Burmese to put forward any claims to the country lying south of that line. This is a very simple issue; and if the King is amenable to the advice of prudent counsellors, he will at once accept Sir Douglas Forsyth's terms. If not, the Envoy was to return from Mandalay immediately, and the British troops would, no doubt, receive instant orders to occupy the disputed territory. If the Karennee question were the only one at present dividing the Indian Government from the Burmese Court, a settlement might have been thought tolerably certain. There may be somewhat more doubt as to the King's submission to the condition imposed, as a preliminary to negotiations, that he must explain the studiously ceremonious reception given at Mandalay to the Chinese General who was in command in Yunnan when Colonel Browne's party was attacked and Mr. Margary murdered. The death of Mr. Margary created a very painful sensation in India, and though the case against the Court of Mandalay rests on nothing stronger than suspicion, so far, at least, as non-official information goes, that suspicion was reasonably deepened by the honours paid to Leeseetahi. The fact that the responsibility primarily rests with the Peking Government for a crime committed on what is claimed as Chinese territory is, indeed, as appears from this morning's letter from our Shanghai correspondent, in no way incompatible with a belief in a guilty collusion on the part of Burmah. But, besides the Manwyne affair, another possible ground for controversy has arisen between the British and the Burmese owing to the protection which Captain Cooke, our political agent at Bhamo, extended to some unfortunate Panthay refugees. The Burmese and Chinese are now on friendly terms—it may be, perhaps, on terms even too friendly—and the Woon of Bhamo, the Burmese Governor of the place, wished to arrest the Panthays, and to hand them over to the Chinese General. Captain Cooke, of course, refused to give up the fugitives, though he disarmed them; but, finding that they were not safe at Bhamo, he brought them down to Rangoon. Upon this the Burmese found a complaint against Captain Cooke, which they may endeavour to set off against Sir Douglas Forsyth's demands. The news of the murder of Colonel Hamilton, Inspector-General of Police in Pegu, by "dacoits," or gang-robbers, of whom our telegram from Rangoon last week spoke as "Burmans"—that is, we suppose, Burmese subjects—may furnish another subject for dispute. It is certain that these lawless banditti find shelter from British justice within the dominions of the Burmese Monarch; but that is what we have to expect wherever our territory is bordered by an uncivilised community. So, too, the disappearance of Mr. Porter, another officer in the Police Service, who had undertaken an exploring journey from Arracan to the Irrawaddy, as yet only excites apprehensions. None of these circumstances, however suspicious, are, in fact, incapable of explanation. It is the accumulation of them, and the manner in which the political atmosphere as soon as one cloud is dissipated generates another, which excites anxiety and alarm.

We have said that the King's disposition towards the English is generally believed to be dangerous to peace, but that the violence of his threats and the significance of his armaments may possibly be exaggerated by rumour. Caprice is the characteristic of Oriental despotism, and it seems impossible to form any accurate estimate of the King's intentions either from his ridiculous displays of military force or, on the other hand, from his smooth language to English officers. Lieutenant Adamson was sent on a few weeks ago to the Burmese capital to announce the approach of Sir Douglas Forsyth's Mission, and was introduced to the King in person by Captain Strover, the British Political Agent. At this interview the King declared himself for a pacific policy in this decided language:—"Strover, I am glad that the Viceroy has decided to send Sir Douglas Forsyth here, as it is well that no differences should exist between two such mighty Powers as the British and Burmese Governments." Unfortunately, the friendship of China sometimes seems to offer more powerful attractions to the capricious Prince, and the danger is that he may think he sees in a Chinese alliance the possibility of retrieving the disasters of 1824 and 1852. Among the Chinese traders who come into contact with our merchants in Burmah there seems to be an impression that the Government of Peking will send an army from Momien in case of war to help the Burmese against the British. This is extremely improbable. Mr. Wade appears from our Shanghai Correspondence of this morning to have been obliged to use threats before he could obtain compliance with his demands for a full and just inquiry on the spot; but he has prevailed, and the investigation is to be made. It is, however, quite consistent with Chinese policy to talk with a double tongue, and while Mr. Wade is receiving an abundance of fair words at Peking the Mandarins who now govern Yunnan may be filling the greedy ears of the Court at Mandalay with illusory promises of assistance. Thus the foolish Burmese may be tempted to their doom; for of the issue of a war, should war be unavoidable, there can be no doubt whatever. Half a European regiment and twice as many Sepoys, Sikh, or Madrassee, would enable Lord Northbrook, if he pleased, to carry out the menace of Lord Dalhouse's proclamation in 1852. Should Sir Douglas Forsyth be met with an unsatisfactory answer, or should he continue his journey to that capital and the Monarch or mob at Mandalay be daring enough to forget the respect which is due to an Ambassador, "the Governor-General in Council," to quote Lord Dalhousie's haughty words, "will again put forth the power he holds, and will visit with full retribution aggressions which, if they be persisted in, must of necessity lead to the total subversion of the Burmese State, and the ruin and exile of the King and his race."

The first step necessary was to institute inquiry on the spot, in order to fix the guilt upon the right shoulders. Passports were, therefore, asked for two foreign officials to proceed to Yunnan, accompanied by a Chinese official, to investigate the affair, and a guarantee from Prince Kung that no one accused of participation in the outrage shall be sentenced until the officers sent have had an opportunity of investigating the evidence. A threat of hauling down the flag induced compliance with this request, and I believe the mission will start about the end of April. It is wished here that Mr. Medhurst may be one of the officers selected. He has an intimate knowledge of the Chinese language and people, and the manner in which he carried out the objects of the Yangchow expedition stamps him as well fitted for the present purpose. Failing him, I suspect that Mr. Mayers, the Chinese Secretary of Legation at Peking, will very probably be the senior of the delegates from hence.

EDUCATION IN CHINA AND JAPAN.

(NEW YORK TIMES.)

For the first time in history public opinion in China is beginning to make itself heard in favour of a Western system of popular education. An influential appeal to the Government at Peking for the introduction of competitive examinations in branches of European knowledge in the case of youths seeking official appointments shows a marked advance in the progress of civilisation in that great Empire. A few steps further will suffice to bring it into closer communion than it has ever been brought before with the outside world. Then the vast natural resources of the country will become developed according to most advanced methods. Stores of historical riches, too, will be opened. And in due time the energies of a dense, active, and intelligent population will be brought into direct competition with that of foreign lands. Japan was once quite as exclusive in regard to foreigners as China has ever been. During the authority of the Taicuns, or, more correctly, the Sho-guns, the absolute exclusion of all foreign influences was an essential part of the public policy; and that authority, which begun in the twelfth century, was maintained, with some occasional changes of degree, down to the year 1868. With its fall a remarkable era of rapid progress began. In 1871 the feudal system was abolished. A Department of Public Education was established, and placed under the control of a native of singular ability and vigour. In 1872, by one of those sudden acts of which only a paternal and more or less despotic government is capable, 53,000 public schools were created throughout the Empire, and in all of these the same branches of knowledge as those which are being cultivated in the schools here and in England are now being studied with the most exemplary assiduity. It must be remarked that under the old system, the Japanese were never an uneducated people. Mr. W. E. Griffis, who was formerly connected with the Imperial Japanese College at Tokio, says that schools and colleges, literature and learning, flourished exceedingly under the Sho-gun regime. Nine-tenths of the people could read and write, books were cheap, and circulating libraries were to be found in every town. The soil, therefore, was well prepared for the introduction of a more complete system of education. But in China the same conditions exist, and as soon as Western ideas are once adopted, progress there will be hardly less rapid.

LONDON: MONDAY, JUNE 14, 1875.

THE NEW REGIME IN THE MALAY PENINSULA.

WE rejoice to see that the policy inaugurated by Sir ANDREW CLARKE in dealing with the petty States in the Malay Peninsula is on the whole working well; quiet has been restored to the various troubled districts, and the British agents appointed to assist each local chieftain in the business of orderly government, if open to criticism in some of their proceedings, cannot, at any rate, be charged with inactivity. Of course we have, for the present at least, to depend for information on the reports which these officials themselves supply to the Singapore Government; accounts which must of necessity be one-sided; but after all it is a great gain to get these long announcements—for long they are—direct from head-quarters; there is no obligation on the authorities to make them known, and much credit therefore is due to those who saw that our new and delicate relations with the Malay Princes will be grounded on the firmest basis, if public opinion be allowed its influence from the first, and the general approval of the mercantile community brought over to the side of those who have really a very complicated and difficult system to carry out.

Mr. SKINNER, who has recently made an official tour of inspection among those Malay States and river settlements over which our new treaty relations extend, comments on the altered bearing of both the rajahs and the ryots towards Europeans. "There was," he tells us, "no more of the "running away and hiding, or the anxious faces and ner- "vous manners I have always been accustomed to in out-of- "the-way places. None of the chiefs assumed what was for- "merly their usual tone, a sort of arrogant and sulky de- "meanour. . . . . I found much less difficulty in getting "information . . . . their habits of secrecy seem to be "giving way, and a new life and interest are plainly ap- "parent all along the coast." This is all very well; matters are improving—there was, indeed, much room for improvement—but while it would ill become us to be too sanguine, to place undue reliance on a hastily-prepared rose-coloured report, those who are actually charged with the work of developing each locality would do well to use circumspection. Extravagant expenditure, and a feverish eagerness to put everything straight all at once are alike to be avoided. Reforms and innovations if thrust down the throats of a timid ignorant people, who see no good in the changes, are apt in the end to create disorder and obstruct real progress. Difficult and complicated are the epithets we have applied to the new regime, and, indeed, it is obvious that the number and divided interests of the puny chieftains and little territorial dominions with which we have to deal render the case very different than it would be if the whole country had hitherto been under the government or mis-government of a single prince. We do not take absolute possession of the districts, and there are very good reasons why we have not adopted this course; but with a control necessarily incomplete, with many diverse races and creeds, European, Chinese, and Malay to deal with; with frontier lines intermixed; with treaties rarely identical; and with an altered set of circumstances applicable to each separate spot; with so many little shoals all round us and rocks ahead, careful steering and good pilotage will be required. Commerce, for example, cries out loudly for an energetic development of the tin mines; and beyond a doubt it is on account of its TIN that the Malay Peninsula possesses any special importance; but even in this matter caution must be used, progress must be deliberate, for the miners are Chinese, and though the Chinese clans keep the peace amongst themselves, there is always the risk of an outbreak between newly-arrived Celestials and the suspicious Malay. An influx of Chinamen into a district lately restored to order, where the native peasantry have only just begun to pick up confidence, and are returning, a family at a time, to their deserted plantations, might give much trouble to the local Malay chief and to the Assistant Resident—all inexperienced in his new functions—just at the time when harmony needs to be undisturbed that the wheels of State may run firmly and smoothly in their original ruts. Mining populations even in a strongly-governed country are always somewhat turbulently disposed. Chinese rulers know this well enough; that we believe to be the reason why they have hitherto been so jealously careful to restrict the working of iron and coal even by their own people in China. Agriculture should be encouraged simultaneously with mining enterprise, for agriculture pre-eminently increases population, and as population increases the general revenues enlarge themselves too. Mr. SKINNER describes his visit to the police-court in Larut, where he found the proceedings being conducted as in British settlements; "charges" (under the Indian Penal Code) being duly entered and disposed of daily by Mr. MARPLES, the magistrates. "The warrants run in the name of H.H. the "Sultan. There is a European officer of police in attend- "ance." Now this is just the sort of thing to be condemned. What kind of judicial training Mr. MARPLES has gone through, or by what means he got appointed to his present post, we are at a loss to discover; all we know of him is that he was formerly a bookkeeper to Messrs. ALMEIDA and SONS, and afterwards to the Tanjong Pagar Dock Company; but even if he were the most competent magistrate that ever sentenced a prisoner, we still regret to see justice administered British-fashion according to the penal code of Bengal, in an autonomous native State. How can the Malays learn their duties, and yield a willing obedience, when they find their own laws ignored, and a code in an unknown tongue with strange forms of procedure forced upon them by a foreigner unacquainted with their own wants and ways? We do not need to drag in a Statute-Book from India to enable us to keep things quiet in Larut, or maintain peace inside the borders of Perak. Moreover, besides the discontent which the importation of new-fangled laws and clumsy administrators is likely to create such a course is of all policies the most unsound. The petty chiefs and princelings if left totally unoccupied, if even the criminal jurisdiction over their own subjects be taken from them, if in fact they have no duties whatever to perform, will, assuredly, out of sheer idleness, take to plotting mischief; and when their revenues have accumulated under our careful supervision, they will grow weary of their merely sinecure offices, and seek by re-awakening disturbance to bring back those glorious times when squeezing, rapine, and pillage were their dear privileges and pastime.

The fact is, that, with the exception of Mr. DAVIDSON at Klang, the Residents seem hitherto to have totally misconceived the duties and functions imposed upon them; they are trying to govern, which is not wanted, and is sure to end in harm. Their proper business is to advise, instruct, suggest, assist, but not to take all the work on to their own shoulders. If they persist in their present course clouds of discontent will gradually gather together, and a little tropical tempest burst on them by-and-bye. The whole system established by Sir ANDREW CLARKE needs most careful pioneering, for it is open in principle to this objection, that the officers on whose moral influence the good government of each country virtually depends are not directly responsible should affairs go wrong. While fine weather prevails and every undertaking prospers, then the public cry out in praise of the system; but if by chance disturbances should arise, perhaps owing to the Residents' mismanagement, bad advice, or precipitate reforming zeal, then of course the blame is easily shifted upon "that wicked Rajah" and his unprincipled Minister, or to the Chinese head-men, or to any body, in fact, who has got a pair of shoulders to bear it. While, as for the British community,

they will immediately lay their finger on the weak spot in the system, pronounce the thing a failure, and declare that it must be given up.

THE P. AND O. COMPANY.

THE P. and O. Company's meeting, which took place on the 8th inst., did not pass off without some complaints from the shareholders, who had been disappointed in not receiving an interim dividend. The absence of dividend is generally, and not unnaturally, a cause of complaint, and when this occurs in a company which has been looked upon as a certainty the disappointment is sure to find distinct utterance. But, as the Chairman very forcibly put it, there is really no great cause for complaint if a company which from its commencement to the present time has paid a dividend averaging 8½ per cent. per annum does not declare an *interim* dividend for one half year. It is not as though affairs were going on in all the old fashioned easy way, when the P. and O. Company had it all their own way. They have for years past had to take steps to face opposition and competition of no ordinary character; and it is evident from the details of the report and the explanations made at the meeting that they have been doing their best to meet the difficulties which have arisen upon the opening of the Suez Canal. A policy of retrenchment and economy is always a difficult one, and generally a very unpopular one; and it has also the special disadvantage, which unfortunately has become only too apparent in connection with the P. and O. Company, of raising up enemies among those who are no longer the recipients of the same favours as in former days. The P. and O. Company has been favoured by the energetic circulation of a variety of reports against its management—but these were disposed of successfully by Mr. SUTHERLAND at the meeting. It was shown to the satisfaction of the shareholders present that the efforts of the directors to meet the altered circumstances that have arisen have been unceasing, and that the affairs of the Company have been conducted upon a thoroughly sound basis. The enormous reduction which has taken place in freights and passage-money *viâ* the Suez Canal are too well known to need to be dilated upon; and the immense competition which the Company have had to face requires them to reorganise the whole system of working the service. Another cause which has militated against them was noticed at the meeting, and that is, that at the very time when this competition has had to be faced they have been compelled to expend large sums in increasing their fleet and making vessels suitable to the new conditions that have to be met, and similarly changes have had to be made in the repairing and other establishments in consequence of the opening of the Canal.

In point of fact the P. and O. Company have still to meet what is always most trying, that is a period of transition; as, although the changes resulting from the opening of the Canal were accomplished facts years ago, the alterations as to management, as to the nature and size of the vessels and numberless other details that have to be made by a large company must be a work of time, and can only be properly effected carefully and gradually. This is the policy which the directors have been steadily carrying out, and it is satisfactory that the shareholders have shown themselves confident in the management of their directors and have refused by a decided vote to entertain the idea of appointing a committee of investigation, or in any other way committing what could not fail to be the most serious blunder they could commit, that of showing any signs of want of confidence in the management at a critical time. Nothing could tend more directly to render the efforts which have been made abortive. It would deprive the directory of the energy necessary to carry out the policy they have inaugurated; as if the shareholders showed that they had in any way lost confidence in the directors, the directors would soon lose confidence in themselves. As matters are at present progressing, there is every reason to hope that the company will ere long be thoroughly organised, so as to meet the existing condition of the traffic, and will succeed if not actually as, at least proportionately as well under the new *regime* as it has done under the old and much easier state of things when the P. and O. Company had the whole of the overland traffic in their own hands.

OUR POSITION IN BURMAH.

VERY scant information has as yet reached the English public as to the misunderstandings which have sprung up between the King of BURMAH and ourselves, and which Sir DOUGLAS FORSYTH has been despatched on a mission of more than ordinary parade and ceremonial to adjust, if he can. According to the latest telegrams to hand (which we publish in another column), the King of BURMAH turns out to be much more obstructive than was at first supposed. He is, so rumour runs, backed up by the Chinese agents, who promise him the aid of the unwieldy Celestial Empire in the event of an actual rupture, and it is acknowledged that LEE SIE has reached Ava, the bearer of despatches from China. Things certainly look very ugly; and we can well imagine that the activity of trade must be declining, and that Europeans as well as natives must be getting rather uneasy. One leading London newspaper has already published letters from correspondents who fear a new territorial aggression, and urge the old argument against annexing a country in defiance of the wishes of its inhabitants; it is, therefore, only just to point out that the position of England towards independent Burmah stands on a very peculiar footing. We took part of the country, and left the rest; this conduct unsettled independent Burmah, and her people have dwelt in misery ever since. As a matter of abstract justice it is a question whether we ought not to consider the general happiness of the community, rather than the hereditary claims of a few great feudal chiefs to misgovern their people; but however opinions may differ on this point, what we wish here to dwell on is the evident likelihood of our hearing, some three months hence, that British troops have had to march up to the Burmese capital. It is, of course, almost incredible folly in the King of BURMAH to be so doggedly unyielding about a few miles of territory and a few savage Karen tribes—if these be really the subjects in dispute; but, after all, our experiences in Abyssynia, Ashantee, and elsewhere, may serve to show us how obstinately a pusillanimous, half-instructed despot will sometimes hold out, and it really looks as if, either from obstinacy such as this, or else at the instigation of bad advisers, the King of BURMAH were doing all he can to force us into an extension of our dominions. In the interests of all concerned, we say, the sooner the better.

IT has been rumoured that the postponement in the departure of Sir BROOKE ROBERTSON from Canton was owing to an intimation from the Foreign-office that he would be required to relieve Mr. WADE at Peking. We are in a position to state that Mr. FRASER, the Secretary of Legation, will take charge when Mr. WADE leaves, but that event is now quite uncertain, owing to the Western China and Burmah difficulty.

THE rumour that Sir HENRY BULWER, Governor of Labuan, now on leave, will be appointed Governor of Natal, has been revived, but no successor to Labuan has been named. The temporary appointments made by Sir ANDREW CLARKE at Singapore have not yet been confirmed by the Secretary of State for the Colonies.

THE latest telegrams from China do not report the departure of the members of the mission appointed to proceed to Talifoo to inquire into the authors of the murder of Mr. MARGARY. Colonel BROWNE was expected at Shanghai about the middle of June. Mr. ALLEN and Mr. NEY ELIAS are believed to be still in Burmah.

WE understand that the Rev. R. S. COPLESTON has been appointed Bishop of Colombo in succession to Dr. JERMYN. Mr. COPLESTON obtained a first class at Oxford in Classical Moderations in 1866, and a second class in the Classical Final School in 1868. He is now a Fellow and Tutor of St. John's College, Oxford.

WE are informed that the Admiralty have declined to produce copies of the report made by Captain BUCKLE on the Sooloo Archipelago. We understand that it contains full details of the arbitrary conduct of the Spanish Government.

DR. S. WELLS WILLIAMS.

By the departure of Dr. S. Wells Williams, LL.D., for Europe and Ameria, the small foreign world of China loses, perhaps for ever, one of its greatest ornaments, and certainly one of its most learned members, if not its ripest scholar. His career in China during the past thirty-five years has been of a somewhat varied nature, but we cannot call to mind the name of any foreigner, be his nationality what it may, who has done more loyal service not only to his co-nationals, but to the interests of the foreign community at large, and we are sure that his loss will be sorely felt by all classes alike. If our memory serves us, Dr. (then Mr.) Wells Williams arrived in China as a missionary about the year 1840, at a period when the position and *status* of foreigners was, we need hardly observe, far different from what it is at the present time; then their operations, whether mercantile, missionary, or political, were confined to Canton and Macao, and migration to Peking and the far north seemed an impossible dream of the future. At the outset of his career Dr. Williams undertook the superintendence of the Mission Press first at Macao, and afterwards at Canton, and one of the earliest works which bore his imprint (Macao, 1841), and which he carried through the press in a most able manner, was Dr. E. C. Bridgman's "Chinese Chrestomathy in the Canton Dialect,"—a most valuable work, but one which has unfortunately long been out of print, and is now rarely to be met with. Indeed, he was not only the printer of the work in question, but aided very materially in drawing up the chapters on natural history, as well as some other minor portions, not to speak of the preparation of the whole of the elaborate index, which occupies some fifty quarto pages of small print. We mention this circumstance, which is probably known to very few of the present generation of residents in China, in order to show that the veteran scholar of whom we speak must have acquired a considerable proficiency in the Chinese language at a very early period of his career. Dr. Williams steadily pursued his vocation in the South of China, earning golden opinions on all sides for his industry, ability, and high literary attainments, and at the same time accumulating vast stores of learning for future use, in reference to the language and history, geography and government, manners and customs of the Chinese Empire, subjects which at that period were comparatively untouched by foreigners, and upon which he has at various times thrown so much light. As is well-known, Dr. Williams's career has been for many years, at any rate, partially diverted from the course which it is natural to suppose that he had in contemplation when he first set foot in China, but upon this matter it is not within our province to express any opinion. For some twenty-five years he has been more or less intimately connected with the United States Legation in China, and on nine different occasions he has acted as *Chargé d'Affaires*. In 1862 he went to Peking, to prepare the way for the late Mr. Burlingame's arrival, and personally superintended the conversion of a small *joss*, close to Dr. Lockhart's missionary hospital, into an official residence for the Minister of the United States at the Court of Peking. Since that time his services have been entirely at the disposal of his nation, and their great value has, we doubt not, been fully appreciated by his Government.

Apart from his labours as a missionary and a diplomatist, Dr. S. Wells Williams is best known to the outer world by his literary works, by which he will be long and gratefully remembered by many generations of students. His principal works are four in number, which may be placed in two classes of essentially different natures, the one more particularly valuable to the student of the Chinese language, and the other to the general reader. In the latter category are his "Middle Kingdom; a Survey of the Geography, Government, &c., of the Chinese Empire" (published at New York in 1848), and his "Commercial Guide to China and Japan" (a third edition of which was issued at Hong Kong in 1863), both works showing great research and much patient labour. Valuable, however, as these two books, especially the "Middle Kingdom," undoubtedly are, they are surpassed in value and importance by his two Chinese Dictionaries. Dr. Williams arrived in China at a time when a knowledge of the language was acquired under great difficulties, owing to the want of the assistance which students naturally feel the need of in attacking an unknown tongue, and people were beginning to recognise the defects and shortcomings of Dr. Morrison's great pioneer dictionary. Dr. Williams, no doubt, kept this pressing want steadily before him, and when, in 1856, he published his "Tonic Dictionary of the Chinese Language, in the Canton Dialect," he admittedly gave lexicography a new start in China. This work, though comparatively small in bulk, deals with very nearly eight thousand characters, and it has been found so exceedingly useful to the student of the prevailing dialect of Southern China, that Dr. Eitel, aided by a subvention from the Colonial Government of Hong Kong, is about to bring out a new and revised edition of it. Dr. Williams's residence at Peking soon convinced him of the great necessity for the publication of a more comprehensive and more generally available dictionary, which should not deal with a local dialect only, and at length in 1874 he published from the American Presbyterian Mission Press at Shanghai his great lexicographical achievement, "A Syllabic Dictionary of the Chinese Language, arranged according to the Wu-fang Yuen Yin, with the pronunciation of the characters as heard at Peking, Canton, Amoy, and Shanghai." This very important work is comprised in about 1,200 pages, and deals with upwards of 12,500 characters, classified under 522 syllables. It is, of course, to some extent based on the smaller dictionary before alluded to, but the materials contained therein have been greatly amplified and added to, and the labour expended on it will be better appreciated when we mention that for eleven years its author devoted to it the principal part of the leisure time left him by his official duties at Peking. This dictionary, though some of the critics in China have endeavoured to pick holes in it, and though it may possibly be susceptible of some improvements in a second edition, is universally acknowledged to be the best extant, and in it Dr. S. Wells Williams has most assuredly built up for himself what Horace calls "monumentum ære perennius." If it be only for the sake of the advancement of our knowledge of the Chinese language, it is to be hoped that the veteran and learned lexicographer may be induced to return to China at some future time; but should he decide otherwise, we heartily wish him all enjoyment of his well-earned repose in his own native land, after an honourable and eminently useful career in China, which has extended over no less than thirty-five years.

Correspondence.

THE MURDER OF MR. MARGARY.

(To the Editor of the *London and China Telegraph*.)

SIR,—The cruel murder of Mr. Margary (a British officer carrying an Imperial passport) continues to excite the horror and indignation of every Englishman, and I may say every foreigner resident in China. There is little doubt that this murder is attributable to orders from Peking to oppose the entry of the party into China. It is of a piece with the settled policy of the Chinese Government, which has ever been to prevent the entry of foreigners into the country. We all anxiously wait to see what action the English Government will take in the matter. British subjects in China have no confidence in Mr. Wade. This outrage on Margary may be looked upon as a just retribution on the English for their *disgraceful inaction* at the time of the Tientsin massacre. I, individually, always felt that that massacre if unavenged would lead to others. It would have done so at the time, but that foreigners at other places were on their guard and prepared to defend themselves. In Margary's case, he being unarmed, or defenceless, was killed, but the party following him were able to defend themselves, and so escaped the indiscriminate massacre intended. How long are we to endure this state of things? Dealing with a treacherous and semi-barbarous nation as if they were on a par with European nations, when even to their own countrymen they are a scourge and an abomination. This occasion, if made a proper use of by our Government, might lead to the real opening of China, and confer untold blessings on the down-trodden people. They would hail us as deliverers from a worse than Egyptian bondage. This is a country teeming with the products of the soil and man's labour, but the people meet at every point with such heavy exactions (squeezes) that they cannot carry their goods to market.

The idea seemingly entertained by our authorities, that the Chinese Government will punish the murderers of Margary, if they prove to be officials, is a most dangerous and fatal error. There is no instance on record where the Chinese have punished an official for any murder or outrage upon foreigners. In some instances they have under threats executed a few coolies or peasants, who in all probability had nothing to do with the matter. In the two most flagrant instances, viz., the murder of our officers and soldiers under a flag of truce near Peking, by Chinese authorities, and the Tientsin massacre committed within two hundred yards of the Yamen, no one was punished in either case. In the suppression of the mutiny in India the officers and men there did not consult the mawkish sentimentality of people at home, but read the mutineers such a lesson that they have not since forgotten. We want another Havelock here to avenge this cold-blooded murder. H.M. corvette *Modeste* is under sail for Hankow, and as the Admiral has come up here at the special request of Mr. Wade, it is rumoured that she is to go on to Ichang, which is too far from Yunan, where Margary was murdered, to be of much avail.

If the Chinese authorities who committed the murder are to be punished, we must punish them, as the Chinese will never do so; therefore the sooner we do so the better, unless we are prepared to eat dirt. We all here think that Disraeli will uphold the honour of his country, which is at stake. In this instance anything effectual must be done from the Burmese side, as we are too far to reach the culprits.—I am, Sir, your obedient servant,

Shanghai, April 24, 1875. SHANGHAI.

THE HONG KONG AND SHANGHAI BANK.

(To the Editor of the *London and China Telegraph.*)

SIR,—Your article of 27th Feb. on the Hong Kong and Shanghai Bank has, in my opinion, touched the right nail on the head. A Bank losing money can be understood; every Bank loses money sometimes: but a Bank continuing to lose money in large sums persistently for years demands and requires explanation. I think I can throw some light on the matter. When the *real* state of the Bank was first disclosed last year, all the English Directors resigned, fearful of incurring any further responsibility. The Sugar Company was a speculation of Kressor's, handed over to the Bank when it was found not to pay. Then there was the Pier and Godown Company, which the public did not want; and when the P. and O. or other steam company offered $90,000 for the concern, the Directors foolishly refused a good offer, and the P. and O. have since built a wharf of their own. The next cause of heavy losses to the Bank is the Managers opening credits for irresponsible people. This Bank has the largest local business, and with proper Directors and prudent Managers ought to do a good and remunerative business; but the system of loans without security is rapidly bringing the Bank to grief.

Quem Deus vult perdere priùs dementat.

The only plan, in my opinion, to restore the Bank to its former position, is to get rid of the present Directors and Managers, as they have shown their utter incompetence to manage the affairs of the Bank successfully. A catalogue of disasters is their legacy to the unfortunate shareholders who have placed their capital in the hands of such unworthy Managers. The shareholders can do nothing until next annual meeting, when they will have the power of excluding those Directors who have betrayed the trust reposed in them; but at the half-yearly meetings they surely can refuse to pass the accounts if not more satisfactory than those lately presented. The present Board of Directors has not a single Englishman upon it, certainly a suspicious circumstance for an English colony.—I am, Sir, your obedient servant,

A SHAREHOLDER.

Shanghai, April 20, 1875.

THE P. AND O. COMPANY'S MEETING.

The half-yearly meeting of the P. and O. Company was held at their office, Leadenhall-street, on the 8th inst.; P. D. HADOW, Esq., in the chair. The notice convening the meeting having been read, the CHAIRMAN suggested that the report (which we gave at length in our last issue) should be taken as read, and referring to its contents said it was not so satisfactory as their reports had generally been. An interim dividend was usual at that time of year, but it was not in his power to offer one on the present occasion. They might wish to hear the reasons he had to give to give in respect of not proposing any dividend. The operations of the company during the past half-year were less favourable than they had been for many years. After deducting from revenue the current expenditure, and making the usual reserves for depreciation and insurance, there remained a profit on the working account, but not enough to justify the directors in recommending the payment of an interim dividend. The causes that led to this diminished profit were, first, the reductions in the mail subsidies, which he had explained on a former occasion. The Australian subsidy was £40,000 per annum less than formerly, and the Imperial subsidy was £20,000 per annum less, besides being now subject to deductions for heavy penalties for delay arising from bad weather and other causes over which the company had no control, making £60,000 a year less. The result was a diminution under the head of "Subsidy" for the half-year ending the 31st of March last of £22,000 as compared with the corresponding period last year. There was a most serious falling off in the receipts for passengers and in the East Indian and China trades. The bulk of the Bombay trade, taking the outward as well as the homeward business, was compressed into the period from October to April, and during the other five months, from May to September, the shipments were limited.

Freights had been 20s. per ton less than at the corresponding period last year. Steamers had been leaving Liverpool for Bombay at 15s. and even 12s. per ton, and from these low receipts the Suez Canal dues and other charges had to be deducted. The freights which the Company had received, it was true, were not so low; but it was not surprising that under the circumstances they had not been able to make a profit such as would permit of their paying an *interim* dividend for the past half year. It would, no doubt, be a matter of disappointment to the proprietors that they would receive no dividend, and he, as a large shareholder himself, fully sympathised with them. In an enterprise of this kind people must take their shares subject to the vicissitudes of trade, and could not expect seven or eight per cent. for the year as a matter of course, otherwise there would be no one who would invest in the funds. He would, however, point out that the proprietors of the P. and O. had had a dividend of 8½ per cent. for the time of its existence; and there was nothing at present which could be fairly charged against the care and foresight of the management. They had, in fact, taken every possible means to meet the present altered state of affairs.

The shareholders would see from the report that under the head of "Home and Foreign Establishments" they had reduced expenses at Southampton by £12,000 a year. He mentioned the case of Mr. Lamb, who was not only the practical engineering superintendent at Southampton, but had a general charge for more than thirty years of that department of the company. The directors had granted him a retiring allowance of £500 a year, being at the rate of half the salary which he had received for many years. They promoted the second superintendent, to whom they paid £700 a year, to the office held by Mr. Lamb without increasing his salary. He would not trouble them with any further observations beyond assuring them that the directors where not unmindful of their interests, and that the desire to meet the changed circumstances was shared by all in the employ; those who had been asked to submit to some diminution in their salaries having accepted the necessity, in the spirit that became faithful servants. He was sure this spirit would be also followed by the proprietors at large, and would conclude by moving the adoption of the report.

Mr. GIBBINS, a shareholder, seconded the resolution for the adoption of the report. He had every confidence that the energy of the directors would enable them to meet every difficulty, and bring the affairs of the company before long into as prosperous a position as they were for many years past.

Mr. DAVIS said he considered that the report was very unsatisfactory. No doubt the subsidy was £450,000, and it was now reduced to £430,000, but they had £90,000 from the Australian colony for the mail service, and he thought with a subsidy of something like 19 per cent. on the company's capital they ought to be able to declare a dividend. He was prepared to prove that the saving at Southampton was no saving at all; they had to pay higher wages to the workmen and salaries to the officials in London.

Captain BAIN proposed the appointment of a committee of investigation to examine the accounts, and to report the result to a future meeting. He contended that the dividends since 1873 were paid principally out of capital.

Mr. JONES thought that the directors ought to institute law proceedings against Captain Bain for his allegations against the directors. If they had followed his advice they would have had a very inferior fleet at the present time. There had been a great change in the events of the world since the commencement of the company. He thought they should reduce their rates for freight as much as possible; they would have to pay 10s. per ton to go through the Suez Canal, and they might come down to something like 25s. per ton for freight from London to Bombay. Instead of paying other ships to carry coals for them to the East they should convey coals in their own ships, and thus get rid of so much competition to the company's ships on their homeward voyages.

Mr. T. SUTHERLAND, one of the managing directors, stated that one of their clerks in the office who had conducted himself very strangely for some time, and had in consequence had his services dispensed with, had written a pamphlet just before the meeting and circulated it among the shareholders. It was to the effect that in the course of two years about £100,000 was taken out of capital for revenue purposes. One item was for coal. He alleged that the price should be charged at 45s. instead of at 40s. per ton; the average cost of the coal in the Company's stores was about 37s., and the Company had charged for the service a little more; they had between 300 and 400 cargoes of coal in the year. They calculated the price of the other stores in a similar manner, according to the average price, so that in practice the prices were to a great extent equalised. The clerk contended that the price ought to be 45s. for coals instead of 40s.; the difference, he alleged, was taken out of capital, which was simply a mistake, they would show the accounts of the Company to any shareholder, and he could judge for himself. He then, at considerable length, stated the mistakes that Captain Bain had made in his statements and pamphlets as to the position of the Company. The balance at the credit of coals and stores account was £100,000. The great increase that had been made in the tonnage of the fleet for freight, from 25,900 tons in 1867 to 71,700 tons in 1874, and for which the directors only called for £800,000 capital from the shareholders, while £2,000,000 were expended on the fleet. The assertion that £30,000 was taken out of capital in 1872, £782,000 in 1873, and £94,000 in 1874, for revenue purposes, had no foundation whatever. He replied also to other observations.

Captain ENGLEDUE, Mr. HURST, Dr. MARRIELUZ, Mr. BADDERLEY, and others, having addressed the meeting, principally in defence of the policy of the board,

Sir T. DAKIN deprecated the appointment of any committee, and contended that the charges made against the board were brought in a most irregular and suspicious manner, instead of being made openly and in a manner which would fairly open a discussion of them. He knew the evil of committees of inquiry, and thought they might wait till the end of the year, when the whole of the company's accounts would be presented to them and every explanation given.

Mr. BUTLER-JOHNSTONE, M.P., deprecated in strong terms the course taken by Captain Bain and Mr. Miller, whom he likened to "those foolish, misguided, and unreasonable people who still believed in the Claimant." He would not sit on the direction of any company where such charges were brought by a shareholder unless he were allowed to bring an action against the authors of those charges, and he hoped that the chairman and directors of the Peninsular and Oriental would prosecute the discharged servants of the company who—with perhaps the very best intentions—had done so much injury to the general interests of the concern.

The CHAIRMAN, after replying to the questions which had been put by the shareholders, put the amendment, when there were only three hands held up for it, and the report of the directors was adopted by a very large majority. The motion suggested by Sir T. Dakin was adopted unanimously. The Chairman said the directors would work out the year as well as they could, and be prepared to give the shareholders as large a dividend as prudence would permit. The meeting then separated.

CONSTITUTIONAL CHANGES IN JAPAN.

(THE TIMES CORRESPONDENT.)

YOKOHAMA, APRIL 30.

A great deal of speculation has been afloat for some time regarding a meeting, held at Osaka six weeks back, of several of the present and of he ex-members of the Council of State. It was well known that a strong desire existed among certain members of the Cabinet to procure the recall to office of two at least of the members who had resigned their portfolios while the discussions were pending which ultimately led to the Formosa Expedition. The meeting at Osaka had this for its chief object, and on the return of the Ministers who attended it, it was announced that Kido and Itagaki had been prevailed on to rejoin their former colleagues. Both had been opposed to the steps which led to the quarrel with China. Both were strong and trusted men; and it was hoped that not only would the equilibrium in the Cabinet be restored, but that certain measures would be passed calculated to enlarge the basis on which the Government of the country reposed. Itagaki was known to be in favour of some such measure, for the principal cause of his resignation was a proposal to assemble all the Provincial Governors—men elected and paid by the State—and to constitute of them a House of Assembly, as a response to the demands of the people for representative institutions, or something equivalent to them. It is said, and I think with reason, that Itagaki has of late somewhat modified the views he held in regard to a really popular form of government; and, if so, it is well, for the Japanese are in no sense fit for what we understand by the expression popular institutions. But, like all the reformers here, he is partly affected by the undoubted pressure caused by the expansion of the national mind, and is partly desirous of conforming as far as may be practicable, to those forms of government under which the civilisation of the Western nations has been developed. There is just at present a tendency to imagine that a modification of the old form of government will produce that spirit which in Europe was the cause, not the result, of such modification, and hence we see the native newspapers teeming with articles the refrain of which is that "a House of Commons is an excellent thing." Be the views of the lesser or leading men, however, what they may, a proclamation from the Mikado to the nation was issued on the 14th inst., which runs as follows:—

"On ascending the Imperial Throne we assembled the nobles and high officials of our realm, and took oath before the gods to maintain the five principles, to govern in harmony with public opinion, and to protect the rights of our people.

"Assisted by the sacred memory of the glorious line of our holy ancestors and by the union of our subjects, we have attained a slight measure of peace and tranquillity.

"So short a time, however, has elapsed since the late Restoration, that many essential reforms still remain to be effected in the administration of the affairs of the Empire.

"It is our desire not to restrict ourselves to the maintenance of the five principles which we swore to preserve, but to go still further and enlarge the circle of domestic reforms.

"With this view we now establish the *Gentro-in* to enact laws for the Empire, and the *Dai-shin-in* to consolidate the judicial authority of the Courts. By also assembling representatives from the various provinces of the Empire, the public mind will best be known and the public interest best consulted, and in this manner the wisest system of administration will be determined.

"We hope by these means to secure the happiness of our subjects and our own. And while they must necessarily abandon many of their former customs, yet must they not, on the other hand, yield too impulsively to a rash desire for reform.

"We desire to make you acquainted with our wishes, and to obtain your hearty co-operation in giving effect to them."

At the foot of this proclamation was a notification from the Prime Minister to the effect that the Sa-in and Ya-in were abolished, and the two Chambers named in the proclamation were founded. The Sa-in and Ya-in were special departments of the Government, the functions of which have never been thoroughly understood by foreigners. But, speaking generally, all new suggestions touching the advancement or the welfare of the Government were submitted to them, and pronounced upon before being sent on to the Council of State, or rejected at once without further reference. Their working was very mysterious, and, on the whole, unsatisfactory, and their abolition after a comparatively short existence proves them to have been unsuited to the exigencies they were instituted to meet.

The new institutions are explained by intelligent Japanese officials as constituting an approach to constitutional government, the nearest equivalent for which in their language is "the founding of laws." The *Gen-ro-in* will consist of a body of men of mature age and official experience, including some who may be remarkable outside the official circle for general acquirements and political knowledge. These will constitute a deliberative Assembly, and discuss matters affecting the welfare of the State, sending their resolutions up to the Council of State, whence, if approved, they will be sent down to the *Dai-shin-in*, to be by them thrown into the forms of law. This is the best explanation at present obtainable of the new institutions though I give it under the fullest reserve, and may have to modify it after further investigation. As the members of both the Chambers—and it is important not to allow the idea of representative institutions to cling to our use of these words in this case—are elected by the Government, it is difficult to see with what propriety the expression "constitutional form of government" is used by Japanese in explaining the new creations. But I am still inclined to believe that they are something more than mere forms, though your readers must be careful not to infer the establishment in Japan of anything answering to representative institutions. I should deem it necessary to offer an apology for so meagre and unsatisfactory an explanation of what will probably prove an important and organic change in the form of government of this country, but I am confident hait, at this moment, there is not a foreigner in Japan who could extla n them satisfactorily. The lapse of another fortnight may enable pme to pronounce more definitely on this subject.

THE MARRIAGE OF A CHINAMAN.—CAUTION TO LADIES.

The following report of a case tried in Paris is a fresh instance of the danger and unsuitableness of marriages betwen Europeans ladies and Chinese, which we have pointed out on several occasions. We trust this will act as a forcible caution to young ladies of European birth and education. Chinese and other Orientals are totally unsuited, from their habits and education, to become husbands, and in their cases such matches turn out disastrously:—

Tin-Tun-Ling, a Chinaman, was tried at the Assizes on a charge of marrying Caroline Liegeois, described as an English governess, while the wife he had left behind at Macao was still alive. Born in 1831, and baptised as a Christian in 1849, the accused was married at Macao, a native Christian priest performing or witnessing the ceremony, no register, however, being at that time kept. Another native priest became godfather to three of the four children of this marriage. In 1861 he accepted an engagement as secretary and interpreter to a M. Callery, of Paris, at f.150 a month, but on his arrival found he had to wash up dishes and black boots. On the death of his master, in 1862, he was ignorant of French and without resources, but a friend of Theophile Gauthier, happening to meet him, took him to dinner to his house, and Gauthier gave him a home to teach his daughters Chinese. In 1870 he was appointed assistant to M. D. Hervey St. Denis, Professor of Chinese at the College de France, but his hasty temper led him to tell his superior in the middle of a lecture that he knew nothing of the language, whereupon he was dismissed. During the siege he frequented the ramparts, creating amusement by his fund of drollery. For the first three months of his stay in Paris he sent money to his wife, but all communication between them then ceased. In 1872 Mdlle. Liegeois, according to the prisoner's version, became so enamoured of him that he could not resist her solicitations. A civi marriage was accordingly arranged. The French law, by the attestations and consents it requires, interposes so many obstacles to wedlock, that numbers of people in humble life cohabit without attempting to satisfy its exigencies; but the prisoner had a friend named Comte, who was rebuked by the presiding judge for the excessive complaisance which led him to swear to allegations respecting Tin's parentage and antecedents. He even styled him a Baron, which he could have had no means of proving. The marriage ceremony was peformed on the 6th February, 1872, but the bride left her husband the same night. They never cohabited, but she paid him several visits, the issue being that she preferred a charge of bigamy against him at the French Foreign-office. While the accusation was being investigated, however, she sailed for New York, and has not since been heard of. No question was raised as to the fact of the second marriage, and there was strong circumstantial evidence in proof of the first, for the two Chinese priests before mentioned had made depositions. The first wife's brother had also made a deposition that he regarded the prisoner as his brother-in-law, and Madame Callery stated that in his engagement with her husband he stipulated for the payment of a sum of money to his wife before he started for Paris. An interpreter was employed by the Court in the examination of the accused, though he understands French tolerably well, and declared this step unnecessary. The long, intricate, and argumentative questions of a French Judge must, however, be somewhat puzzling to a foreigner even with a mastery of the language, and there was some difficulty in ascertaining his line of defence. It appeared in the end, that having heard nothing of his wife for three years, he considered himself by the law of China released from the connection. His counsel, M. Bonnier Ortolan, dwelt on this plea, urging also that there was no proof of the validity of the first marriage, and that the bride was only a secondary wife, or concubine. He argued, also that, even assuming her to have been a real wife, there might have been a divorce, and he created some amusement by citing the reasons justifying this measure—namely, sterility, immodesty, disobedience to the husband's parents, loquacity or slander, theft, a jealous temper, or an incurable malady. Adultery, he said, necessitated a divorce; and the wife was now alleged to have four children, whereas she had only two when the prisoner left her. He also read—though this was not relevant to the case—a provision whereby a woman deserting her husband was liable to 100 lashes and be sold to any purchaser. He maintained likewise that Macao, though occupied by the Portuguese, was Chinese territory, having a native Governor, and that the Chinese law did not recognise marriages celebrated by priests, parents alone having the right of concluding marriages for their children, and there being no religious ceremony. The presiding judge having summed up, the jury, after retiring for five minutes, acquitted the prisoner.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

LAW - On the 21st April, at Pootung, Shanghai, the wife of W. C. Law, of a daughter.

PALMER—On the 11th June, at 6, Walterton-road, St. Peter's-park, W., the wife of the Rev. Robert Palmer, C.M.S., of Ningpo, of a daughter.

TAIT—On the 6th June, at Ko-lan-soo House, Portobello, the wife of James Tait, of a son.

MARRIAGES.

CALLENDER—WARRICK.—On the 9th June, at Claremont park, by the Rev. Wm Bolton, M.A., and Rev. John Kelman, M.A., Alexander Callender, Leith, to Elizabeth Muirhead, second daughter of William Warrick, Leith.

DEATHS.

FARR—On the 19th April, at Shanghai, Frederick Farr, a native of Gravesend, aged 53.

QUIN—On the 7th June, at Greenwich, William Quin, late Captain Superintendent of Police in the island of Hong Kong, China, aged 69.

RAPHAEL—On the 18th April, at Shanghai, the wife of R. S. Raphael, aged 24 years

SANFORD—On the 10th June, at Clifton-villa, Hayter-road, Brixton-hill, S.W., Alice Mary, third daughter of the late Beaums Sanford.

THE MURDER OF MR. MARGARY.

The Shanghai correspondent of *The Times* writes as follows under date April 17:—

All interest is centered here at present on the recent events in Yunnan, and on the means to be taken for punishing the murderers of Mr. Margary. You will, of course, receive from Calcutta fuller details of the attack on Colonel Browne's party than have yet reached us. We have, as yet, only telegrams saying that Margary, with several of his servants, was murdered in the town of Manwein, and the remainder of the expedition attacked and obliged to retire. The intelligence has caused the most profound regret. Mr. Margary was well known to us all, and universally esteemed—by many as a warm friend, and by all as a high-minded gentleman and one of the most promising officials in the service. It is remarkable that, in a private letter from Bhamo of the 28th of January, Mr. Margary mentions Manwein as a place where he had passed a week with some pleasure while his Chinese servant went on to Bhamo to report his arrival to Colonel Browne. Yet this is the very place where on his return journey he is entrapped and murdered. I do not know whether the Chinese will venture to plead in this case the usual excuse of mob riot. If they do, the question why no hostility was shown on Mr. Margary's first visit will be a difficult one to answer. There seems really no doubt that the whole affair was instigated and carried out by the officials, and there appears reason to suppose collusion on the part of Burmah. It is to be hoped, however, that the suspicions which attach to the Court of Mandalay will not in any way obscure the graver responsibility which rests upon Peking. Mr. Margary was travelling with an Imperial passport, and was murdered in a Chinese town—it is even said within an official Yamen. The scene of the outrage is within the magistracy of Teng-Yueh, in the prefecture of Yung-chang—both places inscribed in the Chinese Civil List, so that no plea of want of jurisdiction can avail. Besides, it is said the attack was made by soldiers at the instigation of the local Governor. Of this, however, you know by this time more than we do. What you do not know is that the intention of the Chinese to oppose the mission is said to have reached the ears of the Roman Catholic missionaries at Hankow before the event, sufficiently conclusive evidence, it would appear, of pre-meditation and pre-arrangement. If this statement should prove true the responsibility will have to be laid far higher than on the local official of Manwein though he will none the less be guilty of the actual murder. Remembering the opposition shown to Mr. Cooper's two attempts to cross the Chinese frontier, I have litt'e doubt the attack was carefully pre-arranged, and if it should prove the Burmese Court were concerned, it is to be hoped a new era will dawn for Mandalay. If the English frontier were advanced to Bhamo, and made contiguous to that of China along the west of Yunnan, the gain would be as great politically to our influence here as territorially to our Indian Empire. There is every likelihood that France will soon establish a protectorate (which will be a real Sovereignty) over Tonquin, in which case she will touch the Chinese frontier on the south. It will be an immeasurable gain to our influence at Peking that China should feel the pressure of other European nations on her south and west as she has felt that of Russia in the north.

Monetary and Commercial.

The Globe Telegraph and Trust Company announce a second issue of £2,000,000 capital—divided into 100,000 6 per cent. Preference Shares of £10 each, and 100,000 ordinary shares of like amount—to rank equally with the existing shares and take dividend from the 18th April last. The directors are ready to receive tenders for these shares in the stocks and shares of existing dividend paying telegraph companies, reserving to themselves the right to accept or refuse the whole or any part of the stocks or shares tendered.

The Great Northern Telegraph Company's traffic receipts for the month of May were this year, f.366,423 ; last year, f.363,932. The total receipts from January 1 to May 31 were, this year, f.1,602,397 ; last year, f.1,689,998.

An extraordinary general meeting of the Eastern Extension Australasia and China Telegraph Company (Limited) was held on the 7th inst. to consider a recommendation of the directors for the extension of the telegraph system of the company from Australia to New Zealand, and to submit resolutions to sanction such extension and the doing of all necessary acts to effect it. The cost of the cable, &c., would be about £325,000, and it was proposed to raise the money by 6 per cent. debentures of the company. A discussion ensued and explanations were given, after which formal resolutions were agreed to, authorising the directors to enter into the necessary contracts and to raise the requisite capital for the purposes of the proposed extension.

At the half-yearly meeting of the P. and O. Company, an amendment to the adoption of the report was moved, advocating the nomination of a committee of investigation into the company's affairs. The report was, however, carried by a large majority.

The directors of the Universal Marine Insurance Company (Limited) have decided to pay the usual *ad interim* dividend of 5s. per share on the 1st July, being at the rate of 10 per cent. per annum.

With reference to the report as to the robbery effected by two clerks of the Yokohama branch of the Comptoir d'Escompte, we find that the ultimate loss to the bank is only £3,000. The directors continue their confidence in the manager of that branch.

In the Manchester Market the business has been of a very limited character, buyers holding aloof except for immediate necessities. There has been no quotable change in prices ; still, where offers have been put forward, small concessions have been accepted ; this, however, is mostly noticeable in cases where orders have run out ; where engagements still exist, full prices are held for as a rule.

Bar silver has been sold at 55½d. per oz., the lowest price yet touched. No Mexican dollars have been sold. The market is very quiet, and buyers are awaiting fresh telegrams from the East, before operating.

THE BOARD OF TRADE RETURNS.

The Board of Trade returns for May show that the improvement manifested in the April returns, so far as regards our exports, has not been maintained. The returns show once more a considerable falling off in the exports of British and Irish produce. The decrease in the exports is 14 per cent., the total value being £18,225,152, against £21,229,247 for the corresponding month of 1874 ; but there is an increase in the imports of 13¾ per cent., the total value being £32,346,107, against £28,453,786 last year. In the exports cotton yarn has decreased 5 per cent. in quantity, and 12½ per cent. in value ; cotton piece goods increased ¾ per cent. in quantity, and ¼ per cent. in value ; linen yarn decreased 10 per cent. in quantity, and 2 per cent. in value; linen piece goods increased ⅞ per cent. in quantity, but decreased 4 per cent. in value ; woollen yarn decreased 15 per cent. both in quantity and value ; woollen cloths decreased 10 per cent. in quantity, and the same in value ; worsted stuffs decreased 14¼ per cent. in quantity, and 17½ per cent. in value ; iron and steel decreased 11 per cent. in quantity, and 26 per cent. in value ; coal fuel, &c., increased 11 per cent. in quantity, but decreased 16½ per cent. in value. With regard to the imports, corn has increased 84½ per cent. in quantity, and 33 per cent. in value ; raw cotton increased 12 per cent. in quantity, and 11 per cent. in value ; flax decreased 70 per cent. in quantity, and 64 per cent. in value ; raw silk decreased 25 per cent. in quantity, and 35 per cent. in value ; wool increased 33 per cent. in quantity, and 43 per cent. in value ; tea decreased 7½ per cent. in the total value, and the quantity entered for home consumption increased ¾ per cent. Coffee increased in the total quantity and value 96½ and 91 per cent. respectively ; but the quantity entered for home consumption decreased 12 per cent.

The estimated value of the imports of principal articles of foreign and colonial produce for May amounted to £32,346,107, against £28,453,786 in the like month of 1874, and £34,385,907 in 1873. For the five months the figures stood—in 1873, £151,680,705 ; 1874, £152,369,711 ; and 1875, £151,895,261. The declared value of the principal articles of British and Irish produce exported in May was £18,225,152, as against £21,229,247 in the corresponding month of 1874, and £22,607,082 in 1873. For the five months the figures stood in 1873, £106,326,404 ; 1874, £9,846,360 ; and 1875 £91,507,221.

The following is an extract from these Returns of the figures which refer to our Export trade with China and the Far East:—

ARTICLES OF IMPORT.

In the Produce Markets there has been, with few important exceptions, an absence of animation, and as supplies of most of the leading articles continue fully equal, if not in excess of the demand, there is little disposition to speculate, and movements in prices have mostly been unfavourable to the importer.

TEA.

Messrs. Arthur Capel and Co.'s Circular says :—There has been more business done in our market during the past week, the low range of prices for common to fair red-leaf and black-leaf Congous having attracted the attention of buyers, and led to considerable purchases of these kinds from 10d. to 1s. 1d. per lb. ; other kinds show no material alteration, either in demand or value, with the exception of fair to good new season's Canton Congous, which, owing to large arrivals, have given way 1d. to 1½d. per lb., the finer kinds being, however, well maintained. The public sales have been small, comprising only 9,370 packages, which sold without reserve at about last week's rates, except for new season's Canton Congous, which went 1d. to 1½d. per lb. lower. The deliveries for the week, as compared with last year, are as follows, viz. :—

	1875. lbs.	1874. lbs.
Home Consumption	2,172,192	1,921,613
Coastwise	743,376	595,266
Exports	784,526	520,327
	3,700,094	3,037,206

Congous :—Red-leaf kinds : Siftings remain firm, there being none in first hands. Broken-leaf kinds have been saleable from 9½d. to 9¾d. per lb., fair common 10d. to 10½d. per lb., good common meeting with but little inquiry. Fair to good and fine Kaisows have been firm at last week's prices, but with few offering. Finest still sell slowly. Pak Lin kinds are without change. Black-leaf kinds : Common to fair common remain quoted at 10d. to 10½d., with only a moderate inquiry. Sales to some extent have been made in good common to fair kinds from 10¾d. to 1s. 0¾d. per lb., being about last week's rates ; other kinds show no material alteration. Some parcels from second hands have been sold at prices rather under those required by importers for similar kinds. Canton-make kinds : Common to fair of new season's have been difficult of sale from 1s. 0½d. to 1s. 2d. per lb., being 1d. to 1½d. per lb. lower. Good from 1s. 2½d. to 1s. 4d. also show a decline, but fine from 1s. 6d. to 1s. 8d. fully maintain previous rates. In Oolongs and Souchongs there has been nothing of interest to quote. *Scented Teas.*—Canton Capers : Notwithstanding that the quantity brought to auction has been moderate, prices show no improvement, the stocks being still heavy. A few of new seasons have arrived, but are wanting in scent. Orange Pekoes remain in limited demand. Foochow kinds : Capers are only saleable at low prices. Orange Pekoes : Common to fair are dull of sale, but good qualities in fair demand at rather better prices. *Green Teas.*—The demand remains moderate, and the prices at public sale show no change of importance this week.

SILK.

The Market continues quiet. China Silk finds buyers to a moderate extent at former rates. In Cantons and Bengals there is very little doing. Japan Silk attracts some attention, but there is no improvement in prices. Deliveries, 1st to 9th, inclusive :—China, 1,200 bales ; Canton, 324 bales ; Japan, 235 bales ; total, 1,759 bales.

Messrs. Arles, Dufour and Co.'s Circular, dated Lyons, 5th inst., says :—As it was expected at the date of our advices of the 8th ult., very large orders in coloured Silks, fancy articles and ribbons for the autumn season have been placed throughout the month of May. Manufacturers are now, for the most part, entirely engaged for several months to come. The impulse given to transactions in raw Silk by the orders placed was greatly stimulated towards the middle of the month by unfavourable reports on the progress of the crop in Spain and in France, and our market has remained since in a state of remarkable activity. A rise of f.2 to f.3 is now established on classical European Silk, and Chinas are decidedly firmer, in spite of telegrams estimating the probable export from Shanghai at 80,000 bales. The chief interest is now concentrated upon the progress of the crop in Northern Italy, which forms the bulk of the European crop. All prospects are for a good outturn, but the worms being yet backward no decisive opinion can be given before another week. Should, as it is expected, prices of cocoons be about the same as last year, the cost of New Silk would be nevertheless higher, in consequence of the fall in the rate of exchange.

COFFEE.

Arrivals have continued upon an extensive scale, and the supplies brought to auction have been larger than for some time past, but the sales have gone off with more spirit than was expected. After several fluctuations the tendency in the value of Plantation Ceylon has been downwards, and prices close 1s. to 1s. 6d. lower, excepting bold, which has sold more readily at rather dearer rates ; middling coloury is now quoted 103s. to 105s. Native Ceylon continues scarce, and prices are 1s. dearer, good ordinary having been sold at 89s. to 89s. 6d. Closing prices are :—Plantation, triage and ordinary 80s. to 95s. 6d., grey to coloury, small 96s. to 101s., low middling grey 100s. 6d. to 102s. 6d., middling coloury 103s. to 105s., good middling to fine middling 105s. 6d. to 108s., good to fine bold 108s. 6d. to 113s., pea-berry at 120s. to 127s. 6d., native small 77s. to 80s., good ordinary 89s. to 89s. 6d., bold 94s. to 96s., pea-berry 100s. to 105s. 6d. The only sale of other East India has been 555 bags Manila at 95s. 6d. to 97s. 6d. for fine pale and yellowish, and 100s. to 101s. for superior yellow quality.

SUGAR.

During the past week a larger business was effected, almost entirely however in British West India, which checked the downward tendency, and imparted more firmness. Within the past two days unusually heavy arrivals of cargoes at ports of call have caused a quieter tone, and business on the spot has been moderate, but prices of refining kinds are well sustained, as are also fine cystallised and grocery kinds. Common brown kinds have been neglected throughout, and sales are therefore limited, but prices are steady. In the absence of demand for Manila, no sales are reported, and prices remain nominally unchanged. There has been a moderate demand for date Penang at

Digitized by Google

the previous value of 16s. 6d. In auction 1,730 bags cane were bought in, brown at 19s. to 20s. 6d., yellow 21s. to 21s. 6d., also 3,188 bags native at 16s. 9d. to 17s. A floating cargo of Java for the United Kingdom, comprising the Royal Charlie, 1,350 tons No. 14, has been sold at 25s. 3d.

COCOANUT OIL.—Although the demand has continued limited prices have exhibited no material alteration, some fine Cochin has been sold at £43 10s., and Ceylon in pipes at £37 10s. In public sale of 525 casks Ceylon 53 hogsheads sold at £38, the remainder being withdrawn or bought in, pipes at £37 10s. to £37 15s., puncheons at £38, and hogsheads at £38 to £38 5s. per ton.

CHINA STRAW PLAIT.—At auction 351 bales were offered, but only about 70 bales found buyers, white at £10 to £10 2s. 6d., mottled £7 10s. to £8 15s., with better qualities at £13 12s. 6d. per bale.

CHINA MATTING.—At auction 168 rolls were chiefly sold, fancy check at 33s. to 46s. 6d., red ditto 34s. 6d. to 50s., white 37s. 6d. to 45s. 6d., mats at 54s. to 54s. 6d. per roll.

CUTCH.—At auction the large supply of 4,933 boxes 24 bags Pegue was offered, of which 2,000 boxes and the bags found buyers at and since at previous rates, Flag BB and Cock and other marks at 23s., Elephant mark at 23s. 6d. per cwt. Laudings, deliveries, and stocks for the first five months of the three years :—

CANES.—Of 272,750 Tonking offered about 50,000 sold at ⅝d., one lot ¾d., mouldy 5-16d. Of 68,500 Yellow Bamboo 30,000 sold at 1d. to 1⅛d. 4,260 Dragon partly sold at 1d., 820 Ground Rattans at 2½d. to 8¼d. Of 20,000 Whanghai one-half sold at ⅞d. to 1½d. each. 6,780 Fancy Rooted, 10,000 Partridge, and 7,860 Midgen withdrawn.

CAMPHOR.—The market for China has been quiet, and only about 300 boxes have changed hands at 70s. to 71s. 3d. per cwt. reweights, closing sellers at 70s.

CUBEBS have been steady but very quiet.

COIR GOODS.—Market quiet, and to sell a reduction would have to be submitted to. There have been no public sales since our last.

COTTON.—This market has remained in a very weak state throughout, prices on the spot are generally ⅛d. per lb. lower, whilst under the pressure to sell afloat prices have gradually receded, establishing a total decline of ¼d. to ⅜d. for the fortnight. The closing prices afloat are, good fair new Tinnivelly 5¼d. to 5 9-16d., good fair Western 5d., fair Coconada 5d., good fair Dhollera 5½d.

DRAGON'S-BLOOD is very firmly held and comparatively scarce ; 9 cases sold. Reed fair £10 17s. 6d. to £11 ; Lump dull £5 5s.

ESSENTIAL OILS.—*Anniseed* firmly held, and a few cases sold at 10s. to 10s. 6d. *Cassia* dull ; small sales at 4s. 4d. *Lemon Grass* steady ; of 60 cases, 10 sold, good at 2½d. *Nutmeg* quiet ; 6 cases bought in. *Cinnamon* dull, and supply abundant ; of 9 cases a small quantity sold at 4s. 3d. for fair. *Citronelle* quiet ; sales privately at 1⅝d.; and of 107 cases at auction half sold at same figure.

EBONY.—At auction 71 tons (308 logs) Ceylon of fresh import were all bought in, good quality at £13 10s. per ton.

FANS.—305 cases China were bought in at 1d. each.

GAMBIER has been in steady request at dearer rates, closing about 3s. per cwt. higher than a fortnight ago. On the spot 1,000 bales have been sold at 25s. 7½d. to 26s. ex-ship and ex-quay for whole bales. For arrival 50 tons have been sold at 25s. 9d., and 50 tons at 25s. 7½d. ex-ship all faults, also 50 tons July shipment at 26s. ex-ship. At auction 1,195 bags 460 bales cubes were bought in, fine free at 43s., pressed 35s. to 36s., except about 253 bags, &c., which sold, sea-damaged, 1st class free at 39s., Malacca kind 16s. 6d., blocky (sound) at 35s. 6d. per cwt. Imports, &c., in the first five months of the three years :—

GUTTAPERCHA has been dull at unaltered prices.

GALANGAL ROOT is cheaper, the large quantity of 935 packages being offered, but only a few were sold at 20s. to 20s. 6d. per cwt. for fair quality.

GUMS.—*Benjamin* steady ; of 128 cases one-half sold, Sumatra seconds, good, £10 to £10 10s. ; thirds, low to good almondy, 44s. to 102s. 6d. ; Siam dark thirds, block, £8 10s. *Copal* unchanged ; large auctions this day. *Damar* quiet ; 206 cases retired. *Gamboge* again cheaper ; of 30 cases a small proportion sold at £9 to £10 15s. for fair to good pipe partly run.

HORNS.—At the periodical public sales held Thursday there was a good demand for all kinds, the result being that the whole of the moderate quantity offered was disposed of at a further general improvement. Ox and Cow sold at full rates ; Buffalo at steady prices for light to an advance of about 1s. per cwt. for heavy weights ; Deer at higher prices. The sales included 18,350 (11 tons) Ceylon and Cochin Buffalo all sold (including), average 1,782 to 1,542 horns at 27s. 6d. to 33s. 6d.; 4,120 (6 tons) Penang sold, average 742 to 686 horns at 38s. to 42s.; and 6,300 (10 tons) Rangoon average 636 to 542 horns at 43s. per cwt. 58,290 (26 tons) Ceylon and Cochin Deer were nearly all sold, average 1,684 to 2,174 horns at 48s. to 74s., with a few small lots from 79s. to 86s.

HEMP.—There has been a much better demand for Manila, and prices have gradually advanced, until a total recovery of about 40s. per ton has been established. Privately about 1,500 bales have been sold, mixed to fair at £30 10s. to £31 10s., good fair at £32. At the auctions the moderate supply met biddings at full rates, but owing to the firmness of holders only a small part was sold. Of 1,085 bales offered 280 bales sold, superior brown quality at £30 10s., chiefly damaged good roping at £32 5s. to £32 10s., the remainder sound good fair bought in at £33 per ton.

INDIA-RUBBER has been rather quieter ; 20 tons Borneo sold afloat at 1s. 4d. ; very little otherwise done ; 80 baskets Java at auction retired.

ISINGLASS.—No transactions.

JAPAN WAX.—The market continues very quiet ; of 72 cases offered a few lots only were sold at 51s. per cwt. for good hard squares.

MUSK.—Market steady ; of 41 caddies Tonquin Pod offered the bulk sold ; fair to very good dry selected pods at 38s. to 45s.; rough and bally very good 29s.; ditto part false packed, part inferior 13s. to 15s. 6d.; 3 caddies Assam sold at 12s. 6d. to 13s. 6d., and 12 tins Cabardine were retired.

PLUMBAGO.—The good supply of 1,711 barrels Ceylon mostly new import at auction went off slowly, and only 350 barrels found buyers at about previous prices, middling to fair lump 13s. 6d. to 16s. 6d., fair to fine chips 10s. to 11s., dust 8s. 6d. to 9s., chips 9s. 6d., the remainder bought in, good to selected lump at 18s. 6d. to 21s. 90 barrels 171 bags sea-damaged saved from the wreck of the Border Chieftain, offered without reserve, sold, chiefly lump at 11s. 6d. to 15s., dust, &c., 7s. to 9s. 3d. per cwt.

PEPPER.—*Black* remains quiet, and is ⅛d. per lb. lower ; a small trade has been done at 5½d. to 5⅝d. for greyish to good Singapore and 4⅝d. fair Penang, and of over 10,000 bags offered at auction a very few only sold. Afloat it offers freely. Singapore at 5¼d., Penang 4½d., on which small sales have been reported. *White* has declined ¼d. per lb., and there are no buyers in quantity. At auction of about 1,350 bags one-fourth sold. One lot very fine bold 8⅛d.; good bright 7½d. to 7⅝d.; fair, 7⅛d.; closing dull.

RHUBARB.—China is quiet, but very firmly held ; of 156 chests brought forward only one fourth sold ; fine bold 4s. 5d.; good 3s.; fair 1s. 4d. to 1s. 9d.; wormy 8½d. to 9d.; low dark 5¼d. to 5½d. per lb.

RATTANS.—At auction 1,660 bundles Penang sea, &c., damaged were bought in at £24 to £26 per ton.

RICE.—The market has continued in a dull state, and although prices of floating cargoes have further declined fully 1½d. per cwt., there has been little disposition to buy ; the closing quotations are 8s. 0¾d. to 8s. 1½d. for Rangoon, and 7s. 9d. for Necransie. On the spot there has been more demand for soft grain early in the fortnight, and rather dearer rates were obtained, but there has since been less demand ; hard grain sorts have been slow of sale throughout. The sales on the spot comprise good to fine white Bengal at 11s. 3d. to 12s. 6d., Japan at 8s. 7½d. to 8s. 8¼d., Madras at 9s. 1½d., new Rangoon at 9s., old ditto at 8s. 3d. to 8s. 9d., old Bassein (the landed cargo per Turkestan) at 8s. 4½d., Necransie at 8s. to 8s. 3d., and old Burmah from Calcutta (famine rice) at 8s. 1½d. to 8s. 4½d.

STICKLAC.—The market continues quiet. At auction 480 cases Siam were offered, of which about 60 cases sold at £5 12s. 6d. for fine free, the remaindre being bought in at £5 7s. 6d for old, to £5 10s. for fresh import. Landings, &c., for the first five months of the three years :—

SPICES.—*Cassia :* 20 cases Japan bark sold at 27s. to 28s. *Cassia Lignea :* Of 1,010 cases unworked about 400 cases sold at 54s. to 56s., being easier. *Cassia Vera :* 20 bundles Padang bought in at 50s. *Cassia Buds :* 69 boxes of old import bought in at £5 15s. *Mace* dull, and of 36 cases, half sold ; good at 2s. 7d. to 2s. 9d., broken 1s. 4d. to 1s. 5d. *Nutmegs* rather easier and quiet, but some trade done privately ; of 160 cases and casks offered, half sold ; 62's at 4s. 4d., 77's to 80's at 3s. 7d. to 3s. 6d., ordinary defective limed 10d. to 10½d.

SAPANWOOD is in request ; of 15 tons new Ceylon 9 tons sold at £12 10s.

STAR ANNISEEDS.—No business done.

SOY.—Market steady but quiet ; 14 cases Japan chiefly bought in at 16s. per dozen bottles.

SAGO.—At auction of 2,130 bags about 1,200 bags sold, small at firm rates, large and medium unchanged, ordinary small pearl at 16s. 6d., fair to good at 17s. to 18s., good medium at 16s. 6d., good large at 17s. *Flour :* 2,169 bags Singapore met few offers and were all bought in at 13s. 3d. to 13s. 6d., except 110 bags damaged, which sold at 9s. 6d. to 9s. 9d.

TAPIOCA.—Of 482 bags extra fine white Penang 320 bags sold steadily at 2⅞d., 2,007 bags Singapore went off slowly and only 500 bags sold at former rates, good to fine white at 2⅛d. to 2¼d., fine bold Malacca at 2⅜d., the remainder bought in at 2⅛d. to 2¼d., old at 2⅛d. Since the sale 200 bags fine Malacca have been sold at 2⅛d., and 160 bags fine Penang at 2⅜d. *Pearl Tapioca :* The large supply of 1,254 bags went off flatly, and only 300 bags sold at again easier rates, good and fine medium at 19s. 6d. to 20s., bullets at 20s. 6d., the remainder bought in, chiefly medium at 20s. to 21s. *Flour :* 50 bags Singapore bought in at 2¼d.

TIN.—There have been some slight fluctuations, up to £85 having been paid for Straits, but the market closes quiet at the subjoined quotations :—Straits on the spot £83 10s., afloat £83 ; Banca £88 to £88 10s., Billiton £83 per ton.

YELLOW METAL.—Sheets, 4 by 4 ft., 7¾d. to 8d.; Sheathing and Rods, 7¾d. to 8d. per lb.

TIN.—English Refined, £91. Tin Plates: Charcoal IC, per box, 30s. to 34s.; Coke, 24s. to 26s.

LEAD.—WB, £23 15s.; do., other brands, £22 5s. to £22 10s.; Spanish soft, ex ship, £21 10s. to £21 12s. 6d.; Sheet, £23 5s. to £23 10s.; Shot (kegs extra), £26 10s.; White do., £29; Red do., £25.

SPELTER.—Silesian, £24 to £25.

QUICKSILVER.—In bottles of 75 lbs. each, £12.

Messrs. French and Smith's Circular says:—The Metal Market the past week was quiet. Iron is wituout change, and business in it is limited. Copper is dull, and price is easier. Tin Plates are again easier. Lead has been quiet, and the price closes steady, but without animation. The only demand of moment at present for exportation is for Russia. In other Metals nothing to notice.

CASUALTIES.

The Blair Athol, for Java, in getting under way at Cape Town, on May 9, owing to the anchor not holding, drifted on to the rocks, but was subsequently towed off by the Florence (str.), for £101. Damage believed to be slight.

MISCELLANEOUS.

The Glenroy (str.), from London for China, arrived at Malta on the 8th inst., and left on the 9th.

The Priam (str.), from Liverpool, for China, arrived at Port Said June —.

From Port Elizabeth we learn that the wreck and cargo of the Jupiter T., from Singapore to New York, ashore east of Point Padrone, were sold, April 30, for £9,500. As the vessel still holds together it is expected that a considerable portion of her cargo will be recovered. The Pioneer and the G. T. Kemp are on the spot to take in the cargo salved.

Advices from Rio Janeiro, May 9, state that the Eliza Shaw, from London for Shanghai, which put in March 27, with damage, after collision, has discharged and sold her cargo of coals, and is repairing.

The surveyor of the Viking (str.), from London, which arrived at Hong Kong April 18, after being aground, reports seven reverse frames cracked and six frames cracked and broken on the starboard side, and eight reverse frames broken, five floor heads broken, and twelve frames broken and cracked on the port side.

LAUNCHES, &c.

On the 3rd inst. an iron sailing ship was launched from the yard of Messrs. Richardson, Duck, and Co., South Stockton-on-Tees, of the following dimensions:—Length over all 220 feet; breadth, 35 feet; depth of hold, 21 feet 9 inches; tonnage, o.m., 1,166 tons; gross, n.m., 1,094 tons. She is classed 100 A at Lloyd's, and has been built under special survey, to the order of E. H. Capper, Esq., Cardiff; is intended for the India and China trade, and will be commanded by Captain Llewelyn Evans. As the vessel left the ways she was named the Abercarne, by Mr. Higgins, of London.

On the 7th inst. there was launched from the yard of Messrs. Scott and Co., Cartsdyke, a screw steamship of 2,000 tons, for Mr. Alfred Holt, Liverpool, for the China trade. Her dimensions are:—Length, 311 feet; breadth, 35 feet; depth, 26, feet. The engines, which are 250-horse power, were made by the Greenock Foundry Company. On leaving the ways she was named Orestes.

From the yard of Messrs. Henry Murray and Co., of Port Glasgow, was launched on the 9th inst. a finely-modelled screw-steamer for the Borneo Company, for trading in the East. On leaving the ways she was named the Rajah. She was towed to Greenock, where she will be supplied with compound engines of 70 h.p. nominal, by Messrs. Kincaid, Donald and Co.

Messrs. Norris and Joyner write us that the Flintshire is not taking out 150 tons gunpowder, as stated in our last.

COURVOISIER'S BRANDY

THIS celebrated Brandy is highly esteemed for its purity, delicacy of bouquet, and softness of flavour. It is used in preference to any other in many of the leading Paris and London Clubs.

It was the only one supplied to his late Majesty Napoleon III.

It has also met with the highest approval wherever it has been shipped, and the Proprietors are able to refer with pleasure to the recognitions of its superiority which reach them from every part of the world.

CAN BE OBTAINED THROUGH ANY MERCHANT.

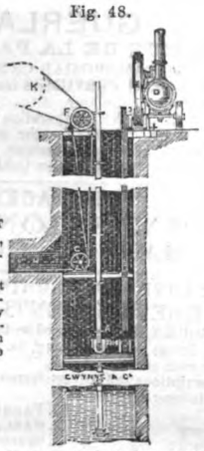
GWYNNE and Co., Hydraulic and Mechanical Engineers,

ESSEX STREET WORKS, STRAND, LONDON, W.C.

Fig. 39.

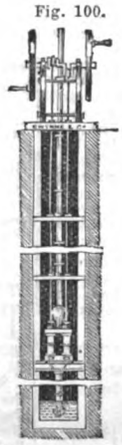
GWYNNE & Co.'s PATENT PUMPING MACHINERY, AS APPLIED TO EMPTYING DOCKS.
The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be given

Fig. 48.



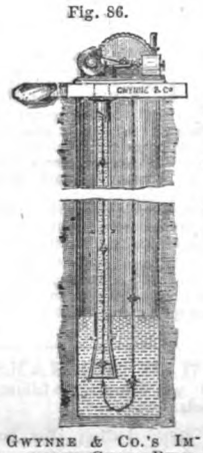
GWYNNE & Co.'S IMPROVED PATENT CENTRIFUGAL PUMP.
Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of Water

Fig. 100.



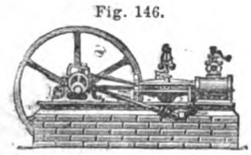
GWYNNE & Co.'S IMPROVED DOUBLE BARREL DEEP-WELL PUMP,
For Hand-power, adapted for ordinary most careful construction, and on the most approved system

Fig. 86.



GWYNNE & Co.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.
These Pumps work without valves or packing, and raise a considerable quantity of water. They will lift sand, mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.



GWYNNE & Co.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.
With or without Expansion Gear, for economical working.
From 4 to 100-horse power

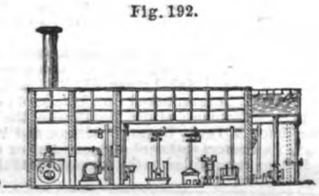
Fig. 154.

GWYNNE & Co. IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.
These boilers are simple and compact. They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler.

Fig. 142.

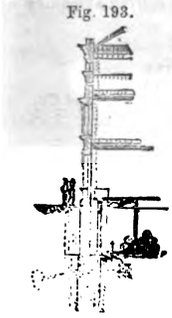
GWYNNE & Co.'S IMPROVED PORTABLE STEAM ENGINE.
Light, simple in construction durable, and economical, and very superior to "Agricultural" Engines.
From 2½ to 30-horse power

Fig. 192.



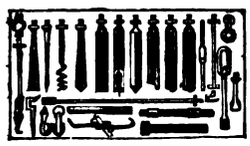
GWYNNE & Co.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES, FAT, &c., &c.
The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motion power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added to lift water or any purpose required.

Fig. 193.



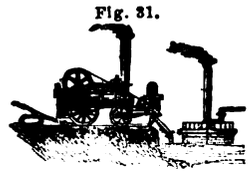
GWYNNE & Co.'S IMPROVED HYDRAULIC LIFTS.
Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine, or other produce, into or up from cellars, or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.
Prices on application.

Fig. 121.



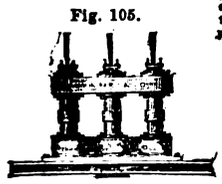
GWYNNE & Co.'S BORING TOOLS.
Of greatly improved construction. The figure represents those most frequently used, but the form and number vary much with the nature of the soil, and size of the bore hole.
G. & Co. can confidently recommend these as the best in the market.

Fig. 31.



GWYNNE & Co.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR.
In which the Pumps are furnished with hose for distributing the water over the adjoining plantations. Made in all sizes.

Fig. 105.



GWYNNE & Co.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.
These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and comparison with those of other makers is challenged. Gwynne & Co. make single and double-barrelled pumps upon the same principles.

Fig. 207.

GWYNNE & Co.'S IMPROVED DREDGING MACHINERY.
The boat can be constructed so as to draw only 18 inches of water, if required. The machinery is extremely simple, yet thoroughly effective the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Large Illustrated Catalogue with many Estimates, and upwards of 200 Engravings, post free for Twenty-four Stamps to any part of the world.

GRAND HOTEL COMPANY.

Wellenstein, Mrs. Zwang, Messrs. Kaiser, F. B. van Leeuwen, Mrs. M. A. Ermerins, Messrs. T. S. Ballot, C. Donker, J. E. Matthies, H. A. Alofsen, F. de Lannoy, M. W. Mortier, Mr. and Mrs. C. J. H. Meyer, eight subaltern officers, 167 soldiers.

Summary of News from the Far East.

JAPAN.

Our advices from the Japan Ports by the present mail are only two days later than those by the Pacific mail, which was received, *via* San Francisco, on the 5th inst.

CHINA.

PEKING AND TIENTSIN.

The Tientsin correspondent of the *North China Herald* writes as follows:—

Li Hung-chang seems to be specially active in military preparations at Tientsin. Besides massing troops and erecting numerous forts, he is said to be about erecting a line of telegraph between the chief forts—we presume those of Sinching, Taku, and Peitang. He has also imported from Europe a number of torpedoes, which, with their charges, are now stored at the Taku forts. These tremendous preparations at Taku remind us of the Taeping complaint at Quinsan. The rebels had strongly fortified the approach from Soonkiong, but Gordon meanly took them in the rear. Perhaps Li Hung-chang may some day realise the same sensation.

In the *Peking Gazette* of the 8th April there is an announcement that Wan-seang, the celebrated Chinese statesman, had memorialised the Throne, praying the Regents to allow him to retire from his public duties on account of continued ill-health. And further on, in the same *Gazette*, we find an Imperial Rescript on the subject of the memorial, commanding that Wan-seang, on account of his continued ill-health, shall be released from the duties of his rank as Major-General of the Manchow White Banner, and that he will not be required to attend to the transaction of business connected with the Board of Works, and the office of the Foreign-trained Legion at Peking; but that he will still be retained in his positions as a Privy Councillor, a Minister of State in the Cabinet, and a member of the Tsungli Yamen. In the *Gazette* of the following day, the 9th of April, it is announced that Wan-seang had presented a special memorial to the Regents, thanking them for the favour of exempting him from certain duties.

On the 19th April the annual meeting of the landrenters of the British settlement at Tientsin was held at H.B.M.'s Consulate, Mr. Mongan, Her Majesty's Consul, as usual on the occasion, presiding. Mr. Mongan opened proceedings by calling upon Mr. E. A. Solomon, the chairman of the Municipal Council, to lay his statement before the meeting. Mr. Solomon thereupon addressed the landrenters by first referring, in a general way, to the labours of the Council during the past year, and afterwards to the satisfactory condition of the funds on the closing of the year, as the statement of accounts which had been laid before the landrenters testified. He concluded by laying before the landrenters an estimate of the probable expenditure, which will be likely incurred by the new Council for the twelve months ending the 31st March, 1876. The accounts for the previous year were then, with complete unanimity, passed by the meeting, as also the estimates of the probable expenditure for the following year. Mr. Solomon after that read letters which had been lately addressed to him by members of the community regarding the purchasing of a fire-engine; the annoyance suffered

Digitized by Google

by certain residents in the settlement by the firing of salutes from vessels of war lying in proximity to their dwellings; and the blocking up of the thoroughfare by goods placed on the bund, arising from the negligence of the police in not preserving an open space. These matters were accordingly all fully discussed and arranged. The business of the past year being then brought to an end, voting papers were handed to the landrenters by Her Majesty's Consul, that they might proceed to ballot for a new Council; and the subsequent examination of them, after being filled up, showed that Messrs. Cordes, Forbes, Moore, Hatch, and Meadows were duly elected councillors for the next twelve months. Her Majesty's Consul after that brought to the notice of the landrenters three local matters, which imperatively demanded rectification. This the new Council promised they would promptly carry out. The thanks of the meeting were then unanimously given to Mr. Solomon, the chairman of the late Council, for the able manner in which he had discharged his duties as the representative of the Council while in office. The business of the meeting concluded by a vote of thanks to Mr. Mongan for presiding over it on the occasion.

There has been a meeting of the stewards of the Race Committee, for the purpose of drawing up the programme of our approaching Spring Races, which will come off on the 13th, 14th, and 15th day of May. I may state generally that the prospects for a satisfactory meeting are very favourable. The Peking Races will come off on the 26th and 27th April, and three of our sporting men have started for Peking, to ride at the races, where we trust they will keep up the fame of the Tientsin Turf.

General Raasloff, the Danish Envoy, arrived at Tientsin on the 22nd April, in the S. S. N. Co.'s steamer *Shantung*. Immediately after his arrival he called upon the Governor-General; and subsequently he and his suite took their departure, on horseback, for the capital, hoping to reach Peking in the forenoon of the 26th April, in time to see the first day's races.

Herr von Brandt, the German Envoy, has arrived at Tientsin from Peking. He subsequently called on Li Hung-chang, the Imperial Commissioner for Foreign Affairs; and the Commissioner returned the call at the German Consulate. His Excellency will not at present proceed to the South of China, but will in a day or two return to Peking.

On the 20th April, Mr. Robert Hart, Inspector-General of Customs, arrived at Tientsin from Peking, and is staying at the residence of the Commissioner of Customs. Since his arrival, he has visited Li Hung-chang. It is stated that he will remain for some days to transact business with that official.

SHANGHAI.

The present mail brings advices from this port to the 2nd May; the French mail from London, March 12, was received on the 29th April. The following summary of news is from the *North China Herald*:—

A meeting of shareholders in the Gas Company has been held. The accounts showed a net profit of Tls. 23,120. A dividend has been declared at the rate of 11 per cent. A new gas-holder which is in course of erection constitutes a present drain upon the funds, as its cost is being met out of income; hence the reduction of 1 per cent. from the usual rate of dividend. A slight increase has taken place in the quantity of gas consumed. Sir E. Hornby and Messrs. Purdon, Hogg, and Hitch were re-elected directors. The fee to the Chairman for attending directors' meetings was raised to Tls. 20; that to the other directors remaining at Tls. 10 as before.

The adjourned meeting of shareholders in the Shanghai and Hongkew Wharf Company has been held, to receive amended proposals with reference to the amalgamation of Hunt's and Heard's wharves with the Hongkew wharf. After two amendments had been rejected the original motion for the amalgamation was carried, subject to the alteration of certain articles of the deed of settlement of the Hongkew Wharf Company, to be submitted and approved of by another meeting, of which thirty days' notice must be given.

An extraordinary meeting of members of the Shanghai Race Club has been held, Mr. C. J. King in the chair. The meeting was called in accordance with a resolution passed at the annual meeting, to take into consideration the correspondence between the Club and the Recreation Fund Trustees. The following resolution, proposed by the Chairman, and seconded by Mr. F. D. Hitch, was carried unanimously:—

That the secretary of the Shanghai Race Club shall address the chairman of the Trustees of the Recreation Fund, to the effect that the members of the Shanghai Race Club respectfully decline the proposals contained in his letter to Mr. John Dent, of the 18th of August, 1874; as the club is desirous of reserving its independent action in the purchase of the privately held shares in the race course, as well as to retain the control of the race course and the grand stand enclosures in the hands of the appointed officers.

Dr. Williams has issued a circular to the Protestant missionaries in China, inviting their attention to Rule X. of the Regulations for the Philadelphia Exhibition, and suggesting that they should interest themselves under it. Department X. under this rule is for "objects illustrating efforts for the improvement of the physical, intellectual, and moral condition of man," and is subdivided again into separate groups, of which one, headed "Religious organisations and systems," is an appropriate place for a missionary collection. Mr. Drew has suggested that a collection be made of everything which will form a full representation of the benevolent work done in China by Protestant missionaries since the arrival of Robert Morrison at Canton in 1807; and Dr. Williams thinks such an exhibition would be full of attraction and instruction to the people of the United States. The collection would of course comprise books written or translated by missionaries; statistics of number of missionaries engaged now and from the beginning; number of churches, of communicants, missionary schools, hospitals, &c. The proposal is a new one, and no doubt a collection of seventy years' work would make a formidable display. Dr. Williams suggests that the missionaries at the several stations should hold meetings, apportion the work of collecting, and appoint some one to correspond with a general committee which has been formed at Shanghai.

A case of considerable local interest has been heard at the Supreme Court. The parties were Butterfield and Swire *v.* Little and Co. The plaintiffs claimed a sum of about £60, as the difference between the amount of freight paid by them to the defendants in July last, for teas shipped on board the s.s. *Pleiades*, and what the freight would have amounted to at rates paid subsequently by other parties for teas shipped by the same steamer; alleging that it is a custom of universal practice in Shanghai to make a return of such difference to the shipper, in case cargo is subsequently taken at a rate lower than that first fixed. The defendants denied the existence of any such established custom. At the close of the first day's proceedings, the Court intimated that the evidence adduced in support of alleged custom did not satisfy it, and the plaintiffs decided, after consideration, to submit to a nonsuit.

The Chief Judge has given an important decision in regard to the proceedings of lekin runners in the Settlement, on a rehearing of the case Walker *v.* Malcolm, which was tried before the magistrate on the 5th April. Sir Edmund Hornby holds that the treaty, while giving free right to the Chinese to deal with opium as they choose, on its passage into the interior, does not give them a right to levy any tax beyond the import duty while it is still in the "port"; and, while not defining the port, implies that it has certainly not left the port while it is in the town of Shanghai. We argued to this effect in writing on the subject in the *N.-C Herald* of the 25th February last, and are glad to find our opinion confirmed. The purport of the Chief Judge's decision is of course that the action of the opium runners is illegal, and should be opposed by the Foreign Representatives.

We fancy our Tientsin correspondent has arrived at a right conclusion, though from somewhat mistaken premises, in blaming so severely as he has done the appointment of Sung Pao-hwa to the Yunnan Commission. Sung Pao-hwa is not a member of the Commission, nor will he take a part in the business of inquiry. He is only going as escort to the delegates sent by Mr. Wade. Even for this office, however, we do not hesitate to say that he is an unsuitable person. The escort of a man so small in rank is directly calculated to lower the importance of the mission in the eyes of the Chinese, and our effort should be to give it every importance that circumstance can invest it with. The appointment should be insisted on of a special commissioner ranking at least as high as a Taoutai, and nominated by the Tsung li-yamen instead of by the Viceroy of Chihli. It is all very well to recognise Li Hung-chang as Commissioner of Foreign Affairs in matters of routine, but he should be allowed no independent say in such a matter as this. The official appointed to escort the foreign delegates should be appointed directly by the Government, so that the officials and people along the route may know his mission emanates from the Court itself.

The account which has reached us from Burmah, of the attack on Colonel Browne's party removes any possible surmise that it had the character of a riot. The whole affair was clearly premeditated, and comes home more closely than ever to the Governor of Momein. As we had learned before, Mr. Margary had gone on ahead of his party to try to overcome some opposition which was shown. He seems to have been persuaded that he had done so, and sent back word to Colonel Browne to that effect. We learn from the *Rangoon Gazette* that this messenger returned to Mr. Margary after delivering his message, and was one of those killed. A groom only seems to have escaped; and it is from him, we presume, that the information comes that Mr. Margary was speared while mounting his horse in response to the Tsaubwah's invitation to visit some hot springs in the neighbourhood. His head was carried to Momein and exposed on the walls of that city. In the meantime, Colonel Browne's party, deceived by the deception practised on Margary, was advancing into the trap. He also rode on ahead, and was politely received; while the attacking party were gathering round. It soon became evident, however, that treachery was intended, and the timely arrival of his escort appears to have been his salvation. They commenced a retreat, were at once attacked, and a brisk fight ensued, during

Digitized by Google

which a leader of the assailants, wearing a Chinese military mandarin's uniform, was shot.

It is disappointing to learn from Reuter's telegram that the Government are still awaiting further information in regard to the case. We had hoped that sufficiently full details would have long since reached them by telegrams from Calcutta to enable them to see their way clearly. That they may elect to wait for a detailed report before taking into their own hands measures to punish offenders we can understand. But they must know enough to be able to tell Parliament what investigatory steps are to be taken; or are they awaiting the result of Colonel Browne's conference with Mr. Wade? The delay in the arrival of the *Gvalior* is doubly unfortunate, as he and Mr. Allen are on board.

The steamer *Ocean* has been arrested at the suit of the owners of the *Fusing*, for the sum of Tls. 200,000, at which the latter have laid a claim for damages sustained by the collision. We hear that there has been a good deal of difficulty as to the form in which this claim should be raised. The Chinese claimed that it should be tried before the Consul and Taoutai under Art. XVII. of the Treaty of Tientsin. But the difficulty then arose that the Consular, or Mixed, Court so constituted is said to have no power of arresting the steamer. The C.M.S.N. Company appear to have ultimately resolved on trying the case before the Supreme Court. The Chinese take immense interest in the case, from the fact that a number of mandarins were drowned by the accident, and are said to be seriously inclined to treat the accident as a set-off against the murder of Mr. Margary in Yunnan! averring that damages may be as reasonably claimed for the (accidental) death of so many mandarins, as for the (wilful) murder of a British official.

We regret to hear of another death by drowning in the Hwangpoo. The steamer *Yung Ning* had arrived from Hankow, and was being berthed alongside the C.M.S.N. Company's wharf, when Mr. W. H. Stanley, the chief officer, who was on the pontoon superintending the mooring of the vessel, walked over the end in the darkness, and before any assistance could be rendered him was sucked under by the strong ebb tide running, and drowned. Mr. Stanley was an old resident in Shanghai, and was much respected, both by his shipmates and employers. This death would have been prevented had there been any protection round the pontoons, and we trust that measures will be at once taken to erect guards.

The body of a Chinaman has been found lying on the Pootung shore. The body had been some time in the water, and was much cut about the head. It is supposed to be that of the sampan man missing from a boat found by the police on the river, unoccupied, a short time ago. The body, which was almost past identification, has been handed over to the Lifeboat Association. A Chinaman has committed suicide by cutting his throat with a chopper, in the suburbs of the French Concession.

A special meeting of land renters was held at Chinkiang on the 24th April, to discuss the question of repairing the Bund. A professional survey had been had, and it appeared that the river was eating in seriously into the bank. Mr. Kingsmill advised sinking vessels loaded with stone for a distance of 800 feet along the foreshore, as a foundation for the necessary works. The Chinese authorities wish the Foreign Community to share the expense of the works. The latter decline. Temporary repairs to the Concession Bund will be made at the discretion of the Council.

The Shanghai Taoutai has issued a Circular to the native merchants here, very much in the sense of the Customs' Taoutai's late effort at Tientsin; and we are told that it has been similarly met—by a threat to close business unless it is withdrawn; but for this we cannot vouch.

The Viceroy of Nanking is expected here, to inspect the Arsenal. A number of soldiers, intended, we believe, as his guard, have been encamped on the bank of the Soochow creek, and have made themselves a nuisance by crowding into the gardens of foreign bungalows there.

Admiral Ryder has reviewed a large body of seamen and marines from the British men-of-war in harbour on the Race Course. It is understood that Admiral Ryder intends going up to Hankow shortly with the *Vigilant* and *Modeste*. We hope that he will go on to Ichang. It will do the Chinese good to see the British flag some distance up the Yangtsze.

M. Godeaux, Consul-General for France, has left for Europe on furlough. He is replaced temporarily by M. Lemaire until the arrival of Count de Chappedelaine.

A torch-light procession of the Fire Brigade has been held, and came off successfully.

ATTACK UPON FOREIGNERS NEAR QUINSAN.

A serious attack has been made on some foreign sportsmen in the neighbourhood of Quinsan. The *Herald* gives the subjoined particulars of the affair:—

Mr. W. Cooper and Mr. F. M. Hague had gone up on a shooting excursion, and in shooting at a snipe Mr. Cooper unfortunately wounded a Chinaman. The latter was hidden among some barley, weeding or doing something of the kind, and must have risen as the shots passed him. He was, however, very slightly hurt, only a few pellets having struck his face and shoulder, which they barely entered skin deep. Mr. Cooper took him back to the boat, dressed the hurt, gave him some money, and sent him away contented. Shortly afterwards, however, he was carried back by a crowd, who demanded $50, and would listen to no other proposal. Mr. Cooper offered to go with them to the magistrate at Quinsan, or Shanghai, but they would listen to nothing but $50. He had not sufficient money, but to pacify them promised to obtain it, if a foreign boat came by; they cut the sail rope and eventually went away, but a large boat containing some twenty men armed with cutlasses and matchlocks remained alongside, and stayed the night to prevent the foreigners moving. This boat went away at 5 A.M., and shortly afterwards the Tepao came down and renewed the request for $50. Not having it the foreigners could not give it, and pushed off into mid channel out of the way of the people who were beginning to assemble. The Tepao shouted that he could not get the money, and the crowd ordered the lowdah to put in shore. He instead tried to scull away—the damage done to the ropes prevented sailing—when the people got into little boats, boarded the house boat, took forcible possession, and brought her ashore. They knocked the lowdah overboard and struck him severely while he was in the water. They tried to drag Mr. Cooper out of the cabin, having run ropes with nooses at the end over the house, with the object of strangling him if they could get one over his head. Planting his foot against the steps, however, he was able to resist their efforts for a time, Mr. Hague in the meantime guarding the back entrance.

How all this would have ended can be easily surmised. Two men could not long resist such a crowd. But there was fortunately another houseboat about two miles off, and Mr. Cooper had sent off two coolies to alarm the occupants at the beginning of the row. The latter had, however, heard the yelling, and joining two foreigners from another boat which passed during the riot, the four set out with several of their coolies (fortunately dressed in European sailors' dress, which imposed on the crowd), all armed with guns, to the rescue. Directly on their approach the crowd dispersed. Two of the latter, however, were arrested; and hereupon a general alarm was sounded with gongs throughout the neighbourhood; and another threatening advance was made. Two other foreign boats, however, had come up in the meantime, and the foreigners were now strong enough to land whereon the Chinese appear to have thought discretion the better part of valour, and held back. The prisoners were shipped; and the whole party went on board, leaving the houseboat which had been the first object of attack in a wrecked condition, on the spot. The denouement upset the calculations of the Chinese terribly. Instead of murdering a foreigner, they had lost two of their own number, who were likely to be punished severely, and instead of $50 they had a boat which they had themselves smashed left on their hands as evidence of their guilt. The Tepao sent messengers along the banks for two miles, asking to exchange the boat for the prisoners; but the offer was declined. Two of the boats, which were bound for Shanghai, returned by way of Tsingpoo, and the others pursued their excursion to the Si-ta lake. The former has arrived in Shanghai, and the prisoners were handed over. The matter has been placed in the hands of H.B.M. Consul.

HONG KONG.

Our advices by the present mail extend to the 8th May; the French mail from London March 26 was received on the 6th May. The following items of intelligence are from the *China Mail*:—

At the Police Magistrates' Court on the 4th May, Mr. A. F. Chambers, clerk at Messrs. Jardine, Matheson and Co.'s, who had been arrested on a warrant issued on the information of the Hon. James Whittall, was charged with embezzlement. The charges were as follow:—(1) With unlawfully obtaining the sum of $43,000 or thereabouts, the money of complainant (the Hon. J. Whittall), during July 1873, and at different times thereafter; and (2) with feloniously embezzling at various times during 1873, 1874, and 1875, the sum of $17,850 the property of Messrs. Jardine, Matheson and Co., managers of the Canton Insurance Company. After the evidence had been taken, the defendant was committed for trial at the Supreme Court on both charges. Bail was refused.

The returns of births and deaths for the first quarter of 1875, forwarded by the Acting Registrar-General, are published in the *Gazette*. He says:—"During that period a total of 411 births and 694 deaths has been registered in Victoria and the four districts of Shau-ki, Wan, Stanley, Aberdeen, and Kowloon. Of this number, 35 births, being those of 20 boys and 15 girls, occurred amongst persons other than Chinese. The deaths in this class number 39, of whom 15 were non-residents. The death rate for the quarter amongst the British and foreign community is 24·29, and amongst the Chinese 22·67 annually for every thousand persons living. For the whole population of the colony the rate is 22·85 for every thousand persons. If the deaths of the non-residents be deducted, the death rate of the resident British and foreign community is only 20·91 for every thousand annually."

A large number of our readers will observe with sincere regret the news by telegraph of the death of Mr. George B. Falconer. The fact that he has been taken away within three weeks of his wedding-day will increase the regret on the part of his more personal friends. But Mr. Falconer, by his long residence here and his intimate identification with the commercial and other interests of the Colony, had come to be regarded as one of the most enthusiastic and staunchest members of the community. His sudden death will sever many a link in the older associations of Hong Kong, though he has been cut off at his prime, and his

Digitized by Google

absence will leave a blank amongst the fast-thinning ranks of our older residents.

A very pleasant theatrical performance has been given on board H.M.S. *Princess Charlotte*, the pieces chosen being *Mrs. Green's Snug Little Business* and the long established favourite *Box and Cox*. The stage was most tastefully got up, and everything went off most satisfactorily. Mrs. Green was scarcely audible enough, but looked and acted her part to perfection. Rapps, the policeman, was admirable, and Joe, Mrs. Green's "boy," was as mischievous a young scamp as could be desired. The other parts were very fairly taken. *Box and Cox* was, however, a far more complete success, Mrs. Bouncer, the Printer and Hatter being as perfect actors as are often seen on amateur boards. Altogether the troup may be congratulated on their success, and we regret that space does not permit us a longer notice. The band of the *Audacious* performed in capital style during the evening.

On the 15th May any wealthy resident, desirous of benefiting a public institution, of vindicating a local appreciation of art, and of perpetuating his name in "imperishable marble" in our local collection, will have a chance afforded him. A costly life-size statue of Venus in white marble will be sold at the auction of Messrs. Heard and Co.'s furniture on the day named. The City Hall has no funds wherewith to secure it for the building, but it is to be hoped that some one of sufficient generosity will be found to present it to the institution.

A Chinese soldier has been paraded through the streets of Canton with a cangue on his neck. He was ascertained to have been a member of the Viceroy's body guard. The culprit was found to have been tyrannising over peaceable hawkers and using violence to them, thinking no doubt that his position as the guard of the highest mandarin in the Province would secure him from consequences. But he was mistaken, for when H.E. heard of his peccadilloes, he ordered him to be taken before the Namhoi magistrate at once, who ordered him to be flogged 150 blows, and to be paraded through the streets with a cangue, as a warning to the other soldiers.

Mr. F. W. Mitchell left per *Brisbane* on the 24th April, and Mr. A. Lister commences his duties as Postmaster-General. The colony has lost a very efficient public servant in Mr. Mitchell, but Mr. Lister will, it may be hoped, prove a capable successor. Experience of course goes for something, and in this Mr. Lister will necessarily improve day by day. Meantime his past career justifies every hope that his appointment will prove a benefit to the colony.

A very interesting case, Chun Chew *v.* Emil Vogel, has been brought before the Courts. Plaintiff sues for damages for false imprisonment at Canton. It is probable that further proceedings will arise in connection with the action.

Mr. H. Nicaise (manager at this port of the Borneo Company, Limited,) has joined the Board of the Hong Kong and Shanghai Banking Corporation.

The sale of Messrs. Augustine Heard and Co.'s furniture is announced for Saturday, the 8th May.

The subjoined items of intelligence are from the *Overland Trade Report*:—

A meeting of the shareholders of the Victoria Fire Insurance Company of Hong Kong (Limited), called by circular, was held yesterday to provide for the future management of the company. It lasted only a few minutes, and, on the motion of the chairman, was adjourned *sine die*, it being agreed that the directors should continue to work the office until the extraordinary meeting, called for the 24th inst., for the purpose of winding up the company.

The steamer *Killarney* (Captain H. O'Neill) has made a remarkably quick voyage to Singapore, Saigon and back. She was chartered by Mr. Hop Kee, and left Hong Kong on the 5th April, at 3 P.M., for Singapore, with 560 passengers and 1,500 tons cargo on board, and arrived at that port at 7 A.M. on the 11th, achieving the passage in five days thirteen hours. She left Singapore on the 13th at 3 P.M., arrived at Saigon at 8 A.M. on the 16th, left that port at noon on the 19th, with 32,000 piculs of rice and 50 passengers on board, and anchored in Hong Kong at 11 P.M. of the 23rd, making the voyage in 18 days 9 hours. She had light winds down to Singapore, and fresh northerly winds from Saigon to this port.

An inspection of the troops in garrison at Foochow was appointed to take place on or about the 25th April, but did not come off—owing to the official mourning consequent on the death of the late Emperor's widow. A further period of twenty-seven days' mourning is now ordained.

The s.s. *Hailoong* having been chartered by the Chinese Government to convey 1,500 troops from Foochow to Taiwanfoo, sailed on the 28th April with the last batch—in completion of her charter.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 15th May; the French mail from London 9th April was received on the 8th May, and the following P. and O. mail of 16th April arrived out on the 15th May. The following summary of news is from the *Straits Times*:—

The prolonged session of the Legislative Council, which began early in 1874, was formally closed on the 7th May at the Town Hall, at which, after Sir Andrew Clarke's closing speech, he was presented with an address by the members of the Council. The last Bill passed was that for the protection of Indian immigrants, as amended to suit the views of the Indian Government. In order that the Province Wellesley planting interest, which will be mainly affected by this law, might be represented in the Council during its consideration, advantage was taken of the presence here of Mr. J. M. B. Vermont to invite him temporarily to accept the vacant seat for Penang in the Council, and give the n the benefit of his experience in regard to coolies and the pro'bable working of the law.

At the meeting of Council on the 6th May, the report of the Select Committee of officials and merchants recently appointed to inquire into the working of the civil Establishments was presented, but its consideration was deferred till the ensuing session. It appears that the duty assigned to the Committee was merely to examine into the capacity and claims for advancement of the Government clerks, who have petitioned for increase of salaries. It was generally supposed their inquiries would extend to the heads of departments as well, so far as the alleged increased cost of living is concerned, and that the nature of the work and the system of conducting business would be keenly scrutinised, and suggestions offered whereby it might be simplified. The Report does not enter into these questions at all, but merely recommends some few changes in the clerical department, of no public interest or importance. As a great deal more was expected from the Committee, the report has been productive of no little disappointment. The Council have given effect to the representations of the unofficial Justices, and voted the employment of a second Police Magistrate, whereby the Bench of Justices will be relieved from further police-court duty, which was a serious draft upon their time, and often occasioned much inconvenience.

Sir William Jervois, the new Governor of this colony, arrived by the French mail steamer on the 8th May, and was sworn in by the Chief Justice at the Town Hall on the 10th. The ceremony, at which the community were fully represented, was presided over by Sir Andrew Clarke until Sir William Jervois' commission had been read, when he vacated the chair in favour of his successor. After the oaths had been administered, the new and the retiring Governors were lustily cheered, and Sir William Jervois, thanking the public for the warm reception given him, promised to use his best endeavours worthily to follow in the footsteps of his predecessor in office,—an assurance that was received with much satisfaction. His Excellency in a *Government Gazette* Extraordinary published the same day issued a notification desiring that all the honours due to Governors of colonies continue to be paid to Sir Andrew Clarke during his stay in the colony, in all respects as if he still continued to be Governor.

The Hon. C. B. Plunket has been appointed Acting Lieutenant-Governor of Malacca, and has proceeded to that Settlement in the *Pluto*. Captain Dunlop is appointed Inspector-General of Police. Captain B. Douglas, R.N.R., is appointed Second Police Magistrate, though still sitting in the first police court in place of Captain Walshe, absent on leave. The Rev. J. Aberigh Mackay is appointed Acting Chaplain of Penang, and Mr. Edward Sinclair to be a Justice of the Peace and Magistrate of Police and Coroner for Province Wellesley. Mr. C. Baumgarten, for more than eighteen years Registrar of the Sugreme Court, has resigned, and gone into private practice. Mr. C. E. Velge, late Deputy Registrar, is appointed Registrar, and Mr. J. C. Mitchell, Senior Sworn Clerk, has been appointed Deputy Registrar.

The grievances of the Malacca resident tenants of Government land and the Malay woodcutters, who petitioned Sir Andrew Clarke against indiscriminate taxation and unfair valuation by the Land Revenue Collectors, have been adjusted, by abolishing the system of tenths on land to which the tenants can prove a prescriptive right, and permitting them to obtain renewable twenty years' leases on payment of a merely nominal fee; and allowing the woodcutters to cut wood for their houses, fences, and fuel free of charge, on condition of their reserving valuable timber and fruit trees. The Dinding territory ceded at Pulo Pangkor by the Sultan of Perak in January last has, by proclamation of Sir Andrew Clarke, been annexed to Province Wellesley.

Sir William Jervois, as if to lose no time in following in the footsteps of Sir Andrew Clarke with respect to his dealings with the Native States, has despatched Mr. Swettenham to visit the Bandahara of Pahang, and invite him to Singapore to attend a conference at which the boundaries of the Native States may be definitely settled. This is a question of great importance, the early adjustment of which may prevent serious misunderstandings, and will remove a fruitful source of disagreement between some of the native rulers.

The great prison mutiny murder trial, has been concluded. There were forty-two prisoners in all, arraigned upon two indictments for the murder of Henry Digby Dent, Superintendent of Prisons, on the 13th February last, during the mutiny in the criminal prison. At the outset eleven of the prisoners pleaded guilty, each in turn declaring he had wilfully

Digitized by Google

done the deed. The other thirty-one were put upon their trial before a special jury, who found seven of them guilty on the capital charge, eleven guilty on the lesser counts of the indictment, and acquitted thirteen. The eleven who pleaded guilty and the seven found guilty by the jury were sentenced to death, the other prisoners were remanded until the 17th May, when sentence will be passed upon them.

Commercial Report.

(For dates see first page.)

IMPORTS.

TIENTSIN.—Latest advices report a fair general business at somewhat unprofitable rates, but T-Cloths and English Sheetings are said to leave a margin on Shanghai prices.

HANKOW.—The market for Grey Cottons had been active, but the demand for Fancy Cottons and Woollens was slight.

CHINKIANG.—Messrs. Spencer and Wolff write on the 28th April :—We have again to report a most unsatisfactory week; business in Cotton Goods has been almost entirely suspended, and, although we have advices from Shanghai of an improved tone existing there, our market remains dull and inanimate.

SHANGHAI.—Cottons: There had been a fair amount of business in Plain Cottons during the fortnight, and where any change had taken place in price it had been in advance of last quotations. 7 lbs. and 8¼ lbs. Grey Shirtings had been sold to a moderate extent at firmer rates, one parcel of 1,000 pieces of the best goods of the latter weight bringing Tls. 2; Heavy Shirtings were freely enquired for at an advance of about 5 candareens. White Shirtings: The stock of good 72 reed being small, an advance of 5 cands. had occurred in this quality. In common chops there had been little change, with a small business. English Drills: There had been an active demand for these goods at about previous rates, the market closing strong. English Jeans: Small business. English Sheetings: Stock nearly exhausted, readily saleable. Dutch Drills: Limited business at former prices. T-Cloths: Ordinary 6 lbs. T-Cloths would be easy of sale if in stock; ordinary 7 lbs. had improved, with good enquiry; some purchases for arrival were reported at 3 to 4 cands. below current rates. 6 lbs. Mexicans were not much sought after, but ordinary 7 lbs. Mexicans were in request at rather firmer rates. 8 to 8¼ lbs. goods were also quoted at an advance. In Fancy Cottons there was little alteration. Woollens and Worsteds.—Rather more enquiry reported. The market for Long Ells, though quiet, had shown a fair business. English Camlets were 1 to 2 mace higher. A large business had been done in Figured Orleans, without establishing any change in rates.

HONG KONG.—The arrivals during the interval, besides mail steamers, had been the s.s. Russia, Deucalion, and Glenearn, bringing full supplies of manufactured goods for this market and the north. There had been very little change in the market. Most of the dealers had returned from the country, but they showed no anxiety to resume business, and complained of the difficulty they experienced in moving their late purchases. What little inquiry existed was still confined to the low makes of both Shirtings and T-Cloths, stocks of which were in moderate compass, and importers were in consequence firm in their demands.

CANTON.—Lead of ordinary brand had been sold at $8.35 for cargo on the spot, and $8.20 for arrival. W.B. was quoted $8.40 to 8.45 per picul.—Quicksilver was declining in value, and there were no buyers at $130 per picul.

BATAVIA.—The market had continued very quiet, and there were no signs of a revival of activity.

SINGAPORE.—The market had remained extremely inactive during the fortnight—a general dullness had prevailed, greater than had been experienced for some months past; prices of Cotton manufactures were lower, and had a declining tendency; holders were less firm in consequence of the limited demand, and influenced by drooping values in Manchester.

PENANG.—The business of the fortnight had been small and prices showed little, if any, alteration. In Grey Goods 6 lbs. and 7 lbs. T-Cloths were the only staples which had been in any demand. White goods were very dull and business had been trifling at unchanged rates.

EXPORTS.

TEA.

HANKOW.—Advices from the nearest districts speak of picking being general, under favourable circumstances, the weather being fine and everything that could be desired. In Yeong Lan Toong, Yeong Lan See and Sung Yang purchases of new leaf had been made at a reduction of about 10 per cent. on last year's prices. Quality of the new Tea from all these districts was spoken of as being very good. Musters were expected to be received from the country about the 11th or 12th May—two or three days earlier than had hitherto been expected.

SHANGHAI.—Black: The market was closed for the season. Green: The only transaction during the fortnight had been the settlement of 305 half-chests common Moyune at Tls. 18. The stock consisted of 242 half-chests country tea, 1,268 half-chests Pingsuey, and 454 half-chests local packed.

FOOCHOW.—Messrs. Olyphant and Co.'s Circular says:—Picking of the new crop Tea-leaf has been going on actively for the greater part of the past fortnight, and from some of the nearer districts we hear of the opening of the markets. The prices paid for first pickings of Congou leaf average, according to the native reports, about two taels above last year's cost; in the case of Scented Tea leaf rates show similar advance; but Oolong leaf is said to have been bought at a reduction of some two taels. Up to the time of the despatch of these reports from the country the weather was reported as favourable, but in the Pakling district, in the immediate neighbourhood of Foochow, there has been rain for several days past. The market there has not been opened, though a small amount of leaf has already come into the city for preparation as "contract" chops. In our next advices we shall doubtless report the opening of the markets in those districts from which no news has yet been received. The quality of the leaf has been spoken of by natives as good, but the weather which may have prevailed since country advices were written will have had much influence on the outturn. We hope to hear later that it has been favourable. Statistics of New Season's Congous (contracts included) season 1874 to 1875 :—

	chests.		chests.
Arrivals...	738,500	To same date last season...	645,200
Settlements	736,275	„ „ ...	644,009

Of Ooloong :—

	half-chests.		half-chests.
Arrivals...	104,000	To same date last season...	123,170
Settlements	104,000	„ „ ...	123,170

CANTON.—Messrs. Deacon and Co.'s Report says: In continuing our Tea advices from the 22nd April, we have now to announce the opening of the new season for Scented Teas, and the prices for the few purchases made on market are, if correctly reported, much above what would appear to be warranted by the intrinsic merit of the Teas, keeping in view the present currency in London for such descriptions. As far as an opinion can be formed from the various musters shown on market, the present crop of Scented Teas is decidedly inferior. The Orange Pekoes are in every respect deficient in merit, and there is an undoubted scarcity of fine. Capers are nearly all more or less mixed with old leaf, wanting in scent, and in appearance and style very defective. The weather for the past ten days has been very unfavourable for the scenting flower, and subsequent musters may in course show an improvement in the scenting. Congous: A few small settlements have been made, chiefly in fair to medium class, at about Tls. 20 per picul, being a slight decline. From Macao shipments continue to go forward to some extent, and prices are much the same as last mail. Scented Teas: Orange Pekoes have been purchased at Tls. 25 to 30 per picul for medium to fine long leaf, and up to Tls. 18 for "new make" sorts with rather broken stalky leaf. For Capers extravagantly high prices are said to have been paid, say Tls. 25 for medium quality, nearly half old leaf, with scarcely any scent, but such a basis of value cannot be maintained. The bulk of the settlements given below is composed of Contract Teas, so with such a small business the range of prices can scarcely yet be said to be established. The following is a summary of the fortnight's business: Congou, 2,500 boxes, at Tls. 20 to 27 per picul; Scented Orange Pekoe, 5,300 boxes, at Tls. 16 to 30; Scented Caper, 4,500 boxes, at Tls. 23 to 26; Young Hyson, 500 packages, at Tls. 11 to 12; Pouchong, 200 half-chests, at Tls. 13.

AMOY.—The native teamen had gone up country to make purchases, and it was stated that the prices paid had been from $6 to $8 per picul under last year's rates for fine Oolongs, and $2 to $2½ per picul for Congou. The crop it was stated on native authority would be a good one, as the weather had been favourable for the growth of the leaf, and also for the picking and firing operations. There would probably be a very small crop of Ooloong, but a larger one of Congous than last season.

SWATOW.—Reports from the interior about the new crop were favourable, and in about a fortnight the first musters of Green Tea would be brought down.

TELEGRAMS FROM THE FAR EAST.

ENCOUNTER WITH PIRATES.

SINGAPORE, JUNE 11.—The Austrian corvette *Erzherzog Friederich* had an encounter on the 7th of May with Dajak pirates in the Timboku river. Two of the Austrian crew were killed and one severely wounded.

SIR DOUGLAS FORSYTH'S MISSION.

RANGOON, JUNE 14.—The British mission, under Sir Douglas Forsyth, has arrived at Mandalay. No official information has been received with regard to its reception, or the result of the negotiations.

MANDALAY, JUNE 15.—The King of Burmah received Sir Douglas Forsyth and the members of the Burmah mission with full State ceremony in this city to-day.

THE LATE GOVERNOR OF SINGAPORE.

SIMLA, JUNE 15.—Sir Andrew Clarke took his seat in the Governor-General's Council to-day as member for the Public Works Department.

SEIZURE OF A BRITISH STEAMER.

HONG KONG JUNE 15.—It is reported that the *Carisbrooke* (British trading steamer), bound from Singapore to Hong Kong, with a general cargo and native passengers, has been seized and taken into Canton by Chinese Custom House authorities, being suspected of carrying on a contraband trade with Hainan.

HONG KONG, JUNE 17.—The news of a Chinese gunboat having fired upon and seized the steamer *Carisbrooke*, on suspicion of being engaged in smuggling, is confirmed.

REPORTED MOVEMENTS OF CHINESE TROOPS.

RANGOON, JUNE 18.—Reports have reached this place that large numbers of Chinese troops are being concentrated at Manwyne.

DISTURBANCES AT CHINKIANG.

SHANGHAI, JUNE 18.—Some native soldiers at Chinkiang having insulted the American Consul and his wife, two of them were arrested, and temporarily confined in the British Consulate, which was shortly surrounded by Chinese soldiers and a mob, endeavouring to force the release of the prisoners. The foreign residents at once proceeded to the Consulate to assist in repelling the assault. The Chinese authorities, however, ultimately succeeded in quieting the mob. The British and American Consuls have left Shanghai for Chinkiang. The British corvette *Thalia* and the American war vessel *Palos* follow.

RANGOON, JUNE 19.—The negotiations at Mandalay between Sir Douglas Forsyth and the King of Burmah are proceeding quietly. Nothing is yet known of the result.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—June 16, at New York, from Shanghai, Northampton; at Antwerp, from Maulmain, Gladys (str.); 18, at New York, from Manila, Lizzie H. Babson; from Singapore, Verona; 21, at London, from Singapore, St. Aubin; 19, at New York, from Manila, Hamilton, from Batavia, Dahlkarlsa.

DEPARTURES.—June 17, from London, for Yokohama, Cathaya; 15, from Greenock, for Anjer, Crested Wave; 17, from Liverpool, for Hong Kong, Eastern Monarch; from Cardiff, for Singapore, Queen of the Age; from Cardiff, for Galle, Unison; 18, from London, for Yokohama, Cathaya; from Cardiff, for Singapore, St. Bernard; for Java, Reichstag; 19, from Liverpool, for Singapore, Estrella de Chile; 17, from Greenock, for Rangoon, Martaban (str.); from Liverpool, for Hong Kong, Beemah.

LAID ON.—At London, for Hong Kong, Gryfe, Marina; for Penang, Lorne (str.).

SPOKEN.—Johannes, from Amsterdam, to Batavia, June 1, 23 N., 22.59 W.; Rona, from Liverpool, to Manila, 49.20 N., 6.50 W.

MISCELLANEOUS.—Manila, June 8: The wreck of the Camiguin (str.) has been sold for $1,501. Malta, June 13: Passed, Madura (str.), from Batavia, for Nieuwe Diep. Port Said, June 18: Arrived, Menelaus, from Liverpool, for China. Suez, arrived June 13: Conrad, from Batavia, for Nieuwe Diep.

MISCELLANEOUS.—Suez, arrived June 20, Nestor, from Shanghai for London; 21, Glenartney, from Shanghai for London.

THE MAILS.

PRESENT INWARD MAIL.—BRINDISI, JUNE 18.—The P. and O. Company's steamer Malta, with the homeward India, and China mail, arrived at 2.30, and the mail left at 5.30 P.M. for London.

NEXT INWARD MAIL.—SUEZ, JUNE 15.—The Messageries Maritimes Company's steamer Sindh, with the inward French mails from China and Japan, left here to-day for Port Said and Marseilles, at which latter port she may be looked for on the 23rd inst.

INWARD MAIL DUE JULY 12.—GALLE, JUNE 15.—The Messageries Maritimes Company's steamer Anadyr, with the inward French mails from China and Japan, left here to-day for Aden.

HEAVY PORTION OF NEXT OUTWARD P. AND O. MAIL.—SOUTHAMPTON, JUNE 18.—The P. and O. Company's steamship Pekin, Captain W. Woolcott, sailed to-day, with the heavy India and China mails, a full cargo, £147,873 in specie, and jewellery value £960. She takes out 50 passengers, and 25 proceed by the corresponding steamer from Venice and Brindisi, making a total of 75. The Pekin goes through the Suez Canal to Calcutta, passengers for Bombay changing ships at Suez.

OUTWARD MAIL OF MAY 21.—GALLE, JUNE 15.—The Messageries Maritimes steamer Hoogly, from Marseilles 23rd ult., left here to-day for Singapore.

LAST OUTWARD P. AND O. MAIL.—SUEZ, JUNE 18.—The P. and O. Company's steamers Delhi and the Hydaspes left at 11 A.M., for Bombay and Calcutta respectively.

DUTCH OUTWARD MAILS.—SOUTHAMPTON, JUNE 14.—The Java Company's steamship Holland, carrying Dutch mails, sailed to-day with passengers and a full cargo of general merchandise for Batavia, Samarang, and Sourabaya.—SOUTHAMPTON, JUNE 15.—The Nederland Steamship Company's steamer Koning der Nederlander sailed to-day for Penang, Batavia, &c., with a full cargo, 35 cabin passengers, 175 troops, and Dutch mails and specie.

Literature.

The Imperial Russian Geographical Society has had tidings of M. Miklucho Maklay, in the shape of a letter from that traveller dated Singapore, April 13. He states that his researches after a race of Papuan extraction in the Malay Peninsula lasted for two months, and at the outset, the rainy season being barely at an end, he was obliged to wade through inundated plains and forests, while he also suffered great discomfort from attacks of insects and reptiles. In the Semang type, a primitive and nomad race who are gradually disappearing before Malay and Chinese civilisation, M. Maklay considers he has clearly proved the existence of a non-Malayan element. He now proposes, after being absent from Russia for some years, to return thither for the purpose of publishing the results of his travels in New Guinea and other parts of the East Indies.

Naval and Military.

The work of completing the great ironclad ship Alexandra, in the basin at Chatham Dockyard, is making good progress. The armour-plates are being attached as rapidly as possible, the great sheers erected on the side of the basin being used for the purpose of lifting them into position. As soon as possible the vessel will be put into dock for her fitments to be completed. One of the large docks at the dockyard extension is being specially prepared for her use, and a tramway has been placed round it, on which will run two powerful cranes, to lift heavy weights to be placed in the ship.

The Channel Squadron, now in the Mediterranean, after an unusually protracted absence will return to England in the middle of July. The Agincourt and Northumberland, the two largest ironclads, will be paid off into reserve, their boilers, especially the Agincourt's, being quite unsound, and needing entirely new ones. The Monitor will then become Admiral Seymour's flagship, and the Black Prince that of Admiral Sir John Hay, and they will then, with the Monarch, Resistance, and Triumph go on a cruise round the coasts of Great Britain, calling at the chief ports.

To provide the troopships of the Navy with such boat accommodation as will approach that required by the Merchant Shipping Acts Amendment Bill, it has been decided to introduce on board the Orontes for trial a launching lifeboat bridge and an additional lifeboat 40 feet in length.

Lieut. James F. Bedford (1874) is appointed to the Audacious, on the China station, for surveying duties.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BRADBERY—On the 13th May, at Singapore, Mrs. Edward Bradbery, of a son.

DONNER—On the 17th June, at Champion hill, S.E., the wife of Julius Donner, of a son.

NICHOLL—On the 6th June, at Streatham, the wife of R. Corrington Nicholl, of a daughter.

SMITH—On the 13th May, at Singapore, the wife of W. Buchanan Smith, of a daughter.

MARRIAGES.

HORNBY—ROBERTS.—On the 29th April, at Trinity Church, Shanghai, by the Rev. Canon Butcher, Sir Edmund Hornby, Kt., Chief Judge of H.B. Majesty's Supreme Court for China and Japan, to Emily Augusta, eldest daughter of John P. Roberts.

TAYLOR—REID.—On 24th April, at St. John's Cathedral, Hong Kong, by the Rev. R. H. Kidd, Colonial Chaplain, Joseph Morison Taylor, of Shanghai, to Isabelle, only daughter of Captain David Reid, of Peterhead, Scotland.

DEATHS.

VANDERSPAR—On the 8th June, at Cambridge-terrace, Hyde-park, Henry Richard Vanderspar, of Galle.

THE WOOSUNG BAR.

(To the Editor of the *London and China Telegraph.*)

SIR,—I read in the *London and China Telegraph* of June 14, in your article on "Mr. Hart on the Woosung Bar and the Future of Shanghai," the following:—"His remarks on 'The Mouth of the Yangtsze' are the corner-stone of the superstructure which he afterwards builds up, and of them it will be sufficient to say, in brief, that they are mainly based upon an astounding blunder. How a man in Mr. Hart's position, and with all the means and appliances at his disposal, could have been betrayed into stating that the channel to the north and east of Tsung-ming Island, in the estuary of the Yangtsze, has of late been used occasionally, and is spoken of with growing approval, probably only Mr. Hart himself can explain, for, as a pure matter of fact, the channel is not navigable at all, except by small native craft! Surely the crass ignorance displayed on so vital a matter is of itself a good argument for the removal of the Inspectorate General of Customs from the cobwebs and intellectual fogs of Peking to the clearer and more practical atmosphere of Shanghai. It is, perhaps, needless to say that Mr. Hart blunders over a channel which does exist to the south of Tsung-ming Island, and which, in certain conditions of the tide, is sometimes used by steamers running between Shanghai and the northern ports. Having blocked up its present mouth to his own satisfaction, Mr. Hart proceeds to give us his views in regard to the Shanghai river, and they are of such a nature that if they were sound they would tend to depreciate very materially the value of property in Shanghai. Happily his views are not sound, and their fallacy is ably exposed in the counter-memorandum to which we have referred," &c.

Now, what will the writer of the above article think when he is told that there *is* a channel to the north and east of Tsung-ming Island in the estuary of the Yangtsze, *which has been of late used occasionally by foreign owned steamers.* Whether spoken of with growing approval or not I am not in a position to say. You are wrong in saying the channel is not navigable at all except by small native craft. *I have three times navigated (as passenger) the channel to the north and east of Tsung-ming Island*, and had in this channel about seven fathoms of water throughout, if my memory serves me aright. The channel was surveyed by the Harbour-master's Department, and by Captain Steele, of the *Manchu*, in Messrs. Russell and Co.'s employ (between Shanghai and the north ports). The Customs steamer was placed at the disposal of the surveyor. *A chart was made of the channel, and I was presented with a copy of this chart by the surveyors.* True, the whole river to the north and east of Tsung-ming was not surveyed, and as it is not buoyed one might get ashore on a shoal patch, as we did, but we got off with little or no difficulty on the rise of the tide.

The channel at the *end* of *Bush* Island I believe has been filled up for many a day; junks or small native vessels used to use this channel at the end of Bush Island many years ago, but when passing up or down of late I have not seen native vessels using it. The north bank is rapidly extending, and at no distant day there will be one continuous island from the head (north-west) of Tsung-ming and down to the entrance to the river.

Let us look at the changes we may expect to see at Hankow if the river is open up to Ichang, or above it; will not the cargo come direct by the river steamer? Look, again, at Tientsin; once it has got its coal and iron at work, it will increase rapidly in every way that tends to make a city and port great and powerful. The now closed ports during three months in winter may be made an *open* port all the year round, except may be during a short space of time in *extra* severe winters, which only numbers three out of the last fifteen years.

Foreigners need not blink these things—to those who reside in the country and watch affairs there they are plain. Changes *are* coming fast in many ways. It will be, ere long, *China for the Chinese*, and Li Hung Chang—notwithstanding his faults—seems to be the right man in the right place for carrying out these changes.—I am, Sir, your obedient servant,

OLD SHANGHAI.

Glasgow, June 14, 1875.

THE NEW SEASON'S TEA.

From advices relative to the new season's Congou we gather that the shipments to date reach over 40,000,000lb., and for the first month of the season will without doubt go over 50,000,000lbs. This enormous export, at prices equal to a range never exceeded (if telegraphic reports are true, that prices paid are the same as last year, which were the highest ever reached), is proof, by the willingness of the Chinese to sell, of the splendid profits they have realised, precluding all chance of profit to the buyers, for it is quite evident the day has passed for the high prices here of the past few seasons, due warning of which we gave in our issue of 22nd March. The heavy shipments reported indicate an increase in first crop leaf from Hankow of at least 5,000,000lbs., as it is well known that the Chinese are largely extending the area of cultivation near Kiu-kiang, that is, where the Ningchow Congou is produced, which has given such large returns to the producers, since Hankow was opened to foreign trade and enterprise. To save importers of the just 40,000,000lb. (new season's new make Congous are losing 8 to 12 per cent.) of country Congous, season 1875-76, from disastrous losses, there should be a total cessation of shipments, for it is simply impossible for those connected either with the selling or buying on this side to carry on the business with judgment or satisfaction to the owners of property, depreciated by the recklessness in which it has been eagerly competed for at the ports of shipment, and it is to be regretted that a magnificent trade, representing an annual value of over £12,000,000 sterling, should be carried on with such unsatisfactory results. The first steamer, either the *Glenartney* or *Bengal*, may be expected about 7th July.

PARLIAMENT.

—o—

OCEAN POSTAL CONTRACTS.

(June 15.) Mr. JOHN HOLMS asked the Postmaster General what ocean postal contracts are terminable in 1876, and if the requisite notice has been given for their conclusion; and, if so, whether, having regard to the fact that shipowners competent to enter upon such contracts must have time given to them for preparation, it is the intention of Her Majesty Government to call for tenders for the fulfilment of these services.—And, whether, seeing that steamers depart almost daily for the United States of America Her Majesty's Government are prepared to avail themselves, so far as practicable, of any eligible vessel, and give no further subsidies for the conveyance of mails to that country.

Lord J. MANNERS stated that three ocean postal contracts expired next year, and that the requisite notice had been given for their termination. The contracts for the carrying of mails between this country and the United States had still a considerable time to run. Before they expired the Government would consider whether any better arrangement than the existing one could be made; but at present it would be unwise to discuss the matter.

COOLIE LABOUR.

(15th.) Sir CHARLES DILKE asked the Under Secretary of State for Foreign Affairs whether Her Majesty's Government have received the recommendations made by the French Labour Laws Commissioners for securing more efficient protection to Indian coolies who are taken to Réunion, Guadaloupe, Martinique, and Cayenne; and, if so, whether there is any objection to lay upon the table a copy of such recommendations and of the draft of any new legislation on the subject which the French Government may have announced its intention to propose.

Mr. BOURKE said Her Majesty's Government have only received extracts affecting Indian emigration to the French colonies from the French Labour Laws Commission's Report, and there is no objection to laying these papers on the table of the House; but with regard to the draft of any new legislation which the French Government may propose on the subject, we have only got a "Projet de Loi," which may or may not become law, and which we have no objection also to lay on the table. Perhaps, therefore, the best course will be for the hon. gentleman to move for these papers, and if he will privately communicate with me I will arrange with him the form of the return.

NOTICES OF MOTIONS.

Mr. Mark Stewart.—To call attention to the evidence given before the East India Finance Committee, 1871, with reference to the Opium Traffic; and to move, that this House is of opinion that the Imperial policy regulating the Opiun traffic between India and China should be carefully considered by Her Majesty's Government with a view to the gradual withdrawal of the Government of India from the cultivation and manufacture of Opium.

Mr. John Holms.—Army and Navy Expenditure (Audit).—That, in the opinion of this House, in order to secure the due appropriation of army and navy expenditure to the purposes intended by Parliament, it is expedient that the system of independent audit which, since the passing of the Exchequer and Audit Departments Act, 1866, has been successfully applied to the accounts of the annual grants for the miscellaneous Civil Services, should be extended, in its leading principles, to the grants for Military and Naval Services.

Sir George Campbell.—East India (Military Service).—To call the attention of the House to the difficulties which must arise if a system adapted to this country is carried further without at the same time making adequate provision, in connection with the recruiting arrangements, for the Military Service of India and the distant colonies, in which the greater part of the Line of the British Army is employed; and to move a resolution.

Mr. Thomas Brassey.—On the Navy Estimates, to call attention to the altered conditions of naval warfare, and to the expediency of constructing armoured vessels of more moderate dimensions than those recently adopted; and to move the following resolutions:—"That the efficiency of our fleet for the protection of British interests abroad depends on the number no less than the individual power of our ships; and that for such services it is desirable to build many vessels of moderate speed rather than a few ships of extreme speed." "That, as it is impossible by means of armour to resist submarine attack or the fire of heavy guns, it is expedient to adopt more moderate dimensions for our ships of war, and to make a proportionate increase in the number built."

Sir Charles Dilke.—To ask the Under Secretary of State for Foreign Affairs whether he has any information as to the Russian expedition to Hissar, and if he knows whether the men of science named for it are to be accompanied by a military escort.

Mr. Hanbury-Tracy.—Ordnance Select Committee.—To call attention to the present description of heavy guns as supplied for the navy and for fortifications, and to move that, in the opinion of this House, it is advisable the Government should reappoint the Ordnance Select Committee.

Mr. Baillie Cochrane.—Central Asia.—To call the attention of the House to the extension of Russian territory and power in Central Asia, and to move an address for Papers.

In the course of a discussion in the House of Lords upon the Bill having reference to the adulteration of Food and Drugs Lord Cottesloe moved to omit Clause twenty-nine, which proposed to throw the duty of inspecting all packages and samples of tea, as imported, upon the Customs, which he said would not only require an army of officers, but would be a very costly proceeding indeed. Inspection could very well be performed by the merchants and dock companies themselves. The Duke of Richmond, however, dissented, and said that the clause had been introduced expressly to prevent adulteration by the Chinese, and Lord Cottesloe's motion was rejected.

Miscellaneous.

THE AUSTRIAN MINISTER IN BANGKOK.

The *Augsburg Gazette* has received the following account of the reception at Bangkok of Herr Von Schaeffer:—Herr Von Schaeffer presented his credentials to the First King on the 12th March last. The presentation took place with much display at Bangkok, in the new apartments of the First King's Palace, which had been decorated by Chinese and Siamese hands, after European models. The First King gave in honour of the Austrian Envoy a dinner in the Palace, to which all the Royal Princes and the Ministers were invited. The walls of the dinner-hall were decorated with beautiful paintings, and with the arms of the Treaty Powers. In the middle, over the entrance, the Austrian coat of arms was set up, with the German and French arms on each side of it. During the dinner two Siamese orchestras performed alternately; one of them playing with great precision the Austrian National Hymn.

The conversation was carried on mostly in the English tongue, which the King speaks fluently. After the usual questions about the various members of the Imperial Family of Austria, the conversation turned on the progress of civilisation in Japan and other Asiatic countries. The King appeared very much pleased to learn that European opinions followed attentively the development of civilisation in the Far East. He pointed out all the difficulties that stand in the path of reform, and claimed credit for his great share in the work done in that direction. The decline of polygamy in the higher classes of the country, the disbanding of the Corps of Amazones, and the gradual decrease of the nasty habit of betel-chewing, have been mainly brought out by his personal influence. At the close, King Chulalongkom gave to the Austrian Minister a written answer for the Emperor of Austria.

Before leaving for Hong Kong, Herr von Schaeffer presented himself to the Second King of Siam; the latter lives in the old Palace of Bangkok, the appearance of which exhibits in the strongest light the contrast between decaying and rising Siam. In the great Hall of Columns, where the Austrian mission was received by the Minister for Foreign Affairs of this shadow of a King, the old Chino-Siamese paintings had vanished into patches of undistinguishable colour, cobwebs played the part of hangings to the colossal windows, and bats flew to and fro over the heads of visitors. The Audience Chamber proper was better kept; there the Second King, dressed in European fashion, received missions in private audience, with the simplest of Siamese ceremonials. He did not sit on the throne erected in the middle of the room, and which was nothing else than a modern gilt arm chair, but he met half way the members of the mission, and took a seat with them at a round table behind the throne. His conversation was mainly about the health of the predecessor of Herr Von Schaeffer, and of several members of the Austrian mission in the East, whose names happened to occur to the King. A conspicuous figure was that of the Royal swordbearer, who during all the time of the audience immovably held over the head of the King a naked sword, richly gilt and set with precious stones.

THE GEOGRAPHICAL SOCIETY.

At a meeting of the Royal Geographical Society Major-General Sir H. C. Rawlinson in the chair—Admiral Sir Leopold M'Clintock read a paper on Arctic sledge travelling, which he said had been unknown to English seamen till the second and third voyages of Parry and the second voyage of Sir John Ross, but was not extensively made use of till the search expeditions for Sir John Franklin. He himself had been highly successful in sledge travelling, which can only be accomplished during the spring months. The ice is covered with snow, at first dry and hard, through which, as through sand, the runners of the sledge sink for an inch or so, and as the spring advances fresh snow falls, and sledging is more laborious; later it melts, and then fair progress can be made through the water overlying the ice, but the men are drenched with the ice cold water, and after this water has drained off the ice becomes unsafe for travelling. He described the tents and sledges, the latter having runners three inches broad, and raising the load about a foot above the ice. It is drawn by seven men. The food is tea, chocolate, biscuit, and pemican, or dried meat mixed with fat. The clothing consists of soft warm woollen articles, under a cloth impenetrable to the wind, and the entire weighs from 16 lb. to 21 lb. No furs are used. In the expedition just departed, dogs are to be made use of so far as practicable. In conclusion, Sir Leopold said—To sledging we are indebted for almost all our modern Arctic achievements. To it we confidently look as a means of escape where neither ships nor boats would avail. And here permit me to quote from a paper which I wrote some years ago:—"It is now a comparatively easy matter to start with six or eight men, and six or seven weeks' provisions, and to travel some 600 miles across snowy wastes and frozen seas, from which no sustenance can be obtained. There is now no known position, however remote, that a well-equipped crew could not make their escape from by their own unaided efforts." I had the great gratification of learning from Lieutenant Payer, when he recently visited this country, that these words of mine afforded very great encouragement to him and his companions, when their ship became inextricably beset, and when she was finally abandoned in the eightieth parallel of latitude. The public mind, perhaps unaware of the formidable difficulties which surround it, points to the crowning glory of reaching the North Pole—that goal of so much ambition and endeavour. However, what has been done will be done again, if the state of the ice is at all similar; but of this we are, of course, uncertain. This is a grave uncertainty. We know that an open sea has been found at no great distance off the Siberian coast, and that it rendered nugatory all Wrangell's attempts to sledge northwards. Yet it is worthy of remark that Wrangell was one of the first, if not the very first person, to suggest an attempt to reach the Pole from Smith Sound. Captain Nares has this advantage over Wrangell, that he is provided with boats fit to navigate a partially iceless sea, should his sledging be interrupted by water. We know full well that ordinary obstructions will but strengthen their determination to solve the great geographical problem committed

Digitized by Google

to them; and we have the satisfaction of knowing that this national undertaking could not be placed in abler hands. They will carry with them the assurance that they have not only our heartiest wishes for their success, but our entire confidence in their resolute endeavours to deserve it.

Admiral Sir R. Collinson said he had proved the value of dogs in drawing a sledge. He stated that Mr. Allen Young, who was taking out the *Pandora* as far as Disco, purposed, after depositing the letters for the expedition, to push westward either by the route taken by the *Fox*, or by that followed by the *Erebus* and *Terror*. He saw no good reason why the *Pandora* should not make her way down to the American coast, and along it to Behring's Straits, in one season.

Dr. Rae said he differed with Admiral M'Clintock as to the form of the sledge; he thought a flat sledge on low steel runners the best kind. He was also glad that snow houses were to be used, as this would save the weight of tents.

Admiral Ommanney thought the expedition, if unable to reach the Pole, might be able to go round the north of Greenland and return to the east of it. As to snow huts, they were very good things where they could be made, but for part of the time there was no snow to make them of.

Admiral Richards said the men had to leave the ships for three or four months, and must carry all necessaries. They could not take two or three kinds of sledges, and must take the one most generally useful, which experience had shown to be the runner sledge. They must carry tents, for snow houses were impossible for part of the time.

Sir L. M'Clintock said Admiral Richards had replied to Dr. Rae. The flat sledge would not suit on hummocky ice, and he might say that experience had been gained by some 50,000 miles of Arctic sledging; combining the men and having long sledges was found the best plan. The expedition has sledges 16ft long for crossing cracks in glaciers, sledges 14ft. long to carry boats, 11ft. long for seven men to draw, 8ft. long for dogs, and 6ft. sledges, charming little things on which a geologist might draw his own specimens. (Laughter.) Sixty dogs were to be taken out. Snow huts would be used where possible, but the whole weight of the tent being but 40lb. was not of much account.

The President announced that an extra meeting would be held on Monday, the 28th inst., when the Sultan of Zanzibar, one of the honorary members of the society, would be present.

COAL MINES IN CHINA.

The following is the report which we allude to in another column:—Wang Chang Yung visited Barnsley and the district as a special Commissioner of the Imperial Government, to obtain information as to the best machinery and appliances that can be obtained for working collieries, as well as to the best mode of sinking. He was accompanied by Mr. Bourne, C.E., London, who has been appointed Consulting Engineer to the Chinese Government, and by Mr. Siemens. On arriving at Barnsley the party visited the foundry of Messrs. Needham, Qualters, and Hall, where they were shown some drawing cages, about the largest in England, for the Cortonwood Colliery, the diameter of the shafts of which was no less than 20 feet inside the tubing. They then visited the Dodworth Silkstone Colliery, which they descended, and the Commissioner appeared to be very much pleased with what he had seen in the workings. Returning, they proceeded to the Monk Bretton Colliery, where they were shown a pair of horizontal engines for drawing, about the largest yet made. The Commissioner then expressed a desire to see a colliery in course of sinking where a very large body of water had to be encountered. A drive of eight miles took the three gentlemen, together with Mr. Peacock, mining engineer, to the Wath Main Colliery, which has been in course of sinking nearly three years, and where about 120,000 gallons of water had to be overcome. The pumping operations were very closely scrutinised by the Commissioner, who took copious notes of all he saw. A visit was then paid to the new sinking at Hoyland, where they are going down to the Silkstone coal; another to the extensive ironworks of the Messrs. Dawes, at Milton, near Barnsley. The party then proceeded to Sheffield, and went over the works of Sir J. Brown and Co. (Limited), and those of Cammell and Co., where they saw the heavy plate mill as well as the *Bessemer* convertors at work, and expressed themselves much pleased with all they had witnessed. It is said that considerable orders for machinery were given, and, as there are vast deposits of coal in China, it is evident that the Imperial Government intend developing them in the best and most economical manner.

SIR DOUGLAS FORSYTH'S MISSION.

The country (says *The Times*) is waiting with some impatience for news from Burmah. Our telegraphic intelligence states that Sir Douglas Forsyth has reached Mandalay, although he had been forbidden to begin negotiations until the King should explain why a cordial welcome had been given to the Chinese General, Leeseetahi, who is believed to be responsible for the murder of Mr. Margary. Plausible explanations come so glibly from the lips of an Eastern potentate that the King can easily have offered such excuses as would permit Sir Douglas to execute his mission, even if it should not have satisfied himself. In the peremptory language which is a first necessity of Eastern diplomacy, our Envoy may have already told his Majesty that we will permit no change to be made in the boundary line which Lord Dalhousie drew between British and Burmese territory. He will also have asked for more precise explanations touching the assassination of Mr. Margary. The King will be requested to account for the obstacles which his subjects threw in the way of Colonel Browne's party, for the aid which they gave to the Chinese, for the order which was issued in the King's own name to hinder the Expedition, and for the welcome which has been given to the General who is supposed to be guilty of the crime. Sir Douglas Forsyth may also have insisted that our Political Agents, both at Mandalay and Bhamo, shall be allowed such escorts as to place them above the risks of the King's caprice and his subjects' savage passions.

THE LATE ADMIRAL SHERARD OSBORN.—The sale of the effects of the late Admiral Sherard Osborn has taken place at the deceased's residence, Charles-street, Berkeley-square. The catalogue embraced nearly 500 lots, and in addition to the furniture, there were upwards of 100 articles, ornaments, and other effects, the greater portion of which had been collected abroad during the admiral's travels. For these articles there was a very spirited competition, and many of them fetched double, and in some cases three and four times their real value. They included a large number of cabinets, boxes, bowls, and other articles of Japanese and Chinese manufacture, and also specimens of Indian and other Oriental manufacture. There were also several telescopes used by the deceased on his different voyages, and these also realised high prices, more especially one with a coloured diagram of naval signals on the exterior, which was sold for upwards of £100. The paintings consisted, among others, of several of our ships of war, including the *Hercules*, *Minotaur*, *Northumberland*, *Monarch*, *Bellerophon*, *Sultan*, *Agincourt*, *Pioneer*, and *Topaze*, together with two of the *Great Eastern*. They included upwards of forty portraits of naval characters, amongst whom were those of Nelson, Sir John Franklin, and other distinguished officers. The books were upwards of 400 in number, and consisted chiefly of works on voyages and discovery, together with others on our relations with Russia, China, Japan, and other foreign countries.

CHINESE COINS.—At the *soirée* of the Numismatical Society, held on the 17th of June, Mr. Giles, of H.M.'s China Consular Service, exhibited a very large and valuable collection of Chinese coins, ranging from the earliest specimens of "lump" and "knife" money down to the common cash of the present day. It will suffice to say that there were 899 different coins, and that they have been examined by Dr. Birch and Mr. Poole, of the British Museum, who have pronounced them to be "unquestionably genuine," to show at once the extent and value of the collection. Negotiations are going on, which it is hoped will result in their ultimate transfer to the coin department of the British Museum.

MR. FITZJAMES STEPHEN, Q.C., and Mr. Benjamin Shaw have given separate, but generally concurrent opinions on the series of questions submitted to them by the Hon. and Rev. W. H. Fremantle, touching the right of Church of England clergymen to officiate in Nonconformist places of worship. Mr. Stephen thinks such action clearly illegal, not by statute law, but by "the King's Ecclesiastical Law." Clerical attendance at Nonconformist charitable meetings held elsewhere than in licensed places of Dissenting worship the learned counsel thinks legal, as he also does orthodox preaching by Anglican clergymen in any place of worship in Ireland, Scotland, the Colonies, or foreign countries.

A BAZAAR in aid of the "French Works of Charity," Leicester-square, has been held, by permission of M. Gavard, at the French Embassy, Albert-gate. The sale was under the patronage of the Duchess of Edinburgh, and the stallholders included the Baroness de Bulow, the Countess De La Warr, the Countess of Shannon, the Viscountess Grey de Wilton, Lady Alexander Gordon Lennox, Lady de Clifford, Lady Howard of Glossop, the Comtesse de Florian, and other ladies of title and position.

MR. EDGAR WILLIAMS has painted, in his usual forcible style, a whole length portrait of Sir Harry St. George Ord, C.B., R.E., in the uniform of the Royal Engineers, of which corps he was lieut.-colonel. The portrait has been commissioned by the Chinese inhabitants of Singapore to be placed in their Council-chamber, as a memorial of Sir Harry's administration of the government of those settlements for nearly seven years. The memorial picture is on view at Messrs. Graves and Co., Pall Mall.

THE 174th anniversary of the Society for the Propagation of the Gospel in Foreign Parts was observed on the 16th inst. in St. Paul's Cathedral with a celebration of Holy Communion, in which the Archbishop of Canterbury and the Bishops of London, Rochester, Hereford, Carlisle, Bangor, and Labuan participated. At the close of the Communion Office the annual sermon on behalf of the society's funds was preached by the Bishop of Hereford.

AN official notification has been published in Berlin to the effect that the German Minister at Peking, Herr Von Brandt, is empowered under the laws of 5th of May, 1870, and 6th of February, 1875, to perform the ceremonies of civil marriage, on behalf of German subjects or persons under German protectorate in the territory of his diplomatic jurisdiction. Also to register births, marriages, and deaths of German subjects or German *protégés*.

THE Lord Chancellor has granted the dignity of Queen's Counsel to the following gentlemen:—Mr. J. O. Griffits, Mr. James Motteram, Mr. L. W. Cave, Mr. J. W. Mellor, Mr. T. Campbell-Foster, Mr. T. H. Baylis, Mr. J. E. Gorst, M.P., and Mr. B. T. Williams, of the Common Law Bar; and Mr. Locock Webb, Mr. Heming, Mr. M. H. Cookson, Mr. H. Davey, Mr. H. B. Ince, Mr. Graham Hastings, and Mr. Robinson, of the Chancery Bar.

SIR EDWARD S. CREASY, Chief Justice of Ceylon, has read a paper on "The Facility of Administering Law which includes Equity" to the members of the Law Amendment Society, at the rooms of the Society of Arts, Adelphi, Lord O'Hagan, ex-Lord Chancellor for Ireland, occupying the chair.

CONSULAR JURISDICTION IN EGYPT.—The Court of Aix, to which the National Assembly had referred the question of judicial reform in Egypt, has decided that it is necessary to maintain the capitulations and Consular jurisdiction in that country.

THE Spanish Government has granted an amnesty to the working men transported to the Philippine Islands for political causes.

A BLUE-BOOK has just been issued, containing Consular reports from Saigon, &c., which we shall notice in our next issue.

CAPTAIN WALSHE, superintendent of police, Singapore, proceeded by last mail.

THE RUSSIAN ADVANCE IN CENTRAL ASIA.

With extracts from Schuyler's report on Turkestan, and a map pointing out the projected railway lines from Russia through Siberia to Peking, through Central Asia to Hankow, and through Tiflis and Teheran towards India. Read at the Society of Arts by the Rev. James Long :—

No question of the day is of deeper interest to England than this Central Asian question in the following aspects :—The British Empire will have, ere ten years elapse, a great semi-oriental Empire stretching 9,000 miles from the Black Sea to the Sea of Japan, backed with two millions of bayonets, placed close to its Indian frontier, and separated only by barriers easily passed. When the English people talk of the difficulty of invading India, they ignore the thirty invasions of India that have already taken place from Central Asia (the Hindu-Kush has nineteen passes through it) ; and that the Afghans ruled Northern India for centuries. As to the physical difficulties of marching troops, they are not to be exceeded by what Diebitsch encountered in the Balkans, Kauffman at Khiva, and England in Abyssinia. Russia is an Empire looked up to with ignorant admiration by millions of discontented natives in India, and is embarrassing a peaceful policy there ; Russian influence is creeping down through the Hindu-Kush, and the frontiers of Kashmir, and it may soon be a question—Is Afghanistan to be Russian or English ? for the figment of a neutral zone is vanishing into thin air.

As the rules of this Society prohibit the discussion of political questions—though this Central Asia problem is not one of party politics – happily the distinctions of Whig, Tory, and Radical are not introduced on Indian subjects which relate to the very existence and stability of the British Empire, I will merely state a few points without discussing them.

1. If Russia occupies Merv should England not occupy Herat and Kandahar ? Russia's position on the Oxus removes the chief physical difficulties in an invasion of India, giving a secure basis of operations.

2. Should not England have English agents in Afghanistan to represent her interests, exercise a proper influence, and remove the very unsatisfactory state of things at present, where, to use the language of Sir H. Rawlinson, "The British agent at Cabul does not occupy that position of independence and authority to which he is entitled as the representative of the Government of India, being unable, as it is believed, either to obtain or communicate any trustworthy information of a confidential character ?" The *Quarterly Review*, in a late excellent article on the Central Asia question, states—"British agents and representatives are excluded as completely from Afghanistan as they ever were from Japan or China, and we can neither make out what is passing in the Amir's mind nor give him a definite impression of what is passing in ours."

3. Should England not take the responsibility of preventing incursions on Russian territory from Afghanistan, otherwise Russia must interfere in Afghanistan, for whose good order she holds England responsible ?

4. The recent advance of Russia may require 20,000 additional English troops in India. How are the men and money to be supplied ?

5. The disturbing effect of Russia's approach to India among a population of 250,000,000, many of whom, especially the Moslems, exceeding 40,000,000 in number, are bitterly opposed to English rule. How is this to be met ?

The question of the military aspect of the Russian advance is not within the scope of this paper, and it has been treated ably in various works by Green, Goldsmid, Trench, Vambery, the latest and best of which is Sir H. Rawlinson's "England and Russia in the East." Fully master of the subject, Sir Henry has produced a series of most valuable and authentic statements which will appear like revelations of the unseen to a numerous portion of the British public, and ought to rouse them from the extraordinary indifference in which they are regarding the security of an Empire in which England has such a stake, moral and material. If England is apathetic, the natives of the East are not, and the conviction is unfortunately increasing among them that the English lion, growing old and careless, is practically yielding the superiority to Russia in Asia.

THE RUSSIAN ADVANCE IN CENTRAL ASIA.

Russia's advance in Central Asia since 1847 has been like an increasing tide, noiseless, ceaseless, but effective ; during that period our north-west frontier in India has also been greatly extended, the Punjab and Oude have been annexed, but Russia has gone ahead of England, for she has acquired a territory equal in size to Great Britain, France, Germany, and Turkey in Europe united, though the population is not larger than that of London. The wave rolls on, and, as the Emperor Nicholas used to say, Russia has no boundary in Central Asia. Within a quarter of a century Russia has moved down from the north of the Caspian 500 miles south and 1,400 miles east, until she is now within 250 miles of Peshawar, with her influence extending where her arms have not reached, as Sir H. Rawlinson, in his recent work, "England and Russia in the East," states :—"Instead of two empires divided by half the continent of Asia, as of old, there is now intervening between their political frontiers a narrow strip of territory a few hundred miles across, occupied either by tribes torn by internecine war or nationalities in the lowest stage of decrepitude, and traversed by military roads in all directions." To this we may add his most suggestive remark, "India is a country where a certain amount of discontent must be ever smouldering, which can be fanned into a conflagration by the contiguity of a rival power." The recent conquest of Khiva gives Russia the Oxus, with its navigable stream and fertile banks, in a position with regard to Afghanistan like that of the Rhine to France, or the Indus on our north-west frontier. The wave may roll on south until it reaches the Persian Gulf or Indian Ocean, for in Oriental nations there is no capacity of resisting a European power. As a Russian general said to me at St. Petersburg, "Native states are like a pack of cards, knock one down and the whole go."

One of the causes of this Russian advance lies in the commercial influences which are leading to the occupation of new territory as a field free from European competition ; but there are others, for as soon as Russia began to recover from the Tartar invasion she directed her attention to the East. As early as 1560, when England had not a foot of land in India, and did not even dream of it, Russia received at Moscow an Embassy from Bokhara and Samarkand. Russia was subsequently taught by the Crimean war a bitter lesson, and she has profited by it ; instead of entangling herself, as she did for a century, in European politics, she followed the slope to the East for which she is so well adapted from her geographical position and semi-Orientalism. What Count Gerowski, one of her ablest writers, said twenty years ago is becoming realised :—"The Slav and Russian current will undoubtedly turn towards Asia. There in those vast spaces is the immense field opening for their action, and no other nation or race can fulfil this mission. If mankind is to form in the future a harmonious whole, the solitudes of Asia must be stirred up, vivified, and the death-like quiet prevailing there must be broken. Culture and civilised treatment must dispel the atrophy north as well as south of the Himalaya." The crusading religious element is strong with the Russian people, whose land was for three centuries desolated by Moslem hordes. What the "No Popery" cry has been in England the "No Moslem" has been in Russia ; its people cannot forget that Timur sacked Moscow, and that Russian Grand Dukes held the stirrups of the horses of Islam chiefs.

THE COMMERCIAL ASPECTS OF THE RUSSIAN ADVANCE.

Serf emancipation, and the various and great reforms in operation in Russia, have woke up the national energies which had long been pent up by despotism and a bureaucracy ; they have been directed in the way of trade, in which nobles as well as people share ; this has led to covering Russia with a network of some 10,000 miles of railway, and to numerous societies for trade, banking, &c. I will give an illustration of this new spirit in the history of the Russian Steam Navigation Company—a Company composed entirely of Russians. It was formed in 1857, when the Black Sea fleet was destroyed ; it was largely subsidised by the Government, and gave employment to the officers and sailors of the late fleet ; it has been a great success, its original shares of 150 roubles have risen to 650, and are not to be bought. It pays 15 per cent. dividend and employs eighty-seven steamers, which touch at all the ports of the Black and Caspian Seas, as well as to the chief ports from Constantinople along Asia Minor and Palestine, to the Canal of Suez, and ply regularly between Odessa and London. They have opened out the Black Sea to Russia ; in 1859 they cut through the jungle at Poti to make the beginning of a great harbour ; they encountered terrible obstructions in the old *tchinovnik*, or bureaucratic system of Russia, but they have overcome them. The mines on the Black Sea have been utilised by them, and they use at present 100,000 tons annually of anthracite coal. They own also 600 miles of the Odessa railway ; they opened out steam communication between Odessa and Bombay, but it did not succeed, as they could not compete with foreign steamers.

The commercial development of Russia in the East has been greatly hindered by the dearness and difficulty of communication ; water and iron are both necessary—the water way and the iron way; hence the railway system so rapidly developed in European Russia is now stretching its arms into Asia, as a prop of the protective system which is strong in Russia, as Moscow, like Manchester, requires foreign vents ; but the protection interests have made the Caspian a *mare clausum* and English tea and cloth are declared contraband in Central Asia, though they were exported from Bokhara to Samarkand and Tashkend, for Manchester could send goods cheaper to Eastern Turkestan than Russia could from Moscow.

As a step to her commerce, colonisation is encouraged ; already Russians find their way to Badakshan, and beyond Lake Issikul. At Vernoe a military agricultural colony for veteran soldiers has been established to give solidity to the frontier towns ; some 5,000 were settled there a few years ago, and these numbers have been since much increased. David Ker, in an article in the *Geographical Magazine* on the mineral wealth of Central Asia, states :—"On my way up the Syr Daria I saw caravan after caravan of Russian peasants plodding eastwards, drafted from the villages to the wild regions lying between Lake Balkish and the Chinese border, and the same fiat which sent them thither can at any moment people the mines and factories of Turkestan with the artisans of Central Russia." England may learn something from this as to the question of European colonies in the Himalayas.

CENTRAL ASIA AND COMMERCE.

Russia's possession of the valley of the Oxus, like her conquest of the Caucasus, is not an ultimate point, it is only a resting-place or stage in advance. She considers it important politically in enabling her to check English interference with Russia on the Bosphorus by counter interference with England on the Indus, and in gaining access to the Hindu-Kush with its nineteen passes. A country like Turkestan, whose population is only 3,000,000, and the majority nomads, and whose wants are few, and mode of life simple, cannot be the main prize coveted. On this subject, considerable attention has been lately directed by the English and Russian authorities to a report on Khiva, written by Dr. Schuyler, the *attaché* to the American Embassy at St. Petersburg, and published by the American Government ; Dr. Schuyler's official position and freedom from prejudice against Russia have attached great importance to his observations ; he states, regarding the Russian trade in Turkestan :—"It is falling off, rather than increasing during the last eight years. The population of Central Asia is not large, its wants are few, very little can be exported there with any advantage except prints, cotton goods, clothes, and tea. The only goods imported from Central Asia are cotton (very bad in quality), silk, and a few fine sheepskins. The communications are so bad as to render trading very difficult." He represents the country as burdened with a great number of officials. The deficits in the budget for 1873 were 7,000,000 roubles. Turkestan is not, then, the El Dorado or Promised Land that some fancied.

Russia's great object lies in China with its 300,000,000, which could be tapped from Kashgar. Russia will gain wealth in China that Tur-

Digitized by Google

kestan can never yield. Elias, in his tour, states that the coal fields of China cover 400,000 square miles, yet its mines are unworked, and there are no railroads. Here is a region where, not losing, like as with the anarchical tribes of Turkestan, Russia will realise solid cash. Yakab Beg, whose rule extends 1,300 miles to Tarfan, has pacified the country; but if China, whose dominion once extended to the Hindu-Kush, should attack him, he may have to become a feudatory of Russia in order to get the means of resistance.

RUSSIA'S CENTRAL ASIA AND CHINA RAIL.—A RIVAL SCHEME TO THE SUEZ CANAL.

While Germany and Italy are rivals in trade to England—the former in particular, German merchants competing successfully with English in Calcutta, Bombay, and China—Russia is coming forward with another grand scheme of competition, and as the Suez Canal is superseding the Cape route, so Russia sets up a rival to the Suez Canal, and is going back to the old lines by which, ere Turkish barbarism had desolated the fairest regions, Constantinople and Peking were connected by a line of caravan routes which came along Mongolia, the Oxus, the Caucasus, and the Black Sea, making Constantinople the centre of convergence and distribution to Central Europe and the shores of the Mediterranean. The great Slavonic race will by this new route be afforded a wide field in those regions, for ages given over to Moslem fanaticism and Chinese immobility; the iron road which will unite the Baltic to the Pacific will also bring Russia into contact with the Anglo-Saxon race, which, filling up the solitudes of the American Continent, will meet on the Pacific slope, to which they will be joined by the Dominion and Californian Railways, that will link the Pacific and the Atlantic, and while 100,000,000 of the Slav race will occupy Eastern Europe and the plains of Asia, Coleridge's dream of America will be realised, "100,000,000 freed men living there under the laws of Alfred, speaking the language of Shakespeare and Milton," having the old country on the East, but Australia, India, the Russian Empire, and China on the West.

Russia has immense territories on the Amur, a country as large as France, but now nearly useless for commercial or colonial purposes, owing to the difficulty and dearness of communication. It must be welded on to Russia by the rail, and gives Russia a deep stake in the Chinese Empire.

This project to connect Peking and Petersburg by rail is not a visionary one, for a communication between China and the Western World from the most ancient times was maintained by Armenians, Buddhists, and Persians. There were two caravan routes across Central Asia, one by Bokhara and Samarkand, over the Terek Pass to Kashgar; the other leading up the valley of the Oxus, by Balkh and Faizabad, in Badakshan, by several routes to the table land of Pamir, and so on through Kashgar to Hasni and Hankow.

The Romans were acquainted with the geography of Khiva and Bokhara, and there was a trade in silk between China and Rome in the days of Augustus, carried on to Peking through Central Asia by way of Asoph, and Astrakhan. It took eight months going and returning, and was quite secure even for single travellers with a couple of interpreters and a servant. The country must have been subsequently consolidated when Jenghis Khan founded an empire that extended from China to Russia, through which the Mongolian wave of conquest rolled along to Western and Southern Asia from the Yellow Sea to the Danube, and when even Breslau and Hungary were attacked.

THE RUSSIAN MOVE TOWARDS KASHGAR IN CONNECTION WITH THE RUSSO-CHINESE RAILROAD.

The Russian movements to the north-east of Kashgar have been going on steadily for years; it has appeared to many a mystery why Russia has spent so much time and money in such apparently barren conquests; but the following will be the solution: as the conquest of the Caucasus has opened out the trade route to Persia and ultimately to India, so will the territorial acquisitions north of Kashgar and Yarkund lead to the great trade and caravan route to China, traversed for 2,000 years, on which a rail will ultimately be placed. The subject has been much discussed in the Russian journals, and an expedition has been sent out to survey the route.

The caravans from India to China always halted at Kashgar, and were there reorganised. In 1403 Bernard Goez, the Jesuit traveller, found Kashgar to be a mart of great note; here, as it is to the present day, all the roads, from the Khanates of Central Asia, converage; from thence they continued on the traffic route to China. Baron Richtofen has written on the facilities for constructing a railway between Kuldja and the centre of China, through a country with easy gradients and supplied with coal; the coal exists abundantly along the trade road from Kansu through the fertile oasis of Hami to Barkul, along a steppe-like country, studded with wells, to Kuldja, a town annexed to Russia in 1872; from Kansu through Shenshi or Honan to Singafu, the gate to Central Asia, and great capital of North-West China, with its population of 1,000,000, the Lower Hoango-Ho, and Yangst, the railroad would have a cheap and abundant support; its construction, with scarcely any large river to cross except the Upper Hoango-Ho, and no mountain range to pass over, would be comparatively cheap. To the north, where the Hoango-Ho breaks out from its mountain cradle, between the Pamir range and the Altai mountains, which edge the southern coasts of Lake Baikul, there is a natural pass from the most ancient times, as Humboldt shows, and numberless migrations have been made through it in the direction of the Caspian Sea; it was only the caravan route, and was followed by the celebrated traveller Hiouen Thsiang. The railroad from Hami and Kansu will bridge over those deserts and steppes of Central Asia, which have kept races apart for thousands of years, and have contributed powerfully to the long isolation of the Chinese.

Thus, while Peter the Great's object was to extend Russian trade from the Baltic to the Black and Caspian Seas, and so on to India, his successor aims at a higher flight, to link the Baltic to the Pacific by the iron horse. This may restore Constantinople to some of its palmy days, when it was the centre of trade between Europe and Asia.

While England proposes opening out a new and short route south-west between China and India, *vid* Burmah, Russia is penetrating China from the north-west, through Siberia as well as Central Asia; thus the vast abyss between Chinese and European civilisation will be bridged over, and Western ideas will flow into the very centre of China from both Russian and English founts. The solitudes of Russia may hereafter be populated with Chinese emigrants who might do in Siberia what they are doing in California, as they are industrious, practical, and particularly suited for agriculture.

How, then, these two great Empires of England and Russia can be in contact without collision is the great problem of the future; their shock would be an irreparable injury to Christian civilisation in the East, as well as to the cause of religion, humanity, and trade in both countries, while the savage tribes of the desert, the bigoted Moslem and idolatrous fanatics, would exult seeing two Christian Empires destroying each other.

THE SIBERIAN AND PACIFIC RAILWAY.

The Amur district, respecting which so much was hoped, has proved an utter failure, either as regards commerce or colonisation, mainly because it is not connected overland with Russia; the Siberian rail would be its salvation, and trade would spring up along the Pacific seaboard. What the overland route is to India, the overland must be, *cæteris paribus*, to the Amur.

But the great impulse for the Siberian railroad comes from the tea merchants of Moscow. The statistics of the fair at Nijni show that the trade overland from Peking, *vid* Siberia to Russia, is on the decline, and, notwithstanding the high protective duty, cannot stand the competition with the Russian Steam Navigation Company, which brings the tea direct by sea from Hankow to Odessa; from Odessa it is sent to Nijni, and sold for less than the land-borne tea. It is only the high-priced fine sorts that can stand the competition; the coarse sorts, taking a twelvemonth or more in their overland transit, have to give way to the sea-borne tea, which comes in six weeks from China to Odessa. The only chance is the Siberian rail, which will reduce the time of transit from twelve months to a fortnight.

There is much discussion as to the line; the one which finds most favour is to go from Nijni and Ekaterinburg by Tiumen across the Uralian mountains to Omsk, Tomsk, Irkutsk, Kiachta, and so on to Peking; it goes, however, over a thinly populated country (Siberia has only six inhabitants to a square mile), has to cross many large streams, and little coal is to be found; and when a rail shall connect the tea districts of Central China with Russia, *vid* Mongolia and Central Asia, the tea trade may take the latter route in preference to the one by Northern China and Siberia.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, JUNE 16.

Politics have come to a complete standstill, and the papers are now discussing the results of the elections, which are, as I stated in my former letter, satisfactory for the Liberals, who have not lost in numbers, and still more satisfactory for the anti-revolutionists, who have won two seats by defeating the Liberals who have hitherto held them. The loss of Mr. Tak in Middelburg is indeed a very heavy blow for our Whigs, and they are lamenting greatly thereabout. It is already evident that the position of the Cabinet has become very insecure, inasmuch that they are no longer backed by a certain majority.

Mr. Loudon, ex Governor-General of Java, arrived the day before yesterday at the Hague. He was received at the railway terminus by several officials; amongst them by General Van Swieten. Mr. Loudon will stay only a few days at the Hague before returning to Lausanne, where his family resides.

Some anxiety has been caused here by the news, published from a private source by the *Vaderland*, that some revolutionary demonstrations have occurred in Tagal, the people being greatly dissatisfied with the behaviour of the Resident, whom the Governor-General declined to dismiss. It was feared—so it is stated—that military intervention would become necessary.

Leyden has again held its festival, the students having celebrated the 300 years' existence of the Academy by a splendid masquerade, representing all the illustrious persons who have studied in that town, or who have visited it. The fête was a complete success.

The shareholders of the International Credit and Trading Company "Rotterdam" have held their annual meeting, when the managers had the pleasure to state that the operations of the company had been so successful last year that a dividend of 22 per cent., that is f. 13.75 per share, could be declared. From the report I derive the following facts:—The profits reached the sum of f. 949,281.13½, from which had to be deducted general expenditure, f. 218,108.94; dividend to the managers in Java, f. 83,996.85; debts written off, f. 224,051.91; income-tax, f. 7,040—so that the net profit amounted to f. 42,306.57½; of which sum f. 70,833.23½ had been added to the reserve fund. The business had increased enormously, and a commission of f. 110,961.92 had accrued from consignments. The profits from the operations on the company's own account in Java had amounted to f. 170,773.25. The report was approved of unanimously.

Commercial and financial affairs continue extremely quiet.

AMSTERDAM, JUNE 17.

To-day the meeting of shareholders of the Dutch India Trading Bank was held here. According to the report, a nett profit had been made of f. 729,045, from which sum a dividend of 10 per cent. was announced. The profits earned in Java amounted to f. 541,019. In my next letter I will give further particulars.

General Verspyck will next week insert in the *Vaderland* three articles under the title "Loudon and Atjeh—a Protest."

Mr. H. A. Des Amorie van der Hoeven, formerly editor of the *Bataviaasch Handelsblad*, and who, after having repatriated, has been received into the Catholic Church, has become a candidate for Breda. His election is regarded as quite certain.

H.M. steamer *Valk* has started from Nieuwe Diep for Rotterdam, to convey the Queen to England.

The London & China Telegraph.

LONDON: MONDAY, JUNE 21, 1875.

KASHGAR.

A PECULIARLY characteristic piece of Oriental rhodomontade has just come under our notice, which, although it possesses no great political importance, deserves a passing remark. It has been known for some time past that YAKOOB KHAN, Ameer of Kashgar, was on the look-out for supporters and allies in view of possible contingencies, and, indeed, there was a rumour that he contemplated despatching a special envoy to London for some mysterious purpose, but probably the strangest quarter for him to turn to for assistance was Constantinople. In January last we published two telegrams from St. Petersburg and Berlin respectively, the former of which showed that the Ameer was already getting *aux petits soins* with the Commander of the Faithful, for we were told that, in return for the Sultan's recognising him as Khan, he was coining silver money with the name and insignia of ABD-UL-AZIZ, as though he were a vassal and tributary of the Porte. The second telegram, however, showed in even a stronger light the importance which YAKOOB KHAN attached to the protecting influence of Turkey, for it informed us that he had again sent SEIT MAGASCHER YAKOOB to Constantinople to tighten his relations with the Sultan, whose suzerainty over all Mohammedan Tartars he apparently acknowledges. The Ameer of Kashgar has evidently gained his wish, for a telegram from Vienna, dated June 15, states that the Turkish Embassy for Kashgar has left Constantinople with money, presents, and a promise of the Sultan that he will protect Kashgar for all time. How happy YAKOOB KHAN ought to feel at this assurance! All his troubles and fears put an end to for all time! But hard-headed and practical people may be disposed to cavil at the soundness of the guarantee, and to doubt whether the Sick Man will be able to do much for his vassal and tributary in the hour of need. In view of the distance of Constantinople from Kashgar, and of the unsubstantial nature of Turkish finances, not to speak of other trifling considerations, we would certainly hope that the Ameer, for his own sake, will not place too much reliance on the fair promises of the SULTAN, if he wants any assistance in his coming struggle with China, and still less if he should unfortunately happen to get entangled in any serious difficulty with Russia. In the latter case, at any rate, it would be worse than ridiculous for him to hope for the slightest assistance or even countenance on the part of the SULTAN, for the Sick Man's relations with Russia are already of a quite sufficiently ticklish nature to make him keep clear of further complications in that quarter. Whilst speaking of Central Asian matters, it will not be out of place to call attention to a St. Petersburg telegram, also of June 15, to the effect that, according to reliable information, there is no truth in the news published by some journals of negotiations between England and Russia having been carried on in London, and of a Convention having been concluded there whereby a neutral zone in Central Asia is arranged between the two countries. Mindful of the old adage about the non-existence of smoke without fire, we must presume that the Central Asian question has recently been under discussion, and that Lord DERBY and Count SCHOUVALOFF have been able to arrive at a more satisfactory arrangement than has hitherto been deemed practicable.

SIGNS OF THE TIMES IN CHINA.

OF late years the Chinese have tacitly recognised the great superiority of foreign nations in the art of war by the zeal with which they have wasted money over arsenals, dockyards, &c., in their vain endeavour to put themselves on a par with the outer world in that respect, when, as we have before pointed out, they had far better have employed the millions of taels thus squandered for other purposes of a more peaceful and profitable nature. If any reliance, however, can be placed on the statement advanced by the writer of an article in a recent number of the *Wan Kwo Kung Pau*,—and it certainly has some show of probability on the face of it,—it seems not unlikely that they may ere long take a far more important step in the right direction. The statement to which we allude is to the effect that LI HUNG-CHANG has memorialised the Throne, asking that foreign learning and the sciences may be placed on an equal footing with the standard subjects in the literary examinations of the Empire. A rumour is already current that the prayer of the memorial will be granted; but this seems premature, to say the least of it, if not almost too good to be true; for, doubtless, if entertained at all, the proposition will require long and anxious consideration at the hands of the Powers that be. But if any man in the Empire can induce the Central Government to adopt this bold step, it is undoubtedly the powerful and far-seeing Governor-General of Chihli; and if it be adopted, and courageously and honestly carried out against the storm of opposition which it will be sure to provoke amongst the obstructionist party, it will be impossible to over-estimate the enormous advantages that will accrue to the Chinese Empire from this startling innovation, which at one stroke will upset the cherished traditions of centuries. When once the educated classes get thoroughly familiarised with "foreign learning and the sciences," the rest will be easy, and the regeneration of China will commence; Fêng-Shui and such like nonsense will disappear; railways and telegraph lines will traverse the country in all directions; and its vast resources will be rapidly developed. The great change here foreshadowed will not be effected by a mere stroke of the Vermilion Pencil, although it will result from it, and even if LI HUNG-CHANG succeed in attaining his object, it will be many years before the full benefit will be reaped. A plan somewhat similar to that suggested to the Government of China is believed to be working well in Japan; and there is no reason why, if it be allowed a fair trial, it should not do the same in China; it will probably take much longer to get into working order, for, independently of the greater extent of the country, the character of the Chinese is more solid, and less susceptible of sudden changes than that of the Japanese. When, however, the new system of education is once fairly under way, this very stolidity of character will stand the Chinese in good stead, and give them a considerable advantage over their more volatile neighbours.

THE OPIUM TRADE.

AS mentioned in our last issue, the subject of the Opium Trade is to come forward for discussion in the House of Commons on the 25th inst. For some time past, the "Anglo-Oriental Society for the Suppression of the Opium Trade" has been unceasing in their endeavours to raise up sufficient public opinion to induce a full discussion of the subject, and, in consequence of their endeavours, Mr. MARK STEWART has given notice that he will call attention to the evidence given before the East India Finance Committee in 1871 with reference to the Opium traffic, and move a resolution. The secretary of the Society sets forth in the circular which he has issued that the object in view is to obtain a candid and impartial hearing on the subject in the Legislature, and there is no question that the matter is one of so much importance that the responsibility of fairly discussing it cannot be blinked. At the same time, it is to be feared that the Society aim at too broad a result to meet with the full support of the House at the present time. No doubt there is much to be said upon both sides of the question, and, however much those who desire to see an end put to the consumption of Opium in China deserve our sympathy in their benevolent object, there are practical

Digitized by Google

difficulties in the way of a suppression of the traffic, which will unquestionably prevent the Government from pledging themselves to such a course. The revenue obtained by the Indian Government, amounting to about eight millions, is, of course, the chief obstacle. However, the discussion of the subject is likely to lead to good results, as it is always desirable with regard to a matter of this kind that there should be as much light brought to bear upon it as possible, and if the movement of the Society do not succeed at the moment, their labours will not have been lost, if they succeed in some degree in again calling the attention of the Government and of the country to the question. We learn from Peking that the Chinese Government are directing their attention again to the matter. It appears that at the beginning of each reign the Chinese have a custom that the high officers sit in conclave for eight days (holding, in fact, a kind of Privy Council), and discuss all the important questions which press for solution; and the Opium question was among the subjects then considered. Our correspondent states that the Cuban question is still pending, and the difficulty with regard to the murder of Mr. MARGARY had thrown everything into the shade. The Chinese Government, it appears, express themselves willing and anxious to move in the matter of the suppression of the Opium traffic, but they find their hands tied by an empty exchequer, foreign treaties, and by internal misrule and corruption, which always make it a matter of so much difficulty to introduce any reform into the Celestial Empire. It will be thus seen that there are difficulties in the way of the question on all sides. The total suppression of the Opium traffic, which is the aim of the Society, would be a matter involving large considerations of revenue in India, and which could not be effected at a moment's notice. It is therefore open to doubt whether, under existing circumstances, anything can in reality be done in the matter; and it is to be recollected that when the subject was brought forward on the last occasion, that is after the report of the Committee of 1871 was published, Mr. GLADSTONE, who was then Prime Minister, declared his opinion very definitely against taking any steps with regard to it.

IN another place we extract from *The Times* some very pertinent remarks with reference to the state of the India and China trade, to which we have repeatedly drawn attentention. The point at which it has been unsatisfactory for years past is exactly touched in the remarks which are made, and we can only hope that attention being called to the matter at home may induce some improvement. The profits of the trade have been steadily diminishing, or to speak more accurately, the losses have been increasing. The shipments of Manchester goods to China during the first five months of this year have fallen off as compared with last year, but up to that time for years past we had had precisely the same state of things which is noticed as existing in the India trade at the present time, namely, a constant increase in quantity with an equally constant decrease in profit. With this lamentable fact staring them in the face, merchants in China have for years past been apprehensive as to the results which are now beginning to be felt, and we can only trust that the failure of Messrs. COLLIE and Co. may not prove as disastrous as is naturally apprehended at first blush. At the same time, it is impossible to ignore that the present state of affairs gives ground for grave apprehension.

SOME exaggerated paragraphs have appeared in the daily papers in reference to the visit of WANGCHENG, who has been described as a mandarin, or Chinese commissioner, &c., empowered by the Chinese Government to visit our engineering yards and make purchases for shipment to China for the working of the coal mines there. It is further stated that Mr. BOURNE, who accompanied him on a visit to some of the collieries in the north, has been appointed Consulting Engineer to the Chinese Government. The facts of the case are simply that WANG has made a visit to this country for the purpose of prospecting our appliances, but is not giving any orders. Mr. BOURNE, who is acting as agent for the Exhibition of European wares at Shanghai, has not been appointed Consulting Engineer, but proffered his services to accompany WANG. Mr. JAMES HENDERSON is progressing with his work, and in due course we shall announce his departure with his staff. Our readers must understand that it is the custom for any one who obtains an order for goods from a Chinese official, to consider himself as acting for the Chinese Government.

WE understand that M. GRIGORIEFF, the President of the Russian Committee of the International Congress of Orientalists, has written to the English Committee to propose that the third session of the Congress, which was to have been held at St. Petersburg in September of this year, should be postponed until the autumn of 1876. As this change would involve an alteration of the *statuts definitus* of the Congress, a meeting of the English Committee was held to consider M. GRIGORIEFF'S letter, and a resolution was then carried in favour of adhering to the annual meetings. We believe that communications are passing between the English and foreign committees with a view to arriving at a concurrence of opinion on this subject.

WE noticed at the time of the Vienna Exhibition the establishment of an Oriental Museum as an offshoot of that institution, which, we are glad to say, is doing well. We have received the fifth number of an interesting periodical published in connection with it, namely, the Austrian *Monatsschrift fur den Orient*. The paper will, doubtless, be of value to all who are concerned in the Far East, and will be acceptable to many of our German readers in India, the Straits, and China. The present number contains articles upon the late Famine in India, Railways in Turkey, the Sanitary Condition of the Levant, with Notes on China-grass, Japanese Finance, and other kindred subjects.

IN reference to the difficulty we noticed some time since with regard to the appointment of Mr. GARDINER AUSTIN, the Colonial Secretary, as Acting Governor of Hong Kong during the absence of Sir ARTHUR KENNEDY, we are glad to state, on the best authority, that no slight was intended to General COLBORNE. It appears that the Colonial-office had decided on a change from the practice of appointing the Commander of the Forces, previous to the arrival of General COLBORNE. The blame, therefore, must rest with the authorities at the War-office.

WE understand that a telegram has been received announcing the appointment of SHEN-PAOU-CHEN, the Imperial Commissioner of Formosa, and Director-General of the Arsenal at Foochow, as Governor-General of the Two Klangs, with residence at Nanking. This appointment also includes that of Superintendent of Foreign Trade.

M. GIQUEL, whose arrival with five Chinese from Foochow we lately reported, is now on a visit to London, and has placed two at the Royal Naval College, Gosport, two at an engineering establishment at Havre, and one at an academy in Paris.

WE lately noticed the appointment of M. SKATSCHKOFF as Consul General at Shanghai for Russia. We understand that he proceeds to his destination this week, *viâ* New York and San Francisco.

WE are glad to announce that the Royal Geographical Society will send two delegates to the Paris International Congress of Geography.

THE consecration of the newly-appointed Bishop of COLOMBO will, we understand, not take place until the end of the year.

THE CONSULAR SUPERANNUATION ACT.

THIS is a short Act, which has been passed to amend the Superannuation Act of 1859, so far as relates to the superannuation allowances to be granted to civil servants who have served in an established capacity in an unhealthy climate. The present Act consists of four sections only, and may be summarised as follows:—(1.) The Commissioners of the Treasury are empowered to declare that any

Digitized by Google

country or place named by them in an order or warrant shall be deemed to be unhealthy for the purposes of the Superannuation Act, 1859, and this Act; all such orders and warrants must, however, be laid before Parliament, as ordered by the old Act. (2.) When a person who has served in an established capacity in the permanent civil service of the State is entitled to any superannuation, gratuity, &c., under the provisions of the Act of 1859, two years' service by him in an unhealthy place shall be reckoned as service for three years, and service for any greater or less period than two years shall be reckoned in the like proportion. (This will, no doubt, be justly considered as a great boon by the Civil Service, but the next sentence, which we give *verbatim*, detracts much from its value). "But nothing in this Act contained shall alter "or affect the second section of the Superannuation Act, "1859, so far as it requires a service of ten years before "a person becomes entitled to any annual superannuation "allowance." Consequently, if a man has served nine years in the most pestiferous climate in the world he will not be entitled to any pension at all, though his time of service ought, in all fairness, to be allowed to reckon as thirteen years and a half; however much his health may be ruined, he must think himself lucky if he has a small gratuity awarded him). (3.) It must be borne in mind that this Act is not retrospective beyond the 17th of last February, and only applies to persons who have retired from the public service since that time. (4.) This section merely prescribes the short title of the Act, and ordains that it shall be construed as one with the Superannuation Act, 1859.

A Treasury Minute has now been issued under the authority of this Act, from which we learn that "My "Lords read again a letter from the Foreign office, dated "17th July, 1874, transmitting a list of places which, in "the opinion of the Earl of DERBY, may be considered as "unhealthy, and stating that the list in question had "been prepared after due inquiry and communication "with Her MAJESTY'S representatives in the various "countries in which the unhealthy places are situated." "My Lords" concur in Lord DERBY'S recommendation, and accordingly declare that the following places shall be deemed to be unhealthy places for the purposes of this Act, viz. :—

Fernando Po.	Tananarivo.	Chefoo.
Loanda.	Surinam.	Newchwang.
Rio de Janeiro.	Callao.	Hankow.
Pará.	Poti.	Kiukiang.
Pernambuco.	Havana.	Shanghai.
Bahia.	Puerto Rico.	Ningpo.
Santos.	Soulina.	Foochowfoo.
Greytown.		Pagoda Island.
Cartagena.	FAR EAST PORTS.	Amoy.
Santa Martha.		Swatow.
Panama.	Bangkok.	Taiwan.
St. Thomas.	Manila.	Canton.
Cayenne.	Bruni.	Whampoa.
Réunion.	Peking.	Kiungchow.
Port-au-Prince.	Taku.	

In defiance of geographical considerations, we suppose that Chinkiang is officially looked upon as part of Shanghai, but why are Tientsin and Tamsuy omitted from the list? We can hardly fancy that they are excluded from the benefit of the Act on the ground of their exceptional healthiness, for in that case Chefoo would have been included. Again, we must ask why is Saigon, (Cochin-China), Sarawak (Borneo), and the ports of Java excluded? It is true that hitherto we have only employed merchant Consuls at these places, who are not entitled to pensions, but it is pretty certain that before long we shall have Foreign-office Consuls at some of them, and there can be no doubt of their equal claims to unhealthiness with the ports included in the Act. We can only conclude that the omission is one of those inexplicable official mistakes which occur occasionally, to the mortification of the heads of departments. We presume in this case it falls not on the Treasury, but on the Foreign-office, who must have advised the ports to be included.

THE MINT AND THE FAR EAST.

The Fifth Annual Report of the Deputy Master of the Mint, which has just been issued, contains a somewhat unusual amount of matter relating to the Far East, a part of which is of considerable interest and importance to the mercantile community in that quarter.

The amount of old copper coin withdrawn from circulation in the Colonies during the year 1874 was £22,134, of which the greater portion was received from Ceylon, and since the beginning of the present year further consignments have been sent home by that Colony. In consequence of representations from the Colonial-office that there is still a considerable quantity of copper coin in circulation in the Colonies, the Deputy Master of the Mint has recommended to the Treasury that the time for receiving that coin at the Mint at its full nominal value should be extended to the 30th June, 1876, but this arrangement applies to the Colonies only.

Numerous Colonial coinages have been required during the year, but, owing to the other demands upon the Mint, they were, with one exception (that for Newfoundland), entrusted to Messrs. Heaton and Sons, of Birmingham, and were executed, as usual, under the supervision of an officer of the Department. Among these coinages were a silver one of twenty-cent, ten-cent, and five-cent pieces, of the nominal value of £5,000, for the Government of Hong Kong; another of the same denominations, of the nominal value of £6,250, for the Straits Settlements; and a copper coinage of one-cent pieces, of the nominal value of £20,833, for the last-named Colony. Besides these, a silver coinage for Hong Kong, of the same subsidiary pieces as those already supplied, and of the nominal value of £10,000, was in progress at the close of 1874.

"A question of great interest," remarks Mr. Fremantle, "has again been raised during the year by a despatch from the Governor of Hong Kong, calling the attention of the Imperial Government, at the instance of the Hong Kong Chamber of Commerce, to the present condition of the currency of that Colony. The silver pieces mentioned above as having been recently coined for Hong Kong are merely subsidiary token coins for use within the island itself, the standard coin of the Colony being the Mexican Dollar; and their Lordships [*i. e.*, at the Treasury] have on several occasions been led to consider how far it was desirable that a British trading community should be to so great an extent dependent in its commercial transactions upon a foreign coin. The despatch of the Governor, with its enclosures, was referred to me by their Lordships' directions, and I was desired to report on several points connected with the subject, which appeared to deserve their consideration." Copies of the Treasury letter and Mr. Fremantle's reply are given in the appendix, and we shall refer to them presently.

The value of the specie packed during the year for the Treasury Chests abroad was £650,041, as against £475,000 in 1873, but it did not exceed the average of late years of the sum named; £316,541 consisted of Mexican dollars shipped to Hong Kong and the Straits Settlements.

Mr. Fremantle mentions that he has received the report of Dr. Linderman, Director of the United States Mint, for the year ending June 30, 1874, which contains full details as to the proceedings of the American Mints during that period, and, in addition to much other information of interest, gives an account of the progress made by the newly coined *trade dollar* in commercial transactions in China. The coinage of these dollars in the year amounted to $8,588,900, and it was hoped that as soon as coinage operations could be commenced at the new mint at San Francisco there would be no difficulty in meeting the large demand for them which exists in the China trade.

With regard to the Japan Mint, Mr. Fremantle makes the following observations :—Two reports have been received from Major Kinder as to the proceedings of the Japan Mint; one, his Third Annual Report for the year ending 31st July, 1874, and the other, his Fourth and last Report for the half year ending 31st January last [recently alluded to in our columns], on the termination of his engagement with the Japanese Government as Director of the Mint. During this period of eighteen months there had been a marked falling off in the amount of the gold coinage, and it was not considered probable that for the present any necessity for a large coinage of gold would again arise. A change was made during the year 1874 in the design of the silver "yen" or dollar, the value being now clearly indicated on the coin, and a considerable number of these pieces were issued for circulation. The new coin was recognised as legal tender by the Government of the Straits Settlements, and at several places on the coast of China, including Canton, but not by the Government of Hong Kong. Objections had, however, been raised to the weight of the "yen," 416 grains, as not corresponding with that of the American "trade dollar," which is 420 grains, and the Japanese Government had under consideration a proposal for raising its weight to that of the latter coin. The coinage of silver had been chiefly confined to that of the smaller denominations of pieces, and the issue of this part of the coinage was likely to continue. The coinage of copper had progressed steadily during the year 1874, and had amounted in August last to 36,000,000 pieces, but it was expected that many years would elapse before the full amount of copper coin required throughout the country could be produced. In December last, and again in the course of the present month, assays have been made in this department of the

Digitized by Google

portions of "pyx" coins of gold and silver and of "test ingots" taken from the coinage of the Japan Mint during the year ending the 31st of July, and the half-year ending the 31st of January last, respectively, which had been forwarded to this country by the Japanese Government for examination under their lordships' directions. The result, as in 1873, proved that the operations of the coinage had been conducted with great care and accuracy.

By a return showing the amount and destination of gold coin exported from Victoria, attached to the 1874 Report of the Deputy Master of the Melbourne Mint, and printed in the Appendix to Mr. Fremantle's Report, we find that during the year £390,922 were exported to Galle and £2,340 to Hong Kong.

The Appendix closes with the correspondence respecting the currency of Hong Kong, which consists of the letter of the Treasury to the Mint and the Deputy Master's reply, the two covering five pages and a-half of small print; the correspondence forwarded for Mr. Fremantle's consideration was found to be too voluminous for publication with his Report. In the Treasury letter "My Lords" consider four distinct proposals, viz. (1), That the Japanese yen, and (2) that the American trade-dollar be proclaimed legal tender. (3) That a new Hong Kong dollar be coined in England to circulate as legal tender at Hong Kong. (4) That clean dollars only be accepted as legal tender. "My Lords" think it might be practicable to proclaim the Yen legal tender as a silver dollar of equivalent value to the Mexican; but still, "in the presence of the unanimous recommendation of the consulted Banks that the yen should not be accepted, at least for the present, and of the fact that the Chamber of Commerce declined to make any recommendation in favour of the yen, 'My Lords' are of opinion that it would not be desirable to entertain that part of Mr. Cameron's application." They do not see how the Governor could proclaim "the American trade dollar as a silver dollar of equivalent value with the Mexican dollar, when it is notorious that it is about 1 per cent. superior in value thereto;" but at the same time they think "a question may remain whether the American dollar might be rated for concurrent circulation." Upon these points and the other two, in regard to which they do not say very much, "My Lords" desire a full report from the Deputy Master of the Mint. Having considered the matter carefully in all its bearings for some seven weeks, Mr. Fremantle forwarded an elaborate reply on Nov. 28, 1874. Space will not admit of our following him through all his lucid observations on the points raised for his consideration, but we extract his remarks respecting the Japanese yen and the American trade dollar. Having spoken of the weight and fineness of the yen and the Mexican dollar, he proceeds thus :—

I submit, therefore, that there can be no question as to the power of the Governor to give legal currency to the "yen," under the Order in Council above mentioned; but, as the commercial community are decidedly opposed to its admission, at least for the present, as a legal coin, it is perhaps unnecessary to consider whether the Japanese Government has as yet had sufficient opportunity of proving its determination to coin with accuracy, or of possessing that stability which can alone guarantee that its coinage will not hereafter be tampered with. The American "trade-dollar," on the other hand, is clearly not a "dollar of equivalent value" to the Mexican. It would appear to have been made heavier than the latter with the idea of rendering it more acceptable, as, although its fineness is the same, viz., 900 parts of silver in 1,000, its weight is four grains more, being 420 grains, as against 416.

Mr. Fremantle doubts whether the peculiar position of Hong Kong does not render it impossible to establish a separate currency for that Colony, and he points out that if a special dollar were coined in England for Hong Kong, it could not be laid down there under a charge of *three per cent.*, viz., two per cent. for coinage, and one per cent. for freight and insurance. For these and other reasons detailed he considers the project impracticable. We cite the concluding portion of Mr. Fremantle's letter *in extenso*, as it is of great general interest :—

There are two remaining points raised in their lordships' communication upon which it is difficult in this country to form an opinion, and both of which their lordships intimate it would in any case be necessary to reserve for further reference to the colony, namely (1), whether the American "trade dollar" might be admitted to concurrent circulation with the Mexican, though not at the same rate, and (2) whether it would be possible to introduce the much-needed reform, that only clean dollars shall be legal tender in Hong Kong.

The first point would appear to turn almost entirely upon the question how far the inconvenience which would probably be caused in ordinary transactions by the circulation side by side of two dollars of slightly different values would be counterbalanced by the additional facilities which would be acquired of obtaining, in times of sudden or rapid expansion of trade, an earlier supply of coin than can be had at present.

As regards the second point, namely, the possibility of excluding all but clean dollars from circulation, I would remark that it is at present the practice of the native Chinese merchants to "chop" every dollar imported as it comes into their hands, and that the ordinary currency of Hong Kong consists chiefly of "chopped" coins. It is clear, therefore, that as no proclamation issued in Hong Kong could directly compel the native merchants to abandon the practice of marking their dollars with their "chop" or sign, the effect of excluding "chopped" coin from legal circulation in Hong Kong would be to interfere seriously with the trade of that Colony with Chinese ports. This remark applies only to the southern ports, as in Shanghai and throughout the north of China the old Mexican dollar, clean, is the only coin accepted.

THE FOREIGN RELATIONS OF THE UNITED STATES.

In the volume of "Papers relating to the Foreign Relations of the United States, transmitted to Congress, with the Annual Message of the President, December 7, 1874," the China correspondence consists of forty-four despatches, comprising twenty-eight from the U.S. Legation at Peking, the Consul-General at Shanghai, and the Consul at Amoy to the Department of State, and sixteen from the authorities at Washington to the Legation and Consulates in China. Of this total of forty-four despatches no less than twenty have their origin in the difficulty between China and Japan, four of them being devoted entirely to General Le Gendre's case. The concluding despatch of the series is one from the Department of State to Mr. Seward, dated Nov. 2, 1874, dealing at some length with the proceedings against General Le Gendre and disapproving of them; the writer sums up in these words :—"For all these reasons and upon the facts as reported, the Department is forced to the conclusion that the arrest of General Le Gendre was without warrant of law, and cannot receive its approval. Had the arrest been the act of a foreign Power it is apprehended that the arrest would have been the ground for energetic action on the part of the United States." After this, we should fancy that Mr. Seward and Mr. Henderson, the Consul at Amoy, will be very chary of arresting Generals with roving commissions. Mr. Henderson also receives a severe rebuff on account of the terms of a neutrality proclamation, of a one-sided nature, which he took upon himself to issue, forgetful of the fact that such power appertains only to a Minister, and not to a Consul. One of this series of despatches gives the identical note addressed by the Treaty Power Consuls at Shanghai to their respective superiors at Peking "in regard to the neutrality of the foreign settlements in China and Japan in case of war, and to the immunity of commerce," and in another Mr. Henderson describes his visit to Liang-kiau Bay, Formosa, in the U.S. war-steamer *Monocacy*. Several of the other despatches are simply of a formal nature. Two of the earliest despatches in this volume give cover to correspondence respecting the Peruvian mission to China, and two others relate to the difference between the Spanish Chargé d' Affaires and the Tsungli Yamun respecting the prohibition of coolie emigration to Spanish colonies. On Nov. 18, 1873, Dr. Williams reports the disastrous inundations in Manchuria, and the brigandage arising from the consequent distress, and he forwards a lengthy communication on the subject from Mr. F. P. Knight, U.S. Consul at Neuchwang. On February 12, 1874, he advises the Department of State of the capture of Suh-chau in Kansuh, the last stronghold of the Mohammedan rebels, and he forwards a translation of a very voluminous memorial from Tso Tsung-tang, reporting the same. In concluding his letter, Dr. Williams observes :—"The Mohammedans rose in array in the south-west and north-west, where they set the Imperialists at defiance for ten years or more, but are now no longer formidable, and the few chiefs who may have escaped with a small following will not be able to gather head in those devastated districts. The manner in which orderly government, trade, and rebuilding of ruined towns has revived in those departments in the Valley of the Yang-tsze, which were left almost like a wilderness in 1865, leads me to hope for a similar reviving in the western provinces." The next despatch (March 30, 1874) states that "A Roman Catholic Bishop, whose diocese comprises a part of Manchuria and the region contiguous to Korea, has lately reached Peking from Newchwang, and brings an account of an entire change in the Government of Korea within the last three months, and the removal of the ruler who has usurped the authority during the past fifteen years. The principal facts, as he reports them, tally very well with some statements made years ago, and bear the appearance of authenticity, though many details remain to be supplied." Although Mr. Hart's notable memorandum on the Woosung Bar and the Future of Shanghai must, from its date, have been in the hands of the United States Charge d'Affaires in this month of March, no despatch is reproduced relating to it, but in a long despatch, dated July 20, 1874, and forwarding correspondence respecting the dredging of the Woosung Bar, there occurs this passage :—"The minute from Mr. Hart, in relation to the topography and physics of the *embouchure* of the Yang-tsze, and its connection with the Hwangpu River (inclosure 7), contains many facts and deductions bearing upon the utility or otherwise of the present scheme. The impotence of human efforts to guide or restrain the action of such mighty rivers in depositing their silt makes it desirable to collect and scrutinise all such data bearing on a plan like this; and the even flow of the Yang-tsze and the uniformity of its deposits make it safer to estimate results in this case than in some other rivers. The only thing now asked of this Government is to take measures to increase the depth of water on the bar so as

Digitized by Google

to allow vessels drawing four fathoms to cross at high tide; and this has been shown to be practicable, and its immediate execution a great necessity." It is a very noticeable fact that there are two *lacunæ* in this despatch as given in the volume before us, and that none of its enclosures are printed. The riot at Shanghai is reported at great length, one enclosure to the despatch on the subject being a voluminous extract from the *Evening Courier*. The despatch notifying the trial and sentence of persons concerned in an attack on the Rev. H. Corbett, an American missionary, at Chi-mi, in the Chefoo Consular district, is exceedingly full, and occupies no less than twenty-three pages, most of which are printed in very small type. Four despatches relate to the case of Walter Jackson, charged with piracy and an assault with intent to commit murder on board the British bark *Satsuma*. The correspondence arose out of an application made to Mr. Consul-General Seward for the man's arrest by the Colonial Government of Hong Kong. The matter eventually fell through, as, of course, the extradition treaty between Great Britain and the United States could not be held applicable to Shanghai, but it appears to us that a grave miscarriage of justice would have been avoided had it been remembered that the man, being borne on the articles of a British vessel, was, until discharged from his service, to all intents and purposes, practically a British subject, and should have been dealt with as such. Various matters connected with the operations of the Great Northern Telegraph Company occupy four despatches and a portion of another. Mr. Consul-General Seward's "general efforts and the general efforts of the Consuls of the United States in China to promote the establishment of telegraph lines and the general policy of inducing the authorities to favour and not to oppose such work," meet with hearty approval from the department of State. Finally, we may mention that one of Dr. Williams's earlier despatches encloses a very voluminous correspondence with the Consul at Tientsin respecting the purchase of the premises of the American Southern Presbyterian Mission at Hangchow.

The Japan correspondence comprises forty-seven despatches, thirty from the United States Legation and seventeen from the Department of State. Two despatches relate to "an inquiry made by one Captain Benjamin Pease under what governmental protection the residents of the Bonin Islands are;" Mr. Fish declines to have anything to do with them, saying that, if American citizens take up their abode there, "by resorting to such remote spots on the globe's service, they may fairly be held to have deliberately abandoned the United States without a purpose of returning, and therefore to have relinquished the rights as well as the duties of citizens." Some queries by Mr. W. H. Doyle as to the rights and privileges of American residents in Japan give rise to two despatches. Mr. Doyle is told that "as an American he cannot alter treaties existing between the two countries, but he can expatriate himself, if he wishes so to do." He does not appear to have gained much information of a novel nature in reply to the inquiries which he propounded to Mr. de Long. Seven despatches, commencing as far back as June 2, 1873, relate to proposed modifications of Japanese hunting regulations to govern foreign residents, and eight others are connected in different ways with the Japanese expedition to Formosa. In the last Mr. Secretary Fish discusses the attitude of Japan towards China, and instructs Mr. Bingham to exercise vigilance in protecting the rights of American citizens, and in maintaining the neutrality of the United States in case of war. The last three published despatches, addressed by Mr. de Long to the Department of State, treat of (1) the entertainment of the Duke of Genoa by the Emperor of Japan; (2) the release of a Japanese, who had been arrested for becoming a Christian; (3) a joint note, addressed by the diplomatic corps, to the Japanese Government, and transmitting a draft code of regulations for the government of foreigners travelling or doing business in the interior of Japan. Two later despatches from Mr. Bingham on this matter, which are not published, were read by Mr. Fish "with interest and general approval," and "his general views on the subject commend themselves to the Department, and make it unnecessary to give detailed instructions." In one of his despatches Mr. Bingham forwards a long abstract of a report by Mr. D. W. Ap Jones, "upon the adaptation of certain districts in Japan to the growth of cattle and sheep." Mr. Bingham expresses an opinion that "the material is in Japan to give profitable employment to one hundred million people, instead of the twenty-five, or at most thirty million, who now reside here, one half of whom are without remunerative occupation and in poverty;" and "notwithstanding the published reports to the contrary," he is "also fully satisfied that the undeveloped mineral resources of Japan, in coal, iron, copper, gold, lead, and silver, are very great," and he further thinks that "the opening of the country under proper regulations and restrictions would be attended with advantageous results to Japan and to the United States." Two despatches passed between Mr. Bingham and Mr. Fish in regard to an American citizen, who had transgressed the treaty limits in Yesso, and went into the interior without the permission of the Japanese authorities. The action of Mr. Consul Hawes, at Hakodate, in the matter is substantially approved. One of Mr. Fish's later despatches treats of the coperative policy of the United States in Japan. It was written in consequence of Mr. Bingham's deeming it his duty to withhold his name from a joint note of Sir Harry Parkes and his colleagues to the Japanese Government on a certain matter. Mr. Fish conditionally approves Mr. Bingham's proceeding, but remarks that "it is not deemed wise at present to depart from a policy [*sc.* of co-operation] which has thus far, in the main, proved serviceable." At the conclusion of his communication he further adds that "it is deemed especially important that, in all cases of ill-treatment of foreigners, or of any restriction, or limitation, or denial of the rights guaranteed to them by treaty, or of any infringement of treaty rights, whether personal or of property, the united influence of the foreign representatives in Japan should assert the inviolability of the treaties, and the full protection of all citizens or subjects of the Treaty Powers," which doctrine is most essential to the well-being of the foreign communities in a country like Japan. Seven despatches passed between the United States' Legation in Japan and the Department of State at Washington in regard to the Simonoseki indemnity, and in the last of them, which closes the correspondence, Mr. Fish acknowledges the receipt in full of the amount due by the Japanese Government to the United States on that account.

Besides the China and Japan correspondence, properly so called, there are three despatches bearing on the coolie traffic. In the first Mr. R. G. Watson, British Chargé d'Affaires at Washington, alludes to a conversation he had had on Sept. 3, 1874, with Mr. Fish "on the subject of the recent suppression of the coolie trade at Macao, and the suspicions which, in consequence of the subsequent increase of the Chinese emigration to San Francisco, are entertained lest a portion of this emigration should surreptitiously be diverted to Peru or Cuba," and at the same time transmits, for that gentleman's information, copies of a despatch and its enclosure on that subject from Sir A. E. Kennedy, Governor of Hong Kong, to Lord Carnarvon. Sir Arthur regards the matter with grave suspicion, and directs attention to the fact that in less than five months 8,802 coolies had thus been shipped from Hong Kong to San Francisco. In the second of these despatches the U.S. Minister in Peru reports to Mr. Fish that a committee of seven respectable Chinese residents at Lima had asked him to help them to open communication with the Government of China, their object being to make known "the true condition and treatment of the coolies in Peru," and thus to "counteract attempts which have been made, and were to be continued, to inculcate the belief in China that the coolie trade ought to be encouraged, and to induce the Chinese Government to make the diplomatic representative of Portugal, near the Government of Peru, the medium of communication between the Chinese Government and its subjects in Peru." Lastly, General Sickles, at Madrid, refers to the commission which had been appointed by the Peking Government to visit Cuba, "and investigate the condition and treatment of the Chinamen held there in a sort of bondage, represented to be even worse than slavery;" and he informs Mr. Fish that the fact of an American being placed on the commission is "regarded as offensive to Spanish dignity, and loud protests have come from Cuba against what is called an American intrigue to deprive the planters of Chinese labourers by means of an unfavourable report to be made by the investigating committee." The Spaniards seem to have shown themselves unnecessarily thin-skinned in this matter, for the "American" objected to would seemingly be Mr. A. Macpherson, of the Chinese Customs, a most undoubted British subject.

PAPER MANUFACTURE FROM BAMBOO.

In a former issue we noticed an invention by which the refuse of the sugar cane, after the extraction of the juice, can be utilised as a material for paper making. We are now able to place before our readers the fact of the utilisation of the tender shoots of the bamboo for a similar purpose. The rapidity with which the bamboo grows in suitable localities and congenial climates, and the vast area over which it can be produced in most eastern countries, render the announcement of the conversion of a hitherto but little regarded vegetable product into a commercial commodity a matter of considerable importance to such countries as Ceylon, Mauritius, Penang, Burmah, Java, &c. To the paper trade of the world this invention cannot fail to prove of the utmost advantage. So great has been the expansion of this manufacture during the last dozen years, that notwithstanding the utilisation of many materials hitherto unused in the composition of paper, it is found that the cost of production is steadily augmenting. The advent therefore of a material capable of being supplied in unlimited quantities and at a low rate of cost cannot fail to mark a new era in the history of paper manufacture. The abolition of the paper duty and of the newspaper stamp led to an enormous expansion of trade in all waste materials capable of being converted into paper. In addition to this there has been a steady increase in the demand for all varieties of paper employed in trades and manufactures, until at length it became necessary to look about for new materials accessible readily and at a low cost. The aloe, the plantain, and many barks of trees, as well as soft woods, have been tried, but with incomplete success. In 1861 the Sparta grass was intro-

Digitized by Google

duced to the notice of the British paper makers by Mr Thomas Routledge, who found it growing over a vast tract of Spanish territory. After repeated experiments and a large outlay of capital, this enterprising gentleman took out a patent for its utilisation as a paper material, but owing to British prejudice did not finally succeed in establishing it until the outbreak of the American war caused serious apprehensions as to the future supplies of cotton and cotton waste. The imports of Sparta grass from Spain and Algeria amount at the present time to 140,000 tons yearly, but, unfortunately, owing to a variety of causes, the price of this article has increased from £5 to £10 per ton, and inasmuch as not more than 45 per cent. of the raw material is capable of being converted into paper the actual advance to the manufacturer has been at the rate of £10 per ton on the portion utilised. The necessity that exists for obtaining cheap descriptions of paper for low priced journals has induced Mr. Routledge to look elsewhere for a raw fibrous material at a low cost that might supplant the Spanish grass, and this he appears to have found in the half-developed shoots of the bamboo, a plant which thrives in the poorest soil, demanding nothing better than abundance of moisture and heat.

The manufacture of paper from the bamboo is not an entirely new idea; the Chinese and Japanese have from time immemorial produced a very thin transparent paper from the matured bamboo, but necessarily by a process which renders the article valueless in a commercial point of view. By working up the shoots at an age when they have matured their fibrous development, but before the formation of any woody texture, that is, at about the age of six months, Mr. Routledge is enabled to deal with the article as readily as with any other product under a process which he has protected by patent. The process thus protected consists in passing the shoots of the bamboo through heavy crushing rollers in order to split and flatten them. The stems thus crushed are then passed through a second series of rollers in order to further split them into ribbons, which being cut by a guilloitine knife, are delivered by an automatic feeder direct to the boiling pans. As the stems contain 60 to 70 per cent. of watery mucilaginous matter much of this is expressed by the crushing, while at the same time the fibrous mass being partially disintegrated is more readily acted upon during its treatment by caustic alkali, which is carried on for many hours in a battery of iron vessels, sixteen or twenty in number, after which it is thoroughly washed in hot and cold water. After these processes, which effectually remove all mucilagiuous and resinous matters, the bamboo is pressed free from water, passed through a devil or teaser, where it is torn into a tow-like substance, and finally dried and baled.

It is estimated that an acre of suitable land in a moist situation would produce forty tons of green bamboo per annum, or ten tons dry fibrous material, yielding 60 per cent. of paper stock, or six tons per acre. This it is believed could be delivered to the paper makers at two-thirds the present cost of Sparta stock, leaving a very handsome profit to the producer. We need not remind readers in the East with what rapidity the young shoots of the bamboo grow; they have been known to make a growth of nine inches in a single night. Even in England the bamboo in the glass house at the Duke of Northumberland's garden at Kew has made remarkable progress in a few weeks. How readily the poorer classes of cultivators in the East could attend to this new branch of industry we need not say, it could be followed in localities and on grounds suitable for no other article of commercial value, and now that an ever-increasing population demands fresh fields for its labour, this new paper material appears to be precisely that which is wanted. There is no fear of the market being overdone with it, provided the producers do not become exacting in their demands, for each year sees the wants of the paper trade increase for raw material at a low price.

Monetary and Commercial.

The failure is announced of Messrs. Alex. Collie and Co., of London and Manchester, merchants, commission agents, and manufacturers. The firm has for some years held a leading position in Lancashire, but has made heavy losses on shipments to the East, and also, it is understood, on imports from that quarter. Messrs. Turquand, Youngs, and Co. are preparing a statement of affairs to be submitted to a meeting of creditors as soon as practicable. It is estimated the gross liabilities will amount to about £3,000,000, a considerable portion of which will ultimately run off. As to the probable result of the liquidation, it is at present impossible to form any accurate estimate. In commenting upon the failure *The Times* says :—

It has caused much surprise, except among those who have had to struggle against the continuous losses which have resulted from East India shipments of Manchester goods during at least the last four years, and who are aware of the large increase of those shipments for the first five months of the present year. The increase in that period amounts to about sixty-three million yards, or nearly 15 per cent. over the total of the corresponding period of last year. The firm has enjoyed good credit and a reputation of being possessed of ample means, but an impression has been gaining ground for some little time past that the business has been of too speculative a nature. The liquidation of the liabilities will depend, as a matter of course, upon the character of the firms upon which Messrs. Collie and Co. have been in the habit of drawing, for the custom in this trade is for large houses of this class to pay cash for what they buy at Manchester every other Friday, and to draw upon the firms in London or elsewhere for whose account they buy for shipment to the East or otherwise. Mr. George Yule was, it appears, in the firm, but in 1870, by effluxion of time, the partnership expired, and the business has since been carried on by Alexander Collie and William Collie. The position of the East Indian and China trade has for some time been bad. Not only have shipments of goods from this side been made very often at serious loss, but the return trade has yielded no compensating profit. The trade in silk has for a long time been unsatisfactory, and tea has been oversupplied to the markets of Europe. It is said, also, that the trade in opium, on which in former years enormous fortunes were made, has not been paying those engaged in it. The Government of India has made a very heavy profit, and the Chinese have contrived to get something out of it, but the middlemen have not. As an article of exchange it is sometimes shipped at Calcutta at a higher price than is ruling in the market of Hong Kong. Losses have, therefore, been steady and severe, and, one after another, the older houses have been either succumbing or retiring from the trade. This, of course, has affected Manchester very severely, and the more so that raw materials have been keeping well up in price, while manufacturers' prices have been falling. There has, no doubt, been much forced business going on as well. Heavy consignments of goods have been sent out in the belief that they were sure to sell, and, once there, they have had to be thrown on a dull market for what they would fetch.

In connection with this failure the bills have been returned of Messrs. Shand and Co., East India merchants, Rood-lane, Fenchurch-street. The liabilities are estimated at about £250,000. Messrs. Rainbow, Holberton, and Co., of St. Helen's-place, Bishopsgate-street, have also suspended their payments. Messrs. Turquand, Youngs, and Co., have been instructed to prepare a statement of affairs, which will be submitted to a meeting of the creditors as soon as possible. The liabilities are reported at about £75,000. Messrs. Alexander, Son, and Co., East India merchants, of Great Winchester-street, have been compelled to suspend payment. The firm was of long standing, and held in good repute. The liabilities are estimated at £300,000.

The well-known firm of J. P. Westhead and Co., of Manchester, merchants, engaged in the home trade has suspended payment, with liabilities estimated at over £200,000. The cause of the stoppage was the use of accommodation bills between Alexander Collie and Co. and Messrs. Westhead and Co., amounting to £110,000, which by the failure of the former rank against the estate of the latter. This is a more serious failure as affecting Manchester than that of Collie and Co., as the bulk of the losses by the stoppage fell outside Manchester; but in the case of Westhead and Co. the liabilities fall chiefly upon the manufacturers and agents of Lancashire and Yorkshire.

Messrs. Young, Borthwick, and Co., bill brokers, of Lombard-street, have stopped payment, with liabilities on bills bearing their guarantee of about £2,500,000, including £700,000 to £800,000 on the drafts of Messrs. Collie and Co. The firm was established in 1867, and has occupied a respectable position in the London discount market. The failure may be considered as entirely due to that of Collie and Co., and the liquidation, of course, depends upon the extent of the dividend to be paid by that house.

The bills of Messrs. Robert Benson and Co., merchants, have been returned. It is understood that their liabilities, which are about £750,000, are in some measure due to their connection with the Aberdare Iron Works, which recently failed. The house was the agent of the Illinois Central and other American railway companies.

The following are other failures arising out of Messrs. Collie's, with the amount of liabilities in each case :—Messrs. John Anderson and Co., of Philpot-lane, estimated liabilities £200,000; Messrs. Malcolm, Hudson, and Co., Japan merchants, of Crosby-square, the financial agents of the Japanese Government, and agents of two lines of steamers. Their liabilities are stated to be about £150,000, but nothing is known as to the ussets. Messrs. Henry Adamson and Sons, of 75, Mark-lane, liabilities not estimated, but understood to be small; Messrs. John Strachan and Co., East India merchants, 121, Bishopsgate-street, liabilities about £200,000; Mr. J. C. Fowlie, of 78, Leadenhall-street, liabilities about £100,000. The assets in almost all cases will depend upon the outturn of consignments.

Very little business has been attempted on the Manchester Exchange, the failure of Messrs. A. Collie and Co. and its possible effects engrossing conversation and attention, and the prices of yarns and goods have remained untested by much inquiry. On the other hand, sellers refrain from pushing their goods in the slightest degree, and are more afraid of a possible glut on the market than of temporary stagnation. The general feeling on the market is rather one of anxiety than of excitement.

Advices from Montreal report the failure of Messrs. Henry Davis and Co., of Montreal, with liabilities amounting to £270,000, of which £140,000 is unsecured. This firm has been chiefly engaged in importing woollen goods, so that a large por-

Digitized by Google

tion of their liabilities fall on Leeds, Dewsbury, Huddersfield, and the woollen manufacturers of Germany. The holders of the £130,000 secured are chiefly bankers. This is the largest failure that has ever taken place in Canada on dry goods. Consequent on this failure, Messrs. Empey Johnson and Co. have suspended, with liabilities of considerable extent in Manchester and Yorkshire. Messrs. Henry Davis and Co. are indebted to Messrs. Empey Johnson and Co. to the extent of £35,000. Messrs. John Armstrong and Co., St. John's, N.B., are also involved with Messrs. Henry Davis and Co., and have likewise suspended.

At a meeting of the creditors of Messrs. J. C. im Thurn and Co. it was resolved to accept a composition of 5s. in the pound, payable in a month, and the liquidation of the estate was left in the hands of three trustees, who undertake to realise the assets and pay over the proceeds to the creditors. The statement showed that the unsecured liabilities had finally been diminished to £513,806, against which the total estimated assets amount to £431,104, including £37,366 cash and about £200,000 of bills receivable and book debts considered good. The losses of the firm during the last nine years have, it is stated, averaged about £46,000 per annum, but the results of some years were extremely adverse, the loss of 1873 having been £90,000, and of 1874 about £370,000.

The Oriental Bank Corporation notify that the coupons of the Japan Seven per Cent. Loan of 1873, due the 1st July, and also the bonds drawn 1st April, amounting to £48,000, will be payable at their office after the 1st proximo.

It is announced that the half-yearly meeting of the shareholders of the Chartered Mercantile Bank of India, London, and China will be held on the 19th October.

The quantity of tea delivered from the bonded warehouses in London last week amounted to 2,885,105lb., of which 2,012,358lb. was home consumption, 626,281lb. was removed coastwise, 183,188lb. was exported, 58,818lb. was sent coastwise for immediate export, and 4,460lb. was for ships' stores. The duty paid was £50,309, being 16½ per cent. less than in the preceding week.

The average time occupied in the transit of outward messages between London and India by the Indo-European Telegraph Company, *via* Teheran, including the messages for Penang, Singapore, China, Japan, Java, and Australia, during the week ending 11th inst., was one hour nineteen minutes.

Bar silver has become somewhat firmer, and may now be quoted 55⅝d. per oz. Mexican Dollars have been sold at 55⅛d. per oz., showing a decline of ⅛d., the demand for China not being at all good; it is, however, doubtful whether even this rate can be obtained for the large amount (about £170,000) now on the Market from the West India and French steamers.

The amount of bullion per P. and O. steamer *Peking*, from Southampton on the 17th inst., was :—In silver, to Singapore, £64,530; to Hong Kong, £23,229; to Shanghai, £3,750; to Yokohama, £2,067; total £93,576.

ARTICLES OF IMPORT.

During the past week business has again been extremely quiet, and the tendency of prices is still downward. A slight decline has occurred in Tea, Coffee, Pepper, and Sago. On the other hand, there has been an improvement in Tin.

TEA.

The market during the past week has not been affected by the failures in connection with the China trade, for with the continuous decline in value since last January, and the decreasing stocks held by importers, there has been a very limited quantity offering. The losses, with isolated exceptions, now range from 15 to 18 per cent. on import cost for Congou and Scented, and 20 to 25 per cent. on Green Teas. Dealers complain of a scarcity of good and medium quality Congou at 1s. 3d. to 1s. 5d. per lb., but appear to have overlooked the fact that these grades have been selling the past month at 11d. to 1s. 2d. per lb.

Messrs. Arthur Capel and Co.'s Circular says :—Our market, as is usual at this time of the year, has been generally quiet, but further sales to some extent have been made in common to fair black-leaf Congous and new make Canton kinds, the former at last week's rates, but the latter showing a further decline of ½d. per lb. In all other kinds there is no alteration in prices to notice. In public sales 13,344 packages have been brought forward, the whole of which have been sold without reserve. The deliveries for the week, as compared with last year, are as follows, viz.:—

	1875. lbs.	1874. lbs.
Home Consumption	1,975,292	1,898,986
Coastwise	617,841	568,891
Exports	278,536	585,335
	2,871,669	3,053,212

Congous.—Red-leaf kinds: Siftings show no change. Broken-leaf kinds remain firm, also fair common to good common, rather dusty, at 10d. to 10½d. per lb.; free from dust, at 11d. to 11½d. per lb., being only in moderate demand. Fair to good and fine Kaisows are scarce, and previous prices have been fully supported, finest still selling slowly. Pak Lin kinds from second hands have sold at public auction at rather lower prices. Black-leaf kinds: Common to fair common have sold from 9½d. to 10½d., good common at 11d. Fair kinds at 11½d. to 1s. 1d. Good medium to fine have been wanted at from 1s. 4d. to 1s. 7d. per lb. Finest have sold at last week's decline. Canton-make kinds: Further large sales have been made at ½d. per lb. reduction, common to fair realising 1s. to 1s. 1d., good 1s. 1½d. to 1s. 4d., fine showing no change. Oolongs: Common have sold at auction from 8½d. to 9½d.; privately there is but little if any demand. Souchongs are only in limited request. Some Flowery Pekoes have sold at public sale from 1s. 1d. to 1s. 1½d. per lb., being a low range of prices. *Scented Teas:* Canton Capers show no improvement; sales have been made to some extent from 8¾d. per lb. to 10½d. for common to good quality. Orange Pekoes show no material alteration. Foochow Capers are only saleable at low prices. Orange Pekoes: Common kinds are dull of sale; good to fine in fair demand, prices remaining much as before. *Green Teas:* There is but little change to notice in these kinds; the quantity brought to auction has been sufficient for the wants of buyers, and prices for the week show no change.

SILK.

There is nothing new to report of the market; pending the public sales, which are fixed to commence on the 22nd inst., the trade are buying less, but consumption continues on a good scale, and prices are unaltered. Chinas still continue in much favour. Deliveries from 1st to 17th inst. :—

	1875.	1874.
China	2,112	1,621
Canton	577	300
Japan	374	468
Bengal	135	124
Total	3,198	2,513

COFFEE.—Considerable supplies of Plantation Ceylon have been brought to auction during the week, and the demand having been active the sales have gone off heavily at a decline of about one shilling per cwt. The closing prices are small greyish 97s. to 99s., low middling 100s. to 101s., middling to good middling 103s. to 105s., and bold 107s. 6d. to 110s. 6d., peas 125s. to 126s., triage 85s. to 88s. per cwt. No business in Native has been reported.

CHINA MATTING.—At auction 131 rolls offered were bought in, 6 by 4 red at 40s. to 42s. and 5 by 4 at 35s., 4 by 4 white stained at 58s., and 4 by 4 red at 52s. per roll; 158 rolls sold without reserve, 4 by 4 white at 16s. to 17s., ditto more or less mildewed at 12s. 6d., and 4 by 4 red at 16s. 6d. per roll.

COIR GOODS.—The public sales comprised 546 bales 69,268 dholls 781 ballots 65 tons Yarn, 585 bales 5,244 dholls 2,727 ballots Fibre, 117 bales Bristle, 40 bundles Kitool, 21,359 coils Rope. Yarn mostly sold; Ceylon bales, common to medium at £22 to £30, good medium to fine

Digitized by Google

at £35 to £40; dholls, common to medium at £20 to £31 10s., good at £39 10s., fine at £45 to £49; ballots at £34 15s. to £40 5s. Fibre sold at £18 10s. to £22 10s., low at £10 to £11 15s. Bristle, £27 to £50. Kitool was taken out. Rope partly sold, 5 to 5½ in. at £30 5s., 4 in. at £30, and 1½ to 4½ in. at £29 15s. per ton.

COCOANUT OIL.—The market has been very quiet. Ceylon is quoted £37 10s. for old and £37 15s. for new in pipes. Cochin offers at £42 to £43 10s.

CHINA GALLS.—187 cases in auction were bought in at 53s. per cwt.

CUTCH.—A parcel of 128 boxes Calcutta (J.S. and Co., S. in diamond) was bought in at 25s. per cwt., and 300 boxes good Pegu sold at 23s. per cwt.

COTTON.—The market has been quiet; sales have been made on the spot at steady prices, but arrivals are slightly in favour of buyers. Prices are, on the spot:—Tinnivelly 5⅝d. to 5¾d., Western Madras 4 13-16d. to 5⅛d., Northern 5⅛d., Coconada 5 3-16d., Bengal 3¼d. to 4⅜d., Northern 5 9-16d., landing, good fair.

PEPPER.—Black, in auction, has not supported private contract rates, 364 bags Penang selling chiefly at 4⅝d. per lb. for good quality; 937 bags Singapore were offered at 5½d., without finding buyers. *White* is about ½d. per lb. lower, and of 612 bags offered 360 bags sold, ordinary brown Singapore at 7d. to 7⅛d., fair at 7⅜d. to 7½d., good at 7⅝d. The Penang was bought in at 7⅛d. per lb.

RICE.—The market has been extremely quiet on the spot. Floating cargoes have met with some little inquiry, but little business has resulted. By auction, 50 bags 40 barrels Cleaned Java were bought in at 28s. per cwt. 7,000 bags famine Rice (ex Bates Family), just arrived sold, at 8s., ex ship. The following floating cargoes have been placed:—Sirrah, 865 tons Bassein, March sailing, at 8s. 1½d., open charter; Pelligra Figaro, 853 tons, April sailing, at a price said to be 7s. 11½d., open charter; one of 840 tons Rangoon, at 8s. 3d.; one of 1,000 tons, at 8s. 1½d.; and one of 1,000 tons, also at 8s. 1½d.

SUGAR.—The market has continued dull throughout, and not a single sale of East India descriptions has occurred during the week.

SAGO is rather cheaper, 159 bags goods medium grain selling at 16s. 3d. per cwt. In another sale 100 bags were bought in at 17s. 6d. per cwt. *Flour*: Of 360 bags Singapore, the sound was bought in, good white at 14s.; the damaged (150 bags) sold at 10s. 3d. to 12s. 3d.

SPICES have been quiet. *Cassia Vera*: 75 bales Padang thin quill bought in at 45s. to 48s. per cwt. *Cinnamon*: In auction, 17 bales bought in, firsts at 2s. 7d. to 3s. per lb. In other Spices no transactions have occurred.

STICKLAC.—In auction 16 boxes Siam were bought in at £5 10s. per cwt.

SAPANWOOD.—In auction 20 tons Batavia were bought in at £14 10s. per ton.

TAPIOCA.—In auction 521 bags Singapore were offered, and about 200 bags sold, fair at 2¼d. to 2⅝d., dull small at 2d. to 2¼d. Of 700 bags Penang 300 bags sold, fine bright Alma mark at 2⅝d. per lb.

TIN has been fairly active, and quotations have slightly advanced. Straits now rules at £84 10s. on the spot and £84 afloat, Banca at £88 to £88 10s., and Billiton at £83 per ton.

CASUALTIES.

SAN FRANCISCO—(BY TELEGRAPH).—The Ango, French barque, from Saigon for Valparaiso (rice), has put into Papeete with all her cargo supposed to be damaged.

MISCELLANEOUS.

ADEN.—Passed, June 11, Conrad (str.), from Batavia, for Nieuwe Diep.

PORT SAID.—Arrived June 7, Madura, from Batavia, and left on the following day for Nieuwe Diep; 11, J. B. Walker, from Southampton, and left for Batavia; 12, Gaelic, from Liverpool, for China and Japan; Glenroy, from London, for China, and both sailed on the following day.

ST. HELENA.—Arrived May 6, Norma, from Hong Kong, for Hamburg; 7, Johanna, from Banjoewangie, for Middleburg; 8, Charles H. Southard, from Penang, for London; 9, Emma, from Tjilatjap, for Rotterdam; 10, Alblasserwaard, from Banjoewanjie, for Amsterdam; Bali, from Sourabaya, for Amsterdam; Bertha, from Nagasaki, for London; 13, Paul, from Colombo, for London; 17, Elizabeth, from Padang, for New York; Havilah, from Ilo Ilo, for Boston; Helena Anna, from Sourabaya, for Marseilles.

PASSED.—May 3, Alnwick Castle, from Colombo, for London; 7, Agnes Muir, from Manila, for London; 16, Zenobia, from Singapore, for London.

THE PYAH PEKHET (STR.).—A telegram received in Greenock on the 11th inst. states that this vessel has arrived at Penang from the Clyde, after a passage of forty-three days, including stoppages at Malta, Port Said, Suez, Aden, and Galle.

NOTICE TO MARINERS.

China—East Coast—Hong Kong.—Fixed Light on Cape D'Aguilar (Tylong Head).—The Colonial Government of Hong Kong has given notice that from the 16th April, 1875, a light would be exhibited from a lighthouse recently erected on Cape D'Aguilar (Tylong Head), south-east extreme of Hong Kong Island. The light is a *fixed* white light, visible as follows, viz.:—1. Visible between the bearings of S.W. and N.W. ¾ W., excepting where the Ninepin and Waglan Islands intervene. 2. Obscured between the bearings of N.W. ¾ W. and N.W. ¼ N. by Soon Kong Island. 3. Visible between the bearings of N.W. ¼ N. and N.N.W. 4. Obscured between the bearings of N.N.W. and N.E. by N., by the Lochow, Pootoy, and the Lema Islands. 5. Visible between the bearings of N.E. by N. and E. by N., ⅛ N., except to vessels when south-westward of the Samoun group. 6. Visible over Tathong Channel, with the exception of a small portion obscured by Shicko Head. It is elevated 198 feet above the level of high water, and in clear weather should be seen from a distance of twenty-three miles. The illuminating apparatus is dioptric or by lenses of the first order. The tower, 57 feet high, is built of stone; the dwellings and boundary wall are painted white. Position, lat. 22° 12′ 15″ N., lon. 114° 15′ 45″ E. —Hydrographic-office, Admiralty, June, 1875.

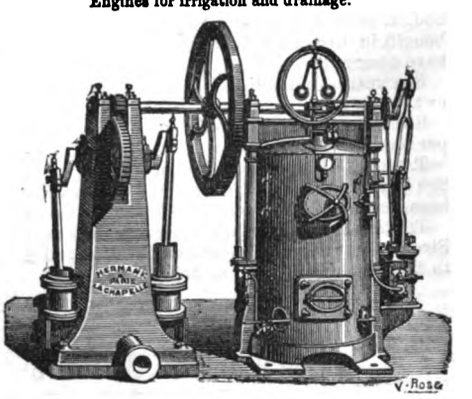
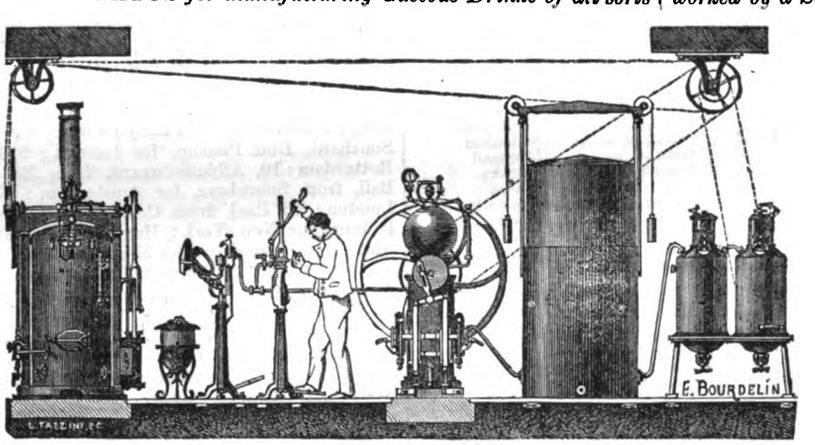
Pumps with plunge piston, moved by Vertical Steam Engines for irrigation and drainage.



CONTINUOUS APPARATUS for manufacturing Gaseous Drinks of all sorts (worked by a Steam Engine).

This apparatus, with mechanical compression and continuous action, is able to produce from 25 to 10,000 bottles of all kinds of aerated drinks per day. It is the only one which complies with all the requirements of the Committees of Health and Safety. The only one which has undergone, before leaving the workshops, the proofs required for any apparatus which has to work at high pressure. The only one adapted to working this branch of industry practically.



J. Hermann-Lachapelle's Syphons are also very remarkable. Their mechanism is very carefully made, and the decanters are in crystal glass of the best quality. The top of these Syphons is plain, without ornament, and easy to clean, which is an advantage.

COMPLETE APPARATUS for manufacturing Aerated Drinks of all kinds (moved by hand).

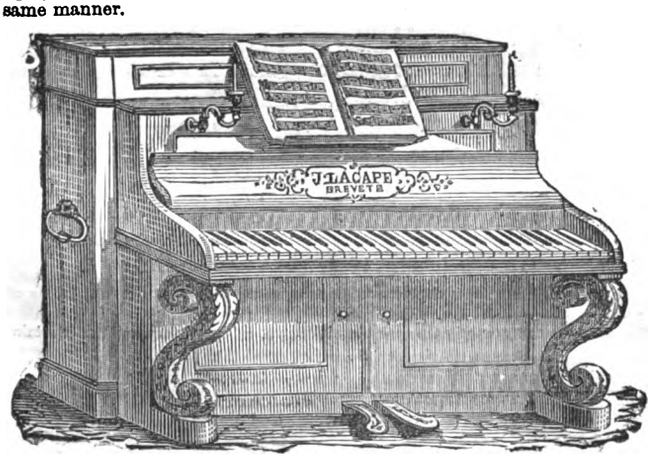
AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29 BOULEVARD ST. MARTIN. PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of seven octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.



ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

Orders through the China and Japan Agency. Specimen at Mr. McMahon's, Yokohama.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, nd by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette.*

Made simply with boiling water or milk.

Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,

HOMŒOPATHIC CHEMISTS,

8, Threadnee dle-street, and 170, Piccadilly. Works:—Euston road and Camden Town, London.

Diploma of Merit, Vienna Exhibition, 1873.

YORKSHIRE RELISH

THE most delicious SAUCE in the world to CHOPS, STEAKS, FISH, &c. Sold by all Grocers and Oilmen in bottles 6d., 1s., and 2s. each. Trade mark—Willow-pattern plate.

PROPRIETORS:—

GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S BAKING POWDER.

THE BEST IN THE WORLD.—Makes delicious Bread without Yeast; Puddings, Pastry, &c., without Eggs, Butter or Lard. Bread made with this Powder is much easier to digest, and much more wholesome than that raised with yeast, and a larger quantity is obtained from the same weight of flour. One trial will convince the most sceptical of its superiority over others. Sold by Grocers, Chemists, and Oilmen in 1d. packets; 6d., 1s., 1s. 6d., and 2s. Tins. Prepared by GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S QUININE WINE.

THE BEST AND MOST AGREEABLE TONIC yet introduced. For the relief of Indigestion, General Debility, and Loss of Appetite it is INVALUABLE. Recommended for its purity by the *Food Journal*, Arthur Hill Hassall, M.D., Wentworth L. Scott, Esq., F.C.S., F.A.S.L., F.R.S.S.A., &c. Sold by Grocers, Oilmen, and Chemists, in large bottles at 1s. 1s. 1½d., 2s., and 2s. 3d. each. Prepared by GOODALL BACKHOUSE & CO., LEEDS

A CURE FOR ALL !!!

GWYNNE and Co., Hydraulic and Mechanical Engineers,

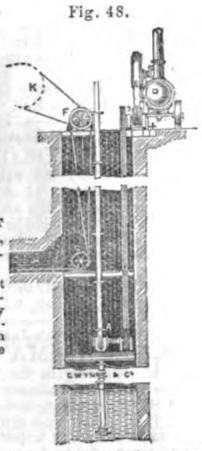
ESSEX STREET WORKS, STRAND, LONDON, W.C.

Fig. 39.

GWYNNE & CO.'S PATENT PUMPING MACHINERY, AS APPLIED TO EMPTYING DOCKS.

The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be given

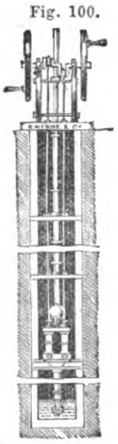
Fig. 48.



GWYNNE & CO.'S IMPROVED PATENT CENTRIFUGAL PUMP.

Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of Water

Fig. 100.



GWYNNE & CO.'S IMPROVED DOUBLE BARREL DEEP-WELL PUMP,

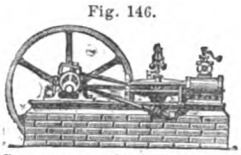
For Hand-power, adapted for ordinary wells of any depth, of most careful construction, and on the most approved system

Fig. 86.

GWYNNE & CO.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.

These Pumps work without valves or packing, and raise a considerable quantity of mud, or grit without choking, water. They will lift sand, and require only very inexpensive repairs.

Fig. 146.



GWYNNE & CO.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.

With or without Expansion Gear, for economical working.

From 4 to 100-horse power

Fig. 154.

GWYNNE & CO. IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.

These boilers are simple and compact. They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler.

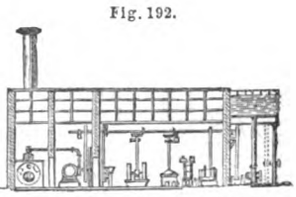
Fig. 142.

GWYNNE & CO.'S IMPROVED PORTABLE STEAM ENGINE.

Light, simple in construction, durable, and economical, and very superior to "Agricultural" Engines.

From 2½ to 30-horse power

Fig. 192.



GWYNNE & CO.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES, FAT, &C., &C.

The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motive power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added to lift water or any purpose required.

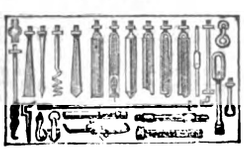
Fig. 193.

GWYNNE & CO.'S IMPROVED HYDRAULIC LIFTS.

Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine, or other produce, into or up from cellars, or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.

Prices on application.

Fig. 121.

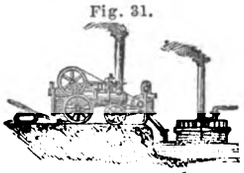


GWYNNE & CO.'S BORING TOOLS.

Of greatly improved construction. The figure represents those most frequently used, but the form and number vary much with the nature of the soil, and size of the bore hole.

G. & Co. can confidently recommend these as the best in the market.

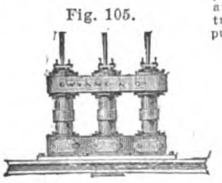
Fig. 31.



GWYNNE & CO.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR.

In which the Pumps are furnished with hose for distributing the water over the adjoining plantations. Made in all sizes.

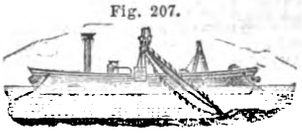
Fig. 105.



GWYNNE & CO.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.

These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and comparison with those of other makers is challenged. Gwynne & Co. make single and double-barrelled pumps upon the same principles.

Fig. 207.



GWYNNE & CO.'S IMPROVED DREDGING MACHINERY.

The boat can be constructed so as to draw only 18 inches of water, if required. The machinery is extremely simple, yet thoroughly effective, the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Large Illustrated Catalogue with many Estimates, and upwards of 200 Engravings, post free for Twenty-four Stamps to any part of the world.

For Freight or Passage apply to GELLATLY, HANKEY SEWELL and Co., 1, Fenwick-street, Liverpool; Bridgewater-buildings, Albert-square, Manchester; 51, Pall Mall, S.W.; and 109, Leadenhall-street, London, E.C.

Steam via the Suez Canal. Last shipping day, 5th July

FOR PENANG, SINGAPORE, HONG KONG, and SHANGHAI, the splendid screw steamship TEVIOT, 100 A1, 1,262 tons register, 1 946 tons gross register, 250-h.p. nominal, 1,250-h.p. effective; W. C. NISBET, Commander; Victoria Docks. This fine high-classed steamer is well known in the India and China trades for her rapid passages.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., 1, Fenwick-street, Liverpool; Bridgewater-buildings, Albert-square, Manchester; 51, Pall-mall, S.W.; and 109, Leadenhall-street, London, E.C.

Steam via the Suez Canal.

TO SINGAPORE, HONG KONG, YOKOHAMA, and HIOGO, taking cargo for transhipment to Java, Australia, &c., at through rates, at shippers' risk, last shipping day, 24th June, the favourite full-powered screw-steamer PARAGUAY, 90 A1, 1,179 tons, 180-horse power nominal; W. G. WILLIAMS, Commander; South West India Docks. This magnificent steamer offers the most favourable opportunity for goods and passengers, the elegant and spacious cabins being replete with every comfort.

For Freight or Passage, apply to A. G. ROBINSON, Esq., 20, Mark-lane, E.C.; SMITH, SUNDIUS, and Co., 33, Gracechurch-street, E.C.; or to NORRIS and JOYNER, 126, Bishopsgate-street Within, E.C. (corner of Cornhill).

With quick despatch.

FOR SHANGHAI DIRECT, the clipper ship WINDHOVER, A1 16 years, 847 tons register, WM. FINDLAY, Commander; South West India Docks. This ship has made some of the fastest passages on record, and is noted for discharging her cargo without damage.

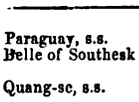
For Freight or Passage apply to NORRIS and JOYNER, 126, Bishopsgate-street Within (corner of Cornhill), E.C.

CHINA

THE following SPLENDID First-class SHIPS will be despatched as under:—

Port.	Ship.	Class.	Dock.	To sail.
Hong Kong	Marina	A1 12 yr.	W.I.D.	With des.
Shanghai ...	Agnes Muir..	AA1	E.I.D.	With des.

Apply to KILLICK, MARTIN, and Co., 10, George-yard, Lombard-street, E.C.



FOR Tanjong Pagar, SINGAPORE.—The following VESSELS are now on the berth in

	Tons	Brokers.	To Sail.
LONDON.			
Paraguay, s.s. ...	1,179	Norris & Joyner...	June 24
Belle of Southesk ...	548	Wright Brothers, & Co.	June 23
Quang-se, s.s. ...	2,788	McGregor, Gow, & Co.... ...	June 23
George Croshaw ...	670	Wright Brothers, & Co.	July 10
LIVERPOOL.			
Stentor, s.s. ...	—	Alfred Holt ...	June 24

Scale of wharf and dock charges may be had on application to the Company's London Agents, Messrs. MACTAGGART, TIDMAN, and Co., 34, Leadenhall-street, E.C.

SHAW, WILLIAMS, and CO will despatch the following high class vessels as under:—

Ports.	Ship.	Class.	Tns.	Dock.	Sailing.
Hong Kong	Gryfe	*AA1	1073	E.I.	With des
Shanghai ...	Albert Victor ...	A1 13 yr.	858	E.I.	With des
Shanghai ...	Titania ...	A1 16 yr.	879	S.W.I.	To follw.

For Freight or Passage apply to SHAW, WILLIAMS, and Co., 9, Fenchurch-street, E.C.

With quick despatch.

FOR YOKOHAMA and HIOGO, the well-known China clipper ALBUERA, A1 17 years (owned by Messrs. John Willis and Son), 774 tons register; R. E. HARRIS, Commander; South West India Docks. This fine vessel is confidently recommended to shippers, and has excellent accommodation for passengers.

For Freight or Passage apply to J. D. WILLIS and Co., 115, Leadenhall-street, London, E.C.

To sail 30th June.

YOKOHAMA AND HIOGO (loading in the West India Docks), the splendid clipper ship WESTERN CHIEF, newly metalled, A1 14 years, 750 tons register, J. P. HILL, Commander. This favourite ship, known to be one of the fastest in the China trade has excellent accommodation for passengers.

KNEVITT and Co., 3, Sun-court, Cornhill.

With despatch.

FOR YOKOHAMA and HIOGO DIRECT, the favourite Aberdeen-built China clipper FLYING SPUR, A1 15 years, 735 tons register; South west India Docks; G. CROOL, Commander.

For Freight or Passage apply to JOHN WILLIAMSON, York Chambers, 55, King-street, Manchester; or to ROBERTSON and Co., 5, Newman's-court, Cornhill, London, E.C.

JAPAN SEVEN PER CENT. LOAN OF 1873.—The COUPONS due 1st July, 1875, on the Bonds of the above Loan, and the BONDS drawn for payment on the 1st April, 1875, amounting to £18,000, will be PAID on and after the 1st proximo, at the Office of the Oriental Bank Corporation, 40, Threadneedle street Coupons and drawn Bonds must be left three clear days for examination previous to payment.

Oriental Bank Corporation,
40, Threadneedle-street,
June 14, 1875.

THE MAILS, &c.

The French mail, bringing the above advices, was delivered, *via* Marseilles, on the 24th inst., being four days early. The next inward (P. and O.) mail, with advices Yokohama 12th, Shanghai 16th, Hong Kong 22nd, Singapore 30th May, which is due, *via* Brindisi, on Monday next, the 5th prox., left Galle on its due date, the 10th inst.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Sindh*, arrived June 22.—From Yokohama: Mr. Katsoura (attache to the Japanese Legation in Berlin). From Shanghai: Messrs. Kendall, Mitchell, Relpot, Pereira, Teillot, De Rosalis, Voight. From Hong Kong: Messrs. MacLean, De Coster, Schleppel, Kleczkowski, D'Avila, Joly. From Saigon: Messrs. Hauss, Lousteau, Fricot, Brecard, Moty, Mdlle. Floret. From Singapore: Mr. and Mrs. Armstrong, Mr. and Mrs. Cotello, Mr. and Mrs. Brown, Mr. and Mrs. Percival, Mr. and Mrs. Rome, Mr. and Mrs. Jansen, Mr. and Mrs. De Rochemont, Mr. and Mrs. Leetjens, Mr. and Mrs Guerini, the Baroness Von Reede, Mdme. De Almeida, Messrs. Garcia, Martinez, Mazetti, Celestini, Montanez, Barrachina, Brinck, Crommelin, Balfour, Genslius, MacIntyre, Tromp, Bruyn, Baretry, Hartung, Mounnier, Champlon, Isemonger, Neave, Zamacois, Elie, Pickham, Chabert, Fife. From Galle: Mr. Fraser, Mr. Atkins.

PASSENGERS OUTWARD.

Per P. and O. steamer *Baroda*, from Brindisi, June 28.—To Singapore: Mr. T. C. Easton. To Ceylon: Mr. Birch, Mr. and Mrs. C. H. Scott.

Per P. and O. steamer *Mirzapore*, from Southampton, July 1.—To Yokohama: Mrs. C. Christenson. To Hong Kong: Lieut. J. F. Bedford. To Ceylon: Miss Vanderspar, Miss L. Vanderspar.

Per French steamer *Meikong*, from Marseilles, July 4.—To Batavia: Mr. Rombouts.

Per French steamer *Amazone*, from Marseilles, July 18.—To Yokohama: Mr. Chapsal. To Galle: Mr. Hassanaer.

Per French steamer *Anadyr*, from Marseilles, August 1.—To Batavia: Mr. Van B. Vaanders. To Singapore: Mr. and Mrs. van der Erb.

Per French steamer *Tigre*, from Marseilles, Aug. 29.—To Saigon: Mr. Andrew Spooner.

Per French steamer *Hoogly*, from Marseilles, Sept. 26.—To Singapore: Mr. and Mrs. Goldie.

Per steamer *Quang-Se*, from London June 24.—To Singapore: Mr. C. G. Graham.

Per steamer *Naples*, from London June 28.—To Singapore: Capt. Gutsmiths. To Hong Kong: Capt. Patterson.

Per steamer *Stentor* (Holt's line), from Liverpool June 25.—To Singapore: Mr. Willan; To Shanghai: Mrs. Simpson.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Our advices from this port by the present mail extend to the 5th May; the P. and O. mail from London March 19 arrived out on the 4th May.

The *Japan Gazette* says:—Within a fortnight of the consummation of a series of embezzlements, involving the loss to the local branch of the Comptoir d'Escompte de Paris of a very large sum of money, another and identically similar fraud has been perpetrated in this Settlement, and although the sum appropriated is, as far as is at present known, not so large as in the former case, it is large enough to render the matter a serious one, to cause outsiders to indulge in speculations as to whether the system of conducting the business of banking in the Far East is a sound one. In the case of the French Bank the defaulters were Europeans, men who, up to the time of the discovery of their misdeeds, had moved in good society, and had been really "above suspicion." The Deutsche Bank, which is about closing up its business here, is now the victim, and the defaulter, a Chinaman named King Yao, who has for some years been employed by that corporation in the responsible position of compradore. The amount deficient is $28,000, which loss will probably be total, as of the two men (Chinamen) who first became sureties for him, one is dead, and the other has left for China. The total amount guaranteed, we are informed (but not officially), was only $4,000. The defaulter, probably thinking that, the bank being about to close operations here, discovery was imminent, voluntarily acknowledged his crime to the cashier, Mr. Hubner. It is surmised that he has been for some time past speculating in exchange, and has made heavy losses, and that he has only recently appropriated the sum deficient. A Japanese employed on the bank premises saw him burning a lot of papers, but the manager found a book belonging to him, detailing the several amounts taken. They represent the appropriations as having extended over a considerable period of time, and this is what is supposed to cast a doubt on the genuineness of the entries. Immediately on the acknowledgment of his guilt the matter was communicated to the German Consul, and two officials of the Saibansho having been sent to the bank, the culprit was bound with cords and taken to jail. It appears that he had already served a term of fifteen years in Hong Kong, for the embezzlement of no less a sum than $60,000 from a leading firm there, and that immediately on his release he came to Yokohama. How, under such circumstances, he succeeded in obtaining so responsible a position here, seems, in the face of it, strange indeed. We believe he has a son employed as compradore in the French Bank.

The following items of news are from the *Japan Mail*:—

The following story is curious, but seems to require confirmation:—On the 30th March, a small steam-vessel of "ordinary size" made its appearance at a village in the district of Amakusa in Shirakawa *ken*, and without introductory parley fired some five or six times at the undefended houses. One of the shots struck the house of a certain Kawakami Sekichi, and the villagers, greatly alarmed, sought for the help of the police. Pending their arrival, however, the vessel had disappeared. Intimation of the event was duly conveyed to the heads of the *ken*, the Naimusho and to the Naval Department, but the *Nisshin Shinjisshi*, from which we translate the story, does not tell us the result of of their investigation.

The preliminary investigation into the recent French Bank robbery has resulted in Adds, through whom Swaby and Cantelli purchased the schooner *Iris*, and who accompanied them in

Digitized by Google

their attempted escape, being committed for trial as an accomplice. Captain Withers, who commanded the vessel, was acquitted. The total sum embezzled was stated by M. Vouillemont, the agent of the bank, at $67,775, of which about $47,000 will, it is hoped, be recovered.

A correspondent of the *Hochi Shimbun*, at Kobe, gives a lamentable account of the decaying prosperity of the southern settlement. Trade, he says, is declining just as at Yokohama, and many of those who were attracted to the port by its early success are now returning to their former homes in the interior. Unoccupied houses are but too common, and it is unsatisfactory to learn that the only public works in course of construction are the jail buildings.

A new newspaper enterprise, the *Eiri Shimbun* (Illustrated News), has been brought to light at Yedo. The proprietors are actors, and the paper is therefore likely to receive the patronage of the fair sex.

The police of Yedo is apparently resolved to suppress not only the traffic in rabbits but also the domestication of these animals. Several persons have been recently punished for having them in their possession.

(LATER ADVICES BY PACIFIC MAIL.)

The Pacific Mail Company's steamer *City of Tokio* arrived at San Francisco on the 9th inst., with advices from Yokohama to the 23rd May, and the following summary has been telegraphed to the New York press :—

Within the last month several additional defalcations have been discovered in leading Yokohama houses, mostly committed by Chinese. The Deutsche bank suffered to the extent of $28,000, and Walsh, Hall, and Co. $6,000.

The Japanese financial estimates for the first half of the current year show a surplus of some $1,000,000.

A library of 20,000 foreign volumes has just been established in Yedo by the Educational Department.

The general supervision of contributions to the Philadelphia Centennial has been placed in the hands of the Minister of the Interior.

New and valuable lead mines have just been discovered in the province of Satsuma.

CHINA.

PEKING AND TIENTSIN.

The Tientsin correspondent of the *North China Herald* writes as follows :—

There is no interesting news in the late Peking *Gazettes*, and I have heard of nothing particular going on. I am in receipt of a letter dated April 30, in which the writer says:—"I hear that the Chinese were rude to the foreigners at the races at Peking." As the Yunnan affair, as we all know here, is at present being much talked about both by the higher and the lower classes of Chinese, as well at Peking as at Tientsin, and as the late and still continuing exodus of a number of families from the Legations in Peking has led the populace of both places naturally to jump to the idea that the foreigners of the capital are leaving Peking because they are apprehensive of troubles with the central Government, it does not surprise me in the least that we should now hear the lower orders of people at Peking have manifested their dislike to foreigners at the Peking races.

H. E. Sun-tze-ta has furnished each of the Consulates here with a Chinese chart of the Peiho, showing the places where the grain junks will moor and anchor while in the port. Marks have been put up at the extremities of the different places as a guide to the junks to place themselves. The Taoutai deserves considerable praise for his exertions in this matter, the arranging of which was much required to prevent collisions between the steamers and junks while navigating this narrow river.

On the 30th April Herr von Brandt, the German Envoy, left here for Peking. Mr. Waeber, the Russian Consul, and Mr. Hart, Inspector-General of Customs, have also left for Peking. Mr. Mayers, Her Majesty's Chinese Secretary of Legation, with his family, has reached here from Peking, and proceeds on to Chefoo.

The weather has been extremely boisterous. On the evening of the 28th April, at the end of a day's dust storm, we had a violent thunder storm with rain ; and as at this season of the year we naturally look for having, after any rain, calm, fine weather, we were much disappointed in having during the whole of the 29th a furious gale from the north, with another dense dust storm. On the morning of the 28th I saw a flock of some thirty wild geese flying south.

KIUKIANG.

A serious riot occurred at Kiukiang on the 1st May. A mob attacked the American Mission premises and completely smashed the contents. No harm was done to individuals, nor does any ill-will seem to have been shown to the missionaries by the respectable inhabitants. A correspondent of the *Celestial Empire* gives the following narrative of the occurrence :—

There has been a serious assault upon the Methodist Episcopal Chapel in the city. The chapel is situated on the main street of the city, about half-a-mile inside of the West Gate, and is a good substantial building, erected about two years ago on land purchased by the Mission. The chapel with its fittings cost somewhere near two thousand dollars, besides which there were, at the back of the edifice, rooms for the native preacher and his family, rooms for two day-schools for boys, the members' class-room, and the chapel-keeper's room, in fact, a well-fitted Mission station. So you can form a pretty good idea of the value of the property, and the importance of the position in the principal thoroughfare of the city. After the preaching and schools were over about 4 P.M., a man who lives next door to the chapel looked into the chapel-keeper's room, and asked if his son was there? No, replied the chapel-keeper, he is not here, neither have I seen him. The man was not satisfied, but persisted in saying his son was there, and he knew they had him, and that the foreigners wanted to take the boy's heart and eyes out, to make medicine. This seems to have aroused the chapel-keeper's ire, for he replied with indignation that foreigners did nothing of the sort, and wondered that the man could be such a fool as to think so. While the two men were arguing the matter, a large crowd gathered in the narrow street, the man shouting at the top of his voice that his son was in the foreign chapel, and that they wanted the boy's heart and eyes for medicine. At the same time the two men took to the last resort of kings, and fought in the narrow street just in front of the chapel ; and the crowd began throwing stones at the doors and windows, finally smashing in both, and pouring into the chapel, where in a very short time stools, benches, pulpit, railing, and chairs were reduced to firewood ; from thence into the school-rooms, one after the other, then into the class rooms, making a clean sweep of desks, tables, stools, chairs, &c.,—finally cleaning out the preacher's room, and taking his bed, bedding, clothes, furniture, and everything belonging to him ; but the preacher himself got into the settlement, with his wife and child safely. I hear that the Er-foo (Deputy magistrate) was on the spot with the runners from his yamên, but could do (?) or at least did—nothing to quell the disturbance, which must have been known at all the yamêns, none but the Chen-tai's yamên being more than five minutes' walk from the chapel. I visited the chapel next morning, and found doors, windows and internal fittings all broken ; a large crowd was in the street, but nothing uncivil was said.

I have learned since that the Taoutai has been energetic in hunting up the vagabonds who gutted the Mission Chapel ; the Yamên runners have caught a good many of them, and on being taken to the Yamên, they received a pretty severe thrashing. The Che-hsien has issued a proclamation, in which he informs the people he will deal severely with anyone found creating a disturbance, or spreading false reports.

SHANGHAI.

The present mail brings advices from this port to the 9th May; the P. and O. mail from London, March 19, was received on the 3rd May, and the overdue mail of 5th March, delayed by the breaking down of the P. and O. steamer *Gwalior*, was received on the 5th May. The following summary of news is from the *North China Herald* :—

We have seen a translation of the Taoutai's circular to the native merchants, which we referred to last week in our news summary. The move appears to be very similar to that of the Customs Taoutai at Tientsin, and is not a happy inauguration of the Taoutai's reign. A defence tax was imposed in Shanghai during the days of the rebellion, and has never been abandoned, although the collection has been materially relaxed. The Taoutai now insists on its full payment, and the *Shunpao* very pertinently asks why Shanghai of all places should be subjected to such an impost? For it seems to be peculiar to Shanghai ; and the *Shunpao* might have remarked that Shanghai has always been indebted for its defence—even during the rebel times when the tax was instituted—to the protection of foreigners. It is a common remark among Chinese at the present day, in case of any trouble here—"If foreigners are driven from Shanghai, there will be no safe place in China."

We understand that the Chinese have resolved to ship no more sugar and chow-chow cargo until the matter is settled, and so far they have carried out the intention. We are told that the Taoutai is beginning to feel his position untenable, and that a retreat on his part will probably soon complete the resemblance to the Tientsin episode. In the meantime the measures taken by his emissaries appear calculated to give the greatest amount of irritation. Two cases which occurred a few days ago have given great offence. While two native hongmen were taking delivery of cargo with their cargo books in their hands, these were snatched away by the tax-collectors, and were lodged in Court before the Taoutai. One man was fined Tls. 630, and the other Tls. 450. We cannot but think the present opportunity might be taken to make a strong move for the abolition of such an anomaly as the Defence Tax altogether.

Three days have been monopolised by our Spring Race Meeting, which took place under the happiest auspices as regards weather, and afforded good sport. That it should have been so is matter for congratulation both for the sake of men interested in the sports and of those who look on race week as an opportunity to go away for a trip. The number of house-boats which went away on the 1st May shows that the exodus up-country was not less than usual ; but we do not hear of so many people going to the Snowy Valley. A rumour which has got abroad

Digitized by Google

that the quarters there are going to grief probably deterred some. The priests collected some money among foreigners not long ago, for the avowed purpose of repairing the dwelling-rooms at the Temple; but the design does not appear to have been carried out. The fine weather which so luckily prevailed on the three race days broke up altogether on the night of the 6th May. Heavy rain during the night and throughout the next morning effectually stopped further sport, and the stewards wisely postponed the fourth day till the 10th.

During the ensuing week we are likely to be busy on Municipal matters, the 11th May being the day fixed for the Ratepayers' meeting. There is a report that the meeting is likely to be posponed till the 18th, in consequence of the non-readiness of the printed documents that have to be circulated beforehand. But we are without official announcement. As yet, only the Estimates for 1875 have been so circulated; and even if the Report can be sent round in reasonable time, there will remain the revised Land Regulations which ought certainly to be in the hands of the ratepayers several days before the meeting. The combined business will hardly be got through in one day.

From the documents appended to the minutes of the French Council meeting we observe that the arbitrators have recommended that the Yank-king-pang bund shall remain as it is They decide against the encroachment on principle, both as to its interference with navigation, and as possibly prejudicing the rights of riverine proprietors. "Every isolated construction which encroaches on a narrow and usually encumbered canal must more or less diminish the facilities of navigation, if it is not executed on scientific principles and conformably to a plan conceived with the object of ameliorating the course of the water way; and consequently it may prejudice more or less the interests of riverine proprietors on the opposite bank." As regards the question raised by the French, whether the English Council has not also encroached, the arbitrators have no sufficient data to decide. "But as the jetties built on this (North) bank are isolated works, they must, if they depass the original banks, be regarded as encroachments," and as more or less affecting free navigation, and liable, therefore, more or less, to prejudice the interests of riverine proprietors on the other side. That, of course, is clear; the question is whether they are encroachments at all. However this may be, the arbitrators recommend that matters be left as they are, and that an undertaking be come to between the two Councils as to the future. The effect of this decision seems to be to confirm an admitted encroachment, which the arbitrators admit is a prejudicial one. To quote the words of the English statement, "the creek is narrowed some twelve to fourteen feet; and this (English) Municipality, instead of enjoying the advantage of a water-course fifty feet wide as originally intended, will only have one thirty-six to thirty-eight feet, and the French Municipality become possessed of land to which they are in no wise entitled."

We mentioned last week that two of the men concerned in the attack on Mr. Cooper near Quinsan had been captured and brought down to Shanghai. One of them is said to be the cousin to the man who was wounded; but the lowdahs say all he did was to retake a bamboo which had been wrested from the assailants by the foreigners, and handed over to one of the boatmen. Otherwise he was fairly quiet. The second man, however, is declared to have taken an active part in chopping the boat's sail and rigging, and otherwise leading on the mob. It is fortunate so prominent a culprit has been caught. We understand that H.B.M. Consul has claimed from the Taoutai a formal investigation, and has signified his intention to be present at the hearing, either in person or by deputy, no matter whether the case is heard at Quinsan or in Shanghai. The two Chinamen are still in the hands of the police, awaiting the decision of the Consul and Taoutai as to their disposal.

Two heavy fires have occurred in the English Settlement; one in the Maloo, between the Shanse and Fohkien-roads, burned down sixteen houses; a second, originating in Fohkien-road, spread to Taiwan-road, and destroyed 116 houses. About four o'clock on the morning of the 2nd May several bamboo huts near the Broadway, Hongkew, tenanted by coolies, were burnt down; and at about the same hour on the afternoon of the 4th five others, on the bank of the Soochow Creek, were destroyed in like manner.

Some documents have been made public which throw strong light on the origin of the outrage upon Mr. Margary. It is quite likely, as Indian papers affirm, that the King of Burmah may have had an active finger in the pie; but these documents bring the direct guilt very startlingly home to the Chinese. There are four documents, of which two give distinct evidence of the advent of a large force from Momein, with the object of attacking the English. One letter predicts the day of the attack, and warns a Burmese official in the English camp to quit it for his life, adding that the warning is given by order of the Chinese. Another mentions the arrival of the Momein force at Manwein, under the command of one Shoon—a nephew of the Li-su of whom we heard so much in connection with Major Sladen's expedition. Li seems to have been at that time a sort of partisan leader, fighting for the Imperialists; he now holds the rank of Colonel, and is military commandant of the district. The inference clearly is that the attack was organised directly by him, quite possibly in collusion with the King of Burmah. Mr. Allen, of the Consular Service, and who accompanied Colonel Browne's expedition to Burmah, has arrived. We learn that Colonel Browne will be shortly on his way here.

We are glad to find that it is proposed to collect a memorial fund in honour of the late Mr. Margary. The subscription is limited to $5, but any sum from $1 up to that amount will be received. The subscription sheet lies at the Shanghai Club, and has already received a numerous list of names. It is proposed that the form of memorial shall be left to the subscribers. A memorial window or a tablet has been proposed. Possibly, if the sum subscribed be large, some other and better idea might be entertained.

On the 3rd May H.M. corvette *Modeste* got up steam and proceeded down the river *en voyage* to Hankow. Later in the day H.M. despatch-boat *Vigilant*, having on board his Excellency T. F. Wade, C.B., and Admiral Ryder, Commander-in-Chief on the China Station, also left the harbour for the same destination.

Shanghai has been thoroughly beaten in the Nagasaki regatta. A private telegram has been received, running: "Kobé first, Nagasaki second, Shanghai 100 yards behind. Our class of boat no use against theirs. Weather rough; raining hard. Sculling races postponed till to-morrow."

The C.M.S.S. *Fei Yuen* is in dock, having the finishing touches put upon the extensive alterations she has been undergoing for some weeks past—preparatory, it is said, for a voyage to England.

On the site of the old Hermitage at Sicawei has been erected a new and more imposing building as a place of entertainment, to celebrate the opening of which a *bal masque* is announced to take place this evening.

HONG KONG.

Our advices by the present mail extend to the 15th May; the P. and O. mail from London April 2 was received on the 9th May. The following items of intelligence are from the *Daily Press*:—

H.E. Shen Pao Chen—Imperial Commissioner at the Arsenal—is, says the *Foochow Herald*, hourly expected from Formosa. His Excellency is the official specially charged with the investigation and settlement of the Great Northern Telegraph Company's claims. During the absence of his Excellency from Foochow, his powers were delegated to certain officers of the Provincial Government, who having already arrived at a decision (favourable, we believe, to the Company) now only await the Commissioner's return, to make known the result of their deliberations.

We understand that the subscription lists for the erection of the new Swimming Bath of the Victoria Recreation Club are now lying at the Hong Kong and German Clubs, at Messrs. Lane, Crawford, and Co.'s, and at the Victoria Recreation Club Buildings. It is hoped that a sufficient sum will soon be subscribed to enable the committee to erect the building.

While one of Messrs. Hook, Son, and Co.'s cargo boats was discharging cargo opposite Messrs. Schellhass and Co.'s premises, the aft mast gave way, breaking right in the middle. One of the coolies employed on board was struck on the back, and sustained such injuries as necessitated his removal to the hospital.

We understand that the Chinese Government intend to introduce the quinine, gutta-percha, and india-rubber plants for cultivation in Formosa; and M. Giquel, who has recently gone home, has, we believe, been commissioned to make the necessary inquiries to this end.

A Court of Inquiry was held in Hong Kong on the 13th May, at the request of the captain himself, into the circumstances attending the grounding of the British steamer *Viking*, Captain Tannock, on the Bombay Shoal, at 2.33 A.M. on the 14th April, on the voyage from Singapore to Hong Kong. Five hundred tons of cargo were thrown overboard, and endeavours made to get the ship off, by means of kedges over each quarter, and driving the engines full speed astern; she was got off at 11.15 A.M. of the 16th April, having been fifty-seven hours aground. After getting afloat the ship made three inches of water per hour in the fore compartment. The only cargo damaged was some iron. After the evidence had been concluded, Mr. Brereton, who appeared as counsel for Captain Tannock, desired to address the Court in behalf of his client, to which the Court objected, as it had not been permitted on previous occasions; Mr. Brereton desired to have the question of his right to address the Court definitely settled, and the inquiry was therefore adjourned in order to obtain the opinion of the Attorney-General on this point.

STRAITS SETTLEMENTS.

SINGAPORE.

The present mail brings advices from this port to the 23rd May; no later mail from London had been received. The following summary of news is from the *Straits Times*:—

Digitized by Google

We have received the report of the Sub-Committee of the Legislative Council on the question of establishing Savings Banks in the colony, laid before that body on the 4th May. Though the Committee have unanimously signed the Report, some of them are in doubt as to the financial success of the institution, and the rate of interest to be allowed ; it is recommended that the experiment be tried first in Singapore, in connection with the Post-office, and should the result be encouraging, to extend it to the other settlements afterwards. The object is undoubtedly good, but as no such institution has ever been in existence here, it is not at all probable that during the first year the natives will sufficiently appreciate the benefits of the establishment to patronise it to any extent, and it will take two or three years at least to give them confidence in the concern. If the Bank is to be given a trial at all we think the Government should determine to maintain it for at least two years, whether patronised or not ; for a hasty abandonment would doubtless justify, to the native mind, their hesitation to avail of this means for hoarding their savings.

A numerously attended meeting has been held in the Exchange, for the purpose of organising the proper measures to carry out the resolution come to some time ago, to present Sir Andrew Clarke with a piece of plate in appreciation of his services as Governor of these Settlements. The Hon. Thomas Scott was voted into the chair. After some discussion the following resolution was proposed by Mr. R. I. Harper, seconded by Mr. R. Campbell, and carried unanimously :—

That a subscription list be opened for the purpose of procuring a piece of plate for presentation to H.E. Sir Andrew Clarke, and for obtaining his portrait to be placed in the Town Hall, in token of the eminent services rendered by him as Governor of the Straits Settlements during his tenure of office.

The following gentlemen were appointed to act as a Committee to carry out the above resolution :—

The Honourables Dr. Little, T. Scott, and Whampoa ; Messrs. R. Campbell, Almeida, Brasier, Brissell, Suhl, Vaughan, Mulholland, Harper, Baumgarten, Bishop, Henderson, Cachick, Moses, Edgar, Kim Ching, Seng Poh, Cheang Hong Lim, Syed Ismail, Syed Mahomed Alsagoff, Rahman Chitty, and Postajee Pestonjee.

Mr. R. I. Harper was appointed honorary secretary and treasurer, and requested to communicate with Penang and Malacca, inviting the co-operation of the residents in those two Settlements.

We are informed that the Official members of the community purpose entertaining at dinner Sir Andrew Clarke previous to his departure, and his Excellency having accepted their invitation, the dinner will come off in the Singapore Club, the use of which has been readily granted by the members.

The following Address has been presented to Sir Andrew Clarke by the Chinese inhabitants of Penang :—

That we the undersigned Chinese inhabitants of Penang being aware of the eve of your Excellency's departure from the shores of the Straits Settlements, probably for ever, to assume a more important office in India, feel anxious to give expression to the feeling which exists among us created by our observation of the manner in which your Excellency has discharged the duties of your high and sublime office of Governor of the said Settlements during the period of your Excellency's Governorship, since November 1873, until now.

The people, who had during your Excellency's Government, appealed and sought redress from your Excellency, were principally, we may say, ourselves, who by our business connections in trade at Perak and Laroot were very frequently compelled to appeal to your Excellency, anent the injustice we suffered from the hands of the Native Chiefs of these places, but through the superior, searching, and exhaustive way in which your Excellency has undertaken to restore those territories to tranquillity, they now assume a very probable and propitious aspect of flourishing again with respect to trade. The efforts and achievements of your Excellency's labour in this matter cannot therefore be too highly appreciated by us, as well as that done by your Excellency at Siam and Klang.

Feeling anxious that your Excellency should take away from our shores a token of the real respect, esteem, and good feeling, in which we the undersigned Chinese inhabitants of Penang hold you, among whom you have administered with such remarkable impartiality, independence, and good judgment which has obtained for your decisions the respect and esteem of the public in general, we now present your Excellency with this address, and hope that it may now and again remind your Excellency of our shores, with lively and kind feelings of the time spent by your Excellency as Governor among its people.

We now with regret beg to take leave of your Excellency, with fervent wishes for the prosperity and happiness of your Excellency and your Excellency's family, and we subscribe ourselves at Penang on this eighth day of May, A.D., 1875.

The prisoners found guilty on the lighter counts of the indictment in the great prison murder case have been brought up before the Court, when the Chief Justice passed the following sentences upon them :—Four to be kept to rigorous imprisonment for the term of three years respectively, such sentence to commence at the expiry of their present terms of imprisonment; two to rigorous imprisonment for two years, after the expiry of their previous terms of imprisonment ; and five being life prisoners, the Court had no power to inflict further punishment, and they were remitted to prison to undergo their sentences.

A fatal accident, through the careless handling of firearms, resulting in the death of a European seaman, has occurred on board the Swedish barque *Orienten*, Captain Stoel. This vessel cleared on the 18th May for Bangkok, and had got out nearly as far as Rhio Straits when the accident occurred. The facts, as nearly as we can gather them, are as follows. The cabin of the vessel opens aft, near the wheel, there being a passage-way along the deck on each side of the cabin for the crew to pass along. The second mate had a revolver in his berth, and deeming it unsafe to leave it loaded, he came out of the cabin to fire it off, but instead of going to the ship's side he stood near the door and fired. Just as he pulled the trigger, one of the sailors, on his way to relieve the man at the wheel, emerged from the passage-way beside the house, and received the ball in the corner of his forehead, just beside the temple, and fell mortally wounded. The captain immediately put back to Singapore, and summoned Dr. Keiser to the wounded man. Dr. Keiser brought him ashore to the hospital, where he died shortly afterwards. A coroner's inquest was held. The captain and seamen stated that there had been no ill-feeling between the second officer and the deceased, but that they were on good terms ; and the second mate declared he did not even know that the revolver was loaded. The jury returned a verdict of accidental death.

The Supreme Court has been occupied with the case of Mahomed Bhanjee, charged under Penal Code by Chan Ah Seng with cheating, in having, on the 22nd August last, obtained delivery from the prosecutor of twenty-five cases, containing 400 boxes of tea, under fraudulent representations, he promising to pay cash therefor. This case was postponed from last assizes, on the ground that material witnesses for the defence were absent. It was first tried in April, when the jury returned a verdict of guilty by a majority of five against two, which the Chief Justice declined to receive, directing the case to be retried. At the present trial, after hearing the evidence, the jury unanimously returned a verdict of guilty, and the judge concurring, the prisoner was sentenced to twelve months' rigorous imprisonment. This being the last case remaining on the calendar, the jury were dismissed.

The *Government Gazette* notifies that the Hon. C. J. Irving, having returned from leave, assumed office as Acting Colonial Secretary, Straits Settlements, on the 14th May. The Hon. E. A. Irving will continue to act as Auditor-General, and Mr. Arthur Knight will act as Assistant Colonial Secretary. The Hon. H. Plunket, Superintendent of Police, Penang, is appointed Registrar of Births and Deaths, Penang, and Mr. W. E. Maxwell to be Deputy-Registrar of Births and Deaths, Province Wellesley. Mr. R. W. Maxwell is appointed a Superintendent of Police for the Straits Settlements, the object being that he may be detailed by the Inspector-General for duty in any of the three Settlements. Formerly the superintendents were appointed to particular Settlements, whereas under the new system they are appointed merely as superintendents of the police force of the colony, and may be shifted from one Settlement to another without the necessity for a fresh appointment.

We think we do not intrude upon the privacy of private grief if we notice in a few words the death of Charles Brown Waller, Esq., so long and so favourably known here in connection with the direction of our police and the superintendence of the jail under the new regulations. Mr. Waller had many warm friends in the three Settlements, and there are few but must have been surprised to learn of the "strong man" being so swiftly and so relentlessly stricken down by a fell disease, constitutional and hitherto incurable. Able, energetic, and conscientious in the discharge of his official duties ; amiable, warm-hearted, and simple-minded in private life, Mr. Waller's death will be mourned by many beyond his own circle and regretted by all.

At about midnight on Thursday, the 6th May, a fire broke out in Laroot, in the village of the Taipengs. An alarm, consisting of three guns in succession, was fired from the flagstaff hill, and Captain Speedy, the Assistant Resident, hastened to the scene of the conflagration with a posse of police, and with their assistance was successful in speedily extinguishing the fire, which, but for his timely assistance and able measures, would soon have gained such headway that the whole village would inevitably have been destroyed.

We understand that negotiations are in progress between the Governments of India and the Straits to establish a money-order system between this colony and India,—a public convenience that would undoubtedly be largely availed of by the natives of India resident here for the remittance of small sums of money.

The five survivors of the boat's crew of the *Euxine*, after spending considerable time in jail here, are to be sent home by the *Nestor*, nominally to be tried there, the Court here having no jurisdiction over them ; but in reality, we presume, to have the question of their amenableness to trial settled in England.

A CORRESPONDENT at Shanghai advises us that the visit of Mr. WADE and Admiral RYDER to Hankow will probably be extended to Ichang, to gain some information as to the murder of Mr. MARGARY from the French missionaries and others.

From SINGAPORE.—For London, May 18, Eastern Province; 22, Nestor (str.); for Marseilles, Maximos; for New York, 21, Ivalo.

TELEGRAMS FROM THE FAR EAST.

SIR DOUGLAS FORSYTH'S MISSION.

RANGOON, JUNE 21.—The report that the King of Burmah had yielded on all points to the demands of Sir Douglas Forsyth is premature. The negotiations are still pending.

SIMLA, JUNE 22.—An official despatch announces that the King of Burmah has given explanations to Sir Douglas Forsyth respecting the honourable reception accorded by him to the Chinese General Leeseetahi. The King has also executed an agreement guaranteeing the independence of Western Karennee. Hostilities with Burmah are now considered improbable. Sir Douglas Forsyth remains in Burmah pending receipt of further instructions from the Indian Government.

RANGOON, JUNE 24.—In addition to the agreement guaranteeing the independence of Western Karennee, the King of Burmah grants permission for the passage of British troops through his dominions at any time.

RANGOON, JUNE 25.—A rebellion is reported to have broken out in Upper Burmah.

RANGOON, JUNE 25.—The King of Burmah's seal has been affixed to the treaty negotiated by Sir Douglas Forsyth, and the British Mission leaves Mandalay to-day.

THE DISTURBANCES AT CHINKIANG.

SHANGHAI, JUNE 22.—Chin Kiang is now quiet. The Chinese authorities have partially satisfied the demands for reparation made by the British and American Consuls in consequence of the late outrage.

INDIA AND BURMAH.

(TIMES' TELEGRAM.)

CALCUTTA, JUNE 22.—The report of the assembling of a large Chinese army at Manwyne has caused great depression in the Money and Stock Markets here.

THE SEIZURE OF THE "CARISBROOKE."

HONG KONG, JUNE 25.—The steamer *Carisbrooke*, which was seized by a Chinese gunboat off the Hainan coast, on suspicion of being engaged in smuggling, is reported to have been released, security being given to the value of the ship and cargo—viz., $340,000—pending reference to Peking.

RUSSIA AND JAPAN.

ST. PETERSBURG, JUNE 25.—The *Golos* says that advices from Eastern Siberia announce that the cession to Russia of the Japanese portion of the Island of Saghalien in exchange for the Kurile Islands has been accomplished. The Russian Government is stated to have already appointed two commissioners to take possession of the ceded territory.

CHINA MARKET REPORT.

HONG KONG, JUNE 24.—Grey shirtings, 8¼ lbs., Dewhursts' Eagle chop, $2.55; 16-24, water twist, $108. Cotton, fair medium Bengal, $13½. Tea, at Canton, easier; at Foochow, active. Exchange on London: six months' bank bills, 4s. 2⅝d.

The contract for the New South Wales, New Zealand, and San Francisco mail service has been concluded between Sir Daniel Cooper, acting on behalf of the Government of New South Wales, and Mr. Thomas Russell, acting on behalf of the Government of New Zealand, with the Pacific Mail Steamship Company of New York, Messrs. John Elder and Co., of Glasgow, and Mr. Macgregor, M.P. The service is to commence in November next, and is to be for a period of eight years.

Mr. W. Schmidt, late secretary of the China and Japan Marine Insurance Company, Shanghai, notifies that, under instructions from the directors, he has taken over charge from Messrs. Robert Benson and Co., of the company's agency in this City, the offices remaining temporarily at Messrs. Robert Benson and Co.'s, No. 10, King's Arms-yard, Moorgate-street.

THE MAILS.

PRESENT INWARD MAIL.—MARSEILLES, JUNE 22.—The Messageries Maritimes steamer Sindh, with the inward French mails from China and Japan, arrived here to-day at 4 P.M. She brings 94 passengers and a general cargo, including 170 bales of silk, 25,050 packages of tea, 420 packages of sundries, and specie, value £72,719, for London, which part of her cargo will be forwarded to its destination per Company's steamer Gange, due in London on or about the 5th of July.

HEAVY PORTION OF LAST INWARD MAIL.—GIBRALTAR, JUNE 23.—The P. and O. Company's steamer Thibet, with the India and China heavy mails, leaves at 4 P.M. for Southampton, where she may be expected on the 28th inst.

HEAVY PORTION OF LAST OUTWARD MAIL.—GIBRALTAR, JUNE 21.—The P. and O. Company's steamer Pekin (from Southampton, on the 17th of June), arrived at 8 P.M., and left at midnight for Malta and Port Said.

OUTWARD MAIL OF MAY 14.—SHANGHAI, JUNE 23.—The P. and O. Company's steamer Venetia, with the London mails, of the 14th May, has arrived here.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—June 19, at Amsterdam, from Batavia, Noach III.; 23, at New York, from Colombo, Egbert; 24, at Plymouth, from Colombo, Europe; at Falmouth, from Rangoon, Argonauta; 25, at Queenstown, from Manila, Uli.

DEPARTURES.—June 23, from London, for Rangoon, Shun Lee; for Singapore, Belle of Southesk; from Cardiff, for Singapore, Sumatra; 24, from Liverpool, for China, Stentor (str.); from London, for Shanghai, Quang Se (str.).

LAID ON.—At Liverpool, for Penang, Singapore, Hong Kong, and Shanghai, Patroclus (str.); for Hong Kong, Carrick Castle; for Galle, Liverpool, J. P. Smith; at Glasgow, for Singapore, Douglas Castle.

SPOKEN.—J. M. Joshua, from Cardiff, to Galle, May 19, 1 N., 26.40 W.; Zephir, from Macassar, to Rotterdam, June 9, 37 N., 34 W.; Henriette Adriana, from Banjoewanjie, to Rotterdam, June 2, 14 S., 8 W.; D. H. Watjen, from Newcastle to Singapore, June 6, 39 N., 17 W.; France, from Manila to London, June 13, 39 N., 39 W.

CASUALTIES.—Singapore, June 25.—The Sybele (str.), from London, for China and Japan, is ashore outside here, cargo being discharged into lighters; no apparent damage.

MISCELLANEOUS.—Passed Gibraltar, June 19, Madura (str.), from Batavia, for Nieuwe Diep; 20, Koning der Nederlanden, from Nieuwe Diep, for Batavia. Port Said, June 19, arrived, Conrad, from Batavia, and left on the 20th for Naples and Nieuwe Diep.

Naval and Military.

The command of the 2nd Battalion 10th Regiment, vacant by the retirement of Colonel Annesley on half-pay, is to be given to Major and Brevet Lieut.-Colonel Joseph P. H. Crowe, V.C., from the 1st Battalion at Singapore. Colonel Crowe joined the army in October 1846, and was awarded the Victoria Cross for distinguished and gallant conduct during the Indian Mutiny. He served with Havelock's column from its first taking the field in 1857, and was wounded at the storming of Lucknow. His Indian services were rewarded with the Brevet of Major, the grant of a year's service for Lucknow, and the medals and clasps for India and Persia.

THE CHINA FLEET.

HONG KONG, May 13.—"The Charybdis left 10th for Japan. The Hornet, Lieut. J. G. Jones, late of the Charybdis, in command, left on the 12th for Amoy and Foochow; on arrival at the Kestrel will return to Hong Kong. The Ringdove went for a cruise on the 11th to examine the Bokhara buoy; the Colonial Government having no steamer the services of men-of-war are repeatedly asked for on similar occasions. The Vigilant, having on board his Excellency T. F. Wade C.B., the British Minister in China, and Admiral Ryder, Commander-in-Chief on the China station, left Shanghai on the 4th of May for Hankow. Deputy Surgeon-General T. Moorhead, M.D., principal medical officer in China, has two months' leave of absence, and left on the 10th inst. for Shanghai and Japan. The foreign men-of-war in Hong Kong are the American frigate Hartford, and the corvette Said, and the German frigate Ariadne. The American corvette Yantie left on the 9th for the north."

The Elk, 4, screw gunboat, Commander R. H. Harris, which arrived at Portsmouth from the China station on the 9th inst., was paid off on the 22nd inst. She was commissioned at Hong Kong on the 8th November, 1871, where she remained until the 5th of April, when she was ordered to proceed to Tungao Roads, in order to salve the s.s. Hai Loong, which was most successfully accomplished, after five days' very trying work. On the 5th of August she left Hong Kong for Amoy, to relieve the Dwarf. On this station she remained twelve months, visiting Takow monthly, and occasionally Swatow and Amping. The Elk then proceeded to Nagasaki to join the Admiral, and was fortunate enough to be ordered to carry the mails for the squadron to Russian Tartary, visiting the ports and harbours of Possiette, Vladivostock, Wrangel Bay, Olga Bay, and Barracouta harbour, at all of which places the officers and men thoroughly enjoyed themselves shooting and fishing. From this cruise, after calling in at Hakodado, Yokohama, and proceeding through the Inland Sea, she reached Shanghai, and was then ordered to winter at Tientsin. During the long and severe winter at this place the Elks made themselves thoroughly at home, hunting, shooting, and skating being the order of the day, while the evenings were whiled away by theatricals, Christy Minstrels, and general conviviality. It was with deep regret the Elks left this place for Shanghai, where they arrived in time to assist in quelling the riots on the 3rd of May, 1874. She then visited Ningpo (where a week was spent) and Amoy on the way to Hong Kong. It was there discovered that her boilers were getting weak. This necessitated her speedy return to the old country. The Elk left Hong Kong homeward bound on the 2nd of January, 1875, and after calling at Manila, Labuan, Singapore, Trincomalee, Point de Galle, Aden, Jeddah, Suez, Ismalia, Port Said, Malta, Gibraltar, and Corcubion, arrived at Plymouth on the evening of the 7th June. During the commission she has been most comfortable and healthy, not a single death having occurred, and only two men invalided.

The Magpie, double screw gun vessel, Commander Henry Salmon, arrived at Portsmouth on the 22nd inst. from the East India station, *via* the Suez Canal. She left Bombay on the 30th of April, arrived at Malta on the 24th of May, having been towed through the Red Sea by Her Majesty's ship Volage, and left Gibraltar on the 8th inst. Among the places visited by the Magpie during her cruise were Bombay, Zanzibar, the Mozambique and the Seychelles, Mahe, the Andaman Islands, Rangoon, Calcutta, and Trincomalee. Her present commander commissioned her on the 14th of March, 1874.

The iron corvette Volage, Captain Henry Fairfax, arrived at Spithead on the 17th inst. from Malta. She has been employed on special service in connection with the Kerguelen observations of the transit of Venus. The Volage arrived at Malta from Bombay on the 23rd ult., having towed the Magpie through the Red Sea to the Gulf of Suez. She left Malta for England on the 29th ult. The astronomers returned to England overland.

The Emperor of Germany has notified his desire to confer upon Captain Fellowes, R.N., C.B., Superintendent of Chatham Dockyard, the order of the Red Eagle of Prussia, on account of the hospitality and attention shown by him to German subjects who have visited Chatham yard.

The Vestal, in charge of Lieutenant Douglas, late navigating officer of the Avon, is now nearly ready for commission at Portsmouth. It is said that Commander Hand, who served as a midshipman throughout the last China war, will be appointed to this vessel.

At a recent meeting of the Royal Humane Society, its vellum testimonial was voted to J. Davies, able seaman, and G. Davies, ordinary seaman, of the Ringdove, for gallantly jumping overboard at Shanghai to save life.

The Pert, 4, double-screw, composite gun-vessel, will be commissioned on the 1st prox. by Commander Aitchinson, with a complement of seventy-three men, for North America and the West Indies.

Captain Bosanquet, at present on the Torpedo Committee, and who has seen much service in China, has been nominated to the command of the Diamond, about to be commissioned at Sheerness.

Captain P. Sharpe, formerly of the Magicienne in China, has joined the Crocodile at Portsmouth, vice Captain Townsend, late of the Icarus in China, whose period of service has expired.

Captain W. Arthur, late of the Iron Duke, visited Portsmouth on the 22nd inst., and was present at the torpedo experiments on board the Shah at, Spithead, on the following day.

A letter appears in *The Times*, dated Yokohama, April 11, from a correspondent on board the Challenger, descriptive of the voyage of that vessel from Zamboangan to Yokohama.

The Vestal, 11, screw sloop, will be commissioned by Commander Hands in the course of next month for service in the Pacific. Her armament has been materially increased.

Sub-Lieutenants F. S. Ommaney and A. R. M. Creagh (of the Audacious, flagship on the China station) have volunteered to return home to qualify in navigation and pilotage.

The Naval Marine Battalion from Japan arrived at St. Vincent, Cape de Verdes, on the 15th inst., all well, in the Adventure, which was to leave the day following for England.

Admiral Sir A. L. Kuper, G.C.B., whose last command was the China station, will retire in September next, as he will then have been ten years unemployed.

Deputy-Commissary G. T. Pett (of the Control Department) has been transferred from Woolwich to Ceylon.

Miscellaneous.

THE PRIVATE ARCTIC EXPEDITION.

On the 23rd inst. the screw sloop *Pandora* left the docks at Southampton bound for the Arctic Regions. The *Pandora* is thoroughly equipped for service in the Polar seas. Every rope and bolt is new, while the masts, three in number, have been newly spliced, and the yards shortened and re-sailed. Athough she has been strengthened in every part, and although she is so heavily laden that she draws ten and a half feet of water, her whole appearance as she glided out of port suggested symmetry and delicacy of outline. She has been used in times past as a despatch boat, and her smart and tidy build are sufficient criterions to the eye that she did her work rapidly. The usual commander's cabin has been divided for the accommodation of Captain Young and Lieutenant Lillingston. In each cabin is a well-stocked library, and on the walls are photographs and landscapes. Amongst the other articles put on board the yacht were a quantity of scientific instruments and books sent down from London, and an organ which has a somewhat remarkable history. In one of the early Franklin search expeditions this organ, a gift of the late Prince Consort, was first taken away to an

Digitized by Google

Arctic latitude; since that time it has done duty in four other Arctic expeditions, including the voyage of the *Fox*. A silver plate has now been fixed upon it which tells of its adventures, and its musical properties have been renovated at a large outlay by Captain Young for this expedition. Outside the captain's cabin, the mess room of the *Pandora* is situated, and from the four sides of this chamber are constructed cabins for the members of the scientific staff. The *Pandora* has shipped among other necessaries, six strong boats, two whale boats, Snider rifles for seal-hunting, ice condenser, and the now orthodox crow's nest. All round her upper deck are barrels which contain fresh water, and over 100 tons of coals are stored in the bunks. She will carry thirty-two souls, all told, including amongst that number, besides Captain Allen Young, the following officers:—Lieut. Lillingston and Dr. Horner, M.R.C.S.—the latter goes not only as a medical officer, but also as meteorologist; he took a prominent part in the ambulance service of the Franco-German war. Lieut. Pirie, of our navy, and Lieut. Baynan, of the Dutch navy. The last named goes out as a scientific officer, it being intended that botanical and marine research shall form a prominent duty in the mission. This officer won some distinction in the Atchin War. The only other officer is Mr. Toms, who served under Captain Young in the yacht *Fox*. Probably the most remarkable man among the petty officers is "Esquimaux Joe," who sailed with Hall in the *Polaris* expedition; he has been specially brought over from America to act as interpreter on board the *Pandora*.

The *Pandora* is commanded by Lieut. Allen Young, R.N.R., and Lieut. Lillingston, R.N. Mr. Young entered the merchant service in 1846. He commanded the *Marlborough*, East Indiaman (1,500 tons), twice round the world in 1853-4, and the *Addaide*, steam troop-ship, during the Crimean war. He was also sailing-master of the *Fox*, under M'Clintock, from 1857-59. He commenced his travelling work by laying out a depot, between Feb. 15 and March 3, in a gale of wind, and with the thermometer averaging forty to forty-eight below zero. The mercury was frozen all the time. On his return, he started for Fury Beach to get some stores which had been left by Parry, and was absent from March 18 to the 28th. He was attacked with snow blindness. Starting on April 7, he traced the south and west shores of Prince of Wales's Sound. Provisions running short after thirty-eight days, he was compelled to send the men and tent back, but proceeded with one man and the dogs for forty days longer, sleeping each night in a hole in the snow. He attempted to cross the M'Clintock Channel, and went about forty miles from the land, the ice being frightfully heavy. He reached the ship on June 7, after an absence of seventy-eight days. He next went to explore Peel Sound, from June 10 to the 28th. He then connected Osborn's with Browne's furthest, and discovered 380 miles of new coast-line. On Feb. 24, 1862, he became a lieutenant of the Naval Reserve. Lieutenant Young also commanded the *Fox* in the North Atlantic Telegraph Expedition in 1862, proceeding to Faroe Islands, Iceland, and Greenland. He also commanded the *Quantung* gun-boat, belonging to the European Chinese Navy, 1862-4, and was a commissioner to the Maritime Congress at Naples in 1871. He gave his name to Allen Young Point, lying to the extreme south-west of Prince of Wales's Land.

THE STABILITY OF SHIPS OF WAR.

Captain Pim, M.P., has obtained a Parliamentary return which supplies information relating to what certain people would call "unseaworthy ships" of Her Majesty's navy. This paper gives the names of all the ships in the Royal navy built during the last eight years, of 700 tons and upwards, which have had to be ballasted, either to ensure their safety or to regulate their trim. The first four on the list are the *Audacious*, *Invincible*, *Vanguard*, and *Iron Duke*, each having a displacement of 6,034 tons. These ships were designed by Mr. Reed, and it was found necessary, after the foundering of the *Captain* had shown the insecurity attending double bottoms, to diminish their inclination to turn over by placing 360 tons of iron and cement in the hollow cavities below the flooring. This addition to the weight of the hulls has brought them down 5 inches in draught, and, consequently, the lower gun ports are to that extent so much nearer the water. The next two are the *Swiftsure* and *Triumph*, of 6,600 tons, also designed by Mr. Reed, and these ships have had 360 tons of small pig-iron and cement placed in their double bottoms, with 30 tons immediately before and 10 tons abaft the same. The extra 400 tons has increased their immersion 4½ inches. The *Sultan*, of 9,286 tons displacement, has had 335 tons let in to the double bottoms, besides 100 tons before and 25 tons abaft, which has caused her to draw 12 inches more water; but this ought to be taken in conjunction with 188 tons of extra weight added to her equipment, and not contemplated in the draught as designed by Mr. Reed. The *Raleigh*, 5,190 tons displacement, was slightly altered while building, but this deviation from the original design, coupled with an increase in her equipment equal to 108 tons, and the insertion of 180 tons of scrap iron and cement between the frames in the bilges, has led to her draught being augmented by 16 inches. The *Raleigh* is one of Mr. Reed's ships. The *Inconstant*, 5,782 tons, of the same class, had her immersion increased 7½ inches by 180 tons of pig ballast being placed along her vertical keel. The *Shah*, 6,040 tons, had her equipment increased by 105 tons, and this, together with 90 tons of iron in the hold, increased her draught of water by 11 inches. The *Volage*, of 3,090 tons, turned out to be more buoyant than contemplated; though her equipment was increased by 13 tons, and 70 tons of pig iron were placed in her shaft passage, she drew 9 inches less than estimated. The *Active*, of 3,070 tons, had 50 tons of iron ballast placed in her shaft passage, and her equipment was increased by 13 tons, and yet her draught was decreased by 10½ inches. The *Volage* and *Active* were designed by Mr. Reed, as also the *Thalia*. The latter ship is 2,266 tons, and 80 tons of pig iron in her bilges, without any addition to her weight of equipment, increased her displacement by 5 inches when compared with the estimated draught. Mr. Reed's ship, the *Juno*, had 30 tons of ballast placed under the tanks in the forehold and under the provisions abaft, and the difference in her draught is 2 inches, which for a vessel of 2,216 tons displacement is of no material consequence, except in passing over bar harbours or shallow places. Seven other ships designed by Mr. Reed—namely, the *Danae*, of 1,755 tons; the *Myrmidon*, of 877 tons; the *Ringdove*, of 774 tons; the *Philomel*, of 774 tons; the *Lapwing*, of 766 tons; the *Bittern*, of 764 tons; and the *Plover*, of 764 tons—have had a few tons of ballast placed on board merely for the purpose of altering their trim; but the changes in the draught of water are only from half an inch to one inch and a half. The last vessel in the table is the *Wye*, which was purchased by the Government in 1873. Her displacement is 1,160 tons, and the Controller's department ordered 120 tons of scrap iron and cement to be placed in her bilges. This amount of ballast would not be required for a merchant steamer carrying heavy cargoes, but as a naval transport it was expedient to keep her in trim.

INTERNATIONAL POSTAL RATES.—Notices have been issued by the Post-office relating to the new international postal tariff. One states that on and after July 1 next foreign stamps of the value of 2½d. and foreign post-cards of the value of 1½d. will be obtainable in any numbers. The other notices announce through rates to certain countries beyond the limits of the union. To China (Peking, Tientsin, and Kalgan) *viâ* Russia, the rate will be 1½d. per half-ounce for letters and 4d. per 4 oz. for newspapers; *viâ* the United States it will be 6d. for letters and 2d. for papers. The United States route will also be available to the following places in Central and South America:—Colon, Panama, Costa Rica, Nicaragua, 5d. for letters and 2d. for newspapers; Cuba, 3½d. for letters and 2d. for newspapers; Mexico, 6d. and 1½d.; Guatemala, 7½d. and 2d.; Japan, 10d. and 3d.; Hawaiian Islands, 4d. and 2d. To Tunis there will be two routes—*viâ* Belgium and Italy, 3½d. for letters and 1d. for newspapers; *viâ* France, 5d. and 2d. To Morocco the French rates will be 6d. and 2d.; by Southampton, 2½d. and 1d. Registration may be had in all cases, but at a special rate of 8d. to Colon and Panama, and of 9d. to Japan. Between all other parts of Europe—Spain excepted—the United States, and Egypt there will be a uniform rate of 2½d. for half-ounce letters, 1½d. for post cards, and 1d. for newspapers.

IN the South Court, South Kensington Museum, may be seen an interesting recent acquisition, being a large Japanese sculpture, in bronze, of a sea-eagle, the work of a celebrated artist of the sixteenth century, by name Myóchin Munéharu, of whom it was said that "under Heaven there never was such a smith as Myóchin Munéharu." The praise thus conveyed may be a little overdrawn, but the enthusiasm it indicates is accounted for, and almost justified, by the wonderful *élan* of this statue of the bird of prey in the act of departing on the wing, as it seems to us, from the verge of a rock; the neck is thrust outwards, the beak slightly opened, as is to emit a scream before descent is begun. The neck feathers are bristling, and this we do not understand, they appear to have become concave, the tips being elevated; the crest is raised; the expanded wings seem to vibrate in every quill; the tail is spread like a fan. The execution is elaborate and careful, but not merely minute—it is marked by something like largeness of style, and a fine feeling for the differing textures and forms of the various kinds of feathers is distinct.

THE LOSS OF THE "WOOSUNG."—An action, "Curlin *v.* Grant and another," has been tried in the Court of Common Pleas. The plaintiff was a master mariner, who formerly commanded the *Woosung*, a steamer which, on the 21st February last, ran upon a coral reef in the Red Sea and was lost. The vessel had got out of her course in thick weather, and the result of the Board of Trade inquiry was that the plaintiff was suspended for three years. He had contracted to provision the ship on his own account, and the defendants, who were insurance brokers, had effected a policy upon these stores for £1,000. The plaintiff's case was that this policy was not in such a form that he could sue upon it, and he claimed damages in consequence. On the other hand, it was said that the policy was quite in the usual course, and that if any objection had been made to the policy it could have been set right. There were also some other questions raised. The jury, after hearing evidence on both sides, found a verdict for the defendants.

AN official notification has been published in Berlin to the effect that the German Minister at Peking, Herr Von Brandt, is empowered under the laws of 5th of May, 1870, and 6th of February, 1875, to perform the ceremonies of civil marriage, on behalf of German subjects or persons under German protectorate in the territory of his diplomatic jurisdiction. Also to register births, marriages, and deaths of German subjects or German *protégés*.

CONSULAR APPOINTMENTS.—The Queen has appointed William James Hertslet, Esq., now Her Majesty's Consul at Konigsberg, to be Her Majesty's Consul for the Provinces of Prussia (East and West), Posen, and Silesia, to reside at Konigsberg; and to approve M. Albert Lefaivre as Consul at Quebec for the French Republic; and Mr. John Chambers Kemsley as Consul at Port Elisabeth, Cape of Good Hope, for the Oriental Republic of the Uruguay.

THE NEW BISHOP OF COLOMBO.—The Rev. R. S. Copleston, fellow of St. John's and Keble Colleges, Oxford, who has been appointed to the bishopric of Colombo, cannot be consecrated before January next, inasmuch as until that time he will not have attained the canonical age of thirty. He will be the youngest bishop consecrated since the Reformation.

The Star Bull Line steamship *Thomas Sorby* arrived at Batavia on the 21st inst., having made the passage from Southampton in thirty-eight days. The *John Howard*, steamer, of the same line, will sail from Southampton on the 17th proximo, for Batavia, Samarang, Sourabaya, &c.

THE Rev. G. Ensor is engaged in delivering a series of addresses in the South of England on his experiences while engaged in missionary work in China and Japan.

Parliament.

HOUSE OF COMMONS.

THE MISSION TO THE KING OF BURMAH.

(June 21st.) Mr. RICHARD asked the Under Secretary of State for India whether Her Majesty's Government would at once communicate to the House any information relative to the complaints, of whatever kind, made by the Government of India against the King of Burmah, together with a copy of the instructions given to Sir Douglas Forsyth, Her Majesty's special envoy to the Burmese Court.

Lord G. HAMILTON said there could be no objection to laying upon the table the correspondence referring to the differences which had occurred as soon as it was complete. Sir Douglas Forsyth had been sent on a mission to Mandalay to endeavour to arrange matters, and nothing could be more likely to frustrate that object than to make his instructions public. Therefore he (Lord G. Hamilton) must decline to lay these papers before the House.

THE OPIUM TRAFFIC.

(25th.) Mr. M. STEWART, in calling attention to the opium traffic between India and China, reviewed the history of the subject for the last hundred years, and contended that it was our duty to take steps to remedy the evils revealed in the evidence given before the East India Finance Committee in 1871. By the Treaty of Tientsin, in 1860, the sale of opium was legalised after the most vigorous protest on the part of the Chinese Emperor. There were two systems in operation in India, and one of them was the Bengal monopoly. Under that the cultivator gave notice of his intention to grow opium, had his land measured, and received advances as the crop reached certain stages. In this way the cultivation was fostered by the Government, and the produce was sold at auction by the Government. This was bad in itself, and bad because though officials might be upright at one time there was no security for their energy and disinterestedness at another time. The monopoly was further bad because our risks, as traders, were not compensated for by our profits. We did not know how much our revenue might be if this monopoly did not exist. At all events an immense amount of capital was locked up in the better part of two years' advances, and on this account probably 2¾ millions ought to be deducted from the revenue of six or seven millions which we obtained from opium. Smuggling was encouraged by the monopoly, which did not restrict the traffic. In Burmah we had introduced the drug by first giving shopkeepers a few cakes of it, and then selling it to them at a low rate, until the demand for it would warrant the raising of the price. The result had been that a once healthy people had indulged in opium to such an extent that they were mentally and physically debilitated. The monopoly was also condemned as involving injustice to many planters, and deranging trade, so that it was bad from an economical point of view. It was sometimes said that the Indian Government put into execution the power which they possessed of restricting the monopoly, but the facts refuted this statement. In 1865 the *maximum* which was to limit the Bengal monopoly of exportation was fixed at 45,000 chests; but in 1867, either from shortened revenue or some other cause, the export ran up to 48,000 chests. It would almost appear, therefore, that the export of this fearful drug was not regulated by the laws of supply and demand, but by the necessities of the Indian Government, which frequently caused them to resort to this lucrative trade as a means of producing revenue. He had made inquiry as to the feeling in China in reference to this question, and he believed it to be almost universally in opposition to the trade. The moral effect of the consumption of the drug was fearful, and the better class among the inhabitants would be very glad if the temptation to indulge in its consumption was removed from the inhabitants. Apart altogether from its moral effect upon the people, the growth and consumption of opium was to be deprecated on grounds of public policy. It was true that it yielded a large proportion of the Indian revenue, but it was also true that, while large sums of money had frequently to be paid for the relief of famine in India, a vast quantity of the most fertile land in the country was devoted, not to the production of food, but of opium. As an international question he believed that in case of a war other Powers would interfere to prevent England imposing upon the Chinese nation treaties such as that under which the opium traffic was conducted. We professed goodwill towards men, but, as far as this matter was concerned, we were sowing the wind, leaving our successors to reap the whirlwind. Would the Government like to be great distillers in this country? If not, why should the Government in India be engaged in the cultivation of opium? He hoped his noble friend the Under-Secretary of State had not yet been an official long enough to have his eyes blinded and his ears shut to the strong assertions which he (Mr. M. Stewart) had been compelled to make to-night. He had quoted from some authorities in the course of his speech, and he would now quote the words of another authority:—"Offences must come; but woe to him by whom they come." (Hear, hear.) The hon. gentleman concluded by moving the following resolution:—"That this House is of opinion that the Imperial policy regulating the opium traffic between India and China should be carefully considered by Her Majesty's Government with a view to the gradual withdrawal of the Government of India from the cultivation and manufacture of opium."

Mr. PEASE, in seconding the resolution, said new evidence was laid before the Indian Finance Committee, which he hoped would be brought to bear on this question. This was a question which the Government ought to face. If they refused to face it now, it would stare them in the face still more strongly as years rolled on. The hon. gentleman quoted statistics to show that the cultivation of opium by the Indian Government and the revenue they derived from it had steadily and largely increased. The history of the trade in this drug, he believed, was one of the darkest pages in the trading annals of this country. (Hear.) The hon. gentleman proceeded to trace the Parliamentary history of the question, and cited various documents to show the immorality and fearful results of the opium trade. He urged that the Chinese had always protested against this traffic, and they went to war with this country because we were smuggling opium into China. The Government winked at it, and the Chinese took 20,000 chests of opium and mixed other materials with it, destroying its value. For that England bombarded the towns of this fanatical people, and gave them a lesson in Christianity. We destroyed them because they would not submit to be poisoned. It was not until sixteen years had elapsed that the Chinese admitted the traffic. What would have been the result if we had attempted to treat any European Power in this way? Why, we should have had the nations of Europe probably going to war with us. He then referred to the question of the Indian finances, and he observed that the Indian Government was in exactly the same position as the miserable victims of the drug. As soon as the victim felt the pangs of hunger he had recourse to opium, and as soon as the Indian Government felt the pangs of pecuniary deficiency it cried out for more opium. He believed the cultivation would gradually decrease as the Indian Government showed that they wished to get it off their hands. The hon. gentleman quoted the authority of Sir R. C. Hamilton, Dr. G. Smith, Lord Strathnairn, and others of large Indian experience in support of his views, and expressed a hope that the opinion of those eminent men would have proper weight with the noble lord. Sir Rutherford Alcock had stated that he found the Chinese Government were resolved to drive the Indian drug out of the market and to grow opium for themselves. What should be done then by the Government of India was to abandon the cultivation of the article and to take the largest possible duty from it, as the home Government did in the case of tobacco. He hoped that for the future the Government of India would cease to pursue a policy which pandered to the vices of the Chinese—a policy which the maxims of their heathenism and the principles of our Christianity alike condemned.

Sir G. CAMPBELL said that, as he had had direct official connection with this opium question, it was right he should express his views with regard to it. He entirely admitted the fairness with which the subject had been brought before the House by hon. gentlemen who had preceded him. It seemed to him, however, that the question was a practical one. Large sums were derived by the Government of India from opium, and the question was how to deal with it from a practical point of view. The Indian Government had nothing whatever to do with forcing opium on the Chinese. If forced it was upon them, that Government had totally dissociated themselves from the transaction. Both in the past and at present the matter was one between the British merchants and the Chinese, and the Indian Government had had no part in it. Looking at the matter from an Indian point of view, the question was a more simple one. He had considered the subject a good deal, and it appeared to him that the relative evils of opium and alcohol were very much on a par. Both undoubtedly were very bad; the one was the vice of the West, and the other the vice of the East. It had been said that opium was a cursed thing which we were bound to ignore altogether—that we should dissever ourselves from the traffic in opium and from the opium revenue. He ventured to say that was not a practical view of the matter. How could we shake ourselves free from the opium traffic? Only in one of two ways—either by leaving the cultivation free or by prohibiting it altogether. What would be the result of leaving the cultivation free? It would be consumed more largely than ever, while we should sacrifice our opium revenue. Were we prepared to take that course? When the hon. baronet the member for Carlisle had not only carried his Permissive Bill, but when the manufacture and use of alcohol were entirely prohibited, it might then be possible to suggest the prohibition of the cultivation of opium; but it was totally impossible that our Indian revenue should be sacrificed for the benefit of the Chinese. We did not leave the traffic in alcohol free, but we checked it by a very heavy taxation. Opium was one of those things upon which the imposition of a heavy duty enabled us to serve God and mammon at the same time—doing good to our neighbours by checking its consumption and raising a large revenue for ourselves. (Hear, hear.) The question was—in what form should the taxation be imposed on this noxious article of consumption? He should be glad if he could see his way to a simple duty in place of the monopoly system; but he thought the monopoly system worked well, and it was more unseemly than injurious. The Gottenburg system, under which the public authorities regulated the liquor traffic so that as little harm as possible should be done to the community, was precisely analogous to the system followed in Bengal with regard to the opium traffic. The opium revenue was of very great importance to India, and there would be much risk attending changes. We derived a large revenue from opium, and the financial condition of India at the present time was not such as would justify us in running great financial risks for the sake of an idea. (Hear, hear.) So far from being in a flourishing state, our Indian revenue barely sufficed to make both ends meet, and the sudden suppression of the opium traffic would, therefore, be attended with considerable danger. As to the position of the ryots, there was no pressure whatever put upon them to grow opium, and under a different system they would probably fare worse than they did at present. In the same districts as those in which opium was grown the manufacture of indigo was carried on by private speculators, and the ryots engaged in that industry were not by any means free, for they were under a sort of feudalism. If a system of duties were adopted in regard to opium it would probably be necessary to interfere with the opium trade—to lay down strict regulations as to where opium ought to be grown, and to take great precautions against smuggling. Thus the proposed change involved other than purely financial considerations, and it would be most injudicious to take any hasty step in the matter. For himself he was averse to the extension of the present system, and he thought that, as far as circumstances permitted, it ought to be restricted. That was the view which he held formerly as an Indian official, and which he had now to urge as a member of the House of Commons. The Government of India would, he hoped, take the matter into their consideration. The truth was, the greater part of the opium revenue

Digitized by Google

was derived from those districts in which monopoly was established, and it was necessary in any action which might be taken that great caution should be observed. In the case of Behar and Benares it would, he thought, be better to wait until we had seen the result of a change in other parts of the country, where the revenue to be risked would be very much smaller in amount. If the change proved successful in those quarters then it might be extended, and we might thus ultimately be enabled to get rid of monopoly altogether, although he did not think the time when we could do so had yet arrived.

Mr. RUSSELL GURNEY thought that there was no necessity for warning the House not to proceed with too great haste in the matter, seeing that the result of the action which had been taken with respect to it more than a quarter of a century ago was, that the evils of the trade had increased something like fourfold. (Hear.) It was, he might add, idle to contend that there was no difference between the two modes employed for levying a revenue from opium—one of which was to lay a heavy duty on the export of the article, thereby discouraging the trade ; and the other the cultivation of the article by the Government itself. There was all the difference between the two modes that existed—between the nation becoming a distiller and levying a tax on spirits when in the still. As to perfect free trade in opium in India, no one had suggested it. In former debates in that House it had been admitted that great evils sprung from the manufacture of opium and its compulsory exportation to China, on the inhabitants of which country it was forced, according to Mr. Wade, against their conscientious convictions. A very serious responsibility rested on this country in the matter, and it was therefore important that we should, as soon as possible, do all that lay in our power to clear ourselves from the moral guilt in connection with it which ought to attach to us in the eyes of foreign nations. Our rule in India, he imagined, did not depend merely upon physical force ; but that moral reputation at which we ought to aim we could not have while we continue to do all we could in opposition to the feelings as well as the interests of the whole Chinese people in reference to a trade the only argument in support of which he had ever heard was that we were deriving from it a large revenue. (Cheers).

Mr. LAING, having given that question much anxious consideration when he was Finance Minister in India some twelve years ago, wished to address a few observations upon it to the House. Those observations, fortunately, would be short, because much of what he had intended to say had been said already very ably by the hon. member for Kirkcaldy, who, from his former position as Lieutenant-Governor of Bengal, spoke with great authority on that subject. He might say generally that he agreed to a very great extent with the remarks and the line of argument of that hon. member, only he felt somewhat more strongly than that hon. member did the impolicy of any attempt to interfere in accordance with English ideas or English sentiments with the practical administration of affairs in India ; and he had more confidence than, perhaps, that hon. gentleman had in the good sense of the House and of the English people, when fairly appealed to, not to attempt to import English ideas into the Government of that great Empire, and, above all, into its financial administration. He had great respect for philanthropy which was philanthropy at its own expense, but little for philanthropy which was philanthropy at the expense of others. If they endeavoured, on account of some conscientious scruple, to force measures on the Government of India which would cause a sacrifice of between £6,000,000 and £7,000,000 of revenue they ought to say whether they were prepared to make up for that loss, or for any part of it. How was it proposed to supply the deficit? If the Government of India were to double or even treble the Salt Duty it would not suffice, and he did not suppose any philanthropist would recommend such a step. After repeated attempts to impose it, the income-tax had been withdrawn, to all appearance finally ; and as to that tax it had not at the very highest produced more than a fourth of the sum derived from opium. Was it desired that they should unsettle the Land Settlements and break faith with all the cultivators of the soil in order to increase the Land Revenue—which it would be necessary to do to the extent of 25 or 30 per cent. if they wanted to make up the amount of the revenue from opium? Or were they prepared to allow a heavy import duty on Manchester manufactures? They would not by that means get nearly what they sacrificed, but it would be an evidence of sincerity. No one could suppose that such a duty would be tolerated by this country. Some practical substitute must be shown, and it must be a substitute which would not fall upon the vast and poor population for whom we were trustees. For his own part, he had arrived at the conclusion that the case of opium and that of alcohol stood substantially upon the same footing. The same arguments that were used against opium might be used against gin and whisky. As to the prevalent idea that a man who took a small quantity of opium felt compelled to increase the indulgence to an extent utterly ruinous, it was no more true than it would be to say that every Scotchman who drank a glass of whisky became a confirmed drunkard. He had often heard it said that it was common to see the Chinese workman when his dinner hour came sitting down under a tree and taking his meal, and, after it, swallow a minute quantity of opium—just as an English labourer might smoke a pipe—and in ten minutes more get up and resume his work. If a man did a great deal of hard work in the open air a little opium, like a little alcohol, did not seem to have much effect, but no doubt it was a very different case in the stews of great cities, where the indulgence was carried on to a ruinous extent. The truth was that there was much to be said upon both sides. The intoxication caused by opium was less violent in its character than that occasioned by alcohol, and less crime was committed in China and Singapore under the influence of the former than there was in this country under the influence of the latter. It was very easy, of course, to get up evidence as to the frightful effects of opium, but such evidence could not always be implicitly relied on. At Singapore, while the Chinese took their opium, the Europeans drank arrack, and the native population took tobacco and betel nut. It was found that the Chinese were worth three of the natives, and therefore it could not be said that the human frame deteriorated under the influence of the nervous stimulant which they so freely used. Under the circumstances were we in a fit of vituous indignation to destroy so productive an Indian industry for the sake of moral considerations while we continued to raise the greater part of our own revenue from alcohol? It would be most unjust if we were to be thus cheaply virtuous at the expense of 200 millions of the poor toiling wretched ryots of India, for whom we were the trustees, and whom we ought to endeavour to raise in the scale of comfort and of civilisation. As to the mode of collecting the revenues, he disapproved altogether of the proposal to abolish the Government monopoly on opium, and to raise a revenue from the drug by means of an export duty. Such a course would lead to the ruin of the trade by occasioning vast fluctuations in the price of the drug and by encouraging Chinese competition, and would give rise to a large amount of smuggling. The revenue which we derived from opium was not a precarious one, but was a continually increasing one, being based on the growing demands of a large portion of the human race. He regarded the great danger to our Indian Empire as being not Russian aggression, nor Indian disaffection, nor another Mutiny ; it would arise from the wish to govern India from home in accordance with Indian ideas and English sentiments. (Hear, hear). As far as he knew, every time that English public opinion had been so brought to bear as to interfere with the action of those who were responsible in India for the government of India the result had been disastrous. He asked the House to beware how they did anything of that sort in the matter of Indian finance. His experience showed him that, however much to be applauded were the motives of hon. gentlemen who brought forward motions like the present, in nine cases out of ten they did harm rather than good. Let the best men be selected for the government of India, then let the responsibility rest on them, and they would find those gentlemen infinitely more likely to be right than the hon. members here at home could possibly be. (Hear, hear).

Sir J. KENNAWAY said the House ought to accept with all respect the caution given it by the right hon. gentleman who had just spoken, experienced as he was in the affairs of India. At the same time he asked himself whether the right hon. gentleman had not gone too far in deprecating any interference in the affairs of India on the part of the House of Commons. The policy recommended would be a retrograde policy from that which was adopted when England took the responsibility of governing India out of the hands of the East India Company. He quite admitted that the present was a great financial question, and that the loss of revenue would be a very serious matter. The objection made was not to the raising of a revenue from opium, but to the mode in which it was raised, the Government undertaking all the functions of trader and speculator, and encouraging the growth of what was admitted to be a noxious drug, when money was not abundant. (Hear, hear.) With regard to the Chinese, an unjust distinction was, he thought, drawn between the responsibility of the Government of India and of the Imperial Government. That responsibility was one, and could not be divided. The Chinese regarded England as responsible for opium coming into their country, and they were now in a position to demand a revision of the Treaty of 1860, and if necessary to close their ports. What was asked of the Government of India was that they should gradually withdraw from the production of opium, and limit their experiment to the raising of revenue by a licence, and surely that experiment could be tried in one portion of the country. (Hear, hear.) The House had now before it a moderate proposal which, as it did not ask for the entire abrogation of the duty, was not open to the charge of rashness in sacrificing a large revenue, but which asked the Government to proceed tentatively to redress a moral wrong. He thought that, under the circumstances, the House would do well to support the motion.

Sir G. BALFOUR, having been employed in the first China war, and having gained some information when in that country upon the opium trade, felt much confidence in saying that the Chinese had never shown a real and sincere wish to prevent opium from being conveyed into that country. He happened to be present when an offer was made by the two Chinese Commissioners to Sir Henry Pottinger that if the British Government would agree to pay the sum of $3,000,000 we might introduce into China any quantity of opium that we liked. He recommended Sir H. Pottinger to avail himself of that offer, because he foresaw the difficulty which would be caused by the opium traffic. [An Hon. Member : When was that offer made?] It was made in July, 1843, and the papers had been laid before Parliament. He (Sir G. Balfour) afterwards sailed for the North of China and the port of Shanghai. He selected it because, being a central part of the empire, he was confident that a vast commerce would spring up with that part of China. The opium traffic was, as he had anticipated, the cause of trouble, because it was carried on at the mouth of the river that led up to Shanghai. He thought the opium trade objectionable on many accounts, but he had a duty to perform as an official of the Government, and he seized three vessels for contravening, as he thought, the laws of China. A very proper censure was, however, conveyed to him by Her Majesty's Plenipotentiary. Sir H. Pottinger was succeeded by Sir J. Davis, who in one of his despatches stated that Captain Bal; four, at Shanghai, reported that the local Government had no desire to receive information as to the evasions carried on in the opium traffic. During the negotiations at Nankin Sir H. Pottinger had frequent communications with high Chinese authorities, and it was undeniable that the Chinese officers were very indifferent indeed with regard to the opium traffic. Having served in China, he should never have thought of carrying on a war with China on account of opium. Commissioner Lin opened the crusade against opium ; yet the cause of the war was not opium, but the forcible seizure of our merchants who had a right to live in Canton, and to carry on their trade there. There was at present a member of the House whose firm was obliged to give up a stock of opium at Canton which had not been brought from Calcutta or purchased from the Government of India. No more injudicious act than

Digitized by Google

that forcible seizure of opium could have been committed by Lin, because the opium trade, which had up to that time been confined to the mouth of the Canton River, afterwards spread over all the rivers in China. After all, less evils were caused from the consumption of opium than from the use of ardent spirits. Our 80,000 chests of opium sent into China were quite insufficient to bring about the serious consequences with which the opium trade was charged. Mr. Wade and Sir R. Alcock had both borne testimony in the strongest terms to the laxity of the Chinese authorities in resorting to the measures necessary to carry out their assumed hostility to the opium traffic. As to the cultivation of opium by the Chinese themselves, he did not believe it. The same thing used to be said when he was in China, but the cultivation of opium had been very little extended since that time, and no country in the world could produce opium to compare with that of Malwa, Benares, and Patna. Having served in India, he knew that several Ministers had endeavoured to grapple with the question, but none of them had had either the skill or the courage to try an experiment with the revenues of the country. The question was purely one of finance, and he could not see the possibility of raising by other means the amount that was derived from the manufacture and export of opium. He thought, on the whole, that the best course would be not to press the motion now before the House, but to leave the matter for the present in the hands of the Secretary of State for India, who might, in the course of a year, as the result of continued investigation and thought, hit upon a plan which would solve the difficulty.

Mr. NOEL agreed with the right hon. gentleman the member for Wick that it would not be possible to govern India by English ideas, but it was new to him to be told that England was not to deal with the people of India on a moral basis. It was said that the opium question was not to be dealt with because the people of India were not to be called upon to pay for the whims of England. He agreed with this, but he would remind the House that it was an English whim in the interest of an English company which first called upon India to raise a revenue by the growth and export of opium. The question how the revenue of India could be raised if the cultivation of opium by the Indian Government were stopped was the great difficulty; but the House ought to stimulate the Government to see if they could not grapple with that difficulty by finding means to raise the Indian revenue without encouraging the traffic in opium. It was known that Sir William Muir was anxious to have the cultivation of opium by the Indian Government stopped, and that he believed he would be able to discover means of meeting any deficiency in the Indian revenue which would be occasioned by that course; but it was not likely that he would undertake the task unless he was supported by a strong expression of enlightened opinion at home. It was therefore the duty of the House to pass a resolution which would encourage Sir William Muir in the good work which he was desirous of undertaking. If the Government would show a desire to put an end to the Government monopoly our relations with China would be improved—(hear).

Mr. BEACH said he wished to make a few remarks on this subject, as he had been a member of the Indian Finance Committee. His wish was that an end be put to this immoral traffic in opium, but he feared there were difficulties connected with the question which must necessarily exist. As an independent member of the Committee he studied the subject with the most profound attention. As to the Chinese we were not responsible for their tastes. He feared they had had for many generations a pernicious taste for opium, as in this country some people were given to alcoholic liquors. The opium grown in India had a flavour which the Chinese liked better than that of the opium grown in China, and the anxiety of the Chinese Government to stop the importation of Indian opium was owing to their wish to promote not the morality of the Chinese people, but the growth of Chinese opium. From the evidence given before the committee it was abundantly plain that while the one system was adapted for the western part of India, the other system was best adapted for the east. He feared it would be extremely difficult to change the monopoly system into an export duty system, but still the subject was well worth inquiring into, and if the authorities could be induced to alter the system, such a course would be of the greatest public benefit. (Hear, hear.)

Mr. M'LAREN intended to vote for the motion, and remarked that the speech of the hon. member for Kircaldy was one of the most out-and-out defences of the opium trade he had ever heard delivered. We committed a great moral wrong in forcing the last Treaty on China, and the remedy was to abrogate it at once. (Hear.)

Lord G. HAMILTON did not think the hon. member who had just spoken was aware what would be the result of abrogating the Treaty. Sir Rutherford Alcock had expressed a very decided opinion that if the Chinese were left unfettered by the Treaty they would at once expel all the Protestant missionaries from the country. The hon. member surely was not anxious to bring about such a result as that? (Hear, hear.) There had been this evening a most interesting discussion on the whole question of the opium revenue and trade of India. His hon. friend who introduced the motion suggested that certain alterations should be made, and that the system of excise and export duty now in force in Bombay should be tried in Bengal in place of the monopoly system at present existing there. His hon. friend seemed, however, to argue against any revenue whatever being derived from opium.

Mr. STEWART explained that he did not argue against prohibition at all, but wished to do away with the Bengal system and to substitute for it the system which was in vogue in Bombay.

Lord G. HAMILTON said it certainly seemed to him that his hon. friend's words implied direct condemnation of any revenue being derived from opium. (Hear, hear.) One fact must have struck hon. gentlemen who had listened to the discussion as being very remarkable. There had, indeed, been a complete conflict of opinion between hon. members, but every speaker who had had any official experience of India pointed out the danger, if not the impossibility, of abandoning the revenue; whereas the gentleman who had advocated the abolition or alteration of the revenue, and who were doubtless actuated by the best of motives, looked at the question merely from a philanthropic point of view. (Hear, hear.) Two fallacies underlay the statements of both his hon. friends who had brought forward this motion. They appeared entirely to forget that there was no nation in the world which did not in some shape or other take stimulants. (Hear, hear.) Besides, they forgot that in a large portion of Asia—not only in China, but also in Assam and Burmah—the stimulant taken by the natives was opium. We drank beer, the Irish and Scotch took whisky, Americans chewed tobacco, and Chinese smoked opium. The latter took opium because it was the form of stimulant best adapted to the climate in which they lived. Sir Rutherford Alcock pointed out that there were certain medicinal properties in opium which made it sought for by the inhabitants of marshy and malarious districts, and hon. members who lived in our own Fens must be aware that there was a large consumption of opinm and laudanum in that part of England. Such being the case, it was not fair to put upon the Indian Government the responsibility for the immodeiate use of opium by the Chinese. It had been assumed that it was entirely owing to the action of the Indian Government that the Chinese smoked opium. Why was the smuggling of opium carried on? Because the people wanted it. Was it likely that it would be grown in India and that merchants would take to smuggling unless there was a strong disposition on the part of the country to which it was sent to consume opium? Mr. Cooper and Sir Rutherford Alcock pointed out that the habit of opium smoking had existed in China for centuries. It was perfectly true that in Eastern China the opium chiefly used there came from India; but Mr. Cooper stated that he had travelled all over Western China, and found that the people there cultivated opium more extensively than in the other parts of China. If he might venture to suggest it to his hon. friends who differed from him, he could not help thinking that they accepted too readily the instances of persons who made an immoderate use of opium and drew from it a general deduction that every one who indulged in it was completely demoralised, physically and morally. There was very remarkable evidence bearing on this point. There could be no question that the Chinaman who smokes moderately can do an amount of work which no native of any other country could perform. There was a very remarkable report which had come home quite recently from a Consul in China whose territory was in the western part of the Empire, and who once held opinions similar to those expressed that evening. This gentleman believed that the use of opium was entirely demoralising to the individual who was addicted to it, and he gave his experience, which was extensive, and which induced him to alter his opinion. During his journeys he came into the closest relations with men who smoked. Their work was of the hardest and rudest—and the attention of the hon. member for Carlisle was called to this—they had constantly to strip and plunge into the stream in all seasons. The quantity of food they ate was simply prodigious, and the two most addicted to the habit of smoking were the pilot and the ship's cook. On the steadiness of nerve of the former the safety of the junk depended, and yet they seemed to be almost independent of sleep or rest. The Consul added that he did not believe that the smoking of this native drug did any harm; his opinion with regard to it had been much modified, and he was bound to admit that it could be smoked without injury. This was testimony of undoubted reliability, and the result arrived at was the same as the decision previously arrived at by other persons.

Mr. Cooper, in his evidence, said that the habit of smoking was very prevalent among the Chinese. He said that if you suddenly cut off the supply of opium one-third of the whole nation would die; and he added that so long as it was moderately supplied, so long as it was used in moderation, it was not detrimental to health, and that the people were able to perform an enormous quantity of work. He might quote another important authority, who declared that the Chinese would have opium, that if the Indian Government prohibited its growth no good would be done, and that the Indian Government conferred a great benefit on that part of China to which they imported opium. One of the great evils of China was over-population, and if the opium was not imported, the Chinese would cultivate it in place of cereals and other food. He was aware that opium-smoking was prohibited in China under pain of death. Who was the individual who passed that law? He was the Sir Wilfrid Lawson of China. (Laughter.) He was a man determined to put down opium and all stimulants, and seeing a man one day smoking he instantly ordered his head to be cut off. (Laughter.) This law was a dead letter, and no one attempted to enforce it. (Hear.) He hoped his hon. friend (Sir Wilfrid Lawson) would draw some little deduction from this excessive prohibition, for he had little doubt if his hon. friend was successful in enforcing his principles his descendants would find that the law would be disregarded. (Hear.) Two different lines of argument were adopted on this question. They were told on the one hand that the source of revenue was precarious, inasmuch as the cultivation of opium was extending in China; and, on the other hand, they were told they must prohibit the importation of opium into China because it was owing to the Indian opium that the Chinese people were perishing. He quoted the statements of sixteen missionaries from Hong Kong who, while clearly showing that the demand, consumption, and native cultivation of opium were increasing, made the remarkable declaration that there was an opportunity for Great Britain to check the ruinous habit by stopping the supply. He believed that whether the stopped the importation of opium into China or not the Chinese would have opium, and therefore it was not fair or accurate to place on the head of the Indian Government all the evils which ensue from the immoderate use of opium. (Hear.) As to the suggestion of the hon. member for Wigtonshire that they should abandon the Bengal and adopt the Bombay system, he confessed he did not see if it was not wrong to derive any revenue from opium, why it was wrong to get it by excise or import duties. His hon. friend the member for Kirkcaldy considered this a proposal for sacrificing a considerable portion of the revenue for an idea. (Hear.)

He quite understood that there might be certain hon. gentlemen who considered it wrong of the Indian Government to associate themselves in any way with the cultivation or manufacture of opium, but if he could show that every one of the evils which the hon. member depre-

Digitized by Google

cated under the present system would be increased tenfold by the proposal the hon. member made that the amount of opium that would be imported must be doubled or even more largely increased, he thought it would be admitted that the suggestion made would in no way check that which the hon. member deplored. In Assam the people were allowed to cultivate opium, and the result was the whole population became demoralised. (Hear, hear.) That was because there was no restriction, no regulation, no control exercised, and women and children were in the habit of sucking rags saturated with the drug. But in India the persons now engaged in the cultivation of opium were the healthiest and sturdiest of the population. Therefore, the first way in which his hon. friend would improve the condition of the people of India would result in their demoralisation. Then as to the next point. In the Finance and Revenue Accounts of India we had in one page the net revenue derived from the system in Bengal and the system in Bombay, and in the next the total number of chests raised each year in both those Provinces. From these accounts there was this remarkable fact apparent—that though the number of chests annually sent from Bombay very frequently exceeded the number sold in Bengal, yet in only one single instance was the revenue from Bombay in excess of the revenue from Bengal. But there could be no question, if the proposal of his hon. friend were adopted, that one-third of the net revenue derived from opium in Bengal would be lost.

In 1872-3 the output of opium in Bengal was some 42,500 chests, and the net revenue £4,259,000. The output in Bombay was 44,000 chests, or some 1,500 in excess of that of Bengal, and yet the revenue was £1,200,000 less than in Bengal. (Hear, hear.) Therefore the first result of the proposal of his hon. friend would be a very large loss to the revenue, which should be made up by increased production. Accordingly a very much larger quantity should be carried into China or there would be a large loss to the revenue. Then there was another point. We found it necessary to state in Calcutta each year the quantity of opium to be sown in the next year, and thus a degree of certainty was introduced into the trade. Bombay was dependent on the Bengal trade, and if we rendered the output uncertain it would be impossible to depend with any accuracy on the supply from Bombay. It would fluctuate, as had been already pointed out, by millions from year to year, and therefore it would be impossible to adjust the balance between income and annual expenditure. But every financier of eminence had laid it down that if you wished to adjust your expenditure to your income you must know with some degree of certainty what your income is likely to be. (Hear.) There were, therefore, four objections to the proposal of his hon. friend. The first was that it would demoralise the people, the second that it would cause the loss of a large amount of revenue from Bengal, the third that we should introduce an element of uncertainty into the income, and the fourth that we should never be able to adjust our expenditure to our income. He quite admitted that if the Government of India could raise their revenue otherwise it would be better not to raise so much from opium. But we were a practical people, and must adopt practical methods. (Hear, hear.) The right hon. gentleman (Mr. Laing) had said that we should not attempt to govern India from the House of Commons by abstract resolutions. He agreed with that opinion. It had been said that Sir W. Muir was most anxious to surrender this revenue, but he could not do it. Why? Because he was the Finance Minister of India. (Hear, hear.) It was urged that he would be supported by the enlightened opinion of the House of Commons. But the enlightened opinion of the House of Commons would not furnish him with resources nor relieve him of his responsibility as Finance Minister. (Hear.) It might be wrong to smoke opium, but why was it proposed to enter upon a course of policy which would increase the burden of taxation upon those who did not smoke opium? (Hear, hear.) No doubt, the expenditure of the Government of India had increased very much during the last ten or fifteen years. His experience was of course limited, but he felt bound to say he did not see any prospect of materially reducing that expenditure. We had to maintain a large European army in India, the whole strength of our administration there was European, and the cost of importing Englishmen for our administration and our Army was annually increasing. But if this opium revenue should be abolished, we must do one of two things—either largely reduce our expenditure or impose additional taxation on the people of India. Which alternative would his hon. friend accept? If we largely reduced the expenditure, we must put a stop to measures which were largely adding to the moral and material prosperity of the country. One of the pleas for our remaining in India was that we were giving the people a better government than they ever had before. But if you reduced the revenue you at once cut away from yourselves the power of doing much for the amelioration of the condition of the people. (Hear.) He admitted, however, that when so large a portion of the revenue depended upon the habits of a foreign nation, a revolution might occur in their habits which might make it difficult to realise that revenue hereafter. He therefore quite agreed with the line of argument of his hon. friend the member for Kirkcaldy, who had pointed out that the system on which opium was manufactured should not be extended because the revenue was to a great extent precarious. At the same time he hoped he had given the House sufficient practical reasons for refusing to sanction the motion of his hon. friend. (Hear, hear.) His hon. friend had come forward as the representative of the Society for the Suppression of the Opium Trade.

If the motion of his hon. friend were adopted, what would be the result? The revenue would be greatly diminished, and in three or four years he might come down again and ask, as it was now so low, what was the use of retaining it at all. If the House adopted the proposal of his hon. friend, it would be possible for him to take that line of argument. He therefore felt bound to offer his decided opposition to the motion. (Hear, hear.)

The House divided. The numbers were—

Majority against	—37

CARGOES AFLOAT.

SINGAPORE AND PENANG.

Charles H. Southard: 555 tons gambier, 7 tons tin, 175 tons sago flour, 405 tons black pepper, 580 cwts. rattans, 900 cwts. hides, 11 tons india-rubber, 185 tons sugar, 40 m. Malacca canes, 1,340 cwts. copal. Star of the South: 332 tons gambier, 150 tons sago flour, 25 tons pearl sago, 300 tons black pepper, 50 tons white pepper, 25 tons gutta, 260 cwts. rattans, 10 tons india-rubber; 10 tons horns, 25 m. Malacca canes, 27 tons tapioca. Zenobia: 200 tons gambier, 200 tons sago flour, 35 tons pearl sago, 450 tons black pepper, 135 tons white pepper, 4 tons gutta, 2 tons coffee, 260 cwts. rattans, 550 cwts. hides, 5 tons india-rubber, 3 tons horns, 35 m. Malacca canes, 75 tons tapioca. Professor Van der Boon Mesch: 303 tons gambier, 220 tons sago flour, 150 tons pearl sago, 150 tons black pepper, 60 tons white pepper, 340 cwts. rattans, 295 cwts. hides, 6 tons horns, 20 m. Malacca canes, 8 cwts. mother-o'-pearls, 10 tons tapioca. Phineas Pendleton: 850 tons gambier, 760 tons sago flour, 40 tons pearl sago, 30 tons black pepper, 15 tons white pepper, 10 tons sapanwood, 1,240 cwts. rattans, 53 cwts. hides, 35 tons tapioca. Coldinghame: 25 tons tin, 793 tons black pepper, 180 cwts. rattans, 1,161 cwts. hides, 420 tons sugar, 18 tons horns. Vanguard: 70 tons gambier, 76 tons tin, 294 tons sago flour, 48 tons pearl sago, 312 tons black pepper, 73 tons white pepper, 16 tons coffee, 460 cwts. rattans, 195 tons sugar, 32 tons india-rubber, 55 tons tapioca. Constantia: 395 tons gambier, 150 tons pearl sago, 140 tons black pepper, 160 cwts. rattans, 223 cwts. hides. Condor: 150 tons gambier, 210 tons pearl sago, 100 tons black pepper, 240 cwts. rattans, 10 m. malacca canes. Glenavon: 150 tons gambier, 10 tons tin, 455 tons sago flour, 85 tons pearl sago, 265 tons black pepper, 80 tons white pepper, 11 tons gutta, 500 cwts. rattans, 980 cwts. hides, 17 tons india-rubber, 4 tons horns, 63 m. Malacca canes, 80 tons tapioca. Caldew: 130 tons gambier, 115 tons sago flour, 10 tons pearl sago, 120 tons black pepper, 140 tons white pepper, 5 tons gutta, 60 cwts. rattans, 222 cwts. hides, 6 tons india-rubber, 10 tons horns, 21 m. Malacca canes, 27 tons tapioca. Ben Nevis: 30 tons tin, 207 tons black pepper, 6 tons white pepper, 160 cwts. rattans, 113 tons sugar, 2 tons horns. Proserpina: 100 tons gambier, 160 tons sago flour, 150 tons pearl sago, 24 tons black pepper, 240 cwts. rattans, 559 cwts. hides. Dewsberry: 100 tons gambier, 345 tons sago flour, 17 tons pearl sago, 3 tons white pepper, 180 cwts. rattans, 363 cwts. hides, 22 tons tapioca. Windermere: 185 tons gambier, 50 tons sago flour, 275 tons pearl sago, 95 tons black pepper, 2 tons white pepper, 6 tons gutta, 240 cwts. rattans, 120 cwts. hides, 23 tons india-rubber, 70 cwts. damar, 17 tons tapioca. Pauline: 20 tons tin, 245 tons black pepper, 10 tons white pepper, 57 cwts. nutmegs and mace, 380 cwts. rattans, 263 cwts. hides, 295 tons sugar, 55 tons tapioca.

MANILA.

Glamorganshire: 796 tons sugar, 320 tons hemp. Agnes Muir: 442 tons sugar, 14 tons coffee, 550 tons hemp, 30 tons sapanwood, 305 cwts. mastic, 27 mil. cigars. Uli: 175 tons sugar, 277 tons hemp. Mikado: 405 tons sugar, 7 tons sapanwood. Canaan: 500 tons sugar, 445 tons hemp, 30 tons sapanwood, 1,140 cwts. mastic, 140 mil. cigars. Star of the West: 1,000 tons sugar, 480 tons hemp. Monte Rosa: 25 tons sapanwood. Envoy: 750 tons sugar, 43 tons hemp, 12 tons sapanwood. France: 500 tons sugar, 262 tons hemp. Lyra: 406 tons sugar, 140 tons hemp, 6 tons sapanwood, 10 cwts. mother-o'-pearls. Estrella: 570 tons sugar, 230 tons hemp, 12 tons sapanwood. Invincible: 500 tons sugar, 306 tons hemp, 12 tons sapanwood, 250 mil. cigars. Araby Maid: 1,190 tons sugar. Angostura: 547 tons coffee. Penrith: 800 tons sugar.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ANTON—On the 13th May, at Hong Kong, the wife of J. Ross Anton, of a daughter.
HAY—On the 24th June, at Ventnor, the wife of C. S. Hay, D.Q.A., Ceylon, of a son.
SCOTT—On the 28th April, at Swatow, China, the wife of Dr. C. M. Scott, of a daughter.
TABOR—On the 19th June, at Holmesdale, Forest-hill, Kent, the wife of Arthur Tabor, of a daughter.

MARRIAGES.

BURKILL—ANDERSON.—On the 24th June, at Walton-on-the-Hill, near Liverpool, by the Rev. H. C. P. Steadman, Charles Edward Burkill to Harriette Catharine, third daughter of the late Thomas Anderson, of Swinethwaite Hall, Yorkshire.
HAWES—NELSON.—On the 6th May, at Shanghai, by the Rev. G. D. B. Miller, Captain C. P. Hawes, of Shanghai, to Nellie A. Nelson, of New York, U. S.
OTTAWAY—FINCH.—At Holy Trinity Church, Shanghai, by the Rev. Canon Butcher, E. F. Ottaway, of the I. M. Customs, to Miss E. D. Finch, youngest daughter of the late Thomas Finch, of Dutney, Surrey.

DEATHS.

CAMPBELL—On the 18th June, at Kildalloig, Sir Louis Henry Dugald Campbell, of Auchenbreck and Kildalloig, aged 31.
LOOS—On the 11th June, at his residence, 55, Torriano-avenue, Camden-road, London, N.W., after a short and severe illness, Walter Henry Loos, aged 25 years, only son of James Loos, M.D., M.R.C.P.E., Principal of the Medical College, Colombo, Ceylon.
NORONHA—On the 10th May, at Yokohama, Diocleciano L. Noronha, aged 30 years.
SOUZA—On the 14th May, at Singapore, Theadoza, the wife of Felicio de Souza, aged 29 years.
STEAINS—On the 22nd June, at Berkeley House, Nightingale-lane, Clapham-common, after a short illness, Mary, the dearly-loved wife of Arthur Steains, jun.

LONDON: MONDAY, JUNE 28, 1875.

THE FRAUDS IN CHINA AND JAPAN.

THERE is nothing more painful than the cases of fraud and embezzlement which so frequently take place in China and Japan. The two mails last in bring intelligence of serious crimes of this nature from those countries; and in both instances we have examples of the worst feature connected with these affairs, namely, their occurrence not among people for whom any excuse in the way of defective education or lack of social restraint could be pleaded, but among those having the education and occupying the position of gentlemen. By the last mail but one we learnt that Messrs. CANTULI and SWABY, employés in the Comptoir d'Escompte at Yokohama, had robbed the bank, made off in a small schooner, and had, upon being overtaken, shot themselves. This was startling enough, but scarcely had people got over the shock than they heard by the next mail that a Mr. A. F. CHAMBERS, an old and, up to the time, respected resident in China, had been arrested on a charge of embezzling $60,000 belonging to his employers, Messrs. JARDINE, MATHESON and Co. In the latter case we are informed the accused has pleaded guilty, and there is, therefore, no reason to refrain from noticing the affair. We shall, however, reserve detailed comments upon it until we are in possssion of a full report of the proceedings; but in the meantime cannot refrain from deprecating the lax state of morality which these occurrences indicate. How is it, it may be fairly asked, that, in proportion to the size of the foreign communities in China, these swindles are of such frequent occurrence? Anyone conversant with what has taken place in China during the last ten or twelve years could point to half-a-dozen similar cases; and where we find the like results constantly recurring we are justified in looking for a common cause for them. The circumstances which conduce to these lamentable affairs may be briefly summed up, and are familiar enough to residents in China, although they obstinately refuse to see the truth.

In the first place, a great deal too much confidence is placed in untried men. Men of whose moral character their employers know really very little are repeatedly placed in positions of trust, such as would be given only to those in whose integrity there could be no possible doubt in any other place. In the next place, an insufficient check is ordinarily exercised over the servants in mercantile establishments. At home there are always certain safeguards in the form of rules as to when money should be paid into bankers and the like, which make it almost a matter of impossibility for any person to perpetrate a swindle or an embezzlement beyond a certain sum, and extremely difficult to do it even up to that limit. In China, a species of spurious gentility stands in the way of instituting any check upon the doings of men such as Messrs. CANTULI and SWABY—who, if they are defective in an accurate knowledge of the difference between *meum* and *tuum*, sufficiently prefer death to dishonour, to shoot themselves when they are caught—or of men who may for years cut a dash upon stolen funds. Then there is a third cause which most potently leads to lax morality in these matters in China. It is the spurious sympathy which is always evoked for offenders who have been known to the small communities and have kept up something like a good social position. This feeling is natural, we will admit, but it is in the highest degree weak. Against the wretched coolie who has stolen fifty or a hundred dollars indignation knows no bounds; but a sympathy is felt for the gentlemanly swindler, whom we have met at dinner, on the race-course, and at other social gatherings—and upon this good-natured but weak toleration these men greatly rely. But a sound judgment would assuredly see that the occupation of a good position, so far from diminishing the moral guilt, greatly enhances it, and that such men, so far from deserving more sympathy, deserve less. We would extend pity to all who have been guilty of moral failings, and would not regard without some compassion even the poor wretched pilferers and thieves who so often figure in the criminal docks. But the safety of society demands that the penalty for crime shall be not only the punishment which the law inflicts, but the forfeiture of the esteem of all who are worthy to be considered respectable members of society; and there is no doubt that this principle is not sufficiently recognised in China.

In saying this we would not be understood to advocate the cowardly hounding even of the criminal to desperation and utter ruin. A saving hand may be held out to all, as there is hope that the worst may repent of their errors, and society is interested in driving no man to desperation. But we do say that the line between right and wrong requires to be more sharply drawn in China, and that no feelings of meretricious sympathy should ever prevent deliberate acts of fraud and ill-faith, much less of cool and deliberate embezzlement, being looked upon otherwise than as deeds which call for the marked reprobation of every respectable member of society. It is in an improvement in these directions alone that we can ever hope for an amelioration in the state of things which, with the greatest injustice to those—and there are, fortunately, very many such—who have for years carried on an upright and honourable career in China, has made that country a by-word of reproach in all parts of the world. If this is ever to cease, if having been in China is no longer to be, as it is in the present day, a *prima facié* presumption against any man, the heads of mercantile establishments must cease to throw undue facilities for fraud in the way of untried men; the communities, generally, must set their faces resolutely against those who are forgetful of what is due from them as men of honour; and, finally, if even with these practical and moral safeguards it still happens at times that men are charged and convicted of frauds, people must, as they value their own reputations for honesty and respectability, separate their natural pity for the delinquent from their deprecation of his offence; and show, without fear or hesitation, that if, as a man, though a fallen one, he has still some claim upon their sympathies, he has, as a criminal, for ever forfeited any claim to their respect or esteem.

THE FAILURE OF AUGUSTINE HEARD AND CO.

WE regret to find that the comments which we made upon the failure of Messrs. AUGUSTINE HEARD and Co. are more than borne out by later advices from Hong Kong. The explanation which was made by Mr. PARKER at the emergent meeting of the China Traders' Insurance Company is very unsatisfactory, and does not in any way show, what we think the shareholders have a right to know, namely, under what precise circumstances the capital of the company began to be encroached upon, and how it came to pass that the firm considered themselves justified in going on when they were absorbing funds of a company, whose affairs were entrusted to them, to such an extent as $200,000. It would of course be premature to assume that there is not some satisfactory account to be given of the matter, and we do not ignore the facts which we pointed out when commenting before on the subject, that the funds of the company were entrusted to Messrs. HEARD, and therefore legally they had the right to make use of them. But even admitting this, it cannot be considered that they would be justified in risking them for a lengthened period when their affairs were becoming more and more involved. We by no means wish to prejudge this matter, and shall be only too glad if the reputation of the members of an old and hitherto respected firm can be saved by such an ex-

Digitized by Google

planation as is fairly called for by the circumstances, but we cannot ignore that large numbers are the sufferers by the failure, and that there are circumstances connected with it which ought to be completely cleared up. If the matter had gone in the ordinary course into bankruptcy there can be no doubt that pertinent questions could have been asked upon these points, and that an answer to them would have been absolutely insisted upon. With a liquidation under assignment this will not be the case, and it will certainly be a matter of regret if a precedent be established by which a case so obviously demanding a clear exposition of all the circumstances connected with it can pass by with a bare explanation that the firm "owed" the company the sum of $200,000. The points upon which the creditors have a right to an explanation are very simple, and may be briefly summarised. At what period did it first become apparent that the affairs of the firm were becoming involved? What sum was owing to the China Traders' Company then? When did it first become apparent that the firm was insolvent? These and a few like questions frankly answered would be quite sufficient to place the affair in a far better light than it can possibly be in so long as full information is not forthcoming. As we said above, we do not wish to prejudge the issue in any way. We simply deal with the facts as they are at the present time, and we say that those facts call for further explanation. We cannot, in conclusion, omit to seize the present occasion of again deprecating the too easy manner in which matters of this kind are habitually treated in China. Steps which the most ordinary prudence would suggest for ascertaining the true nature of the action adopted by firms or mercantile institutions to which the public have entrusted their funds are habitually neglected, and it is not surprising that the most lamentable consequences repeatedly ensue. A little reasonable care and a little temperate but firm action taken in time would, beyond any question, have been sufficient to have saved Hong Kong from many commercial disasters from which it has suffered; but so long as the public generally, the newspapers, and those immediately concerned are content to neglect the clear duty of watching over their common interests, they cannot complain of the natural results of their own timidity and want of ordinary prudence, foresight, and moral courage.

THE retirement of Sir EDWARD CREASY from the high office of Chief Justice of Ceylon, which had been prematurely announced some months ago, is at length an undoubted fact. The health of the learned judge has been for some time a cause of anxiety to his friends, and although considerable improvement has taken place since his residence in England on leave, it was felt that a return to active duties in Ceylon could not be attempted without causing apprehension. It was, therefore, a matter for congratulation to himself and his family that he received quite recently an intimation from the Secretary of State for the Colonies to the effect that, in consideration of his eminent services, Her MAJESTY'S Government has determined to allow him to retire at once upon the augmented pension of £1,600 instead of £1,200, which his period of service entitles him to receive, a concession which is the more graceful, and is, no doubt, more highly appreciated, by reason of Sir EDWARD CREASY'S politics not being in accord with those of the present Ministry. The Conservatives have ever shown themselves superior to the mere consideration of politics when the public services of an eminent man have to be taken into account; in the present instance Lord CARNARVON saw in the person of Sir EDWARD not merely the upright and able judge of an eastern colony, but the author of deservedly popular works, and a public lecturer of no common order. The public of Ceylon, equally with the island Bar, will regret the necessity which deprives them of the presence of a Chief Justice whom they had long been accustomed to look upon with feelings of unmixed regard. Whether presiding at the Criminal Sessions or in Court of Appeal, the late Chief Justice of Ceylon invariably won golden opinions, and we do not hesitate to say his loss will be severely felt. However able may be the successor sent out to Ceylon, his lack of local experience cannot fail, for some time at any rate, to stand in the way of his usefulness.

THE programme of the Prince of WALES'S tour through the Indian territories of Great Britain has been so far modified as to include a fortnight's sojourn in Ceylon, where, however, his visit will be confined entirely to purposes of sport, though it is not improbable his Royal Highness may show himself to the people of Ceylon on one single public occasion. No doubt this departure from the original plan is due to the pleasant recollections carried away from the island by the Duke of EDINBURGH, who, we have good reason for knowing, experienced more lively satisfaction during his stay there than from any other portion of his tour in the East. In order to make sure of suitable weather, so necessary for Ceylon sportsmen, the Prince of WALES will reach Colombo on or about the 1st December. The monsoon rains will then have ceased, and travelling in the north of the island will be practicable. An elephant kraal at Kornegalle and a week amongst the elephant jungles around Trincomalie will occupy his Royal Highness for the two weeks to be devoted to Ceylon, the departure for the Indian presidencies taking place at the last named station. Owing to this visit being one entirely for sport, the public demonstrations are not expected to be on a large scale. Several Ceylon sportsmen of note, now in England, have been consulted in reference to the best course to be adopted for carrying out the island programme.

WE understand that the subject of the War in Atchin has been brought to the notice of H.M. Government, with a view to their mediation; but it appears that, although perfect friendship exists between the Dutch and English Governments, proposals with this view would not be received with favour. This wretched warfare must, therefore, drag its slow length along. The policy now pursued by the Dutch is simply to hold on to their coast positions, and not make further raids into the interior. They have permitted several ports to be opened for the export of pepper, &c., to Penang, and have promised that British traders shall share equally with themselves all advantages they may derive from the present war with the Sultan of ATCHIN.

WE understand that his Grace the Duke of BUCKINGHAM, the new Governor of Madras, has promised to give early attention to the scheme for deepening the Paumben Channel, which has occupied the Government and people of Ceylon for so many years.

WE are pleased to record that the Emperor of RUSSIA has given a decision in the case of the Peruvian coolie ship *Maria Luz* in favour of the Japanese Government.

THE death is reported of TSO TSUNG TUNG, Governor of the Kiangsu Province.

MATERIALS FOR PAPER MANUFACTURE.

In connection with an article which we have published on Paper Manufacture from Bamboo, it will not be out of place to direct attention to some of the salient points in an elaborate "Report on Indian Fibres available for the Manufacture of Paper, by Hemchunder Kerr, Deputy Magistrate," which has recently been presented to both Houses of Parliament by command of Her Majesty.

After some preliminary remarks on the materials originally in use among the Hindus for writing on, Mr. Hemchunder observes that he has not been able to obtain the precise date of the introduction of paper into India. "Block-printing on paper," he adds, "got into currency in Thibet in the sixth or seventh century of the Christian era; and in Cashmir the use of paper and papier-maché ware became common at least twelve hundred years ago. It is well known that the Chinese first discovered the art of making paper with vegetable fibres, reduced by maceration and pounding into a pulp, about 2,000 years ago, and the Thibetans must have learnt it from the Chinese. It is probable that the Hindus of the plains got the art from the Thibetans directly, or through the medium of the Cashmiris—most likely from the latter, as Cashmir paper has always been held in the highest esteem" in India.

Mr. Hemchunder describes at considerable length the process of paper manufacture in various parts of Bengal, but the chief object of his report was, of course, to give information in regard to "the different fibres named in the Government circular as available in the country and fit for paper-making." We here summarise his remarks with regard to the more important kinds. (1.) *Urtica tenacissima*, or *Bochmeria nivea*. Although only recently brought to prominent notice, the *Rhea* is by far the most

Digitized by Google

valuable fibre-yielding plant in India, and is certain ere long to contribute a leading staple for the export trade of the country. It has been cultivated in small quantities from time immemorial in Assam, &c., and it is familiar to the people as the source of a strong fibre for fishing nets. Two varieties are known to them, the *Dome rhea*, or the cultivated variety, reared by a class of fishermen (Domes), and the *Bon rhea*, or the wild kind. The plant is common almost everywhere in Burmah, and the Shans cultivate it for its fibre, with which they manufacture a kind of linen. In the Malay peninsula and on the island of Java its name is *Ramee* (this name has been adopted in America, where a machine for dressing it has lately been constructed), and in Sumatra *Caloee*. The Nepalese call it *Leepeeah*, and the Chinese *Chu-ma* or *Ma*, from which they manufacture their celebrated grass-cloth. Attention was first drawn to this fibre early in the century, but for some inexplicable reason the matter was allowed to drop. Some difficulty has been experienced in separating the fibre from the stems. 2. *Musa paradisaica*. The fibre of the plantain tree is considered an excellent substitute for hemp. The other leaves of the sheathing foot-stalks yield the thickest and strongest fibres, which are easily cleaned by means of simple machinery. The fibre is fine, white, silky, and of considerable length, lighter than hemp, flax, and aloe fibre, but very strong. Professor Royle, in his *Fibrous* Plants of India, writes :—"Among cultivated plants there is probably nothing so well calculated to yield a large supply of material fit for making paper of almost every quality as the plantain, so extensively cultivated in all tropical countries for its fruits, and of which the fibre-yielding stems are applied to no useful purpose. . . . Each root-stock throws up from six to eight stems, each of which must be yearly cut down, and will yield from three to four pounds of fibre fit for textile fabrics, for rope-making, or for the manufacture of paper. As the fruit already pays the expenses of the culture, thus the fibre could be afforded at a cheap rate." In the Government circular spoken of Mr. Hemchunder was directed to report on rice-straw, bamboo, and sugar-cane refuse. The following are his observations respecting them :—"Rice-straw is a valuable fodder, bamboos are used for a variety of domestic purposes, and the refuse of the sugar-cane is used for boiling molasses, and they are not likely to be had sufficiently cheap for exportation as a material for paper-making. In the Maldah district . . . paper used formerly to be made out of bamboos by turning certain parts of the stalk into pulp, steeping the pulp in a solution of alum and water, and after agitating the mass, taking up on a fine sieve a quantity of the floating particles sufficient to form a sheet. The paper thus made was strong and durable."

In the same Blue-book Mr. Hemchunder furnishes a voluminous report on the cultivation of and trade in jute in Bengal, and under the head of "China Jute" we find the following :—"Mr. Blechynden, the able Secretary of the Agri-Horticultural Society of India, obtained in 1855 some seeds of the said hemp (which Dr. Roxburgh had previously proved to be the same as the jute of Bengal) from Canton, and found the conclusion drawn by Dr. Roxburgh to be correct. The following brief note has been furnished to Government, by Messrs. Jardine, Skinner, and Co., of Calcutta, who had obligingly written to their China correspondent's agent at Canton on the subject :—'In reply to your letter of the 4th ultimo, I am sorry not to be able to give a very reliable account about jute. The Chinamen mostly say the common hemp is the same as the Indian jute. There are two kinds of hemp; the one grown near Canton is called *Hwangma*, or yellow hemp, and is of a coarse description, usually used for making ropes; it is most grown in Sanhwi, about twenty miles from Canton, but is not an article of export from this part. The finer hemp is called *Lookma*, or green hemp, and is most probably the jute of Bengal. This is not grown near Canton (although an old book quotes it as being grown here the Chinese deny it), but comes from the Hankow districts, and is used for making grass-cloth, &c. The descriptions and pictures given of the jute plant exactly compare with the Chinese hemp.' As the quantity produced of the Chinese jute is not apparently large, and the Chinese have to import jute from India, the extent of which is annually increasing, no competition need be apprehended from that quarter, at least for some time to come."

OUR RELATIONS WITH BURMAH.

(THE TIMES.)

An impression seems to be gaining ground in India that we are drifting into a new Burmese war. It is said that the King requires another lesson. With some slight varnish of European knowledge the Court is still essentially barbarian, and its advisers vain and insolent, trusting, not, indeed, to the strength of their country, but to their own fancied astuteness and capacity for outwitting the Englishman. As has been explained on a former occasion, the chief cause of dispute arises from the uncertainty of the frontier fixed at the close of the last war, in the time of the late Marquis of Dalhousie. The encroachments of the Burmese on the Karennee territory have exhausted the patience of the Indian Government, and it has determined to trace with accuracy the frontier line which was left undefined in 1852. The tribes of the debatable land have been forced of late years to submit to Burmese occupation and exactions, and the Government of Lord Northbrook has remembered that though these tribes were formerly left to their own devices, in order that a barrier might be formed between independent and British Burmah, a great part of the Karennee territory does actually belong to Great Britain. This forms the chief subject of negotiation, and the English residents profess to think that the King and his advisers are endeavouring to outwit our negotiator. On the other hand, the King has issued a proclamation to his people, in which he declares his high regard for the British Government, and wonders how any one could think that he would offend such a Power for so paltry a matter as the Karrennee territory. "You should believe," he says, "that there cannot be any war between two nations that are so friendly with each other on account of that worthless Karennee affair; and you should, without paying further attention to the words of those unintelligent people who instigate war between the two countries, try to promote the interests of trade." This proclamation will, of course, be looked upon by the King's opponents as a piece of Oriental duplicity, and they will cite alleged acts which plainly show the desires of the Court to be at variance with these philanthropic sentiments. A number of transgressions are set down to the Burmese, but the most important is the reception given to Leeseetahi, the Chinese General who was in command in Yunan when Colonel Browne's party was attacked and Mr. Margary murdered. This personage is said to have been received with high honours at Mandalay. Accounts differ as to his precise rank and position in the Chinese Empire. Some say that he is not a General at all—at least, not a regular one—but has something of the character of an independent chieftain, and is capable of acting, according to his own fancies, in alliance with the King of Burmah or any other potentate. The King is accused of having done all in his power to prevent the departure of the Expedition, and when it came to an untimely end suspicion very naturally fell upon him. The Government of Peking seems to clear itself by the fact that Mr. Margary passed from one end of the country to the other in safety on his way to join the Expedition, and there is no reason why the Chinese Government should desire to forbid a trade between India and its own South-Western Provinces. But the King of Burmah and his Court may naturally believe that the approximation of the two great Empires would be destructive to the Burman Empire. Already the British hold their finest provinces. Valuable coast land was ceded forty years ago, and at the close of the late war Pegu was surrendered. Burmah has not now a mile of coast, and the country is becoming every year more feeble in comparison with the mighty Empire which has closed upon it. The British Provinces have advanced wonderfully, and the Burmese may feel that the future of their country is in the hands of their adversaries. Such a feeling might prompt to submission, but it may also suggest a crafty resistance under the guise of friendship. A Monarch brought up in the traditions of the Burmese King might revolt from the prospect of sinking into a tributary of the Indian Empire. Possibly this would be the most prudent and lucrative course for him, for it would make his position certain, insure the integrity of his present territory, and maintain, or even augment, his revenue. But the pride of independence rejects such base advantages, and the King may possibly have sought in treacherous intrigues a deliverance from the dangers which he and his counsellors forebode.

On the other hand, it is suggested that a section of the English residents would not be sorry to see another war, and that in obedience to this feeling they give the darkest colour to all the King's acts, and fill the air with alarming rumours. How far the apprehensions prevalent at Calcutta are based on reality we cannot determine, but the currency of these stories, and the growing belief that the King means mischief, must tend to produce the collision which it is the object of the Embassy to avoid.

(MORNING POST.)

The growing power of the vast Empire of China is becoming one of the most important facts of the Asiatic political situation. It is this growing power which confers upon the so-called Burmese Question the only gravity which it possesses. Taken by itself the difficulty which Sir Douglas Forsyth, if the latest telegrams may be trusted, has just satisfactorily arranged at Mandalay might be settled by an ordinary magistrate backed by a few companies of Sikh Infantry. The only army which the Burmese Ruler can muster is an undisciplined rout of half-armed peasants and town rabble, their weapons, spears, and worthless firearms, and their leaders as ignorant of warfare as themselves. It is true that the King is said to have been engaged for many years back in procuring arms and amassing munitions of war. The number of his fairly disciplined retainers may, however, be counted by scores, and though he undoubtedly possesses a few river steam-boats armed with cannon, the bare notion of these craft opposing any effective resistance to a single gun-boat is simply absurd. Of course we are not assuming that the Burmese Court harbours hostile designs. But, even if it did, the only result of a display of its impotent animosity would be to call down upon the remainder of the Burmese dominions the fate of annexation, which has already happened to the fairest provinces of the once mighty Empire of Burmah. As the King is known to be not only crafty, but crafty in an eminent degree, we may be sure that no thoughts of revenge for the loss of Pegu would ever tempt him to an unequal contest with the overwhelming power of Great Britain in Asia if there was no China at his back to encourage him with the hope of assistance. It is plain that the Indian Government is entirely of this opinion too, if the report be correct which asserts that one of the conditions insisted upon by Sir Douglas Forsyth was the permission for a British army to pass in case of necessity through the Burmese territory to the Chinese frontier.

This can only mean that in a certain eventuality it might be expedient for the British Government to use its immense Indian strength for the purpose of recalling the Court of Peking or its insubordinate viceroys and feudatories to a sense of the danger of permitting such outrages as the murder of the brave and unfortunate Mr. Margary. The splendid rewards and honours which have been showered upon the men of the small Sikh detachment which recently repulsed, with

Digitized by Google

such gallantry, the attack of some Chinese soldiers, or banditti, on a peaceful expedition are another indication of the gravity which the Indian authorities attribute to possible complications with China. These Sikhs, it will be remembered, were so convinced of their immeasurable superiority over the Chinese after their skirmish with them that they boasted that with five hundred Punjabee countrymen they would march from one end of China to the other. The boast is of course an exaggeration. The utter annihilation of the Mohammedan insurrection of the Panthays in Yunnan—an insurrection which has assumed for years the proportions of an established Government—is a recent and convincing proof that China possesses more formidable troops than the savage irregulars of whom the Sikh soldiers hold so contemptuous an opinion. The Indian Government, however, is evidently anxious to encourage this feeling among the Sikhs. Though the Chinese Government might easily succeed in these days of improved torpedoes in making the stream of the Peiho too dangerous for a naval attack, a land invasion by the Sikh army, officered by British courage and skill, would be a blow at the fancied security of China which could not but produce the most wide-reaching consequences. And the concession which the King of Burmah is stated to have made would allow of this blow being struck without even a preliminary obstacle of the insignificance of another Burmese war.

It may be expected, nevertheless, that, in spite of the reports of alarmists, the danger of a rupture between Britain and China is sufficiently remote. The Chinese may, indeed, be becoming conscious of their increased strength, and the indications to this effect are conclusive as regards the feeling of the military classes at least. The Chinese soldier is always the least governable and the most truculent of military or semi-military bodies, and it did not want the recent outburst of the Janissary spirit against foreigners, in which an American consul ran so narrow a risk, to prove that the Chinese troops are filled with a spirit which might easily find vent in frightful massacres. If, accordingly a huge Chinese force be assembling at Manwyne, we do not wonder at the anxiety and depression which such a piece of intelligence has produced. It does not by any means follow that these displays of force are intended in any hostile spirit towards the British Government. It is admitted on all hands that the frontier land, which was the scene of Mr. Margary's murder, is infested by hordes of banditti or guerrillas, whose dependence on the Chinese Government is not very well defined. If, accordingly, the Court of Peking really means to exact satisfaction for the murder, or even to reduce these barbarians into tolerable respect for the Central Power, the assembly of a regular force would be an inevitable condition. Besides, the elements of discord are always so rife in the ill-assorted body politic of the Chinese Empire that the mere collection of a military force may be as readily explained by internal as by external circumstances. There are, however, better reasons for attributing peaceful intentions to China, for some time to come at any rate, and these are to be found in the evident anxiety of the Chinese rulers to emulate the civilisation and wealth of the West, thereby manifesting a new-born sense of inferiority, and a desire to improve—the very reverse of all that has been known of China heretofore. The reforms introduced into Japan seem insensibly to have communicated their quickening and enlivening influence to the vast torpidity of the Chinese Empire. Coal mines are to be worked, railroads built, telegraph lines constructed. It is notorious that the Chinese have for some time shown their consciousness of being behindhand in the weapons and armaments of war. They are now displaying a similar anxiety in reference to the arts of peace. The celebrated Viceroy Li-Hung-Chang, the most powerful of Chinese Mandarins, has just advocated the introduction of European studies into the Chinese Universities. We may reasonably conclude that the new Chinese sense of a want of improvement is one of the best securities against China's rushing into war without the preparation which her ablest rulers feel she needs.

(DAILY NEWS.)

The cause of Sir Douglas Forsyth's mission to Mandalay, as announced in the Grand Durbar held at Delhi on the 23rd March, was the boundary difficulty. Lord Dalhousie's Treaty had settled a border line between the northern districts of Pegu, which is now British, and the territory left to the King, and this line was left to be still further defined by Commissioners. The latter found, however, that the line, if drawn as originally intended, would pass through a mountainous country, inhabited by the independent tribe of the Karens. Thereupon, according to a semi-official statement published by the Indian Government, communications were opened with the Burmese Government, which ended in the joint recognition of the independence of the Karens. But the Burmese Government has of late years been encroaching upon the Karennee country, and not long since set up a formal claim to its sovereignty, and as it has refused a new Boundary Commission, the Indian Government is under the necessity of insisting on its observance of treaties. At the Durbar, Lord Northbrook expressed his trust that Sir Douglas Forsyth would be able to effect an amicable settlement of the dispute; but in the meantime, Lord Napier of Magdala had been consulted by the Viceroy, and a portion of the Madras army is now ready to enter upon a campaign should one unhappily become necessary. According to the official telegram just received at Simla, however, the King of Burmah has executed an agreement, by which he recognises and guarantees the independence of Western Karennee, so that the original cause of strife which Lord Northbrook publicly spoke of at Delhi as "serious" may be considered to have been settled. But while this question was still pending the risks of hostilities were further increased by the attack on the Western China exploring expedition under Colonel Horace Browne and the lamentable death of Mr. Margary. As soon as the return of that expedition was known Sir Douglas Forsyth's departure was delayed, and Colonel Browne was summoned to Simla. While the public mind was still unfavourably impressed by these occurrences the news came that the King had received Leeseetahi, the Chinese governor of the province in which our countrymen had been so ill treated, with great honour. By many this was regarded as a more serious matter than the original cause of our dispute with Burmah. No one of course thought of making the King of Burmah answerable for acts with which he had had nothing to do, but the obstruction offered in China, just beyond his frontier, was so entirely in accordance with his policy of preventing our trade with Western China that the assertion that evidence existed of his complicity in the outrage appeared only too probable. It is now stated that the King has given explanations respecting the reception accorded to Leeseetahi, and they are referred to as satisfactory, while no mention is made of the outrage on Colonel Browne's party at Manwyne. We are, perhaps, warranted in inferring that Sir Douglas Forsyth found no occasion to connect the Burmese Government with the Chinese atrocities, and that the Chinese Government will have to bear the undivided responsibility for the attack on our party. The Chinese, it is well known, are most intolerant of the intrusion of foreigners, and like us none the better because we were very friendly with the Panthays, a people who had thrown off their allegiance to them, and had maintained their independence for twenty years, until the Chinese brought their whole power to bear upon them and crushed them, as many as 400,000 men, women, and children being killed in one city.

The question of opening up trading communication with Western China is too important, however, to be treated as a mere incident of a doubtful dispute, and must be dealt with at Mandalay on its substantive merits. For many years we have been seeking access to the markets of China on this side, but the business appears to be impeded by difficulties other than those which are apparent. It would be satisfactory to know on good authority what the relations between the Burmese and Chinese Governments really are, and this we shall probably learn when the time comes for publishing the explanation given to Sir Douglas Forsyth as to the reception of Leeseetahi. A correspondent at Rangoon lately asserted that the King of Burmah is tributary to the Emperor of China, that the tribute was suspended for several years, but that since the destruction of the Panthay Power payment of it has been resumed. If this were so, the reception given to the Imperial General would be explained; if, indeed, explanation should be thought necessary when a weak Government is found paying respect to a strong one. In an unofficial telegram from Rangoon it is said that the King of Burmah has granted the right to send a British force through his dominions to Western China should such an expedition be thought requisite. This statement stands doubtless in connection with the previous announcement, also unofficial, that the Chinese are collecting a large force near Manwyne, in the province of Yunan, and, perhaps, also with the visit of Leeseetahi to Mandalay. On these points, however, we must wait for further information. The Chinese Government is not the most frank among those with which we come in contact, even in the East, but it has a way of dallying with dangerous policies, and of ostentatiously preparing for enterprises which it is far from having the resolution to execute. The Chinese Government will have to be addressed in due time on the subject of trade with its western provinces; but in the meanwhile it has to account to us for the attack upon Colonel Browne's party at Manwyne. So far it is satisfactory to be assured that the difficulty of negotiating a commercial and Customs arrangement will not be aggravated by disputes with Burmah. In India this news will be especially welcome, and also in British Burmah. For the last five weeks the excitement in Moulmein and Rangoon has been very great, and the export trade of Upper Burmah has been paralysed. When the Chinese Government learn that the King of Burmah has come to terms with us they will, perhaps, see the impolicy of offering further opposition to our peaceful enterprises, and facilitate the only kind of progress we wish to make on their frontiers, the multiplication of facilities for the exchange of commodities between their people and ours.

OUR RELATIONS WITH CHINA.

The following letter has been sent to the *Hour*:—

Sir,—If at the well-meaning instigation of the British Envoy at Peking the Chinese came somewhat ignominiously out of their collision with the Japanese over the Formosa question, they have the satisfaction of now finding themselves in a position as to armament in which, had no excuse of probable war assisted them, they would not now be in. But during the long protracted probability of a war with their insular neighbours the Chinese were far from being idle, and the Government docks and arsenals at Foochow, which had lapsed into decaying silence, were reopened, to be the scene of busiest activity in the way of patching up every available ship upon which guns could be mounted. All along the banks of the river Yangtsze, especially in front of the prime old city of Nankin, camps were formed, and guns of every size, description, and quality were raised upon wall and fortification. At every turn of the tortuous river Iniw, an alarmingly wide aspect of guns, relieved in its sombreness with the gay colours of their tattered flags, showed how stout the resistance was arranged to be; while rumours were rife that the old Bogue forts on the Canton river, which British arms had once laid low, were all to be remounted; a battery was built at the entrance of the Shanghai river at Woosung. and all along the coast ports extensive defensive measures were carried out. But no war came about, and, although having to pay a fairly exorbitant sum to the Japanese, and having taxed their countrymen to fill the fast emptying Imperial coffers, the Chinese found themselves with a huge army equipped for the field, a well-appointed navy, and their river and harbour entrances heavily defended. All this, doubtless, came about owing to a fear of a possible war; but with such a fair excuse, the crafty Celestial diplomat failed not to grasp the opportunity to put all in readiness against the also possible event of an even more serious war; for the general impression amongst foreign residents in China has for long been, and is, that a war with China and some European power is brooding. The Tientsin massacre would certainly have brought it to a climax with France, had not hostilities with Germany simultaneously broken out, and even Chinamen themselves are ready to admit this likelihood.

With such facts before us it is well to consider whether our naval force is sufficiently well represented in that wide command which includes

Digitized by Google

Japan and the Straits Settlements. Considering the number of open ports and their distance from each other, we confess to thinking our force inadequate, our supply not equal to the demand. To justly cover with protection ports so numerous and so far and widely spread from each other, a large numerical force is required; but even with the co-operation of the ships of other nations—the French and Americans possessing the next large fleets to our own—many of these ports are left for months unvisited by a gunboat. We recollect, during the last tea season at the Yangtze ports, only one gunboat, and that an American, was on the river, protecting a distance of some seven hundred miles, embracing the important commercial settlements of Chinkiang, Kinkiang, and the great tea mart of Hankow. Again, during the winter months, as the Peiho is frozen, gunboats have to be told off for the northern ports on that river, and, being icebound, are available only during three months for this local service. Foochow, too, an extensively-important tea market, lying considerably inland up the river Min, and bordering on a huge native city, is cared for by a gunboat spending alternate months between its river and the ports of Formosa; and only last year, when the tea-laden steamer *Canton* was hopelessly and helplessly wrecked at the entrance to the Min, was the necessity for the use of a man-of-war made apparent, for the cargo of this steamer was pillaged by the piratical junks, and, in the absence of a foreign man-of-war, the Chinese, at the request of our Consul, tardily despatched one of their customs' cruisers, but only when the mischievous plunder was concluded. Admiral Sir Charles Shadwell, then commander of the China station, was applied to by the Foochow Chamber of Commerce for the presence of a gunboat during the busy tea season, when so much was at stake, but had to reply that his force was not large enough, and that the vessel on the Foochow station must also do service in Formosa. Singapore and Penang, with the various ports in Japan, all claim a share of this distribution of naval power; but, as already pointed out, the supply of small craft suitable for river work is too limited. It is not so much that action is wanted from these ships, but the highly efficacious moral support, the presence of power, will have more effect in quelling the contingency of a possible uprising of the natives. Scarcely a week passes without some port or other being visited by inflammatory placards directed against foreign residents, and though they may never resolve themselves into more than idle threats, still it would be unwise to trust too freely to their insignificance, and not send the moral support of what is called "the inevitable gunboat." Nor is piracy abolished, for all Chinamen engaged at sea may safely come under the head of pirates, and for the total suppression of these, gunboats for coast service are required. Our commercial interests in China and Japan are so vast, and so growing in their vastness, that our position in these far countries should receive even more than sufficient support and protection.

Recent telegrams from China tend to support our argument. The Chinese Navy, in which to some extent, when necessity arises, is incorporated its Customs Service, is not a dead letter, as the news of the firing on a British steamer confirms. Not that this act, legal or illegal, is to be deemed of any striking significance; only as an act which with the Chinese probably never happened before, it asserts a feeling of more daring, and at least proves the actual fact of existence of war-vessels not in theory, but in practice. But for measures for the defence of British subjects, the disturbance at Chinkiang indisputably proves that it is unjustly unsafe to leave any port without the support of the "inevitable gunboat." Chinese mobs are lawless, excited, and have all their hostile feelings fanned up by their dislike to foreigners. It is no use disguising this. We western settlers in China are most unpopular, and it is only the knowledge of our power, and of what strenuous retaliation we are capable of adopting, that alone saves us from repeated disturbances, if not massacre. Similar disturbances as this Chinkiang one are of frequent occurrence, and when they do come about, it takes considerable time to send to the nearest port for a gunboat, and in this considerable time how much may be done by a reckless mob? Our interests in China are enormous, and our navy should be of a size and force to be able to protect these interests at all points and at all times.

—Yours, &c., VIGILANT.

June 23.

THE RISING IMPORTANCE OF CHINA AND JAPAN.

(PALL MALL GAZETTE.)

It is curious to observe the difference between the Chinese and the Japanese in their advance towards Western thought and civilisation. It is not merely a difference in the rate of progress, although that is sufficiently remarkable. The more deliberative spirit, the less impulsive character of the Chinese, to which may be attributed much of their immobility and slowness to move in any direction out of the path of custom, is everywhere apparent. They do move, but with a sluggish step, and not until they have thoroughly worked out in their own minds all the probable consequences. The Japanese, on the contrary, have more of the Malay or Celtic impatience of delay or restraint. They will not stop to consider what may be hereafter; it is enough that there is an immediate object which they desire to seize. Thus, while the Japanese in a single decade have worked a revolution; have restored an ancient sovereignty, while destroying nearly all the feudal orders and institutions of which it formed a part; have adopted railroads and telegraphy, and even changed their costume for hat, coat, and trousers, in which they appear at singular disadvantage,—the Chinese still carry the Tartar badge of their subjugation, the tail, with the same stolid complacency as their fathers did before them, and neither change costume nor customs in any material way. European ideas and inventions have indeed penetrated in some measure through the national pride, dense as it is.

The Chinese have taken to steamships, and are even building them for purposes of both war and peace, but the whole administrative machinery of the country remains unchanged. It was but the other day that we received some startling revelations of palace life at Peking, showing how thoroughly Oriental the whole system of society and Government remains. A young Emperor is allowed to die of a curable disease, either because those about him refused, in their ignorance and prejudice, to resort to means of aid provided by foreign skill, or thought he would be better sent to heaven on the great dragon than left to disturb the existing order of things. It is rumoured that he had shown a restless spirit of curiosity and inquiry, alarming and disturbing to many—that he chafed under the restraints of a Court which forbade the Emperor to move about and see with his own eyes. He died at all events somewhat unexpectedly, as well as prematurely, and when the worst period of his disease was over. Then again the two Dowager Empresses, so lately superseded as Regents, came to the front, and a child was chosen to succeed, the son of one of the uncles. Thus another long lease of power was secured to one or both of these apparently capable and ambitious women. But a younger Empress, the widow of the boy Emperor just deceased, may have been very much in the way in this family arrangement. She might have given birth to a posthumous son. The life allowed her had soon become too burdensome to be borne, and no one seemed surprised to hear of her death. Her existence was undoubtedly a danger to the elder Empresses and their following, since she might have become at any time a centre and rallying-point for a palace revolution. Scarcely had she passed away than a vigorous decree appeared in the *Gazette* denouncing certain eunuchs—those dangerous parasites, the opprobium of Asiatic Courts. Some were condemned to receive 200 strokes of the bamboo, which, if given with will or purpose, would hardly leave much life in the victim; others were made slaves, and banished to the further confines of the Empire towards Ili. What secrets were in their keeping will probably never be known; but their fate points clearly to a state of great uneasiness within the palace walls. Beyond those walls, and in the outer world of Chinese rule and policy, there was foul play to be unmasked, in which Chinese and Burmese, with a convenient wild tribe or two between them, must for the present share the blame. In the meantime, the necessities of a steam fleet are compelling Li-Hung-Chang, the enterprising Governor of Chihli, to commence the working of coal-mines with European machinery and direction. At the same time the Chinese are driven into telegraphy by the troubled state of Formosa and their relations with Japan; and after allowing a line between Foochow, the provincial capital, and Amoy, the port opposite Formosa, to be destroyed, they have renewed a contract with a foreign company to proceed with it. In many directions there is evidence that the energies of China are aroused.

The latest advices show that a large force is proceeding to the attack of the Ataligh Ghazee, in Eastern Turkestan, with the avowed intent of recovering possession and revenging the slaughter made upon them in 1866. We are told that 400,000 Chinese and Kalmuks were massacred by the Mussulmans in the Kashgar territory; while Kuldja, so lately annexed by Russia as a base for her trade with China and Central Asia, had a population of 150,000 nearly all destroyed when the city was taken by the Moslem insurgents. If the Chinese regain this territory, the tragedy will be re-enacted—only the Mohammedans will be the victims; as happened when the Chinese were victors in Shensi and in Yunan, not a Moslem of either sex or any age will be left alive. This is not only a war for geographical position, but a war of race and religion. Whatever degree of ferocity can be given to the conflict by political ambition and race hatred, intensified by religious fanaticism, we shall witness in operation. It will be a shock of two races and two religions, as well as two systems of government. The combatants will be free to wreak all the pent-up hatreds of a century over one of the fairest fields of Central Asia. A "jewel set in sand" was once the poetical but not untrue description of the valley of Kashgar and Eastern Turkestan until it was desolated by Mongol and Koord, by Buddhist and Moslem, in succession. Under its present ruler it has recovered some of its former beauty and fertility; but there are evil days before its present occupants. If the Russians do not intervene, the prospect is a bad one for Yacob Beg and his people; nor will it much improve if they do give effective aid, for the price of such service will not be light. Nor to Great Britain and our Indian Empire is it a matter of indifference what course Russia may adopt. If Eastern Turkestan fall under Russian influence, not only will our commerce be shut out by Russian tariffs, but Russia will gain access to the slopes of the passes through Afghanistan. It will seem strange and new to many that any movement of the long-despised empire of China can bring danger upon our Indian frontier; but, however strange it may be, it ought not to have been unforeseen by those whose business it is to be well informed on all matters affecting the security of our Indian possessions.

While China thus is moving indeed—and only too fast for our peace or security—Japan is effecting an exchange of islands with Russia in the Pacific which may not be altogether indifferent to us in its results. The half of Sagalien opposite the mouth of the Amoor, long coveted and nibbled at by the Russians, has at last been surrendered, in exchange for the Kurile Islands, which are not likely to be of any particular value to their possessors, whoever they may be. It is very natural that Russia should have desired the undivided possession of Sagalien, which in some degree commands the entrance to the Amoor and the adjoining ports on the coast. But it has no harbour, and in other respects is of no value, except in the possession of coal, a commodity which the Russians will turn to account as the Japanese never did. They do not want it, however, having abundant coal within their own islands. But it does not follow that, because it mattered little to Japan who possessed the southern half, or even the whole, of Sagalien, it is equally indifferent to other nations. To China it is not without a certain interest. Over the Pacific and along these shores will pass the great commerce of the future between East and West, and the whole of the southern islands where our Australian empire is rapidly developing. This latest acquisition of Russia will give her the basis she wanted for a new development of her fleet on the Pacific and her trade in the China Seas, equally valuable in peace and war. Altogether, it is impossible not to see how rapidly both China and Japan are becoming countries capable of exercising great in-

Digitized by Google

fluence on European relations and interests. For this reason, if for no other, it is needful that they should be carefully studied, and each step they take intelligently noted. As regards Japan more especially, it behoves us to beware. Not that the rulers or people are hostile, but that they are both moving on a rapid gradient and at great speed. They move too fast, too impulsively and unreflectively, to be safe neighbours or allies, and may plunge into irreparable mischief to themselves or to others at any time. Some of their recent movements in the direction of representative government and a free press are sufficiently interesting in themselves, and sufficiently important in their bearing on national development, to deserve attention in Europe. On another occasion we may be able to show the direction their progress is taking and its probable ends.

JAPANESE AFFAIRS.

(FINANCIER.)

The state of Japan is not without interest at the present moment, as may be learned by perusal of the Japanese press. The country appears to be suffering alike from the scarcity of circulating medium, and from want of activity in its commerce, which, considering the efforts directed to the improvement of native affairs, very much by the adoption of the European notions, becomes a subject for reflection and regret. The development of the resources of Japan, we are informed, is practically at a standstill; her current expenses, though somewhat diminished of late, are large; and her real poverty is beginning to be not only apparent, but felt. About four millions of dollars in gold have left the country since the beginning of the year. The causes are sought to be explained in the fact that, when the country was first opened to foreign trade, the merchants made money very fast, though the country people did not largely gain thereby. So far as a trade may be said to be profitable to a country which obtains for what it values in a slight manner that which it values much, this early exchange of commodities was profitable; but, in this matter, Japan parted, as was quite natural, with her silk and tea at low prices, and bought foreign manufactures at high prices. All this has changed; for she sells her silk so high, and buys her manufactures so low, that she derives a far larger profit; but between these two periods the Civil War occurred, and a vast deal of waste and expenditure was the consequence. The waste was very soon repaired; but the expenditure, represented by a Floating Debt of 90,000,000 dols., is still a charge upon the country.

The effects have been twofold. Firstly, it disengaged a large quantity of the precious metals existing in the unproductive form of metallic money, and converted it into what is, at least potentially, productive capital. When money thus disengaged goes into the hands of bankers it is almost always wholly turned into productive capital, and it fulfils a similar office when used by a Government in redeeming debts. But, unfortunately, during a war it becomes, in one way or another, rapidly squandered. Secondly, as this inconvertible currency issued by the Government not only superseded much of the coin in circulation, but also exceeded it in amount, it led to a rise in prices, which has always at first a very stimulating effect upon trade. Subsequently, however, this inflation subsides, and a stagnation sets in, during which, though the foreign trade of the country is not affected, the exchanges are, and the gold begins to run away; and, if we mistake not, this is the true description of Japan at this moment.

There seems to be a strong feeling among the Japanese that a remedy may be discovered by the establishment of a protective system for the encouragement of home manufactures—not that they have reasoned out the effects of such a system, but it is a kind of patent nostrum believed to possess restorative virtues of a high order. Upon the other hand, there is a hopeful sign in the revocation of the prohibition placed upon the export of rice, which occurred whilst the late dispute with China was pending. Financial exigencies may have originated this permission, but it is now of great importance that entire reliance should be felt in the permanence of the measure. It will be remembered that during the late famine in India the Government refused to stop the export of grain. The question was one brought almost to a crucial test, and the soundest economists have endorsed the opinion of the Governor-General upon that occasion. What everyone must wish to see in Japan is an extension of its greatest industry, the growing of rice. The quantity of uncultivated land is enormous—not merely of upland, the cultivation of which is attended with great labour and expense, but in the valleys and plains. It is not very easy to say whether, with the present excessive land tax levied, the production of rice would increase rapidly under the permission to export it. The extended cultivation would at first demand an increased outlay of capital, and it may be doubted whether the agricultural classes are able to do more than make both ends meet at the end of the year after the land tax has been paid, and provision has been made for the necessaries of life. Still, until the land tax is reduced, the only means which can operate on a large scale as an incentive to increase the production of rice, is the permission to export it, and, if the permanence of this can be relied on, the measure cannot but have a beneficial effect.

THE RECENT FAILURES.

(THE TIMES.)

With reference to recent events it may be remarked that the abuse of the credit system, fostered and stimulated by the growing competition which may be termed the handmaid of prosperity, is the evil to which all of the great commercial disturbances of this century are mainly traceable. The *modus operandi* has been in all cases the same, allowing for small modifications which are incidental to the changing circumstances of the times. Competition in trade is useful and desirable, but is extremely injurious when, as in the case of the credit system, it is abused, and that by a powerful class of institutions which are capable of assisting in the spread of unsoundness to a degree probably not experienced before the Limited Liability Act came into force. Competition in the sense of encouraging weak operators to do business in the produce markets of the world, by buying of them whatever paper they like to draw, is no better in principle than the system of stockbrokers affording facilities to enable their clients to gamble in the Stock Exchange. Indeed, it is far worse and more dangerous ultimately in commerce, as there are no fortnightly settlements to test the means of the merchant who ships tea from China, silk from Japan, or pepper from Singapore. Many persons will be perhaps surprised to learn that when such bills are drawn, instead of the shipping documents remaining attached to them in the process of negotiation, the area of which has become so much extended by modern competition, they very often get into the hands of one set of persons and the bill remains in the hands of another—the bill, of course, under such circumstances being comparatively worthless. If the drawer of such a bill be worth, as is very often the case, little or nothing, and there are millions of such bills for which money has been paid for the produce shipped, how is it possible that the foreign trade of a country can become otherwise than unsound in course of time under such a system? If it were possible always to make a profit upon everything which a merchant bought and shipped to a foreign market, there would be little danger ultimately, perhaps, of the holders of such bills suffering; but we know it is in the nature of all trade to act and react, and it is marvellous to what an extent banks and discount houses can go on year after year taking the same paper when the trade in which it originates has been for years a losing one. We find that the losses in exports which have already culminated in so much disaster are, however, only one side of the question. Importing merchants have also found for years past that their India and China business has not paid, and they trace the cause, to a large extent, to an unsound system of doing the business. Since the completion of the Suez Canal there has been no reason whatever why the six months' usance from the East should any longer prevail. It was scarcely necessary to draw bills against produce shipped at such a long date as six months, even when it was carried by steamer round the Cape. Now the voyage from China through the Canal occupies between five and six weeks, and from India a month; what, therefore, can be the object any more of a six months' bill? None, apparently, except that the drawer, often a man of straw, is enabled to have a large sum of money at his disposal for a long period, with which he can multiply operations and be comparatively indifferent to losses, so long as he can sell his bills to a Joint-Stock Bank, which takes the risk involved for the sake of a good commission. It is quite evident, however, that, when trade in particular articles of produce is bad for years together, the commissions must be very large to make it worth while to keep those engaged in it on their legs, and we hope that whatever unsoundness has thus worked its way into the import trade with the East, it may be eradicated with the *minimum* of injury to those only indirectly concerned.

(DAILY NEWS.)

A few days' reflection and the absence of another crop of exciting failures have sufficed to bring into prominence the real lessons of the late events, about which opinion in the market is now pretty well agreed. A great deal was at first said about the unprofitableness of the East India trade, and the losses on Manchester goods exported and Eastern produce brought home, which that trade has sustained. A great deal of just indignation has also been expressed at the conduct of the firms which have manufactured and circulated an immense quantity of accommodation paper. But it is hardly to these points that opinion is mainly directed. The unprofitableness of the Eastern trade, it is seen, may easily be exaggerated, and it has not been such as necessarily to produce collapse. It is notorious that several important houses have withdrawn or diminished their capital engaged in the trade, without any catastrophe, and that others, by careful management, if they have failed to make the profits of more prosperous years, have nevertheless succeeded in "living" and keeping their capital intact. Almost all trades must at times go through long periods of depression, and unless there is bad business as well, there need be no such disasters as those of last week. As regards the manufacture of accommodation paper also there is certainly nothing novel in these events. Such a manufacture is one of the standing dangers of the Money Market, at all times, and, even when Lombard-street was a smaller market than it now is, there have often been revelations as scandalous as those of the last few weeks, and on almost an equal scale. Opinion, therefore, is not concentrated on the unprofitableness of the Eastern trade or its consequences, or the discoveries as to accommodation paper *per se*. What it has fastened upon instead is the reflection apparently thrown by these incidents on some points in the management of the great joint-stock banks which have acquired immense new importance since 1866, and several of whom approach in extent of business and deposits, if they do not actually exceed, the Bank of England itself. The events which have occurred seem to prove that there is one radical vice in the practice of these banks, which present events, it may be hoped, will cure, but which in the future will produce still greater evils if it is not cured. This vice is the habit of giving a higher interest for deposits than the banks can really afford to pay. In former articles we have frequently dwelt upon this evil from another point of view. The banks were paying so much, we pointed out, that they were tempted to forget the first duty of keeping a large cash reserve, a duty which was left, according to an old tradition, to the exclusive care of the Bank of England. The great joint-stock banks, however, had obviously grown so large that this old tradition was inapplicable, and, to fit themselves for the new circumstances, they themselves must bear the expense of keeping a large reserve, which they could only do by reducing their rates for deposit. Now the same lesson is taught the banks by the magnitude of the losses they have sustained in attempting to lend the immense sums of money they have attracted. For many months there has been a constant complaint of the scarcity of bills; but it is now manifest that, unless certain bills had been taken on a colossal scale, which ought at best to have been taken in minimum quantities, the scarcity would have been even

Digitized by Google

greater than was at any time complained of. In other words, the joint-stock banks have been paying a rate of interest for money on deposit which they could only make, or appear to make, by lending a large part in a manner which involved too great risk of loss. It is, no doubt, quite true that bad debts are unavoidable in almost any business where there is a system of credit. A banker would have to go out of the market altogether if he made no bad debts. But the debts in question are apparently on an unreasonable scale, to which it is hardly conceivable that any banks would have committed themselves, unless with such a plethora of expensively gained money to employ as to unbalance the judgment or check the vigilance of those concerned in one or two critical cases. The directors of these banks have now to face their shareholders with a very gloomy tale of heavy losses and reduced dividends, which we hope they will have the courage to tell truly in every particular; but we doubt if there would have been any necessity for this tale if a beginning had not been made by the accumulation of immense sums of interest-bearing deposits exceeding what they could employ with their own customers.

We would suggest, therefore, for the consideration of the directors and shareholders of the banks at their ensuing meetings, when the subject of these losses must be discussed, the expediency of a thorough reform on this point of giving interest. If they are to keep a proper cash balance at all times, and without relying on an interval such as they have been fortunate enough to enjoy lately, in which they may increase that balance against contingencies; if they are also to avoid the danger of such great and unexpected losses as have just befallen them—then they have no choice but to reduce permanently their rate of interest on deposits, or at least adopt some mode of fixing that rate which shall leave a larger margin of profit on what they can employ safely. It is only an absurd tradition and the influence of routine which have kept them in the groove of adjusting their rates for deposit at one per cent. under Bank rate. The experience of the last two years, culminating in the disasters of the present time, should convince them that in their own interest, as well as for the general safety and steadiness of the market, that routine must come to an end.

SIR HARRY ORD'S PICTURE.

(To the Editor of the *London and China Telegraph.*)

SIR,—In your last paper I find the following paragraph :—

"Mr. Edgar Williams has painted, in his usual forcible style, a whole length portrait of Sir Harry St. George Ord, C.B., R.E., in the uniform of the Royal Engineers, of which corps he was lieut. colonel. The portrait has been commissioned by the Chinese inhabitants of Singapore to be placed in their Council-chamber as a memorial of Sir Harry's administration of the Government of those settlements for nearly seven years. The memorial picture is on view at Messrs. Graves and Co., Pall Mall."

As an old Singaporean I am puzzled to know where the Chinese Council-chamber is located. I know the Secret Societies have a "Rumah Congsi," or lodge, in Hong Kong-street, but Sir Harry would hardly like to find himself in such a locality; but then the only other place where the Chinese most do congregate is the "Celestial Club-house" in Tanglin, where young China meets to play at bowls and billiards and drink soda and b.'s or arrack punch. Surely this also is not a proper place for such a *very popular* Governor's whole length? Can you afford any information on this momentous subject?—Your obedient servant, JEMAHAT.

June 23.

Literature.

Treaties and Tariffs regulating the Trade between Great Britain and Foreign Nations; and Extracts of Treaties between Foreign Powers, containing Most-Favoured-Nation Clauses applicable to Great Britain, in force on the 1st January, 1875. Part II.—Turkey. By EDWARD HERTSLET, C.B., Librarian and Keeper of the Papers, Foreign-office. London: Butterworths; and Harrison and Sons. 1875.

The volume before us forms the second part of a highly important work which Mr. Hertslet has undertaken in view of a desire which has been expressed by some Foreign Powers "to revise their commercial treaties not only with this country, but with other States," and he has undertaken his laborious task in order to save people the trouble of hunting through many volumes, published in a variety of languages, when they desire to obtain information on any point relating to any particular State. With this end his "object will be to show precisely, not only which of our commercial Treaties are now, wholly or partially, in force, but also what commercial Treaties have been concluded between Foreign States, containing clauses conferring more favourable treatment on their respective subjects, commerce, and navigation, than are specially provided for in the English Treaties, but the benefits of which concessions are, or might be, enjoyed by British subjects under the 'most-favoured-nation' clauses of the English Treaties." The compilation of a series of volumes of this nature must necessarily be a work of time, and Mr. Hertslet had originally intended to issue the parts, as soon as completed, in alphabetical order, "but it has been thought that it would be found more convenient if the Treaties with those countries were first analysed which circumstances may render more immediately necessary." Accordingly, although Part I. related to Austria, the present part is devoted to Turkey; we are glad, however, to be able to inform our readers that the next part will, we understand, deal with the Treaties now in force with China; and if that part be prepared, as no doubt it will, with the same elaborate minuteness of detail as the present one, it will form a volume of the greatest possible interest and importance to all who are in any way connected with China and its trade.

Having premised thus much with regard to the reasons which have induced Mr. Herstlet, than whom no one is more competent for the task, to undertake the examination of the Treaties of every country, and the compilation of the present work, we proceed to give a brief sketch of the contents of the volume before us, in order to show the thoroughly exhaustive manner in which the subject is treated. Mr. Herstlet commences with a short historical account of Commercial Treaties and Capitulations which have been concluded between Great Britain and Turkey. This chapter, which is printed in large type, goes as far back as the seventeenth century, and gives a brief summary of the Capitulations of 1675 (the so-called "Capitulations and Articles of Peace" between Great Britain and the Ottoman Porte date back to a very early period, but they have been augmented and altered at different times, and now bear the date of 1675); an Act issued by the Sublime Porte on Oct. 30, 1799; the Treaty of Peace and Commerce signed Jan. 5, 1809; the Convention of Commerce and Navigation of Aug. 16, 1838; a portion of the Treaty of Peace between Great Britain, Turkey, &c., and Russia, signed March 30, 1856, at the conclusion of the Crimean War; the Convention of Aug. 19, 1858, between the Principal Powers of Europe and Turkey; and the Treaty of April 29, 1861, the Tariff of Dec. 7, 1861, and the Protocol of July 28, 1868. Mr. Herstlet next gives copies of the English Capitulations with the Porte, of 1675, and copies or extracts of eight Treaties, &c., of Commerce and Navigation now in force between Great Britain and Turkey, and previously mentioned in the above summary. At the end of this portion of the work we find the "Regulations respecting Immunities and Custom-house Formalities, with regard to articles or effects arriving to the address of the Consul-General, Consuls, and Vice-Consuls of Foreign Powers." In a note attached to these we are informed that "Consular officers are also allowed a certain quantity of tobacco annually for their own use, free of duty," the amount varying at different places; at one, we we observe, it is 200 lbs., and at another 190 lbs., including 38 lbs. of cigars, either of which seems to be a sufficiently liberal concession! We then come to a list of treaties and capitulations now in force between Turkey and Foreign Powers, other than Great Britain, and a short abstract of the contents of each of those Treaties, &c. Mr. Hertslet afterwards places before his readers certain clauses of Treaties between Turkey and Foreign Powers (the benefits of which are applicable to Great Britain under our "favoured nation" clauses) relating to the following matters :—Coasting Trade, Consuls and Consular Jurisdiction, Deserters, Extradition, Military Service, Property, Wills, &c., Protection, Religion, Taxes, Tribute, &c., and Wrecks, &c. The volume also contains copies of the "Turkish Law Granting to Foreigners the Right to hold Real Property in the Ottoman Empire, June 18, 1867," "Turkish Regulations relating to Consular Privileges, July 27, 1869," and the "Tariff framed in accordance with the Treaty of April 29, 1861, and signed on 1st December, 1861." We must not omit to mention that not the least valuable feature in this work is a very carefully prepared "Subject Index," without which so many works of this nature are rendered utterly useless for all ordinary purposes of reference. We have already sufficiently shown our appreciation of Mr. Hertslet's endeavours to render the present commercial relations between this country and Foreign Powers, as defined by the treaties now in force, perfectly intelligible to all, and, while again expressing the pleasure which the plan of the work, no less than its execution, has given us, we have only to call attention to one point on which Mr. Hertslet very properly lays some stress. From his official position at the Foreign-office as well as his hereditary connection with such like subjects, he enjoys exceptionable advantages in the preparation of a work like the present, but to prevent any misconception on this score, he concludes the Preface to the series of parts composing the Work with the following explicit declaration :—"I will only add that I desire it to be clearly understood that although the publication of these parts . . . has received the sanction of the Secretary of State for Foreign Affairs, the undertaking itself is purely a private one, and that I am wholly responsible for the facts recorded, as well as for the accuracy of the statements made therein."

We understand that the next volume will be devoted to China and Japan, and may be expected in about two months.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, JUNE 23

Within a few hours after this letter is posted we shall know the result of the four re-elections at Utrecht, Arnhem, Delft, and Almelo. If it turns out that even in only two cases the Conservatives are beaten by the Liberals, then, it is asserted, the Cabinet will at once resign. But I take the liberty to think that this is by no means the intention

Digitized by Google

of our Ministry. It is quite true that they will no longer be supported by a majority, but the Liberals are thoroughly convinced that it is no time for them to take the reins of government in hand. It seems paradoxical, but nevertheless it is quite true, that the Liberals, when possessed of a majority, will be less troublesome to the Cabinet than when the party is in the minority. In the first case they have nothing to fear from Clerical tricks, and they can keep the Ministry "on the good path," whilst in the latter they are always obliged to be on their *qui vive*.

It is very doubtful whether the old Chamber will meet again during this session. No important Bills can be brought forward, because there is no time left for long debates. But possibly a convocation of the members my become necessary to vote some Bills of minor importance, which cannot be delayed.

You will remember that our Minister of War sent some subaltern officers into the provinces in order to enrol soldiers for the East India army. I regret that this measure has proved to be a failure. There seems not the least ambition for service in Java, or for fighting against the Atchinese. This is the more to be regretted because the *Dagblad van Ned. Ind.* has told us that, owing the absence of the necessary reinforcements, it will become necessary to abandon one or more of our military posts in the Archipelago. Our position is already so bad that if any disorders took place in the neighbourhood of Batavia the authorities would not know which way to turn. I need not add that it is not pleasant to read such statements, but many are of opinion that they have only been written to wake up a military spirit in Holland.

The Queen started yesterday *viâ* Rotterdam to England, where she will stay some weeks. Some days ago it became known that her Majesty had made her *début* as an authoress, she having written an essay in the *Revue des Deux Mondes*, under the title of *Le Dernier des Stuarts*, which will, I think, be read with interest in England.

Things are very dull on the Bourse. The princes of the money market are leaving the City to enjoy the beautiful weather abroad. There is no speculative demand, but prices are, in most instances, well maintained, except those of the shares of the Java Company, with reference to which a sort of panic has prevailed, and prices have fallen in a few days from 20 to 25 per cent. Some troublesome rumours are current, of which, however, I cannot guarantee the truth, and therefore believe it prudent not to reproduce them, the more, because the prices of the shares have begun to improve after the heavy fall. I need not to add that it does not cost much trouble to cause a heavy fall in the quotations of any shares. The Deli Company has done during last year a splendid business, and a dividend is advertised of 16½ per cent. Almost equally satisfactory has been the result of last year's operations of the Dutch India Trading Bank. From the report I derive the following particulars. Though the new tariff of custom and export duties—altered according to the principles of free trade—came in force on the 1st of January, neither the import nor the export trade has given brilliant results in our colonies. The unsatisfactory weather influenced badly on the sugar crop, and both the quantity and the quality left much to be desired, whilst quotations ruled under the average prices of last year. The coffee crop was better than was expected. Large quantities of tobacco were brought on the market in 1874, but the quality was, as a rule, inferior. Prospects are better for the current year. Every year a larger quantity of tea is produced, but for want of a regular market prices have declined continuously. Direct exports to Australia and America did not lead to satisfactory results. The production of tin was in 1873-74 50,000 piculs, next year the quantity will amount to about 60,000 piculs. The managers regret that the efforts to open a regular steam line between Java and Australia were unsuccessful. Notwithstanding the Government subsidy, it was found to be impossible to continue the service, but, on the other hand, the steamshipping trade increased enormously in Java. As to the working of the Bank, it is stated that the discounts increased from f.3,900,000, in 1873, to f.4,508,272. The trade in bills has not given profits equal to the risks, which is due to the extraordinary course of exchange in Java. Larger advances than in the previous year were made on bills of lading. The accounts of the estates and agricultural undertakings have given satisfactory results, and this has likewise been the case as regards consignments. The East India agencies made a net profit of f.541,049.96, whilst the profit and loss account closes with a total balance of f.729,045.28½, being f.250,000 more than last year. This satisfactory result was obtained notwithstanding that a considerable bad debt was made by the failure of a Japan house. The Bank has closed its relations with Japan, and the managers do not wish to enter again into relations with Japan firms, except at the introduction of a well-known Bank. The dividend is fixed at ten per cent. I may add that these are the mere outlines of a most interesting report.

Some days ago a colossal monument was cast at Messrs. Enthoven and Co.'s foundries at the Hague. It will be erected by the population of Banda, "in remembrance of the festival to celebrate the twenty-five years' occupation of the throne by H.M. William III., King of the Netherlands."

The statue of Thorbecke will be placed in this town on the Reguliersplein.

The King has approved the appointment of Mr. W. T. Fraser as British Consul at Batavia.

AMSTERDAM, JUNE 24.

The re-elections have given the following result. In Arnhem the anti-Revolutionary candidate was beaten by Mr. Geertsema, the ex-Liberal Minister. In Delft the Conservative candidate, Jhr de Casembroot, obtained the majority, and this was likewise the case in Almelo, where Mr. Corver Hooft was elected. At Utrecht, however, a most disputed district, Mr. Kien, Conservative, was beaten by Mr. Bastert. The Liberal party have now a majority in the Second Chamber.

The annual report of the Dutch India Railway Company has been published. The balance-sheet shows a net profit of f.377,893.

PRODUCE MARKETS.

The market for Colonial Produce has been somewhat more animated. Important parcels have changed hands, and a firm tone has prevailed.

COFFEE.—Holders of warrants of the Trading Company are not inclined to operate without an advance. The general attention is fixed upon the result of the sale to be held by the Dutch Trading Company.

TEA firm, at former prices. On the 2nd of July a lot of 567/4 and 878/12 chests Java will be brought under the hammer.

RAW SUGAR.—The transactions have been important, good quality having found ready buyers for export to Belgium.

RICE is very dull.

SPICES.—In waiting for the result of the important sale of the Trading Company, at which 37 casks and 4 chests Nutmegs, 17 casks Mace, and 1,273 casks Cloves were offered, the transactions were of no importance. The result of the sale was very satisfactory, and in most instances high prices were paid.

JAVA TOBACCO.—Several parcels of sundry marks have been sold at satisfactory prices.

CUBEBS have met with a very lively demand; but the market is now somewhat quieter.

RATTANS.—A lot of 711 piculs was sold at satisfactory prices.

JAVA INDIGO has met with a steady demand; but the arrivals have been rather large, and this has checked operations.

BANCA TIN has improved somewhat in price, f.51 being paid. Billiton is quoted at f.49 nominal.

Monetary and Commercial.

The following failures arising out of the suspension of Messrs. Collie and Co. have been reported:—Mr. Lewis Stewart, East India merchant, St. Mary-axe, with liabilities estimated at about £100,000.—Messrs. S. and J. Graham, warehousemen, of Wood-street; amount of liabilities not stated.—Mr. William Marshall, of Manchester, merchant and commission agent, with liabilities estimated between £80,000 and £100,000, and Messrs. William Shaw, Son, and Co., woollen merchants, Huddersfield, with liabilities amounting to £30,000.

The creditors of Mr. A. E. Westbeech, of Fenchurch-street, merchant and commission agent, who recently suspended payment, have resolved to liquidate by arrangement, and have appointed Mr. Robert A. M'Lean (R. A. M'Lean and Co.) to be trustee, with a committee of inspection. The liabilities are £112,000, of which £4,000 are expected to rank against the estate. The assets are £27,000, consisting chiefly of estimated reversions from consignments to India, China, and Australia.

Mr. Charles Carnie writes as follows:—

Having noticed in some of your contemporaries remarks about a *private* meeting of bill holders at my office yesterday, I think it as well the matter should be fairly stated—the position being that the whole amount of £56,700 was drawn against *bona fide* purchases of goods and cotton (and not for the purposes of accommodation), which goods and cotton ought still to be in the hands of Collie and Co. to meet it.

We have received the subjoined commnnication from the Borneo Company:—

With reference to the paragraph in the last issue of the *London and China Telegraph*, taken from the *China Mail*, stating that Mr. H. Nicaise, our manager at Hong Kong, had joined the board of the Hong Kong and Shanghai Banking Corporation, we will thank you to state in your next issue that Mr. Nicaise has sent in his resignation as director of that establishment, by order of the board of directors of this company.

The Eastern Telegraph Company announce that, subject to the final audit, the accounts show a balance available for dividend which will enable the directors to recommend a final dividend of 2s. 6d. per share, making, with the previous payments on account, a dividend for the year ending 31st March of 5 per cent., carrying to reserve a balance of £36,000.

The Eastern Extension, Australasia, and China Telegraph Company have declared an interim dividend for the quarter ending 31st March, 1875, of 3s. per share, or 6 per cent. per annum, free of income-tax, payable on the 15th proximo.

The report of the Assam Company states the net profit for the year at £45,026, out of which it is proposed to pay a dividend of 17½ per cent., which makes, with 5 per cent. already paid, a total distribution of 22½ per cent. for the twelve months.

The Universal Marine Insurance Company (Limited) announce the payment of interest at the rate of 10 per cent. per annum, free of income-tax, for the half-year ending the 30th inst.

During the week ended the 19th inst. the deliveries of tea from the bonded warehouses in London amounted to 3,662,255lb., of which 2,048,619lb. was for home consumption, 870,323lb. was exported, 638,157lb. was removed coastwise, 102,099lb. was sent coastwise for immediate export, and 3,059lb. was taken for ships' stores. The duty received was £51,216, being nearly 2 per cent. more than in the preceding week; while during the period from the 1st to the 19th inst. the increase is 9 per cent. as compared with the corresponding period of last month.

It is notified that Mr. Lancelot John Wade has been admitted a partner in the firm of Robertson and Co., of Newman's-court, Cornhill.

Within the last few days some inquiry for Bar Silver has arisen, and the price has advanced to 55¾d. per oz. standard, which is the present quotation. The Market for Mexican dollars is inactive and dull; the amount now on hand, about £140,000, has not yet been placed, and quotations remain nominal.

Digitized by Google

ARTICLES OF IMPORT.

TEA.

Messrs. Jas. Goddard and Co.'s Circular says:—There has been little or no business to report. The failures occurring have had a depressing effect, and all holders have been disposed to lighten their stocks as much as possible. Fresh samples of Scented Teas are showing. In the public sales 12,230 packages have been offered during the week, 11,585 "Without Reserve." Green Teas still continue low, especially Young Hysons, of which fair quality has sold as low as 1s. 4½d., and Imperial 1s. 2¾d. New makes continue to be sold at auction at a further fall. About 1,000 packages Black Leaf Congou obtained 10¾d. to 11¾d. Deliveries from London, from 1st to 21st instant, inclusive, or 18 days, 1875, 10,135,729 lbs., against 18 days, 1874, 9,417,778 lbs. Imports, deliveries, and stocks in London, from 1st January to 31st May:—

Imports.		Deliveries.		Stocks.	
1874.	1875.	1874.	1875.	1874.	1875.
41,877,797	57,915,338	66,458,530	73,229,872	64,550,380	63,078,339

SILK.

At the periodical public sales, which commenced on the 22nd, and are still going on, a general decline in prices of from 3d. to 6d. per lb. has taken place in nearly all descriptions of Silk. There has been a fair amount of business by private contract at slightly better rates than those obtained in the sales. The deliveries are on a satisfactory scale, and stock is being gradually reduced. Deliveries 1st to 23rd inclusive:—China, 2,678 bales; Canton, 662; Japan, 447; total, 3,787 bales.

LONDON QUOTATIONS—JUNE 24.

Hatchoji ... ... (none)	

COCOANUT OIL.—The demand has exhibited little improvement, and prices are rather easier. Cochin rules at £42 to £43, although for 15 tons of fine £43 15s. has been paid, whilst for Ceylon in pipes £37 to £37 5s. has been taken.

CHINA MATTING.—At auction 420 rolls were offered, but there was only a moderate demand, and about one-half sold, fancy pattern at 34s. to 38s., but chiefly without reserve (158 rolls) at 16s. to 17s. for white, mildewed red and white 12s. 6d. to 16s. 6d. per roll; 12 rolls Japan were withdrawn.

COIR GOODS.—At the public sales common qualities of Yarn, of which the bulk consisted, went off flatly, and prices were in most instances 20s. to 40s. per ton lower, a good part being bought in, but the small portion of good and fine sold readily at very full rates. Fibre went off slowly at a decline of 20s. to 30s. per ton for Cochin as well as ordinary Ceylon. Ceylon Yarn sold, good medium to good make and colour at £28 to £30 5s., fine at £35 to £42 15s.; of 223 tons ditto in dholls, only 115 tons sold, very common to common at £18 to £21, medium £22 to £25 10s., good medium to good at £26 10s. to £32 10s., fine to superior at £34 to £40 10s.

CHINA WOOL.—At the Low Wool sales there was a good attendance of buyers considering the small quantity of wool catalogued. The bulk of the China sheep's wool was sold, some fair quality bringing 8½d., and inferior 6¾d. The principal portion of the China camel's hair was well selected and of a very superior class, and brought 11d. to 12d.

CAMPHOR.—Market quiet and lower, and about 200 boxes have changed hands at 70s. per cwt. for old re-weights; new at 67s. 6d., with sellers at these prices.

CUBEBS.—Market steady; of 109 bags offered 20 bags were placed at 28s. per cwt.

CANTHARIDES.—One case China offered in the sales was bought in at 3s. 2d.

CHINA STRAW PLAIT.—At auction of 150 bales offered only 23 bales sold, fine white at £21 15s., common to good ditto £6 10s. to £12 10s., mottled £7 15s. per bale.

CUTCH.—A steady inquiry has prevailed, and by private contract 200 boxes good Pegue have been sold at 23s., 800 boxes flag BB at 23s. 6d., and 600 boxes Elephant at 24s. per cwt.

DRAGON'S-BLOOD.—Market quiet; of 47 cases offered, 7 cases sold at £8 15s. to £9 per cwt.

EBONY.—No business done.

ESSENTIAL OILS.—*Cinnamon* dull and supply abundant; 1 case sold at 4s. 3d. for fair. *Citronelle* quiet; of 22 cases at auction, 3 sold at 1⅝d. *Lemon-grass* steady; 78 cases offered, 11 sold at 2½d. *Anniseed* firmly held, and a few cases sold at 10s. to 10s. 6d. *Cassia* dull; small sales at 4s. 4d. *Nutmeg* quiet; 6 cases bought in.

GUMS.—*Benjamin* steady; of 153 cases 62 sold; Sumatra greyish seconds £9 to £9 17s. 6d.; thirds low 35s. to 41s.; 9 cases fair almondy 105s. *Copal* more inquired for, and sales of good privately. *Damar* quiet; 70 cases fine sold at 60s. *Gamboge:* 12 cases offered, 7 sold at £9 17s. 6d. to £10 10s.

GAMBIER.—With reduced supplies on the spot a strong demand has prevailed, and prices have advanced 2s. 6d. per cwt., about 600 bales being sold, commencing at 26s. 6d., and rising to 29s., but the unexpected arrival of the St. Aubin has caused a decline to 28s. for whole bales and 27s. 6d. ex ship. The demand for arrival has been extensive, and sales to the extent of about 1,000 tons, July to April shipment at 25s. 9d. to 26s. 6d. ex ship all faults, also 750 tons to Liverpool a 26s. 6d. ex quay, and near at hand at 27s. 3d. ex quay.

GALLS.—There has been somewhat more inquiry; privately 200 cases worked China have been sold at 53s., being steady. At auction 248 cases China were bought in at 53s. or withdrawn.

GUTTA-PERCHA remains dull, and at auction of 920 baskets offered only about 40 baskets sold at 4⅜d. to 9¼d., the remainder withdrawn or bought in, common to good genuine at 6d. to 2s. 10d. per lb.

GALANGAL ROOT.—Market steady; 200 bales sold at 19s., one lot at 19s. 6d. per cwt.

HAIR.—At the periodical sales, 6 cases China Yak tails were withdrawn, and 13 cases Chinese human sold at 2s. 9d. per lb.

HEMP.—There has been a steady demand for Manila at the recent recovery, and about 1,000 bales have been sold privately, fair to good at £31 10s. to £33; the supply at auction was all disposed of at and afterwards at previous rates. Of 1,446 bales about 800 bales sold, fine brown at £30, mixed qualities below fair at £31 to £31 5s., fair at £31 10s., good fair to good at £32 10s. to £33 10s., Sorsagon at £34, first-class sea-damaged of fair (200 bales) at £30 10s.

ISINGLASS.—The periodical auctions held on the 22nd instant went off flatly for all kinds. Penang tongue and cake sold 2d. lower, but fine leaf dearer. Of 85 cases 10 bags offered 63 cases and the bags sold, good to fine bold and clean tongue at 4s. 3d. to 4s. 6d., ordinary dark to middling at 3s. 6d. to 3s. 11d., fine selected pale leaf at 5s. 4d. to 5s. 5d., middling to good at 4s. 7d. to 4s. 9d., ordinary 4s. 1d. to 4s. 4d., good to fine cake at 1s. to 1s. 5d. 33 cases Manila cake and low tongue were bought in at 1s.

INDIA-RUBBER.—Very little business done; Borneo is offering at 1s. 4d. per lb.

JAPAN WAX.—Market quiet; small business done at 50s. to 53s. for fair and fine qualities.

MUSK has been firm, and in good demand; at sale, 28 caddies Tonquin sold at 35s. to 35s. 6d.; 2nd pile at 14s. 6d. to 15s.; wet pickings at 18s.; 1 bottle fine grain sold at 65s. Of 6 tins dark and damp, 2 sold at 49s. 6d. per oz.

PLUMBAGO.—At auction of 380 barrels Ceylon offered about 250 sold at easier rates, common to good dust 7s. 6d. to 9s. 6d., good to fine chips 10s. 6d. to 11s., very small lump 13s., good ditto to fine clean bold ditto 15s. 6d. to 17s. per cwt.

PEPPER.—*Black:* Steady and fair business done, checked by the firmness of holders; Singapore spot sold at 5⅝d. to 5½d.; Penang, 4¾d. to 4 9-16d.; and sellers afloat at the lower quotations. *White* very dull; a few lots common sold at 7d., fair 7⅛d. to 7¾d. per lb.

RICE.—The market has remained stagnant, and on the spot only a scanty business has been done in any description, prices being in buyers' favour. Floating cargoes have also been difficult of sale, and few have changed hands, the nearest quotation for Rangoon is 8s. 1½d., but for the first arrival off coast 8s. 6d. is obtainable.

RHUBARB.—China has been very firmly held; of 143 cases China at auction 81 sold at 2s. 5d. to 4s. 8d. for well-trimmed bright root, good colour; wormy, 8½d. to 10d.; middling, 1s. 3d. to 1s. 6d.

SPICES.—*Cinnamon:* No change since the periodical sales. *Cassia Lignea* quiet, and about 200 cases sold at 54s. for unworked fair; 200 cases at sale, part sold at 56s. fine pale. *Cloves:* Nothing of consequence done. *Mace* and *Nutmegs* dull.

SAPANWOOD.—In auction 8 tons Ceylon were withdrawn. 20 tons Java (of indirect import) were bought in at £11 10s., sea and sugar damaged, of which the bulk consisted, at £10 5s. to £10 10s.

STICKLAC.—At auction 188 boxes Siam were bought in at £5 10s. to £5 15s.

SAGO.—The market is quiet; in auction only 576 bags were offered and sold, good medium at 16s. to 16s. 6d., being lower, the remainder damaged large at 14s. 6d. to 15s. 6d. *Flour:* Of 360 bags Singapore the sound was bought in at 14s., but 160 bags discoloured sold at 12s. 3d.

SHELLS.—The periodical sales are announced for the 29th inst.

TAPIOCA exhibits a declining tendency; 1,500 bags at auction sold at 2⅝d. to 2¾d. per lb.

TIN has been less active, and the quotations for Straits have slightly declined, being at the close £84 on the spot and £83 10s. afloat. Banca rules at £88, and Billiton at £83, showing no change.

ARTICLES OF EXPORT.

MANCHESTER GOODS.

Though apprehensions of further embarrassments have in a great measure subsided, and the tone of the market has become more confident, the transactions still continue of a very limited extent, and barely sufficient to test values. Quotations, with few exceptions, show little variation, but where offers are made and business ensues, buyers have the advantage.

CASUALTIES.

ST. HELENA, MAY 24.—The barque Kelso, from Singapore, arrived here, reports on the 21st April, in lat. 32 S., lon. 36 E., experienced a terrific gale, and had fore and mizen rigging carried away, bowsprit and foreyard sprung, and deck much strained.

The Omba, from Shanghai, for London, when coming to anchor off here, collided with mail steamer, doing damage to both vessels.

SINGAPORE, MAY 14.—The Tartar (str.), from London, for Shanghai, in passing through the Suez Canal, struck on some hard substance and broke two blades of her propeller. After examination surveyors allowed her to proceed to Hong Kong, where she will dock after discharging the bulk of her cargo.

MISCELLANEOUS.

MALTA, JUNE 13.—Passed, Madura (str.), from Batavia, for Nieuwe Diep.

SUEZ, JUNE 13.—Arrived, Conrad, from Batavia, for Nieuwe Diep; 20, Nestor, from Shanghai, for London; 21, Glenartney, from Hankow, for London.

PORT SAID.—Arrived, June 18, Menelaus, from Liverpool, for China.

ST. HELENA.—Arrived, May 25, Kelso, from Singapore; 29, Oquendo, from Moulmein; 30, Norch I., from Batavia,; Omba, from Shanghai, for London; Louis Auguste Constantyne, from Batavia; 31, Uranus, from Batavia; Umgeni, from Colombo; Mina, from Banjoewangie; St. Joseph, from Akyab; Parthia, from Rangoon; Mardoll, from Bassein; Trionfo, from Rangoon; June 1, Cora, from Rangoon.

Passed, May 23, Deogaum, from Nagasaki; 30, Dorset, from Colombo, for London; Eliza Cambell, from Moulmein, for Bremerhaven; Aline, from Rangoon; Undine, from Rangoon, both for Falmouth; Sapphire, from Manila, for London; 31, Constantia, for Singapore.

PORT ELIZABETH, MAY 21.—The purchasers of the Jupiter T., from Singapore, to New York, which went ashore twelve miles east of Bird Island, on April 19, have saved a quantity of cargo, and are still working at the wreck. The weather has hitherto been somewhat unfavourable.

ADEN.—Arrived, June 2, Leon (str.), from Liverpool, and left for Manila.

The Devonhurst (str.), from London, for Shanghai, which put in here April 12, disabled, has completed her repairs, reshipped cargo, and sailed on the 7th inst.

MANILA, JUNE 8.—The wreck of the Camiguin (str.) has been sold for $1,501.

LAUNCH.

Messrs. Thomas Wingate and Co., of Whiteinch, launched from their shipbuilding yard, on the 22nd inst., a magnificent iron sailing ship of the following dimensions:—Length, 250 feet; breadth, 40 feet; depth of hold, 23½ feet; 1,923 tons B.M., and classed A 100 at Lloyd's. She is a sister ship to the Culzean Castle, recently launched from the same yard for Messrs. Thomas Skinner and Co., of London and Glasgow, and, like her, will be fitted with all recent improvements, including an Emerson and Walker's independent steam windlass, and large donkey engines for working the pumps and cargo gear and otherwise economising manual labour. The poop is elegantly fitted up in polished maple and teak, and has accommodation for thirty cabin passengers, besides captain and officers. The ceremony of naming the vessel Brodick Castle was performed by Mr. W. E. Birrell, of Glasgow. The vessel was at once taken into the builders' tidal dock to receive her masts, &c.

NOTICE TO MARINERS.

China, Amoy.—Intended Light on Tsing-Seu Island.—The Customs Department at Shanghai has given notice that a lighthouse is now in the course of construction on the northern slope of Tsing-seu Island, entrance of the outer harbour of Amoy. The light will be *fixed*, showing a white light between the bearings about N.W. ¾ W. through west and south, to S.E. ½ E., and a *red* light over the Chauchat rocks and the Taepan shoal; it will be elevated 125 feet above the level of the sea, and in clear weather the white light should be seen from a distance of 15 miles. The illuminating apparatus will be dioptric, or by lenses of the fourth order. The tower will be built of stone and brick, octagonal in shape, 33 feet high, and painted in alternate red and white vertical stripes, and the dwellings white. Approximate position, lat. 24° 22¼′ N., long. 118° 7¼′ E.—Hydrographic-office, Admiralty, June, 1875.

SUNDRIES, PER "CHINAMAN," FROM NEW YORK, FOR SHANGHAI, JUNE 8.

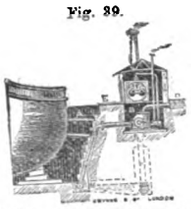
GWYNNE and Co., Hydraulic and Mechanical Engineers,

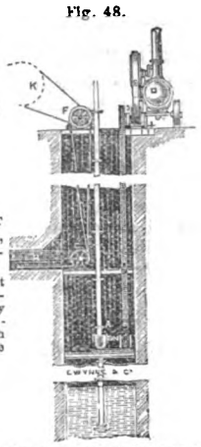
ESSEX STREET WORKS, STRAND, LONDON, W.C.

Fig. 89.



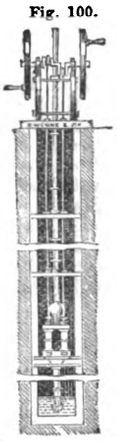
GWYNNE & Co.'s PATENT PUMPING MACHINERY, AS APPLIED TO EMPTYING DOCKS.
The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be given

Fig. 48.



GWYNNE & Co.'s IMPROVED PATENT CENTRIFUGAL PUMP.
Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of Water

Fig. 100.



GWYNNE & Co.'S IMPROVED DOUBLE BARREL DEEP-WELL PUMP,
For Hand-power, adapted for ordinary wells of any depth, of most careful construction, and on the most approved system

Fig. 86.

GWYNNE & Co.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.
These Pumps work without valves or packing, and raise a considerable quantity of water. They will lift sand, mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.

GWYNNE & Co.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.
With or without Expansion Gear, for economical working.
From 4 to 100-horse power

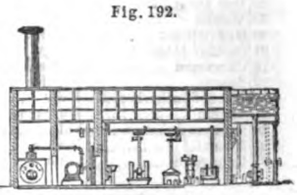
Fig. 154.

GWYNNE & Co. IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.
These boilers are simple and compact. They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler.

Fig. 142.

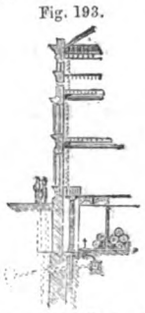
GWYNNE & Co.'S IMPROVED PORTABLE STEAM ENGINE.
Light, simple in construction, durable, and economical, and very superior to "Agricultural" Engines.
From 2½ to 30-horse power

Fig. 192.



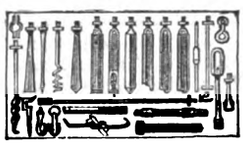
GWYNNE & Co.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES, FAT, &c., &c.
The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motive power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added to lift water or any purpose required.

Fig. 193.



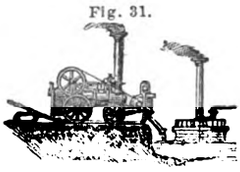
GWYNNE & Co.'S IMPROVED HYDRAULIC LIFTS.
Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine, or other produce, into or up from cellars, or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.
Prices on application.

Fig. 121.



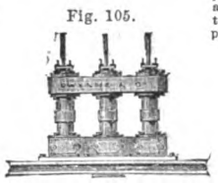
GWYNNE & Co.'S BORING TOOLS.
Of greatly improved construction. The figure represents those most frequently used, but the form and number vary much with the nature of the soil, and size of the bore hole.
G. & Co. can confidently recommend these as the best in the market.

Fig. 31.



GWYNNE & Co.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR.
In which the Pumps are furnished with hose for distributing the water over the adjoining plantations. Made single and double-barrelled pumps in all sizes.

Fig. 105.



GWYNNE & Co.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.
These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and comparison with those of other makers is challenged. Gwynne & Co. make single and double-barrelled pumps upon the same principles.

Fig. 207.

GWYNNE & Co.'S IMPROVED DREDGING MACHINERY.
The boat can be constructed so as to draw only 18 inches of water, if required. The machinery is extremely simple, yet thoroughly effective, the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Large Illustrated Catalogue with many Estimates, and upwards of 200 Engravings, post free for Twenty-four Stamps to any part of the world.

BRANCHES AND AGENCIES.

Hong Kong	Hankow	Saigon
Shanghai	Yokohama	Singapore
Foochow	Hiogo	Bombay
Ningpo	Manila	Calcutta

The Corporation grant Drafts upon, and negotiate or collect Bills at any of the Branches or Agencies; also receive Deposits for fixed periods, at rates varying with the period of deposit.

The Corporation issue Letters of Credit and Circular Notes, negotiable in the principal cities of Europe, Asia, nd America for the use of travellers.

They open Current Accounts for the convenience of constituents returning from China, Japan, and India.

They also undertake the Agency of constituents connected with the East, and receive for safe custody Indian and other Government Securities, drawing Interest and Dividends on the same as they fall due.

Shareholders having their shares on the London register receive their dividends at the fixed rate of 4s. 6d. per dollar. Dividends are payable in London in April and October, on receipt of the advice of meeting in Hong Kong, held in February and August.

Diploma of Merit, Vienna Exhibition, 1873.

YORKSHIRE RELISH

THE most delicious SAUCE in the world to CHOPS, STEAKS, FISH, &c. Sold by all Grocers and Oilmen in bottles 6d., 1s., and 2s. each. Trade mark—Willow-pattern plate.

PROPRIETORS:—
GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S BAKING POWDER.

THE BEST IN THE WORLD.—Makes delicious Bread without Yeast; Puddings, Pastry, &c., without Eggs, Butter, or Lard. Bread made with this Powder is much easier to digest, and much more wholesome than that raised with yeast, and a larger quantity is obtained from the same weight of flour. One trial will convince the most sceptical of its superiority over others. Sold by Grocers, Chemists, and Oilmen in 1d. packets; 6d., 1s., 1s. 6d., and 2s. Tins. Prepared by GOODALL, BACKHOUSE, & CO., LEEDS.

Diploma of Merit, Vienna Exhibition, 1873.

GOODALL'S QUININE WINE.

THE BEST AND MOST AGREEABLE TONIC yet introduced. For the relief of Indigestion, General Debility, and Loss of Appetite it is INVALUABLE. Recommended for its purity by the *Food Journal*, Arthur Hill Hassall, M.D., Wentworth L. Scott, Esq., F.C.S., F.A.S.L., F.R.S.S.A., &c. Sold by Grocers, Oilmen, and Chemists, in large bottles at 1s. 1s. 1½d., 2s., and 2s. 3d. each. Prepared by GOODALL BACKHOUSE & CO., LEEDS

Per P. and O. steamer *Malta*, from Venice, July 9.—To Penang: Mr. Jargensen.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present P. and O. mail brings advices from this port to the 12th May, and by the Pacific mail we have eleven days later news, viz., to the 23rd May; the French mail from London March 26 arrived out on the 14th May, and the following P. and O. mail of April 2 was received on the 15th May (three days early). The *Japan Herald* supplies the following summary of news:—

The doubts which we recently expressed as to the power and constitution of the *Gen-ro-in*, have been fully confirmed, for not only is every member of it to be selected from amongst paid Government officials, but its power is limited to discussing matters—not such as are of interest, and may be brought forward by any one of its members, but, as we learn from one of the published rules, only those which emanate from the Mikado. This so-called Parliament is merely a debating society, without power or authority, and has no more similitude to a real body of representatives than the Oxford or Cambridge debating societies have to the House of Commons.

The Japanese Budget for the first six months of this year has been published without a word of explanation, and has caused some little astonishment in the financial world. Last year's Budget showed that, leaving aside the balance from the previous year, the receipts were $59,359,000, and expenditure $62,169,000. This year we are requested to believe that the receipts for *six months* amount to $58,729,000, whilst the expenditure is $39,022,000, thus showing a surplus of $19,700,000. Should these figures be correct, there is only one way of accounting for this, and that is that the majority of the land taxes (which constitute by far the larger portion of the income) fall due in the first half of the year. If this view is permissible, it should have been so stated, as the promulgation of a balance sheet, showing a surplus of nearly $20,000,000 in six months, has caused very grave doubts as to the truthfulness of the figures published.

The mercantile community both in Japan and China have learnt, with much gratification, that the fortnightly mail service between Yokohama and San Francisco is to be resumed. The Pacific Mail S.S. Company and the Occidental and Oriental S.S. Company have guaranteed that communication between Japan and the Pacific coast shall be maintained fortnightly as heretofore. It is also fortunate for the interests of the proprietors that a good understanding should have been arrived at, preventing an imminent competition between these two companies, which would probably have eventuated in great loss to both. The same rates of passage and freight will be charged. The same officers will attend to the management of both concerns, and the business of each will be conducted in the same offices. Such is the state of affairs at present,—one which we hope will continue so long as it conduces to the prosperity and progress of the foreign settlements in the last, and secures to the proprietors of these companies a fair return for the capital invested in them.

The trial of King Yao, the compradore of the Deutsche Bank, charged with embezzlement, was commenced on the 12th May, at the Saibansho, but nothing of importance was elicited beyond the particulars we have already published. King Yao was formerly in the employ of Messrs. Birley and Co., of Hong Kong,

Digitized by Google

and while with them he committed a robbery which resulted in his condemnation to a term of imprisonment at that place. On the 4th May the whole of the six Chinese shroffs at the Deutsche Bank were given into custody, on the suspicion of their having been in collusion with the compradore. One fact has been ascertained since the discovery of the robbery which places matters in a rather alarming light. It appears that nearly the entire Chinese community—certainly a large and responsible portion of it—and presumably the Chinese Guild, knew that King Yao was a convicted felon, yet not one word of warning was given to any one, and he was recommended to Mr. Mammelsdorff by two of the most trusted compradores in the place.

Another Chinese compradore has absented himself without leave, and embezzled money entrusted to him. On the 4th May the compradore of Messrs. Walsh, Hall, and Co. went to Mr. Engert, in the employ of the house, and asked for money to pay the monthly bills. The clerk told him that he must have sufficient in hand, and did not comply with his request. The same afternoon the compradore of Messrs. Finlay, Richardson, and Co., who is one of the compradore's sureties, came to Messrs. Walsh, Hall, and Co., and told those gentlemen that they had better look out, as it was possible that their compradore, "who had been speculating," might go away by the French mail. This statement, and the peculiar proceedings of the compradore, aroused suspicion, and Messrs. Walsh, Hall, and Co. sent for the compradore. He was absent. His cash balance was examined, and found to be deficient in about $600. Search was shortly instituted for the absentee, who was discovered hiding in his own house, where he was taken into custody. The loss to the firm will be little or none, as the defaulter is largely secured; but several in the employ of the house are said to be sufferers to the extent of the sums they had in the hands of the compradore. Mr. Piquet, for instance, is said to have had a deposit of $3,000 in the man's charge. The total amount of the defalcations is estimated at $4,000.

The Consular Court was densely crowded during the investigation into the case of Adds and Withers, accused of complicity in the recent embezzlement from the funds of the Comptoir d'Escompte. Never before has so much general interest in any trial been evinced in Yokohama. The total amount of the ascertained defalcations of the deceased is stated by the manager to be $67,775. The acquittal of Captain Withers has given universal satisfaction. The public feeling is that he was the victim of circumstances over which he had no control, and that he had no guilty knowledge whatever of the circumstances which led to his being appointed to the command of the *Iris*.

The Japanese Government has despatched two vessels to Korea to reconnoitre, and to acquire information about its coast and harbours. The vessels are to proceed up the river to the capital. Should the Koreans adopt the same hostile policy as that adopted towards the Americans, the chances are that the vessels may be fired on by the Koreans, in which case something serious may arise out of the affair. Some time ago a rumour prevailed that the Koreans were less hostile towards the Japanese than of late years they had been; but the report has lacked confirmation, and the action taken by the Japanese Government would seem to indicate that they either intend to bring affairs to a crisis, or that they expect that the knowledge they seek to gain of the vulnerability of the Korean peninsula will be of use, should hostilities be declared between the two countries.

The Imperial Japanese corvette *Tsubo-Kan* will shortly be despatched on a four months' cruise round the islands. The object of the cruise is to give the cadets of the Naval College an insight into the practical working of their profession. Leaving Yokohama, she will proceed to Hakodate, thence to Nakasaki, thence to the Inland Sea. She will then call at various ports, and return to Yokohama.

The Minister of the Interior has just distributed three classes of rewards to the most successful raisers of eggs of the best silkworms in Japan. In the first class there are only four prize-takers, one of whom is a grower of Yokohama. To each of these the sum of 25 yen has been awarded. Three growers have been rewarded with 17½ yen each, in the second class; and three others in the third class have received 10 yen each.

The *Echo* says that forty houses were destroyed by fire in the village of Shimongamura, Gochiu, on the 19th April. On the 24th another fire destroyed twenty more houses; and on the 30th a third fire broke out, and a violent wind impelled the flames, which destroyed almost the entire village. Many people were found burnt to cinders in their beds. Thirty houses are also said to have been destroyed in a fire in Funa-daiko-matchi, Nagasaki.

Our Spring race meeting has passed off with its usual success, but much indignation has been shown at a most discreditable attack by the *Japan Mail* on the motives of the gentlemen forming the committee of the Race Club. The tone of this article has been universally condemned by all who are acquainted with the subject. The meetings of the Yokohama and Yedo Amateur Athletic Associations have also taken place; and a concert in aid of the hospital, and a theatrical performance have added to our amusements. The cricket season has been opened with a match between our home club and H.M.S. *Challenger*, in which the latter was badly beaten.

H.M.S. *Challenger* has left here for a cruise in the Inland Sea. The French ironclad *Montcalm*, carrying the flag of Admiral Krantz, and the corvette *Volta*, having on board the Duke de Penthièvre, arrived here on the 12th May.

The many friends of the house will be glad to learn that the old established firm of Messrs. Aug. Heard and Co. have resumed business both in China and Japan.

The Rev. Mr. Syle has retired from the pastoral charge of Yokohama. The Rev. Mr. Piper is now officiating at Christ Church.

The Mikado has been making frequent public appearances, having been present at the theatre, &c.

The subjoined items of intelligence are from the *Japan Mail*:—

The negotiations opened some two years ago between the Governments of Japan and Peru have had a more auspicious termination than might have been anticipated from the circumstances attending their commencement. A treaty of friendship and commerce between the two countries was signed some little time back, and, after ratification, was exchanged on the 17th May at the hands of Senor J. F. Elmore, LL.D., on the side of Peru, and H.E. Terashima Munenori, specially appointed by H.M. the Mikado Plenipotentiary *ad hoc*. Senor Elmore has been appointed in permanent mission in Japan and China, and has received full powers for the exchange and ratification of both the Chinese and Japanese treaties. His staff, consisting of a Secretary of Legation and an *Attaché*, have arrived. Having concluded part of these preliminary duties here, he leaves shortly and temporarily for Peking for a similar purpose in China, after the accomplishment of which he will reside in this country. We trust that the intercourse which Senor Elmore has been instrumental in placing on its present footing will be one of increasing friendship and advantage to the respective countries interested in these negotiations. An official dinner, to be given to the Japanese Cabinet and the foreign representatives by Senor Elmore on the 29th May, will celebrate the exchange of the treaty with Japan.

It is notified by the Judicial Department that Japanese subjects who may have legal claims to establish against foreigners must lodge information of the nature of their claims at the respective *Fu* or *Kencho* of the foreign concession in which the foreigner resides. They will then be supplied with a note to the Consul which will enable them to take proceedings for the recovery of their debts. The *Nisshin Shinjishi* has authority for stating that Superior Courts of Judicature will shortly be instituted in Yedo, Osaka, Nagasaki, and Fukushima.

An accident has occurred on lot 113 from the falling in of a framed roof on which some native workmen were engaged. Two of the men were much injured by their fall, and were removed in an insensible condition.

We learn that it is intended to send a small detachment of troops to the Loo Choo Islands, avowedly with the view of protecting the inhabitants.

Messrs. Bourne and Co. have sold lot 149 Bluff, containing 454 *tsubos*, with residence, &c., for $3,000.

HIOGO-OSAKA.

Our advices extend to the 19th May; the French mail from London 26th March was received on the 17th May. The following items of intelligence are from the *Hiogo News*:—

The expected stay of H.E. Sir Harry S. Parkes till the 11th May at this port, together with the unwonted accident of the presence in the harbour of two French men-of-war and a British gunboat, were taken advantage of by Mr. Annesley, H.B.M.'s Acting Consul for Hiogo and Osaka, to issue invitations for a ball on the 10th May. No room in H.B.M.'s Consulate being of suitable proportions, the use of the Municipal Hall was obtained, and this place, well lighted and tastefully decorated by the kind assistance of Captain Paul, of the *Mosquito*, proved large enough for the purpose. By one of those exasperating *contretemps* which occasionally occur to mar the most carefully made arrangements, the P.M.S.S. Company found that the exigencies of trade necessitated the sailing of the *Golden Age* on the afternoon of the 10th May, and as the departure of Sir H. Parkes and suite could not be delayed till the following steamer the ball was deprived of the presence of one of its chief guests.

On the 24th of April were struck at the Imperial Mint at Osaka the first 3,000 of the new Japanese trade dollar. This may be said to signalise another attempt on the part of the Government to constitute itself the medium of supplying the necessities of Eastern trade in the way of a circulating medium, but what the final outcome of these efforts may be it is not easy to foresee. The new trade dollar is a handsome coin, very like the original silver yen, but in place of the Chinese symbols signifying "one yen," it presents three figures, signifying "trade silver," and on the other side, in Arabic numerals and Roman letters, "420 grains; trade dollar ·900 fine."

The Hiogo execution ground has witnessed the last public appearance of two notorious criminals. Fourteen months ago Kobe was startled into a feeling of insecurity, which has never yet since been quite allayed, by the discovery that in a populous street close to the Saibansho the house of a man of good repute

Digitized by Google

had been entered during the night and himself and family barbarously murdered, without any alarm whatever having been raised. After the lapse of some time the police succeeded in arresting two men, who have since admitted their guilt. They were respectively only twenty years and eight months and sixteen years and nine months of age, but were both old offenders, and when sentence was formally passed upon them both betrayed the utmost indifference. They were afterwards led to the execution ground, when the elder died quietly and the younger with bravado. The congregation of Japanese outside the Saibansho was very great, and a considerable crowd accompanied the prisoners to the execution ground, where the two heads were exposed for three days.

Lot No. 74, Foreign Concession, containing 287½ tsubos, has been sold by Mr. K. de Piotrowski to Mr. J. Gillingham for Mex. $200. This lot was originally sold at the land sale of May, 1870, for Boos 9.05 per tsubo. Lot No. 91, Concession, has been sold by public auction by Messrs. A. De Ath and Co., Messrs. C. and J. Favre-Brandt being the purchasers, for Mex. $2,500. The lot contains 295 tsubos, and has erected on it a two-storied store and dwelling house, a brick godown, and substantial out-houses. The sum realised could have hardly represented a third of the original cost of land and buildings.

The Annual Athletic Sports were held on the 24th April, and the afternoon was to have afforded a general holiday, but the pleasure was marred by a soaking downpour of rain, it being the first time, says the *News*, that the Club's gala day has turned out a wet one. Twelve "events" were nevertheless got off.

The steamer *Parana* fell in, on the 26th April, eight miles from the Isumi light-house, with some shipwrecked Japanese, floating on a capsized boat. Two men and a woman were rescued, and one man, quite dead, left behind. From the state they were in they must have been exposed for some time, two of three saved showing symptoms of insanity, and all being too weak to move.

CHINA.

—o—

SHANGHAI.

The present mail brings advices from this port to the 16th May; the French mail from London, March 26, was received on the 10th May, and the following P. and O. mail of April 2 arrived out on the 14th May. The following summary of news is from the *North China Herald*:—

The Taoutai has issued a proclamation recalling his former order about the "Defence Tax," and has thus made the resemblance to the Tientsin episode complete. The native merchants will resume business forthwith. The Taoutai's attempt to introduce more rigour into the Defence Tax has excited discussion on the whole question of local taxation; and it is urged that, taking Sir Edmund Hornby's late judgment as a standpoint, the Chamber of Commerce should move the Foreign Consuls to oppose the whole mass of illegal squeezes that are now levied in the Settlement. In connection with this question, we reprint a list that was brought to notice by Mr. Hanbury some years ago, of rates levied by the Taoutai on various British manufactures, when delivered from the foreign godowns to Chinese shopkeepers in the Settlement, and which we believe holds very good at the present day:—

			Sh. Tls.
Grey Shirtings, per bale of	50	pieces	2.31
White, „ per case of	50	„	2.43
T-Cloths, per bale of	50	„	1.62
Drills, „	30	„	1.72
„ „	15	„	1.05
Fig. Orleans, per case of	50	„	5.75
Camlets, per bale of	10	„	4.14
Long Ells „	20	„	3.00
Medium Cloths,	6	„	2.76
Chintz, per case of	50	„	1.87

A correspondent signing himself "Viator" imagines difficulties in the way of proving the squeezes, and questions whether any real advantage would ensue from their abolition. It seems to us that he answers his own question. He asks us to inform him how the Chamber of Commerce and foreign merchants are to collect facts about local squeezes, and proceeds to give a series of those facts in the shape of a tariff of taxation. We are not at all surprised to learn that no shopkeeper would venture to give evidence in a Court of Inquiry, as a witness, against the existing squeezes. But neither is it necessary that he should do so. If the Chamber of Commerce can satisfy themselves by private inquiry—as "Viator" has done, and as we have done—that the tariff he gives represents approximately a system of local taxation indulged in by the Taoutai, it will be sufficient for them to state the fact with the weight of their authority to the foreign Consuls. The Consuls would, we presume, feel justified in conveying that representation to the Taoutai, with an expression of opinion that to levy such taxes in Shanghai is illegal. The Taoutai will then be committed to one of two courses. Either he must deny the existence of the taxes, in which case every Chinese tax-gatherer found in the settlement can be arrested as a thief, or he must admit and strive to defend the legality of the taxes—which he will find it exceedingly difficult to do. If there is no object in reducing taxation, that is another matter; it is almost surprising, in that case, that so much outcry is made about the imposition of barrier dues in excess of the stipulated transit dues. But we hardly think foreign merchants will agree with "Viator's" conclusion in that respect. It may be that the abolition of the tax would not enable the merchant to sell his goods higher, but it would cheapen them to the consumer; and that is generally held to be an advantage, with a view to extension of trade. We cannot see why taxation of any kind, beyond the stipulated import duty on goods sold within the limits of the port, should not be rigidly opposed and prevented.

It has been found necessary to postpone the ratepayers' meeting, which now stands fixed for May 18. The postponement was necessitated by various causes—1st, the report had not been circulated; 2nd, the revised land regulations are not even yet ready for circulation, and the ratepayers must certainly have some days to consider these before they are asked to vote them. But the ordinary meeting might have been quite well held on the 11th, and discussion on the land regulations postponed if the report had been printed in time. Then a rather startling proposition was, we hear, received at the last moment from the General Hospital trustees. They propose asking the ratepayers to sanction the issue of debentures for Tls. 35,000 to build a hospital on the new site which they have bought for some Tls. 13,000 in Hongkew. The Council have, we understand, very rightly declined to bring forward the proposal officially, and we suspect the ratepayers will think the case is hardly one for the Municipality to take up—at any rate on its present basis. The trustees offer to pledge the property and income of the hospital as security; but these would be rather a white elephant, if it should not prove remunerative. The Municipality would be then placed in the unpleasant dilemma of having to close the institution, or work it themselves at a loss. The only measures, so far as we hear, that the Council purpose bringing forward are a water scheme, a resolution to enable the Council to assess unassessed property, and to hear and decide appeals in such cases, and a resolution regarding W. H. Fogg's Land Tax. The circumstances of this case, as brought out in the late trial at the U.S. Consulate, will be fresh in the recollection of our readers. It will be for the ratepayers to decide whether the abatement claimed shall be allowed.

The Taoutai has assented to Mr. Medhurst's proposition that a joint investigation should be held into the circumstances of the Quinsan riot, and the two prisonors have been handed over to the City authorities. The Tipao of the village has been ordered down, and on his arrival the case will be tried.

It is officially notified that a wrought-iron screw-pile Lighthouse will shortly be erected near the Lismore wreck, on the port side of the channel, at the entrance to the Woosung River. The work has been undertaken by Messrs. Farnham and Co., and we understand that the *Kwa-shing*, towing their pile-driver, started yesterday morning for Woosung, with the Engineer-in-Chief and Mr. Blethen on board. After the erection of a temporary stage close to the Lismore wreck the work of erecting the wrought iron screw-pile tower will be proceeded with. The illuminating apparatus will be *fixed* Dioptric, of the Sixth Order, showing a *red* light visible all round, and this will involve an alteration in the Woosung Light. On the exhibition of the above wreck light, the *red* sector of light now shown on the port side of the channel from the Woosung Lighthouse will be replaced by a white one, but no other change will be made.

A Flower Show has been often talked about in Shanghai, but one has never yet been held. The first exhibition of the kind is to be held on the 24th and 25th May, in the British Consulate Compound. It is hoped that the contributors of specimens of flowers, fruits, and vegetables will be numerous, so as to make the show a successful one, and give encouragement in future years.

The National Bank of India has opened a branch at Shanghai, at the premises on the Bund formerly occupied by the Deutsche Bank.

The steamer *Conquest*, while on her way down the Peiho river on the 4th May, bound to Nagasaki, *via* Chefoo, met with an accident to her machinery. Endeavours were made to proceed to Chefoo, but after several attempts she was obliged to return to Taku, where she will be detained until the damaged portion of the machinery can be repaired at this port and forwarded to Taku.

Messrs. Crofts and Sewjee have held their usual sale of racing ponies and griffins at the Horse Bazaar. There was a good attendance of buyers, and some fair prices were realised, but in several instances the animals offered, although presenting attractive points, were knocked out at a low figure.

We take pleasure in noticing a new publication in Chinese, of which the first number is just at hand. It is a neatly got up illustrated sheet called *The Child's Paper—Monthly*. It is difficult to over-estimate the value of work among and for the benefit of children, whom it is far easier to improve than the grown-up Chinese. The utter absence, as we understand, of all such literature among the Chinese gives additional interest to this effort. The publisher expresses a hope that he will be able to illustrate the articles with original engravings, with Chinese costume and

Digitized by Google

surroundings. In the present number there is a specimen of this kind of work which, though inferior, will perhaps be more attractive to a Chinese child than the better executed foreign prints. We wish the enterprise success. The Rev. Mr. Farnham makes himself responsible for it, though it will need the co-operation of all interested to make it a success. It is in an easy classic style, that it may be used in all parts of the Empire, and the child may the more readily get it read to him if unable to read for himself.

We hear that four of the Manila lottery tickets for the May drawing, sold by Messrs. Kelly and Co. in Shanghai, have drawn good prizes. The $15,000 and one $1,000 prizes have been won by foreigners, and a $3,000 and a $500 by Chinese.

The lecture on "Food," delivered by Dr. Jamieson before the Temperance Society, has been printed as a pamphlet, and is for sale at Messrs. Kelly and Co.'s.

The following items of intelligence are taken from the *Celestial Empire*:—

At the meeting of the Shanghai Waterworks Company held on the 10th May at the Offices of Messrs. Little and Co., it was stated by the Chairman that the Company were quite ready to go on with their works; but that he thought they should wait, in view of the statement that a water scheme was to be brought forward by the Municipal Council, until they saw what scheme would be supported by that body. The meeting was accordingly adjourned until after the Ratepayers, Meeting.

We recently mentioned the case of two of the Che-hsien's runners who had been charged with attempting to extort money from some houses in Smith's-market, and who had been sent by the Mixed Court magistrate to the Che-hsien for examination and punishment. The latter has now investigated the case, and finding the runners guilty, dismissed them from their employment, and ordered them 200 blows each, and to be stationed in the cangue for ten days in front of the houses from which they had tried to obtain the squeeze.

There has been a noisy sacrifice of propitiation lately offered on the space cleared by the late fire in the Maloo, the tenants of each house contributing five dollars, and the sum thus amassed being expended in a quantity of crackers and other detonating nuisances, and in paying for the services of a number of priests. Some of the more prominent votaries were brought up to the Mixed Court, and Chên sent the noisy men to prison for three days.

A negro named John Williams, a seaman on board of the British barque *Corea*, was tried on the 19th April by H.B.M.'s Consul at Newchwang, and sentenced to one year's imprisonment with hard labour, for having stabbed the captain of the ship with a sheath-knife. For several days the wounded man's life was in danger, but he is now progressing favourably.

H.M.S. *Audacious* arrived at Woosung on the 15th May from Hong Kong. The *Modeste* and the *Vigilant* arrived on the 10th May in Hankow, and are expected to leave again on the 17th.

FOOCHOW.

The subjoined items of intelligence from this port are taken from the *Foochow Herald*:—

A sad accident has occurred at the City Arsenal. While proving a smooth-bore muzzle loading gun, cast by native workmen, the gun burst at the breech, causing such fearful injuries to the unfortunate man who was firing, that he expired in a few minutes. One large fragment of the gun struck him in the forehead—smashing in the whole of the fore part of his head. Now that a man has been killed, we understand that, in future, all guns, when being proved, are to be fired electrically on the Woolwich system—under the supervision of Mr. J. A. Betts.

The news from Formosa is somewhat conflicting; but from what we gather, the position of the Imperialists is in no way improved. An irregular kind of warfare prevails; in which the aborigines (who are fighting for bare life) are almost invariably victorious. The recent execution of an Imperialist officer—for rank cowardice in the face of the enemy—may have a salutary effect on the rest; but we are doubtful.

The Arsenal authorities are vainly attempting to dredge the river by means of a wretched little machine, worked by steam, it is true, but utterly worthless for any practical purpose, short of dredging a creek. Pending the arrival of more serviceable machinery, the authorities would, we think, act wisely in saving their coal and labour, as, at present, the game is hardly worth the candle.

A very handsome obelisk of white Sicilian marble has recently been erected in the cemetery, to the memory of our late respected fellow resident Mr. R. P. Williams—whose sudden and lamented death we recorded in August last.

The daily courier service between this place and Amoy was resumed on the 1st May. Letters, &c., are delivered in about 45 hours—at either end.

Mr. Pedder (H.B.M.'s Consul) and family arrived on the 29th April, per *Douglas*.

We understand that H.B.M.'s S. *Kestrel* will leave for Tamsui next week.

HONG KONG.

Our advices by the present mail extend to the 22nd May; the French mail from London April 9 was received on the 16th May. The following items of intelligence are from th *China Mail*:—

At the Criminal Sessions of the Supreme Court Albert Fry Chambers was indicted for obtaining a sum of $42,380 from the Hon. James Whittall by false pretences, The charges, as set forth in the indictment, were as follow:—

1. That the prisoner falsely pretended to Mr. James Whittall that he was entitled to a legacy of £5,000, and another legacy amounting, with accumulated interest, to £4,000, by which he obtained from Mr. Whittall $6,500. 2. That he falsely pretended that he had invested money on mortgage at Shanghai, and that $13,000 would be at his disposal at the end of August, 1872; also that he was entitled to moneys in England, whereby he obtained from Mr. Whittall $6,500. 3. That he falsely pretended that he would receive by mail of 16th September, 1873, a sum of from £1,500 to £2,000, that he had inherited £5,000 under his father's will, and was further entitled to $36,000 as funds of one Newton, which would be available on 25th October, 1873, whereby he obtained from Mr. Whittall the sum of $13,000. 4. That by means of falsely pretending to have received letters from England informing him that he was entitled to sums of £5,000 and £7,000, &c., he obtained from Mr. Whittall the sum of $16,380.

The accused pleaded guilty, and the Attorney-General said he had another information for embezzlement, but as he had pleaded guilty to this indictment he would not proceed with it. The prisoner was then sentenced to three years' penal servitude on the first count; another three years on the second count; and a third term of three years on the third and fourth counts, making in all nine years.

An extraordinary meeting of the Victoria Fire Insurance Company of Hong Kong, Limited, has been held at the Office, Queen's-road. The Chairman, Mr. Andre, said that the meeting had been called by circular addressed to the shareholders, which stated that the business was—"To receive a statement from the Secretaries, and to provide for the future management of the Company." Since the circular had been issued, the directors had received a notice from a number of the shareholders, representing altogether 500 shares, requesting them to call an extraordinary meeting for the purpose of taking into consideration a proposition to voluntarily wind up the Company. The directors had considered the requisition, and a meeting had been called for the 24th May. He therefore begged to propose, "That this meeting be adjourned *sine die*, and that the directors continue to work the office until the extraordinary meeting called for the 24th for the purpose of winding up the Company. The resolution was carried.

The sea robbers in the Canton waters are getting more daring every day. They openly levy black-mail from peaceful traders, and go so far as to send notice to them that if they do not comply with the request, they will be attacked. A junk which plied between Seulam and Canton was threatened in this way the other day, but the master, instead of complying, bought a quantity of ammunition with the money he would have to pay as black-mail, and was determined to make a resistance. We have not heard the result.

A very daring robbery, accompanied by murder, has taken place. The house of a very wealthy man of the literary class in Poonyü district wss attacked by a band of robbers, who numbered over 100. Knowing the great wealth of the family, and the resistance they might receive, the robbers discharged their firearms at random, when they had effected an entrance, in order to frighten those who might be disposed to resist, and mortally wounded the nephew of the master of the house. The robbers succeeded in making a very good haul, having, it is said, made away with property worth not far short of $20,000.

The following account, duly certified, of the average amount of bank notes in circulation in Hong Kong during the month ending 30th April, is published in the *Gazette*:—

Banks.	Average Amount.	Specie in Reserve.
Oriental Bank Corporation ...	$506,728	$250,000
Chartered Mercantile Bank of India, London, and China ...	685,727	230,000
Chartered Bank of India, Australia, and China	398,973	150,000
Hong Kong and Shanghai Banking Corporation	1,672,848	700,000
Total...	$3,264,276	

The Committee of the Victoria Recreation Club deserve much credit for the vigorous manner in which they have pushed on the work at the new Boat-House and Gymnasium. These buildings are now all but finished, and we hope soon to see a few boats safely lodged under cover, in view of the resuscitation of our annual regatta. The old stone erection, known as the Green Wharf, which was swept away in the general wreck of the typhoon, is to be replaced by a pile pier similar to that at Pedder's Wharf; and besides it being an improvement to the appearance of the place, there is a probability of its withstanding any future heavy sea better than the stone pier. A pile breakwater is being formed in front of the sea wall, which will break the force of the sea and possibly ensure the safety of the other buildings.

Digitized by Google

H.M.S. *Thalia* has arrived from Nagasaki, having one case of small-pox on board. She flew the yellow flag at the fore, and shortly after her arrival was shifted to the west end of Stone Cutters' Island, where she still remains in quarantine.

The report of the commission on the blockade, and the answer of the Secretary of State to the memorial have been published. They have excited much discussion.

Mr. Frayling, bandmaster of the 80th Regiment, has been presented with a handsome gold and silver mounted ivory baton, by a number of his well-wishers.

Tenders are invited in the *Gazette* for the construction of roads and drainage improvements on British Kowloong.

The captain of the German barque *Livingston*, which arrived on May 15, was washed overboard and drowned on the passage out.

The *Overland Trade Report* contains the following items of news:—

An extraordinary meeting of the shareholders of the China Traders' Insurance Company was held on the 10th May, at their offices in Queen's-road. The Chairman said that as a wish had been expressed on one hand that the Company should be continued on an independent basis, with a board of directors, secretary, and agencies at the outports, and on the other that the Company should be wound up, he thought that it was only fair they should take the sense of the meeting. A long discussion ensued, and eventually five propositions were submitted to the meeting by the Chairman, to the effect that the Company in future be conducted by a board of directors and secretary; that the accounts hereafter be made up yearly to 30th April, and that the profits (if any) of the past six months be carried to reserve fund; that capital of the Company be replaced by the transfer of $200,000 from the reserve fund; and that any and all dividends which may be received from the estates of Messrs. Augustine Heard and Co. and Messrs. Fearon and Co., and any salvage from outstanding claims, be placed to reserve fund. After some criticism, they were put to the meeting, and passed, with only three dissentients. Some very strong remarks on the conduct of Messrs. Augustine Heard and Co. were read by Mr. Stephens, a shareholder. They were not, however, supported by the meeting.

The Occidental and Oriental Steamship Company announce that the pioneer steamer of their line, the *Oceanic*, will arrive in this port on or about the 27th May, and will leave here for San Francisco on the 7th June. The line is to be worked in co-operation with the Pacific Mail Company, and the agent of the latter has also been appointed acting agent of the former.

The Colonial Government are constructing a road from the landing place at British Kowloon to Yowmahtee, and making other improvements on the mainland.

It is stated that one box of treasure has been recovered from the wreck of the *Japan* by those on board the *Scotland*.

JAVA.

—o—

BATAVIA.

The following summary of Atchin intelligence is taken from the *Batavia Handelsblad* of the 8th May:—

From the Military and Civil Commanding Officer at Atchin a telegram has been received, running as follows:—"25th April,—Enemy's positions at Lohong taken—Loss one man killed and twelve wounded. 18th April,—Flag has been hoisted at Sunghy Raya on East Coast. State of health satisfactory, mortality slight." This is favourable intelligence—the political horizon is becoming clearer and clearer—the smaller petty States are becoming more and more submissive; gradually they will proceed to obey our directions, and the time is at hand to cause ourselves to be represented by an official, who will naturally have to be supported by a small military force. It is to be regretted that General Pel has not sufficient soldiers to enable him to operate more extensively and to take the offensive more vigorously. Although small victories like the above heighten the *morale* of our troops, they do not sufficiently discourage the enemy. To our regret we hear that the barracks constructed on the grassy plain outside the Kraton have been built on the ground without a proper flooring, while all the natives build their houses on posts, whereby the flooring is raised several feet above the soil, whilst the wind can have free play under the dwellings. But putting these by-points aside, we are still thankful for the promising course of matters,—as the close of the war cannot be far off. Not that we too readily believe in a total cessation of resistance, but we do believe in the end of combined resistance. The power of the headmen will become broken, and, as has happened in all Netherlands Indian was, they will die out, or fall into our hands.

The following intelligence is from the *Indier* of the 16th May:—"Since our previous mail summary news has again been received of several advantages gained at Atchin. A telegram from the military and civil officer contains the following communication: May 2—Lamtebu, Setu, and Gichil Oleh-lu taken and occupied. Losses—two killed; wounded, one officer (who died the same evening), ten privates, and three coolies; missing, one trooper. May 6—State of health satisfactory. General Pel is not sitting still, and is approaching Bital more and more closely. He has, however, again asked for reinforcements.

The present condition of the island of Bengkalis, off the Siak coast, is thus sketched in the *Sourabaya Courant*:—

Bengkalis, the recently stationed chief town of the newly established residency on the east coast of Sumatra, is situated on Brouwer's Straits, which form the only large and safe roadstead to be found on the Netherlands side of the Straits of Malacca. The roadstead of Bengkalis, although more capacious, has, as to its safety, much resemblance to Madura Straits, off Sourabaya. But the ships themselves have yet to come. The only vessel that floats upon the wide and smooth watery surface there is a condemned gunboat. Once a month the little steamer *Sunda* brings us letters and news from Europe and Java. Bengkalis itself, considered as the chief town, has not yet much that calls for particular attention. It chiefly consists of a small and miserable settlement of Chinese who live by petty trading, and often by buying up the so well known *trubuk* roe. Their dwelling-houses consist, in general, of plank huts roofed with attap. All this gives, hence, a very ugly look to the place, as the only brick building is the comptroller's house, in which the Resident is temporarily staying. The remaining houses—very few in number—intended for Europeans are of wood, and are likewise roofed with attap. I cannot understand how it is that an Englishman could, after visiting this place, give in the *Penang Gazette* such a highly coloured account of Bengkalis as being flourishing and busy. Nevertheless, we on the East Coast have a future before us. Deli, situated more to the north, is flourishing, and has, of late, increased amazingly in population, prosperity, and even wealth, by means of the numerous tobacco plantations, which are daily extending, and yielding fair profits. For Bengkalis, also, the door is standing open, a site having been chosen for the so-called new town. Large blocks of land have already been marked out, and are intersected by well made and wide roads. On these will be built the barracks and the officers' houses, &c., for the future garrison. There will also rise up the Residency house and office, and whatever other Government buildings may be required for such a settlement. To the remaining officials and to private persons, an opportunity will be afforded for building houses, provided they have means. Should all this be accomplished, Bengkalis will certainly be no despicable place. Perhaps a still greater future awaits it in consequence of its favourable situation. Should, for instance, cultivation extend along the banks of the Siak river, and should the matter become the highway to the East Coast for the Ombilien coal fields in the interior, Bengkalis will undoubtedly become a colossal coal depot, hereby an active movement of shipping will naturally be called into action.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 29th May; the French mail from London April 23 was received on the 24th May, and the following P. and O. mail of 30th April arrived out on the 29th May. The following summary of news is from the *Straits Times*:—

The principal public events have been connected with the departure of Sir Andrew and Lady Clarke for Calcutta. They were entertained on the 20th May by the Maharajah of Johore at a grand banquet, to which all the leading residents of Singapore were invited. Many of the party remained till late next day, when Lady Clarke christened the first locomotive on the Maharajah's railway, which is being rapidly pushed forward—the engine being named after herself. Previous to Sir Andrew Clarke's departure an address was presented by the Chamber of Commerce, thanking him for the attention he had paid to the interests of trade and the deference he had shown for the opinions of the Chamber in all questions affecting commercial interests; and an hour before his embarkation a large deputation of Chinese residents presented him with an elegant address in Chinese, signed by all the leading Chinese residents in the three Settlements.

Sir Andrew and Lady Clarke left for Calcutta in the steamer *China* on the 26th May, and notwithstanding a heavy down-pour of rain, there was a goodly attendance at Johnston's Pier to witness the embarkation. Sir William Jervois, Maharajah of Johore, all the military and civil officers, and many of the residents, were present, and a great many ladies braved the weather to show their respect and esteem for the departing Governor. The covered portion of the pier was handsomely draped with flags and evergreens, and Messrs. A. L. Johnston and Co.'s verandah, which was filled with spectators, was decorated with flags. A guard of honour of the 1-10th was in attendance, but after getting thoroughly drenched they were withdrawn. Sir Andrew and Lady Clarke arrived somewhat late, having been detained doubtless by the heavy rain, and after a great many leave-takings, stepped on board the steam launch belonging to the P. and O. Co., which was placed at their disposal by the Agent of the Company. Three hearty cheers were given for Sir Andrew Clarke, and three more for Lady Clarke, after which the launch moved rapidly off towards the steamer, which lay far out in the roadstead; the company stood watching her for a long way out, straining their eyes to catch a last glimpse, and many would not leave their positions until the ensign, hoisted at the steamer's foremast, signalled their arrival on board.

Digitized by Google

A few days since a policeman on duty in Campong Glam, Beach-road, saw a Chinaman trying to pull two Annamite women into a house; the women, resisting, managed to drag the Chinaman into the street, when the constable arrested all three and took them to the police-station. Inspector Richardson made inquiries, when the women declared they had been kidnapped from a place in Cochin China, and brought to Singapore against their will, together with another Cochin Chinaman, and they (the women) were sold to the master of the house in Beach-road, The circumstances were reported to the Inspector-General of Police, and the Chinaman who imported and sold the women, together with the keeper of the house, were charged before Captain Douglas, Magistrate of Police, under several sections of the Penal Code, and committed for trial at the next Assizss.

The stone beacon which marked the Sultan Shoal,—a large coral bank in the way of steamers entering and leaving by way of New Harbour,—was completely destroyed by lightning a few days ago, and will have to be replaced by a temporary one. This beacon was a prominent guide to the channel, and captains of incoming steamers from the westward should take especial note of the fact of its demolition.

Major-General Colborne, Commander-in-Chief of Her Majesty's troops on the China station, arrived here from Hong t ong by the present mail to inspect the troops, barracks, &c., in he Straits. He is accompanied by Lieutenant-Colonel Hall, R.A., who has come down to inspect the Artillery here.

Her Majesty's birthday, the 24th May, was observed as a holiday by the Banks, and the flagstaffs were decorated with flags and a Royal Salute fired from Fort Canning at noon. The Government, however, observed the 28th as a holiday in honour of the occasion.

A convention has been entered into between the Queensland Government and this colony by which the postage to Australia, Tasmania, and New Zealand, *via* Torres Straits, has been reduced by just one-half, letters now costing only 6d., and newspapers a penny each. This must have the effect of attracting the greater part of the postal matter from the Straits, China, and Manila, to this route.

The prima donna, Signora Maria Palmieri, assisted by Signor Tito Palmieri and Signorina Alice Persiani, will visit Singapore in a few days on her way to China and Japan, and intends giving two concerts here. She has been giving very successful concerts in Australia, and is at present in Java.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—The market had been at a complete standstill. Yarns and Shirtings were difficult of sale, and all kinds of Woollens, with exception of Mousselines, were neglected. Large arrivals had further depressed the market for manufactured Iron: quotations were nominal, and tended downwards, more especially for assorted Nail-rods.

HIOGA-OSAKA.—The position of the market, as regards quotations and deliveries, had varied but little. Cottons. Yarns:—Large arrivals at Yokohama had caused rates to decline. Grey Shirtings: The limited business of the month had again been confined exclusively to 7 lbs. goods. Prices showed no improvement. Chintz: A steady demand was reported for Assorted at low rates. Turkey Reds were saleable, but former quotations were barely maintained. Victoria Lawns showed a slightly better feeling at the close. Holders of Black Velvets generally declined the low rates offered. Worsteds and Woollens: Black Lastings had improved a little. Plain Orleans maintained their value, and a somewhat larger proportion of Assorted Colours had been taken. Mousselines de Laine were less in request owing to the season.

TIENTSIN.—Common T-Cloths active; best not wanted. English Drills and Sheetings in good demand. 7 lbs. and 8¼ lbs. Grey Shirtings, quiet.

CHEFOO.—Messrs. Wilson, Cornabè and Co.'s Circular says:—Business generally has been rather inactive. Cotton Goods: Grey Shirtings have been in but little demand, but for T-Cloths, Mexican chops, we have had a good inquiry. White Shirtings have been neglected, while Drills have been saleable in small lots. Turkey Red Cambrics have been in good inquiry, but for other Fancy Goods we have had no demand. Woollen Goods have been neglected. Metals: Iron is unsaleable with heavy stocks in the place. Lead can be sold in small lots.

HANKOW.—Sales of Cottons had been almost entirely confined to Grey Shirtings and 7 lbs. T-Cloths. The best 8¼ lbs. (Eagle Chop) had been sold at Tls. 1.9.9; 7 lbs. ordinary T-Cloths were quoted Tls. 1.1.5 to 1.3.0 Woollens showed some improvement.

CHINKIANG.—Messrs. Spencer and Wolff write:—There is little or no change to report in our market for Piece Goods. Small lots are moved off daily at quotations, but if any attempt were made to press sales, lower prices would have to be accepted.

SHANGHAI.—The Chamber of Commerce Circular says:—Since the last mail left, the amount of business done in Cottons has not been large, but, except for Grey Shirtings, prices on the whole have been maintained at about former figures, and in some instances an advance is quoted. 7lb. Grey Shirtings are in small request, and prices rather lower. 8¼lb. Grey Shirtings: Auction sales of common goods have taken place at 2 cands. decline. Good makes are unaltered, with little inquiry. Heavy Shirtings: 9lb. are quoted rather lower; 9.12 are in moderate request at unchanged rates. White Shirtings: 56 to 64 reed, no inquiry; 66 reed, small sales at about previous prices; 72 to 80 reed continue in fair request, and stocks being small, buyers have had to pay a further advance. American Drills, Jeans, and Sheetings: The only sale reported is 1,500 pieces Drills. English Drills: 14lb. are in active demand at 2 to 3 cands. advance; 15lb. not so generally wanted. English Jeans: No inquiry. English Sheetings: In small stock, prices higher. Dutch Drills have advanced 2 to 3 cands., stock reduced. T-Cloths: 6lb. and 7lb. common makes are in good demand at firm prices. For the best qualities the market is unchanged, these being in less demand. Coloured Cottons unchanged in price and quiet. Common Velveteens are firmer. Woollens.—Spanish Stripes are unaltered in value. English Camlets have been sold by auction at a decline of 5 cands., and the market is weak in consequence. For Long Ells there is good inquiry at previous rates. Crape Lastings and Figured Orleans of common quality are lower.

FOOCHOW.—Sales had been: Grey Shirtings, 8¼ lbs., 1,000 pieces at $2.70 to $2.82 per piece; T-Cloths, 72 lbs., 500 pieces at $1.85 per piece; Lead, 550 pigs at $8.50 to $9.00 per picul.

HONG KONG.—The arrivals during the interval, besides mail steamers, had been the s. s. Antenor, with part of Ulysses cargo, Galatea (German), Agamemnon, Craigforth, Horriang, and Africa, bringing full supplies of Manufactured Goods for this market and the north. With the exception of Yarns, for which there has been an active inquiry, the business of the fortnight had been limited to the bare necessities of the hour, and as the Shanghai advices had been more encouraging for importers, the bulk of the recent arrivals had been sent on to the North; by this means stocks had been kept within moderate compass; holders were firm in their demands, and the market closed steady at, in some cases, a slight advance upon previous quotations.

CANTON.—Fair sales of Lead had been made at $8.25 to $8.35 for ordinary brands, and $8.35 to $8.40 for W.B., at which rates 2,000 piculs of the former, and 800 piculs of the latter quality had changed hands, leaving 700 piculs L.B. in stock. No transactions in Quicksilver had been reported, but the metal was quoted at $130 to $132 per picul.

BANGKOK.—Mexican T-Cloths were much wanted at Tic. 3¼ per piece, and none had come forward for a long time. Yarns also continued in demand, but supplies were sufficient, and the price had been lowered slightly to induce larger purchases.

SINGAPORE.—Messrs. Boustead and Co. write as follows:—The arrivals with general cargoes are the steamers Glenlyon and Oxfordshire from London, Achilles from Liverpool, and Brema, brig, from Hamburg. The Piece Goods market has continued quiet during the past fortnight, but without further decline in price, the Manchester advices having become rather more favourable. Accounts from the outports are generally unsatisfactory, and dealers buy very sparingly.

PENANG.—The market had remained excessively quiet, and business during the fortnight had been of a retail nature only. Prices remained without any improvement.

EXPORTS.

TEA.

YOKOHAMA.—Arrivals of new leaf had come forward freely and had met with very general enquiry, the prices asked being considered reasonable: settlements in the interval amounted to 4,000 piculs, making a total of 5,000 piculs since the opening. Prices had ruled rather irregularly, the market having been governed daily by the extent of supplies, and the anxiety or otherwise showu by buyers. The barques Mora and Stillman B Allen were advertised as on the berth for New York, but the rates of freight were not yet fixed Quotations:—$36 to $37; fine, $39 to $41 per picul; finest, $43 to $46.

HIOGO-OSAKA.—The market for New Teas was opened on the 10th May at $45 to $47. Few buyers, however, seeming disposed to operate freely at these prices, and advices of low rates arriving from Yokohama, the market fell about $3 perpicul, and this decline had been maintained. Supplies were coming forward freely, and the crop appeared of good quality. Settlements to the 17th May inclusive amounted to about 1,600 piculs.

HANKOW.—Messrs, Olyphant's circular says:—The first musters of the new Teas were shown on the 13th May, representing twenty-five chops from Ningchow, six chops from Yang Low Toong, two chops from Nep-car-lee, one chop from Ko-Chao, and one chop from Low Yang. The market was opened by the settlement of the last-mentioned chop at Tls. 26 per picul, followed by the purchases all the Yang Low Toongs at Tls. 29 to 30, one chop of Nep-car-lee at Tls. 23½, one chop of Ko-Chao at Tls. 25.8.0, and four chops of Ningchow at Tls. 40 to 48. The prices paid for the Yang Low Toong are much on a par with the figures of last season. The settlements of the other classes are so small that we defer making any comparison. The quality of the Tea from the Hankow districts appears to be satisfactory, so far as can be judged from the musters that have been received. The steamers Fleurs Castle and Lotus have been advertised to load for London at £5 10s. per ton; the Hankow is also on the berth for that destination, and the Glenartney, Glenfalloch, and Bengal are daily expected.

AMOY AND TAMSUI.—Formosa Ooloongs: From Tamsui advices to the 19th May state that the new leaf was arriving very slowly, only some 200 or 300 bags having come down from the country, and these had not been generally shown, so that no positive estimate could be formed as to the quality of the new crop. From the quantity received, however, some 60 half-chests had been hurriedly prepared and forwarded to Hong Kong, for shipment to New York, per City of Tokio, the price for which would be settled when the market opens. In the course of a week or two, Teas were expected to arrive rather freely, but at present foreigners ideas had not come up to what the new leaf is said to have cost in the country.

KIUKIANG.—The market for new Black Teas was opened at this port on the 9th May, and up to the 13th 7,776 half-chests had been settled, consisting of Ningchow at Tls. 438 to 50 per picul, and Kiukiang packed Tea at Tls. 38 to 40¼. These prices for Ningchow description were considered higher than the opening figures of last season, while the quality was regarded as inferior to that of last year.

Digitized by Google

SHANGHAI.—No business had been done.

FOOCHOW.—Messrs. Olyphant and Co.'s Circular says:—From the farthest districts as Kaisow, Sinchune, Soo Moo, &c., the reports to hand since we wrote last are not very definite, but it is understood that natives are paying in most cases a similar advance to that established in the lower districts for the new leaf, or say about two taels on an average. A week since the first shipment of new season's contract Paklings (about 1,000 boxes) was made, and the steamer leaving to-day is taking about 14,500 boxes and 50 half-chests more. Teamen have shown a few musters of Paklings on the market already, and their quality appears to be about on a par with similar early musters last season, though a definite judgment cannot be given till the offerings of this class are larger. Country kinds are beginning to come in to Foochow, a few small parcels from the neighbouring Hoke Oan district being already stored in the city we hear. It seems likely, therefore, that we shall see the musters put forth about the same time as last season. Till musters have been seen we cannot of course say more of the quality of the crop than that the natives consider it should turn out about equal to that of 1874 to 1875.

CANTON.—Messrs. Deacon and Co.'s Report says:—During the past fortnight a fair business has been passing in Tea, and as anticipated in last report, Teamen have had to submit to reduced rates, especially for Scented Capers. Scenting flower has not been very abundant, and high prices have had to be paid, so that sellers of Scented Teas have in many cases arranged for an extended time of delivery, in the hopes of cheaper flowers, and immediate shipments are in consequence curtailed. Congous: The settlements reported have generally shown better value than previous fortnight, and the stock is now reduced. At Macao, the the supply of first crop is about exhausted: and pending arrival of second crop, which is reported to be of good quality, but to be costing rather high, business will be limited. Scented tea: For Capers, holders have had to accept a reduction of Tls. 2 to 3 on rates quoted last mail, and as many of the musters show a marked improvement in the scenting, the intrinsic difference in value is even more than that in favor of buyers; we quote fair to medium Tls. 20 to 23, good medium to fine Tls. 24 to 26, and a few fancy parcels have been taken at Tls. 27 to 30 per picul. Orange Pekoes, though in some instances a reduction has been conceded, cannot be generally quoted cheaper: the long leaf sorts are especially wanting in attraction, and with a small supply laying in at high cost, Teamen are not anxious to realize; medium to good medium have been settled at Tls. 22 to 27, and small lots of fine to finest up to Tls. 31 per picul; in "new-make" sorts no transactions have been reported. The fortnight's business is summarised as follows:—Congou, 2,600 boxes at Tls 12½ to 24½ per picul. Scented Caper, 25,000 boxes at Tls. 20 to 30 per picul; Scented Orange Pekoe, 6,300 boxes at Tls. 22 to 30 per picul.

SILK.

YOKOHAMA.—There had been a very quiet market, and transactions had been of small importance. Owing to the close approach of the new crop, dealers were less firm in their demands, though there had been actually no change in quotations. Arrivals were on a par with settlements. Settlements, from 1st July to date, 11,400 bales; against corresponding period—season, 1873-4, 14,350; 1872-3, 13,950; 1871-2, 14,300 Stock, 500 bales.

SHANGHAI.—The business of the fortnight had been trifling, and confined to Re-reels, with a few common Tsatlees. The shipments for the season showed an increase of 15,000 bales from the previous year. Of the new crop, nothing was known definitely. Leaves were abundant and cheap, and it was expected that supplies will again show an increase. Settlements for the fortnight, Chinas, 450 bales. Total settlements since 1st June, 1874, 72,150 bales; against 1873-74, 57,400 bales; 1872-73, 56,250 bales. Comparative unsold Stock on this market, on the 15th May, 1875, 150 bales; 1874, 250 bales; 1873, 100 bales.

CANTON.—About 50 bales New Silk had arrived on this market, but no settlements were reported to have taken place. $330 per picul, or 12s. 3d. per lb. was asked in the country for Kowkong No. 4 Tsatlee. The quality of the new crop was decidedly fair, and an improvement on the corresponding yield last season, and as the weather had been dry, less than the ordinary amount of moisture in the thread was looked for. Before departure of next French mail several hundred bales would be in stock, and doubtless some shipments will be made by that opportunity; $320 to $325 per picul was talked of as probable opening price for No. 4 quality. Parsees were said to have purchased 60 piculs (chiefly old Silk) for shipment to India.

ARRIVAL OF NEW SEASON'S TEAS.

We notice the arrival in London to-day of the steamer *Glenartney*, from Hankow, with the first of the new season teas. She has accomplished the run from Woosung in 44 days, including all stoppages. It will be remembered that this vessel was the first to arrive with the new season teas of last year. Small sales have been made at 1s. 8d. to 1s. 11d., and one parcel at 2s. 5d.

CARGOES OF NEW SEASON'S TEA AFLOAT.

TELEGRAMS FROM THE FAR EAST.

BURMAH.

ALLAHABAD, JUNE 30.—The *Pioneer* of to-day states, in contradiction to former announcements, that the latest news from Burmah is unsatisfactory, the King having refused to allow the passage of British troops through his territory. It is believed that this condition will be insisted upon.

RANGOON, JUNE 30.—Sir Douglas Forsyth and the members of the Burmah mission arrived here this afternoon.

CALCUTTA, JULY 1.—The news that the King of Burmah refuses to allow the passage of British troops through his territory is officially confirmed.

SIMLA, JULY 2.—Official despatches received here announce that the King of Burmah has refused to allow British troops to pass through his territory in case of need. The Indian Government is now in communication with the India-office relative to the action which the King's determination may render necessary.

RANGOON, JULY 2.—Sir Douglas Forsyth left for Calcutta to-day, and will proceed hence to Simla immediately.

THE WAR IN ATCHIN.

THE HAGUE, JUNE 28.—Intelligence from Atchin, dated June 22, says there is no change in the health of the troops. The mortality is not great, and cholera has almost disappeared. Good water has been obtained from artesian wells.

CHINESE LEGATIONS AND CONSULATES.

SHANGHAI, JUNE 27.—China is preparing to establish Legations and Consulates abroad. Ninety Chinese officials are already selected. The Governor-General at Hankow, brother of Li Hung Chang, is ordered to go to Yunnan as Special Commissioner.

THE MAILS.

PRESENT INWARD MAIL.—BRINDISI, JULY 1.—The P. and O. Company's steamer Avoca, with the homeward India, China, and Australian mail, arrived at 1 P.M., and the mail left at 2 P.M. for London

HEAVY PORTION OF PRESENT INWARD MAIL.—PORT SAID, June 28.—The P. and O. Company's steamer Mongolia, with the India, China, and Australia (heavy) mails, sailed for Southampton, at 5 P.M. to-day, where she may be looked for about the 11th July.—Specie, £543,868.

NEXT INWARD MAIL.—SUEZ, JUNE 29.—The Messageries Maritimes steamer Anadyr, with the inward French mails from China and Japan, left here to-day for Port Said and Marseilles, at which latter port she may be expected on the 7th July.

HEAVY PORTION OF LAST INWARD P. AND O. MAIL.—SOUTHAMPTON, JUNE 28.—The P. and O. Company's steamer Thibet, from Calcutta, *via* the Suez Canal, arrived this morning, bringing the heavy India and China mails, 91 passengers, £508 and $760,230 in specie, and 21,733 packages of cargo.

INWARD MAIL DUE JULY 26.—GALLE, JUNE 27.—The Messageries Maritimes Company's steamer Djemnah, with the inward French mails from China and Japan, left here to-day for Aden. She has on board 69 passengers, and, besides her cargo for Marseilles, 900 bales of silk, 24,730 packages of tea, and specie value £58,000 for London.

OUTWARD MAIL OF JUNE 4.—GALLE, JUNE 27.—The Messageries Maritime steamer Irouaddy, from Marseilles 6th inst., left here to-day for Singapore.

Shipping Intelligence.

ARRIVALS.

At YOKOHAMA.—From London, May 10, Annie Braginton ; 18, Calabar (str.) ; 13, from Cardiff, Florentin ; June 29, Abana.

At SHANGHAI.—None.

At FOOCHOW.—None.

At HONG KONG and CANTON.—From London, May 20, Africa (str.) ; from Cardiff, 15, Livingstone ; from New York, 16, Sumatra.

At BATAVIA.—From Liverpool, June 26, Argo (str.).

At SINGAPORE.—From Liverpool, May 22, Achilles (str.) ; 27, Bolton ; from Sunderland, —, Hylton Castle ; from New York, —, Olustee.

At PENANG.—From Liverpool, May 19, Achilles (str.); from London, &c., June 28, Argyll (str.).

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—None.

From FOOCHOW.—For London, June 21, City of Baltimore (str.).

From HONG KONG and CANTON.—For San Francisco, May 19, Avonmore.

From BATAVIA.—None.

From SINGAPORE.—None.

From PENANG.—For London, May 16, Pauline ; 22, Brisbane ; 24, Nestor (str.).

VESSELS LOADING.

At YOKOHAMA.—For New York, Stillman B. Allen, Mora.

At SHANGHAI.—For New York, Grasmere.

At HONG KONG and CANTON.—For London, Denbighshire ; for New York, Pyrmont.

At SINGAPORE.—For London, Hylton Castle, Boldon ; for Liverpool, Tecumseh ; for Marseilles, Luigi C.; for New York, Olustee ; for Boston, N. Boynton.

At PENANG.—For London, Glenisla, Cotherstone.

FREIGHTS AND CHARTERS.

From YOKOHAMA.—To London, by steamer, silk, $4.50 per bale; tea, £4 15s. per ton of 40 cubic feet.

From HANKOW.—To London, per steamer, £4 5s. per ton of 40 cubic feet.

From SHANGHAI.—To New York, £3 per 40 feet.

From HONG KONG and CANTON.—To London, per steamer, £4 5s. per 40 feet ; sailing vessel, £3 per 50 feet ; to New York, sailing vessel, £2 15s. per 40 cubic feet.

From SINGAPORE.—The rate per steamer to London as last quoted ; by sailing vessel, £3 for dead weight, £3 10s. to £4 for light freight ; to New York, £2 15s. for dead weight, £3 10s. light freight.

From PENANG.—To London, per steamer, tin £2, per 40 feet.

COMMERCIAL POSTSCRIPT.

We have received a circular from Messrs. Arles Dufour and Co., Lyons, stating that their firm has been formed into a company, with a capital of 6,000,000 francs.

At the meeting of the China Traders' Insurance Company (referred to under our Hong Kong news) Mr. Stephens stated to the shareholders that a short time before Mr. Albert Heard left the colony he either took away or remitted home $50,000. We are requested by Messrs. Fearon and Co. to say that this statement is entirely without foundation.

It is reported the operations in the Foochow Tea market have been suspended.

Messrs. Head, Wrightson, and Co., of Stockton-on-Tees, are to construct for the Japanese Government two blast furnaces, to be erected at the Heygori Iron Mines, in the north of Japan. Mr. David Forbes, F.R.S., is acting on the part of the Government. They are to be 57 feet high, and will be fitted with all the most modern appliances in this branch of engineering.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—June 30, at Falmouth, from Rangoon, Margaret T. Weir ; from Java, for Amsterdam, Bali ; July 1, at London, from Colombo, Imbro (str.) ; at Falmouth, from Rangoon, Juanpore, Richard ; at London, from Rangoon, Burmese (str.) ; June 30 ; at Havre, from Reunion, Havre ; at Hamburg, from Rangoon, Hansen ; 21, at Portland, O., from Hong Kong, Garibaldi ; July 1, at Nieuwe Diep, from Batavia Madura (str.).

DEPARTURES.—June 30, from London, for Hong Kong, Coldstream ; 28, from Amsterdam, for Batavia, Ocean, Gebroeders ; July 1, from Penarth, for Singapore, Primo, Lucayas ; from Antwerp, for Java, Ottolina ; 2, from London, for China and Japan, Naples (str.); 1, from Glasgow, for Manila, Olano ; 3, from Cardiff, for Galle, Lady Belelau.

LAID ON.—At London, for Yokohama, Ullock.

MISCELLANEOUS.—Gibraltar, June 30.—Passed, Conrad (str.), from Batavia, for Nieuwe Diep. Malta, July 1.—Passed, Glenearn (str.), from Hankow, for London ; 2, Fleurs Castle (str.), from Hankow, for London. Suez, June 29.—Arrived, Holland, from Nieuwe Diep, and left for Batavia. St. Helena.—Arrived, June 2, Henriette, from Sourabay, for Marseilles ; 3, Peter Adolph, from Banjoewangie, for Amsterdam ; Hellinside, from Maulmain ; 5, Yanikale, from Sourabaya, both for Falmouth ; 8, Bolton Abbey, from Rangoon, for Queenstown ; 9, Deutschland, from Rangoon, for Bremen ; 10, Carlisle, from Rangoon, for Liverpool ; Cornelia, from Passaroeang, for Amsterdam. Passed.—June 3, Guiseppina P., from Rangoon, for Liverpool ; 9, Eurynome, from Akyab ; Oswingo, from Rangoon, both for Liverpool ; March 26, passed, Schiehallion, from Maulmain, for Falmouth; Lady Rowena, from Bassein, for Liverpool ; 28, Deogaum, from Nagasaki, for London ; June 2, Eagle, from Bassein, for Falmouth ; 4, Albert William, from Rangoon, for Falmouth ; Howie, from Bassein, for Liverpool ; 5, Geerdina Wilhelmina, from Macassar, for New York ; P. J. K. B., from Batavia, for Amsterdam ; Virginia, from Akyab, for Falmouth ; 11, John Ritson, from Maulmein, for Falmouth ; Acadian, from Bassein, for Amsterdam ; 12, Valentine, from Bangkok, for Marseilles ; 13, Fearnought, from Rangoon, for Liverpool ; 14, Envoy, from Manila, for London. Aden.—Passed, June 28, Sumatra, from Batavia, for Nieuwe Diep.

CASUALTIES.—On the 1st inst., while on her trial trip, the Pau Tah (str.), recently launched from the yard of Messrs. Denny Brothers, Dumbarton, for the China Merchants' Steam Shipping Company, struck on Romnath Patch ; shortly after striking there were eight feet of water in the main compartment ; the fore part, engine-room, and after hold remained tight ; the pumps were set to work, and with the aid of two powerful tugs she was floated and beached at Helensburgh, and during the night pumped dry ; at the time of the accident she had on board 1,000 tons dead weight ; but for the vessel striking the trial would have been most satisfactory, she making an average of 11·620 knots ; the coals are being discharged and she is expected to dock at Greenock in a few days. St. Helena, June 11.—The Henriette, from Sourabaya, for Marseilles, which arrived here June 2, reports that her foretopmast was carried away at the cap by the heavy rolling of the vessel on April 15.

LAUNCH.—On the 29th ult. there was launched from the building-yard of Messrs. J. T. Caird and Co. an iron screw steamer of 1,249 tons B.M., and 220-horse power, built for the Netherlands Steam Navigation Company of Batavia. The vessel was named the Bromo, by Miss Saunders, and is the fifth steamer built by Messrs. Caird for the Netherlands Company. The Bromo will be employed in the goods and passenger trade between Java and Sumatra.

AT a meeting of the Committee of the Aborigines Protection Society, held at Canada-building, Westminster, on Wednesday last, Mr. S. GURNEY, president of the society, in the chair, it was moved by Sir CHARLES WINGFIELD, K.C.S.I., seconded by Mr. R. N. FOWLER, late M.P. for Falmouth, and resolved unanimously, "That in rejoicing "at the extinction of the Macao slave trade, and in anticipating ultimate deliverance for the enslaved population "of Cuba—whether African or Chinese—we desire to record our grateful thanks to Sir JOHN SMALE, Chief Justice of Hong Kong ; to the editors of the *China Mail*, and "of the *North China Daily News;* to Mr. DE SOUZA, of Hong "Kong, for the valuable services they have rendered to "the cause of humanity in connection with the abolition "of the traffic in human beings between Macao and Peru. "The Committee also desire to add an expression of their "sense of the able and undeviating support which in this "country the editors of the *London and China Telegraph* and "of the *London and China Express* have given to the same "good cause."

THE post of Governor of Labuan and Consul-General in Borneo, vacant by the transfer of Sir HENRY BULWER to Natal, has been offered to Mr. USSHER, at present Lieutenant-Governor of Tobago. His services are as follows :—

Herbert Taylor Ussher, C. M. G. (1872), entered temporary service of Foreign-office in Feb. 1855, served on the commissariat-staff throughout the greater portion of the Crimean war (Turkish and Crimean medal and clasp), and subsequently for eight years in West Africa, during which period he held many offices of trust in the Colonial service, including that of acting Colonial Secretary and Judicial Assessor at Lagos for a lengthened period ; appointed collector of Customs at the Gold Coast, 25th Sept. 1866 ; administered that government from the 8th Feb. to July, 1867, when he was appointed administrator of the Government ; lieutenant-governor, Tobago, Sept. 1872.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

DE RYKE—On the 17th May, at No. 17, Concession, Osaka, the wife of Johs. de Ryke, engineer of public works, of a son.

DUNCAN—On the 21st May, at Hong Kong, Mrs. R. Duncan, of twin sons.

FOREST—On the 10th May, at Hong Kong, the wife of Charles L. de la Forest, of a daughter.

HOWARD—On the 11th May, at West Point, Hong Kong, the wife of Thomas Howard, of a son.

JANSEN—On the 10th May, at Shanghai, the wife of D. C. Jansen, of a daughter.

MACARTHUR—On the 28th May, at Singapore, the wife of James Ramsay Mac Arthur, of a daughter.

MARTIN—On the 27th May, at Burnbank, Singapore, the wife of Alex. M. Martin, of a daughter.

PAUNCEFOTE—On the 30th June, at Richmond, Surrey, Lady Pauncefote, of a daughter.

PLUNKETT—On the 25th April, at the British Legation, Yedo, the Hon. Mrs. Francis Plunkett, of a daughter.

READ—On the 28th June, at No. 5, Clydesdale-road, Westbourne-park, the wife of W. H. Read, of a son.

MARRIAGES.

CRAIGIE-HELKETT—BRODIE.—On the 1st July, at West Coates Church, Edinburgh, by the Rev. George Sprott, B.A., assisted by the Rev. R. G. Forrest, M.A., William George Craigie-Halkett, Lieut. and Adjutant 30th Punjab Native Infantry, eldest surviving son of the late Major-General Craigie-Halkett (Bengal Army), of Ravelrigg, to Jessie Spottiswoode, eldest daughter of the late A. Oswald Brodie, of the Ceylon Civil Service.

DEETJEN—FINKE—On the 26th June, at Vegesack, near Bremen, Albert Eduard Deetjen, of Hong Kong and Bremen, to Marie Wilhelmine Finke, youngest daughter of Joh. G. W. Finke, of Bremen and Vegesack.

DEATHS.

CLARK—On the 11th May, at Yedo, James L. Clark.

DICK—On the 26th June, at London, Frederick Mylius Dick, Member of the Legislative Council of Mauritius, in his 58th year.

GROBIEN—On the 19th May, at Hong Kong, Erwin, infant son of F. Grobien, aged five months.

NORONHA—On the 8th May, at his residence, No. 70, Yokohama, D. L. Noronha.

SCHMID—On the 30th April, at Odawara, Japan, Karl Edward Schmid, of H.M.'s Consular Service, aged 46 years.

Miscellaneous.

THE DEFENCE OF HONG KONG.

"Vigilans" writes to the *Hour* as follows:—Hong Kong would have to be defended by a naval force, but when the numerous open ports in the Straits Settlements, China, and Japan would, in the event of any trouble, require the moral and physical support of our Navy, Hong Kong would stand but a poor chance of any adequate aid. Our naval force in these quarters is lamentably small to cover its vast requirements. Hong Kong is often left defended by a saluting hulk. The large increase in the Chinese Navy—and recent advices from Foochow mention the completion of a new corvette—though not possessing to any extent the requisite knowledge for the conduct of open hostilities—for neither the Chinese nor Japanese ships have ever fired a hostile shot since their recent organisation—yet would be, in point of its numbers, of momentous trouble; and therefore, in face of the requirements of our Navy for the protection of life and property at all the many ports where British interests reign, Hong Kong should be placed in a position of adequate self-defence. At present the island is cared for by an infantry regiment and battery of artillery, while Singapore, which has to protect Penang and Malacca, is in a like manner supplied; but the removal of the Marines from Japan has weakened in a measure our representative power. From its position Hong Kong presents to an invading force something of a shell-trap, and would be soon and easily reduced into subjection by a bombardment from outside, where hostile vessels could work their disastrous fire with impunity; and the colony, acting as it does somewhat as a depot for the commercial workings of Northern China and Japan, contains no inconsiderable wealth, while, at the same time, it is the head-quarters of our Navy, and is well supplied with plentiful military and naval stores. What is required for the defence of Hong Kong is the erection of a few batteries round the island, and suitable heights can be obtained commanding the positions where hostile landings might be effected; but, as Hong Kong is surrounded by a wide network of small islands, under safe cover of which an enemy's ship might play a bombardment, the co-operation of a couple of iron-clad rams, such as are to be found in the harbours of Bombay and Melbourne, would almost prevent time being given for any effectual attack from a distance. The Colonial Government—and the Hong Kong governmental purse is not a too poor one—would necessarily aid in paying expenses thus incurred, but the boon of safety would be invaluable. I have spoken of a fear of the Chinese Navy; it is more a fear of its numerical force than of its physical force, for our Navy could cope with it without difficulty; but Hong Kong, apart from its great importance and value to us in times of peace, would be invaluable in times of war, for there, close to the wide land of China, stands a fortress bounded by the sea, where our forces would congregate. Lately some attention was paid to the fortifying of Singapore, but the defence of Hong Kong, for which I now argue, is worthy of the most serious attention.

BURMAH, ITS DEFENCES AND WARLIKE RESOURCES.—At a special meeting of the Royal United Service Institution, Captain E. C. Browne, 21st R.N.B. Fusiliers, read an essay on "Burmah, Its Defences and Warlike Resources." Lieutenant-General Sir Fred. Hamilton, K.C.B., was in the chair. Captain Browne stated that all his information had been gained from personal experience, as while on leave he had explored a large part of Burmah, his sole object then being to examine and report on the resources of the country, which might be of use in future campaigns. He said that all the chief towns were situated on the Irawaddy, which enters the sea through many mouths at Rangoon. He then described the different passes where the Burmese had made their chief stands in the campaign of 1826, and referred to Mandalay which was strongly situated and protected by nature. Mandalay was rendered secure by a brick wall twenty-five feet high and three feet thick. It was not loop-holed, nor had it any embrasures for cannon. The arms and valuables of the kingdom are stored here. There are numerous big guns, but they are unserviceable, and there was no ammunition when Captain Browne was there, but he was told they could easily get it if it was required. There were 2,000 stand of small arms, but they were all rusty, and some of them quite dangerous. The army of defence numbered 3,000 men. There were 20,000 inhabitants within, and 60,000 without the walls. Captain Browne then went into the history, character, and customs of the people, particularly as regards their connection with Great Britain after two severely contested campaigns.

WE read in *La Liberte* that Marshal Macmahon has just remitted the remainder of a sentence to three years imprisonment, incurred two years ago before a court-martial, by a Baron d'Ivry, officer in the French Navy, for a manslaughter committed by him on a Japanese. Baron d' Ivry was undergoing the penalty in the prison of Ste. Pélagie in Paris.

SIR G. BALFOUR has moved for return of East India opium revenue (in continuation of Parliamentary paper, No. 124, of Session, 1870), &c.

MR. S. HILL—Bill to consolidate and amend the Industrial ad Provident Societies Acts.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, JUNE 30.

Though the Liberal party in the Second Chamber will have at their disposal next Session a majority of forty-two or forty-three votes, there is no question of a Ministerial crisis. The Liberals would not be able to take the reins of Government unless all the members were agreed upon leading principles. But this is by no means the case. It is quite uncertain whether the majority would prove to be a substantial one—if the Lower Class Instruction question were brought forward. For the moment—that is to say in September next—the Liberals have nothing to do except to be on the *qui vive*. It must not be forgotten that at the late elections it was not Liberal principles which triumphed, but anti-clerical ones. And Mr. Heemskerk being sly enough not to study so much his clerical friends, there is no reason why he should be replaced. The loss, because it would always be a risk for the Liberal party to take the Ministerial seats, for new elections might at once place it in a minority in the Chamber.

The greatest dulness prevails in politics, and the only items worthy of attention are the letters of General Verspyck, regarding the pamphlet by Mr. de Rochemont—"Loudon and Atjeh." The prevailing opinion is, that the General has succeeded pretty well in elucidating the reasons which caused him to ask for his dismissal; but his behaviour at the extraordinary meeting of the Council of India is less approved of. It was his duty, it is said, after having accepted the mission, to start to Atjeh with reinforcements, to have protested most energetically against stopping the expedition. Other persons, however, think that it would have been very difficult to act otherwise than he did. Of course his protest, published in the *Vaderland*, will not remain unanswered; and though this discussion is most interesting, it does not bring the Atchin question one step nearer to its solution. We are still in that wasp's nest, and Heaven only knows for how long we may have to remain.

The meeting of shareholders of the Dutch India Railway Company was held here to day. The Government Commissary, Mr. Van Swieten, was present. The report which was printed some days ago, and of which I have given you the outlines, was considered satisfactory, and proved that the Company's prospects were improving. The report, showing a net profit of f.377,893. 90, was adopted, and the dividend of 3¾ per cent. declared. Messrs. F. A. Muller, G. Obreen, and Ch. Sautter, were re-elected Commissaries. Mr. den Tex wished to know if it was the intention to ask the Government for more concessions in order to extend the Company's line. Thereupon the President read a correspondence between the Managers and the Government, which showed that steps would be taken in order to secure more concessions to the Company.

It is anything but improbable that we may be involved in a question with Germany similar to that of Belgium. During the last weeks a number of Jesuits expelled from Germany have taken refuge on our territory. They are well provided with money, and have purchased large country seats, castles, and so on, to establish themselves. There is no complaint to be made against these clerical gentlemen, but I should think it would have been better if they had gone elsewhere, where they would meet with more sympathy from the population.

Alarming news is published about our colony, Surinam. The Governor and the members of the Council describe the condition of affairs as a most miserable one, and this is in great part attributable to our indifference towards this colony. It is quite true that large capital has been lost by all sorts of commercial and agricultural undertakings, but this ought not to check our energy.

In my last letter I told you that the volunteering for our East India Army was a failure. Daily, however, some Belgian and French young men accept the bounty, but it seems that it is not quite their intention of being shipped for Java, for after having pocketed the money they, as a rule, try to desert.

To-morrow a meeting will be held at the Hague of the promoters of cremation.

AMSTERDAM, JULY 1.

Mr. H. A. van der Hoeven (Ultramontane) has been elected a member of Parliament by 2,148 votes. The Liberal candidate, Mr. Van Mierlo, obtained 1,164 votes.

Mr. Jacob Dam, M.P. (Liberal) died yesterday at Neuenahr.

The papers contain an extensive correspondence from Dillenburg (Nassau) about the inauguration of the tower erected in remembrance of Prince William "the taciturn."

Mr. Huet's articles "Dutch Policy," published in the *Dagblad van Ned. Indie*, have caused some sensation here. The *Handelsblad* terms his theory a "madman's policy."

Digitized by Google

Naval and Military.

Lord Clarence Paget or Vice-Admiral Sir Hastings Yelverton, G.C.B., will, it is rumoured, succeed Admiral Hon. Sir Henry Keppel, G.C.B., at Devonport, in November, when the command becomes vacant. During the time Sir Henry Keppel has acted as Commander-in-Chief his kindly disposition and interest in everything appertaining to the welfare of the officers under his command has made everyone look forward to his departure with the greatest regret. We understand that he is going out to India with the Prince of Wales, having been specially invited by his Royal Highness.

The *Army and Navy Gazette* says :—The Lords of the Admiralty have declined to grant a pension to the widow of the late Digby Henry Dent, who so heroically sacrificed his own life in the act of saving that of one of his warders at Singapore, on the plea that he had commuted his half-pay prior to marriage. He certainly could not have contemplated the possibility of being murdered in the discharge of his duty when he did so, and we trust the Admiralty will exercise their discretion, and reconsider the decision.

Owing, it is stated, to some question of right of interference it has been decided that Her Majesty's ships engaged in the suppression of the slave trade on the East Coast of Africa are not in future to overhaul any dhows in the Gulf of Aden, the limits laid down being Bab-el-Mandel and Cape Guardafui, within which British cruisers will now have no authority to act.

General Riddell, late of the Bengal Army, died on the 24th ult. He went out to India as a cadet in the Honourable East India Company's military service in 1823, and, besides holding several important civil and political, as well as purely military, appointments, served in the Affghanistan campaign of 1842, the Punjab campaign of 1849, and the Indian Mutiny campaign of 1857-8.

Major-General Edward A. G. Muller died last week at Tulse-hill, aged seventy-three. He had been fifty-five years in the Army, having obtained his first Commission in February, 1820. His first active service was with the 1st Royal Scots Regiment in the Burmese War of 1825-26.

Navigating-Lieutenant Jesse Dixon (1865) is appointed to the Victor Emmanuel on the China Station.

Legal.

ALLEGED BREACH OF CHARTER-PARTY.—STANTON V. RICHARDSON AND OTHERS.

This was an appeal to the House of Lords upon a case stated by the parties from the decision of the Exchequer Chamber, affirming the judgment of the Court of Common Pleas, discharging a rule *nisi* obtained by the appellant to enter verdicts for him in two cross actions or for new trials on the ground of misdirection. The first action was brought by Mr. Stanton, the appellant, as the owner of the ship *Isle of Wight*, against Mr. Richardson and others, as charterers, to recover damages for the alleged breach of a charter-party, under which the ship was to proceed to Manila and load there or at Ilo Ilo, or at Zebu, a cargo of sugar in bags, hemp in compressed bales, and measurement goods, and thence proceed to Cork or Falmouth. The alleged breaches were that the charterers refused and neglected to load a complete cargo on board the ship and refused to pay freight. The pleas denied the contract and the breaches, and affirmed that the ship was not tight, staunch, or strong, or fit to receive or carry a cargo, and that the charterers could not, although they were ready and willing to do so, safely or securely load on board the ship a full or any cargo, and that by reason of the condition of the ship they were prevented from deriving any benefit from the charter-party. The second action was brought by the charterers against the owner to recover damages for the breach of the same charter, the breach being that the master of the ship did not take all proper means to keep the vessel tight, staunch, strong, well manned, and sound, and in every way fitted for the voyage, and that, therefore, the vessel at the time of receiving the cargo was not a good risk for insurance. It appeared in the trials that Mr. Stanton was a shipowner, carrying on business in London, and that the *Isle of Wight* was an American-built vessel, classed A 1 in American Lloyd's, and was 1,253 tons register. Messrs. Richardson were merchants, carrying on business at Manila, under the firm of Findlay, Richardson, and Co., and one of them, Mr. Francis Richardson, was also a merchant in London. The ship was loaded with a cargo of what is termed "wet sugar" in bags at Ilo Ilo, when it was found that the pumps of the ship were not sufficiently powerful to keep her clear when the water in her became mixed with the drainage of the sugar, and the consequence was that the water in the hold rose and completely washed out and destroyed the two lower tiers of bags of sugar, and eventually the cargo was discharged much damaged. The two actions were then brought upon the charter-party. The jury found in favour of the charterers in both actions. The owner of the ship obtained a rule *nisi* pursuant to leave reserved to enter the verdicts in his favour, for new trials in both actions, on the ground that the charterer had no right to throw up the charter-party and refuse to load a cargo, and on the ground of misdirection on the part of the Judge, in telling the jury that there was a warranty on the part of the shipowner that the ship was fit to carry a reasonable cargo of wet sugar, and that there was an obligation on the part of the shipowner and master to have the ship in a state fit for such a cargo. The rule was subsequently discharged by the Court of Common Pleas, and their decision was affirmed by the Exchequer Chamber.

Their Lordships now, without calling upon the learned counsel for the respondents to argue the case, dismissed the appeal with costs, being of opinion that the damage to the sugar was caused by the unfitness of the ship, that the shipowner was bound to have kept the ship in a proper condition, and that the learned Judge was right in the directions he had given the jury on the trial.

COURT OF BANKRUPTCY.

IN RE ROBERT BENSON AND CO.

This was an application for the appointment of a receiver and manager to the estate of Robert James Wigram, Richard Henry Glynn, Robert Henry Benson, and Constantine Wm. Benson, of 10, King's Arms-yard, Moorgate-street—also Liverpool, and Boston, United States—who have presented a petition for liquidation estimating their liabilities at £750,000. The amount of the assets is unascertained at present. Upon an application, supported by creditors to the amount of between £400,000 and £500,000, the Registrar appointed Mr. Waterhouse (Messrs. Price, Waterhouse, and Co., accountants), of Gresham-street, to the office.

IN RE LOUIS STEWART.

In this case the Registrar appointed a receiver and manager. The debtor has presented a petition for liquidation, describing himself as a merchant and East India agent, carrying on business at 10, St. Mary Axe. The liabilities are estimated at £76,500, and the assets about £17,000. It was stated that the failure had been brought about by the recent stoppage of Alexander Collie and Co.

IN RE ALEXANDER COLLIE AND CO.

This firm which suspended payment on the 15th ult., came into Court on an application to the Registrar to appoint a receiver and manager to the estate. The debtors, who are described as merchants, trading at Leadenhall-street, and also at Manchester, have filed a petition to the Court, under the liquidation clauses of the Act, estimating their liabilities at £3,400,000. Mr. Young, a member of the firm of Turquand, Young and Co., accountants, who were appointed to investigate the accounts, reported that the transactions were very heavy, and the list of creditors was a very long one. The value of the assets was not ascertained, but they would be considerable. Many of the transactions were of a complicated character, and involved large amounts both in this country and in Scotland. There was a large stock of goods at Manchester, which it was advisable to sell from time to time to prevent deterioration and loss to the estate. The Registrar granted the application and appointed Mr. Young receiver and manager. The first meeting was fixed for the 28th inst.

THE OPIUM TRADE.

(THE TIMES.)

It is curious to compare the very different statements which were made in the same debate as to the effect of Opium on the consumer. It appeared sometimes as a fearful poison, destructive alike to the souls and bodies of those who indulged themselves in it. All, indeed, that we have ever heard said against alcohol was said against the powerful narcotic agent which takes the place of alcohol among Orientals. The comparison of the two was completed by the kind of defence which speakers on the other side set up. It was the abuse, the House was assured, and not the use, of Opium which was to be dreaded. Taken in moderation, as it generally was taken, its effects were positively beneficial. It was from the dens and alleys of the great cities that the unfavourable pictures had been drawn which were most frequently brought forward by travellers. For the scenes which these represented there was no defence possible, but the experience of the country districts of China was wholly different from that of the towns. A Chinaman, after a hard morning's work, enjoying his midday meal with a hearty appetite, and solacing himself afterwards with a whiff of Opium, just as an English labourer might take his harmless pipe of tobacco, and then going back to his work again none the worse for his indulgence—these, and such as these, were the real instances by which the effects of Opium must be judged, and he would be a stern moralist indeed who would condemn them in so mild a form. We are not so much concerned to strike the balance of all this conflicting evidence, because we know that, whether the drug be wholesome or noxious, the Chinese consumer is, as a correspondent this morning shows, determined to have it, and that the only question can be in what way he is to be supplied, and what nation is to have the profit of the transaction. That the Chinese Government would be glad to exclude foreign Opium is, no doubt, perfectly true, but it is equally certain that it would do so simply in the interests of its own revenue, and would take care to gratify the tastes of its subjects by an article of home growth equally capable of being abused. Nor is there much doubt which way the preference of the consumers would lie. The Opium which the Bengal Presidency produces is by far the best that can be found anywhere, and neither China nor any other Opium-producing country could compete with it for one moment on anything like equal terms. Now, it does not appear to have been urged on Friday that the Opium traffic with China was to be forbidden, although many of the arguments used about it meant either that or nothing. The trade was taken as an existing fact, and, in spite of an abundance of true or untrue, but certainly irrelevant declamation, there was no present purpose of interfering with it. The point on which the House was asked to express an opinion was simply whether the growth of the Opium which we were to send to China was to be, as now, chiefly a Government monopoly, or was to be handed over to private cultivators, who were to pay a tax to the Government for the privilege thus granted them. The question was a perfectly fair one for discussion, but it was hardly to be answered by a reference to the moral rules upon which the advocates for the change dwelt with a somewhat misplaced vehemence, and which, if they were worth anything at all, would lead a good deal further than the conclusion for which they were employed, and with which they had scarcely anything to do.

The opponents of the Opium monopoly were on firmer ground in some of their other arguments, though they mixed up everything in such strange confusion that it is clear they had no real knowledge of the strength or weakness of their position. It is, no doubt, contrary to the general rules of policy that a Government should take into its own hands any kind of industrial enterprise. The reasons against it, both from principle and from experience, are so strong as not easily to be set aside, and, as we have said, those who claim that the case of Opium is an exceptional one are bound to justify an exception which,

Digitized by Google

as such, is clearly in need of being defended and excused. It is almost part of the same argument to urge that the revenue derived from the manufacture of Opium is uncertain, that it depends upon foreign tastes which may possibly change, or upon the goodness or badness of the seasons, which can be even less certainly calculated, and that it is, therefore, unfit to be a regular part of the year's Budget, since at any time it may fall off or even cease absolutely. The reply may be, in the first place, that, even if Government gave up its Opium monopoly, the effect of a short crop would be injurious to revenue, and that the source of income has yet to be discovered which will not be exposed in some degree to this species of fluctuation. Each year's fiscal income, whether in India or at home, cannot but depend upon each year's general prosperity; and the result, so far, will be very much the same, and uniformity will be equally impossible. Nor is there much prospect of any such sudden change in the national tastes of the Chinese as to endanger the security of our Opium profits. We may admit all that has been said on both these scores, but need not, thus far, assign much practical importance to any of it. The most real reason for the maintenance of our present arrangements for the cultivation of Opium in Bengal is that the system is in existence, and that so large an income is dependent upon it we cannot afford to play tricks with it, or to make uncertain moves however likely to be beneficial in the long run. Indian finance has never been a very easy matter for us. We have assumed responsibilities and incurred expenses for the advantage of India a good deal in advance of the natural demands of the country, and more in accordance with English than with Indian notions. The pecuniary difficulty which all this has involved has been by no means slight, and we find it very hard, with all our care, to balance income and expenditure. The present moment, when Indian finance has not yet recovered from the strain of last year's famine, is particularly inopportune for trying dangerous experiments. When we find the voice of all Indian officials, and of those who have the best personal knowledge of India, raised unanimously in opposition to Mr. Mark Stewart, and when we find on his side a tangled mass of reason and sentiment, of which it is very hard to make anything at all, and of which it is impossible to make anything to the purpose, we know what we must conclude. A question which is argued on moral grounds will always command the attention of the House of Commons and the public, but the interest is lessened as often as it is discovered that morality has been thrust in on false pretences, and that nothing on that score is either promised or endangered. It might not be wise for the Indian Government to extend its cultivation of Opium beyond its present limits, but where an income of some six millions is at stake the English Legislature will make very certain of its ground before it will venture to interfere.

(TO THE EDITOR OF THE TIMES.)

Sir,—Will you allow me, as a resident of over fourteen years in China, to point out the serious error which underlay the whole of the arguments advanced by those speakers in the House of Commons on Friday who desired to induce the Government to abandon the revenue derived from Opium in India?

It was assumed throughout that Great Britain was responsible for the introduction of Opium into China. This statement has been so repeatedly made that it has become to be accepted as an axiom by the vast majority of people at home who have not the time to investigate the subject, but it is, as will be seen from what follows, entirely without foundation.

Lord George Hamilton, on Friday evening, in a speech remarkable for its lucidity and for the mastery of the subject which it displayed, really summed up the reply to those who were harping upon the statement that we had "forced" and were continuing to "force" Opium on the Chinese in a single sentence—that, namely, in which he said that we were not accountable for the taste of the Chinese, and that Opium had been used by them as a stimulant from time immemorial. Probably from an unwillingness to detain the House, which had evidently made up its mind upon the practical issue of the question, Lord George Hamilton did not give an extract from the Minutes of the evidence taken before the Select Committee in 1871, which would have completely borne out his statement. As it is very undesirable that the good name of the British nation should continue to be blackened by an accusation which is without foundation, I venture to forward to you the extract in question. At page 282 of the above-named Minutes Sir Rutherford Alcock, formerly our Minister in China, speaks as follows on the above point:—

"Mr. Hobson, the Commissioner of Customs at Hankow, obtained some interesting information about that (the introduction of Opium into China), which I have no reason to doubt is perfectly correct, and it goes so far to show that we are more sinned against than sinning in reference to the first introduction of Opium. It existed in Yunnan certainly before the beginning of this century. Mr. Hobson says the popular story in Szechuen is that a hundred years ago Opium was introduced into Szechuen, Shensi, Yunnan, and Kweichow from India and Thibet. . . . We are responsible, therefore, to the extent of dealing in it and promoting its production in our Indian territories for the profit of the revenue during this century, but they (the Chinese) certainly had it before, because in the latest addition of the 'General History of the Southern Province of Yunnan,' which was revised and republished in the first year of Kien-lung's reign (A.D. 1736), Opium is noted as a common product of Yung Chang Foo. Now, as Mr. Hobson, the Acting Commissioner, well remarks, if 134 years ago so much Opium was produced as to deserve notice in such a work as the one I refer to, it may be safely asserted that the production could be no novelty to the Chinese population at the beginning of the present century, when we first began to import it in small quantities."

So much for the introduction of Opium, of which the British nation has been accused over thirty years.

Next as to our "forcing" the drug upon the Chinese by the so-called "Opium war." Sir G. Balfour, who was one of our earliest Consuls in China, stated in the House that that war was only partly on account of the Opium trade, and that the Opium question as raised by the Chinese has always to a great extent been a financial one. I may state that the highest authorities—among whom, I may mention, is one of the most celebrated missionaries, who is greatly opposed to the traffic—admit that, although the Opium question entered into the causes which led to the war of 1840, it was only one cause among many, and that the traditional restrictiveness of the Chinese and their opposition to foreigners and foreign trade generally had at least quite as much to do with the matter.

Many other facts could be adduced showing the gross exaggerations which have been habitually indulged in by the anti-Opium advocates, but the above are sufficient to show that the statements over and over again made, and upon which hon. gentlemen waxed so eloquent in the House on Friday, to the effect that Great Britain introduced Opium into China, and went to war to force the Chinese to continue to consume it, are gross and unfounded calumnies.

Hon. members wished this "foul stain removed from our escutcheon." The publication of the simple truth will accomplish that end more simply, and certainly more satisfactorily, than "the sacrifice of a large portion of our Indian revenue for an idea," and for this reason I trust you will give insertion to these few lines.—Your obedient servant,

June 26. ALBERT C. DULCKEN.

(DAILY TELEGRAPH.)

Lord George Hamilton has mastered the serious as well as the administrative side of this embarrassed question. He acknowledged that "when so large a portion of revenue depended upon the habits of a foreign nation, a revolution might occur in their habits which might make it difficult to realise that revenue hereafter. He therefore quite agreed with the line of argument of his honourable friend the member for Kirkcaldy, who had pointed out that the system on which opium was manufactured should not be extended, because the revenue was to a great extent precarious." Here is the rub! This is the "black spot" on the horizon which must be watched by Indian financialists, for these seven millions of gold hang upon something else besides the policy of our Government. They depend upon the tastes of the Chinese, who fancy Bengal and Malwa opium now as a connoisseur might favour a certain brand of tobacco or *cru* of wine, but who used to prefer Persian opium, and may some day take to that grown in their own fields, where, whatever may be said, excellent samples of the drug have been produced. So little is this really dependent upon soil that capital opium has been grown and manufactured in Bedfordshire. A vast quantity of Chinese opium is grown in Szechuen and the South-Western Provinces; and, on the day when the Peking Government should prohibit Indian chests again, or issue the never-yet-published edict permitting the open cultivation of the native poppy, on that day the Calcutta financialists would learn how much in the matter also hangs upon the Celestial policy. It is the custom to say that there is no danger of this, and that the China samples can never compare with those of Patna and Malwa. We must warn the official apologists of opium that neither view is tenable; the future home and foreign policy of the Chinese Government is very uncertain indeed, and those who say that good opium cannot be grown on the head of the Yangtsze-Kiang would have denied thirty years ago that tea or cinchona would grow in India. There is a terrible precariousness in the opium returns, which ought to engage the attention of Indian statesmen, and we could wish that something more practical than the resolution of Mr. Stewart on the subject had engaged the debate of the House. The equipoise of Indian finance lies at the mercy of Chinese caprice, and although years may elapse without any sudden drop, yet, on the other hand, a day may bring forth events which would make opium "a drug" in the more uncomfortable sense of market talk, and place Indian Chancellors at their wits' ends. If this could be provided against now, and not hereafter, by an insurance fund saved from the opium receipts, or by some steadfast policy of replacement, or, better still, by prospective agreement with the Chinese Government, it would be well and wise. Such an object was clearly in the mind of the majority, albeit only the minority voted for the abstract expression of the desire for it, and we must utter an earnest warning to those in authority not to take the vote for a vindication of the opium traffic. It can neither be vindicated nor praised, nor at present dispensed with; but for the sake of financial safety, as well as morality, this interval of flourishing trad in the profitable poison ought to be employed in discovering some fiscal antidote for it.

(STANDARD.)

It may be urged that a Government is not justified in making a revenue out of opium, and in helping to confirm a habit which, whether it is generally abused or not, is still injurious to the health and the morals of a large section of mankind. Those who put the argument thus, however, clearly descend from that high ground of moral duty which is the only cause for the passion generally introduced into the discussion. That for a Government to depend on the consumption of opium for a large portion of its revenue is not a very exalted basis of public finance we may readily admit; but it is hard to see wherein the opium monopoly in India differs in principle from the excise duties in Great Britain. In both cases the Government, finding the habit to exist, makes a profit out of it. It would be better perhaps if a sufficient revenue could be raised without recognising such indulgences. But, on the other hand, the financier is justified in taxing the luxuries of the people, and such taxes help materially to relieve the burdens of the poor. Nor can it affect the argument from morality that the people taxed in the case of the opium monopoly are not our own subjects but of another nation. The revenue from opium, amounting to between six and seven millions a year, is a material addition to the Indian Exchequer, and those who object to it on high moral grounds are, at least, bound to point out some other way by which six or seven millions could be raised without increasing the burdens on the poorer classes of the people. Whether the Government of India grows opium or not on its own account opium would still be grown and still consumed. Nay, it is easy to perceive that to give up the Government monopoly would defeat the very object which the enemies of the drug have at heart. What is that object if not to thwart the production of opium? We cannot stop it altogether, for the Chinese grow it largely in their own country, and would grow it still more were they to be cut off from the Indian supply.

THE OPIUM DEBATE.

IN our present issue we give a full report of the interesting debate which has taken place in the House of Commons upon the Opium traffic, and to which we made allusion in our last number. Although it has not resulted in a vote which will have the effect at the present time of changing the action of the Indian Government in respect to the cultivation of Opium, the discussion will not prove useless, as it must be the means of calling attention both at home and in India to the subject, and will form a convenient *point de départ* for its future, and probably more practical, consideration. As we predicted when writing on the approaching debate in our last issue, the difficulty which the supporters of the motion against the traffic would find chiefly in their way, was that of putting their motion into a practical form. No doubt Mr. STEWART acted wisely in refraining from doing more than proposing a resolution to the effect that the House was of opinion that the Imperial policy regulating the Opium traffic between India and China should be carefully considered by Her MAJESTY'S Government, with a view to the gradual withdrawal of the Government of India from the cultivation and manufacture of Opium. This was as much as could be reasonably hoped could be acceded to at the present time, and had the proposition been carried, a step would doubtless have been made towards doing away ultimately with our connection in any direct way with a trade in which those of all shades of opinion must regret to see the Government mixed up.

It is noticeable that upon this point there was an almost complete unanimity among the various speakers; and it is not impossible that had Mr. STEWART'S speech been more specifically directed to this point, the motion would have received greater support. The actual resolution did not go much, if at all, beyond it; but while appreciating the energy with which he called attention to the whole question, we cannot but think that, by enlarging the field of discussion, he lessened his chance of carrying the House upon the single point involved in the proposition itself. It was not difficult for his opponents to point to misapprehensions as to the real history of the Opium traffic, which found their way into his address; and, following up the idea that the measure was designed to cause the Indian Government to abandon altogether its revenue from Opium, to lay stress upon the great difficulty which would attend such a course, the impossibility of doing so at the present time, the injustice which would be done to the Indian people by laying upon them other taxes to meet the deficiency, and to suggest other like objections, which, it is impossible to deny, had considerable practical force. It would be too much to expect that the Indian Government would sacrifice its revenue upon Opium unless it was evident beyond dispute that that course would lead to practically beneficial results; but there was evidently grave doubt how far any action taken by our Government would have the effect of putting down the consumption of Opium in China, and while this was unremoved it could scarcely be expected that the House would give its support to a motion which, although it did not go so far as to suggest an abandonment of the revenue altogether, seemed, from the nature of the comments with which it was introduced, designed to lead to that result. This point was made much of by the supporters of the other side of the question, and it is impossible to deny that there was considerable force in the remarks made by Sir G. CAMPBELL that the only way in which the Indian Government could shake itself free of the Opium traffic was either by leaving the cultivation altogether free or prohibiting it altogether; the latter course would not prevent the consumption of Opium, so long as it was cultivated in China, and, as to the former, it would obviously only have the effect of causing Indian Opium to be more largely consumed than ever. He admitted, however, that it was unseemly that the Government in Bengal should be directly concerned in the cultivation, but appeared to think that there were practical difficulties in the way of abolishing it. In the admission above named, he approached very nearly to the spirit of the proposer of the motion; and it may be hoped that as even those who consider there are practical difficulties in the way of abolishing the monopoly and Government cultivation in Bengal admit that this cultivation is "unseemly," it may yet be found possible to devise means by which the British Government may be freed from the odium attaching to a direct participation in a traffic which has in it elements such as certainly make it undesirable that the Indian Government should have any direct interest in fostering. Although Mr. STEWART'S motion was not carried, it is to be trusted that the discussion will call the attention of the Indian Government to this point, and that they may, notwithstanding the difficulties which Sir G. CAMPBELL considers are in the way, still find means to give up the system in force in Bengal, which need not necessarily entail a great abandonment of revenue, and would clear our Government from the liability of being accused of actually aiding and encouraging the trade. If this result be attained, a valuable and practical step will have been brought about by Mr. STEWART'S motion. The speech of Mr. PEASE was a lucid and able statement. Of course, with such a subject, many errors occurred in the speeches, and even our veteran friend, Sir GEORGE BALFOUR, erred in his account of the proposals made to Sir HENRY POTTINGER.

THE MUSEUM AT YEDO.

SANO, the Japanese Minister, who recently returned after his European tour to Japan, is carrying out in his country educational institutions on the model of those existing here. Not only did he take back with him Dr. WAGNER, who did so much at the Vienna Exhibition, but the eldest son of our commissioner there, Mr. OWEN, is also attached to his staff. Besides making considerable purchases at the Vienna Exhibition for the Yedo Museum, arrangements are in progress for carrying out educational, food, and manufacturing collections, on the plan of those of the Science and Art Department at South Kensington and Bethnal Green. The task of forming, arranging, describing, and despatching these has been entrusted to Professor P. L. SIMMONDS, who has been so long the scientific referee for the department. The first consignment has been sent off of educational works, show-cases, scholastic fittings, instalments of the food collection showing the constituent parts, by chemical analysis, of the principal food products, such as beef, pork, milk, wheat, barley, rice, beans, peas, turnips, potatoes, beetroot, tea, beer, &c. A fine collection of coloured models of our choicest edible roots and vegetables, formed by Messrs. SUTTON and SONS, of Reading, and instalments of the industrial collections in large and varied series, illustrating the stages of the cotton manufacture, from the raw material to the finished fabrics, and all the principal commercial varieties of cotton, together with the manufacturing and industrial uses of shells, in every description of article made from them, such as mother o'-pearl, cameo, and all the various kinds of jewellery and ornamental shell-work now so much in vogue. Mr. SIMMONDS has done so much for the London Government Museums, for the Dublin Museum, the Technological Museum at Melbourne, and the principal Art and Industrial museums on the Continent, that we are glad to find his scientific knowledge and commercial experience devoted to the development of educational progress in Japan.

IN our last issue we published some notes on "Materials for Paper Manufacture," in which we drew particular attention to the *Urtica tenacissima* or *Boehmeria nivea*, the *Rhea* which has been brought but recently into prominent notice, and we mentioned that from the fibre of this plant the Chinese manufacture their celebrated grass-cloth. By a very odd coincidence Dr. FORBES WATSON, the Reporter on the Products of India, was at that time engaged in drawing up an official notification, stating that the SECRETARY of STATE for INDIA in Council had decided, in the event of a sufficient number of competitors coming forward, to make arrangements for a series of trials to take place in this country early in November next, with the object of ascertaining the best methods for the preparation of the RHEA FIBRE, from either the fresh or the dried plant, by mechanical, chemical, or other means. The utmost care will be taken to secure reliable results, and to make public the details connected with the experiments; but, adds Dr. WATSON, it is not intended that any prize shall be awarded on the occasion. It is consequently to be feared that, from the want of a little liberality on the part of the Government, the otherwise good intentions of the India-office may be, in some measure, frustrated.

AMONGST the telegrams received from China during the past week will be found one of considerable importance. It is no less than that the Government have decided to establish Legations and Consulates in Europe. This is, indeed, the most portentous item ever received from China over the telegraphic wires, and will have a most important effect on our relations with that country. We believe that no confirmation of this has been received at the Foreign-office, owing to the absence of Mr. WADE from Peking, but we have no doubt that the appointment of a Commissioner to Yunnan, noticed in our telegrams, is to be traced to Mr. WADE'S visit to Hankow.

LORD STANLEY of ALDERLEY intends on the 19th inst. to call attention in the House of Lords to the coolie traffic, and to ask the Secretary of State for the Colonies to state the result of his inquiries into the death of two coolies from flogging in Province Wellesley. The noble lord will also inquire what progress has been made in framing a law for the protection of Chinese Coolies in the Straits Settlements.

BY the last mail from Rangoon we hear of the appointment by the Indian Government of Mr. NEY ELIAS as Resident at Bhamo. We commend the Government on securing the services of so experienced a traveller, and one so well acquainted with the treatment of natives.

Literature.

Food; a Lecture delivered in Shanghai. By R. A. JAMIESON, M.A., Consulting Surgeon to the Imperial Customs in China, and Honorary Surgeon to the Gutzlaff Hospital for Chinese. Shanghai: Kelly and Co. 1875.

Dr. Jamieson has just published, in a well-printed and neatly-got-up pamphlet form, the instructive lecture on Food which he delivered at Shanghai a short time back. From the prefatory note with which he now introduces his lucubrations to the public, we learn that he does not claim any originality for his remarks, but his audience certainly had to thank him for a mass of well-digested facts. Owing to the necessarily short time at a lecturer's disposal, and probably also from a fear of wearying his hearers, Dr. Jamieson was obliged "to confine the discussion to the food consumed by human beings, and to assume on the part of the audience a rudimentary acquaintance with the nomenclature of chemistry and a readiness to accept without demonstration the elementary facts of physiology." The former of these assumptions appears to us the weakest part of the lecture, for on the strength of it Dr. Jamieson does not hesitate to employ many technical terms and expressions, which must have been very puzzling to a non-professional audience. The first half of the lecture deals with the relations between food and fuel, and the principle upon which the dynamic value of food is estimated. Many, doubtless, thought this somewhat dry, and a trifle too learned; but it shows that Dr. Jamieson is well acquainted with his subject, and knows how to handle it. We cannot follow him through all his observations, for such a course would necessitate our going into the matter at too great a length, but we content ourselves with one very brief extract which will amuse, if it will not instruct, our readers. "Dr. Frankland, the lecturer remarks, "from a table such as I have given above, and on the assumption that only four-fifths of the potential energy of food is lost, shows that the average amount of work ought to be obtainable at the cost of 3½d. per day, if the worker is fed on oatmeal; for 11½d. per day, if on cheese; for 1s. 3d. per day, if on milk, hard-boiled eggs, or loaf-sugar; for 3s. 6½d., if on lean beef; and for 7s. 6d., if you were to feed him on Bass's ale. It may gratify you to be assured that these figures are obtained by calculation. Nobody, so far as I know, has ever been fed exclusively on Bass's beer, at least for purposes of scientific investigation."

In the second portion of his lecture Dr. Jamieson has some sensible remarks to make on the subject of meat; and he does quite right in disabusing his hearers of the notion that "the flesh of young animals, such as lambs and calves, being what we call more tender than that of adult animals, is more easily digested." Having explained this, he points out the odd fact that, though pork is the most indigestible of all meats, and cured flesh is also somewhat indigestible, still bacon appears "to be more easily assimilated than pork." In connection with the subject of meat, the question of primary importance is most undoubtedly its condition, whether wholesome or unwholesome. "Meat," we are told, "may be unwholesome (1), because, whether the animal from which it was taken was or was not healthy at the time of slaughtering, the flesh has since undergone putrefaction. It is true that the American Indians prefer their meat putrid, and so do the Greenlanders; and our noses are every day saluted by the odours of decaying fish and vegetables, which enter largely into the Chinese dietary. . . . Again (2), meat may be unfit for food because the animal was suffering from some infectious disease at the time of death. [This Dr. Jamieson shows is not a dictum that can be unreservedly accepted as true, though it is safest to act up to it.] . . . Or, lastly (3), meat may be fatally unwholesome in consequence of the presence of parasites in its substance. You have all heard of tape-worms, and I am sorry to say that there are a great many of them at Shanghai. They belong to the cestoid group, and their life-history has so direct a bearing on the precautions which we ought to take regarding our food, that I will sketch it briefly for you." With this curious, and slightly unpleasant feature in the dietary of the residents at Shanghai, our space compels us to take leave of Dr. Jamieson's interesting pamphlet, which, we trust, will meet with the attention it deserves at the hands of foreigners in all parts of China and Japan.

Keramic Art of Japan. Part I. By G. A. AUDSLEY, Architect, and J. L. BOWES, President of the Liverpool Art Club. Liverpool: Published by the Authors, for the Subscribers. London: Henry Sotheran and Co.

Some sixteen months ago we noticed in these columns Mr. G. A. Audsley's "Notes on Japanese Art." We now have received the first part of the splendid work on the "Keramic Art of Japan," which that gentleman has undertaken, in conjunction with Mr. J. L. Bowes, the President of the Liverpool Art Club. A short time back Messrs. Audsley and Bowes invited subscriptions for this work, stating that it would contain a comprehensive introductory essay upon Japanese Art in all its various branches, illustrated by thirteen photo-lithographic and autotype plates, and numerous wood engravings printed in colours, and, in addition, a concise dissertation on the Keramic Productions of Japan, from the earliest records up to the present day, with sectional articles on the Pottery and Porcelain of the various provinces of the Empire in which manufactories exist, fully illustrated by thirty-five plates, superbly printed in full colours and gold, and fifteen plates in autotype, the illustrations being all produced from original Japanese works of the greatest beauty, and representing the entire range of Japanese Keramic Art, ancient and modern. Well, indeed, have they fulfilled their promise in this, the first part of their magnificent work, though they think it necessary to apologise for the undue proportion of illustrations from objects in their own possession; this slight *contretemps* they have been unable to avoid, owing to the protracted nature of the lithographing and printing during the early stages of the publication. The present part contains, besides the dedication to H.R.H. the Duke of Edinburgh, Introductory Essay on Japanese Art, pp. i to xii; Illustrations of Early Plates, A and B; Keramic Art of Japan, pp. 1 to 8; five superb chromo-lithographic plates, and descriptions thereof; and two autotype plates, also with descriptive letter-press.

Previous to the Paris Exposition of 1867 very little was known in Europe on the subject of Japanese Art, and the little that was known was "derived from the objects imported by the Dutch traders, from the presents given to the several Embassies that have visited Japan, and the articles collected and described by such travellers in the country as Kaempfer and Siebold," and for that matter the latter did not pay very much attention to art. Even now no treatise has been written by any traveller on the subject of Japanese Art, and no one seems to have been at the trouble of investigating "the arts and art thoughts" of the people. On this point we venture to cite a few remarks from our authors' introductory essay:—"One cannot even hastily glance over the

Digitized by Google

wide field of Japanese Art without being struck by the loving appreciation of the works of nature it displays. The Japanese artist is indeed an ardent student of nature; he watches her silent operations with keen perception, and notes her changes of mood and costume with loving eyes, until each detail of her marvellous handiwork, and each expression of her changeful face becomes imprinted on his mind, to be transferred to every work he sets his hands to do. In the animal and vegetable world he is ever watching for expressive action, or seeking for lovely forms or combinations of colour; and when satisfied with his research, how boldly and truthfully he depicts that which has pleased his artistic taste. Another remarkable trait . . . is his keen appreciation of, and intense love for, the humorous and grotesque . . . . He evinces great ingenuity in designing geometrical and other conventional devices, and in the application of them for the ornamentation of surfaces of all shapes." After going at some length into this portion of their subject, Messrs. Audsley and Bowes, in remarking that of all the methods adopted for the ornamentation of the flat surface, those in which flowers and foliage enter are the most beautiful and characteristic, express it as their decided opinion that in those respects the Japanese artist has no rival. We must not, however, on the present occasion dwell at any further length on this interesting essay, but must turn for a brief space to the "Keramic Art of Japan." The art of making porcelain is undoubtedly of Chinese origin, and was introduced into Japan at a very early period by Koreans who had learnt it from Chinese experts; one tradition, indeed, places the introduction of the art as far back as B.C., 27, but on this no reliance can be placed, and our authors think it more likely that the art came to Japan in the train of Buddhism in the sixth century. They, however, prefer to adopt for their starting point an epoch nearer our own times, and deem it reasonable to look to the middle of the sixteenth century for the first arrival of Japanese Keramic Wares in Europe . . . but," they add, "unfortunately no means exist whereby we may distinguish works of that epoch from those of later periods." Under all circumstances, Messrs. Audsley and Bowes look upon the time mentioned as the most satisfactory for commencing their review, and the only possible one for their illustrations of the Keramic Art of Japan. They then proceed with observations on "Old Japan" ware from Hizen (the earliest specimens of which are in the Dresden collection), and the important potteries of the Owari province. Next they say a few words respecting the productions of the provinces of Kaga, Jeetsju, and Satsuma, the first of which "has long been celebrated for its wares, decorated in rich red and gold," and the last for a faïence of a firm texture and delicate creamy tint, covered with a waxy glaze more or less crackled."

As we have stated above, this part contains five beautifully executed chromo-lithographic plates, two of which represent very fine specimens of Kaga ware, two again a splendid vase and oblong tray of Satsuma faïence, and the fifth a large oblong placque of Owari porcelain, elaborately painted in blue. The two autotype plates respectively represent several specimens of Kaga ware and Satsuma faïence, and so well are they executed that the different objects appear to stand out from the paper. We may here remark that in Part II. will be issued the plates of Old Hizen Porcelain, selected from the Imperial Keramic Collection at Dresden.

Whether considered as a whole, or taken in detail, we feel no hesitation in saying that the instalment of Messrs. Audsley and Bowes's work, which is now before us, is in all respects magnificently produced. In the seven parts to which they limit themselves they will be able to do full justice to the task which they have undertaken,—a task which is with them evidently a labour of love. Their great object, of course, is to give examples of all the most rare and beautiful specimens of Japanese Keramic Art to be found in this country. This being the case, we note with surprise the absence of the names of Sir Rutherford Alcock and Mr. W. J. Alt from the list of persons who have allowed the authors to make use of their specimens for the purpose of illustrating their work, as it is our impression that the collections of those two gentlemen are the best in England. No doubt, however, as they proceed with their undertaking, Messrs. Audsley and Bowes will find out these; at any rate, it is to be hoped they may, so as to render their work more complete.

We have received a copy of Baron Johannes von Gumpach's review of *The Returns of Trade at the Treaty Ports in China, as published by order of the Inspector-General of Customs*, which he has issued as a pamphlet, "with additional notes and an appendix." In the "advertisement" prefixed to this pamphlet the Baron notifies the Inspectorate-General of Maritime Customs that unless its shortcomings, real or supposed, be promptly put to rights, they will be embalmed in "a larger work now preparing for the press," and handed down to posterity as a warning to such like institutions in the future. We hope that the Inspector-General, or, at any rate, that one of his Cabinet Ministers who is entrusted with the seals of the Statistical Department, has taken the Baron's criticisms and strictures in the proper spirit, and has already begun to set his house in order. To speak more seriously, Baron von Gumpach claims to have treated his subject throughout in a spirit of fairness, and he roundly asserts that "the reader will meet with no statement that is not fully and in the strictest sense borne out by the facts of the case." We have neither space nor inclination for a detailed examination of the merits and demerits of the Baron's case, but if his remarks on Mr. Hart's official designation are to be taken as a criterion of the "spirit of fairness, &c.," in which he declares he has written, he had far better not have sent his MS. to the printer. It is idle quibbling to say that "there exists no such office as that of 'Inspector-General of Customs' in China." Mr. Hart's short title in Chinese is *Tsung shui wu ssu*, and if they may not be translated into English as "Inspector-General of Customs" with as much propriety as "Consul-General" is rendered by *Tsung ling shih kuan* in Chinese, it seems rather odd that some carping Chinese critic has not called attention to the fact. If the subject be approached in this manner, it is easy enough to pick holes in any official publication like the Chinese Customs' *Returns of Trade*, our own Blue-books included, but we may reasonably ask, *cui bono?*

The July number of *Temple Bar* contains a long and by no means uninteresting paper, by an anonymous contributor, entitled "A Month in a Japanese Farm-house." It would, however, have been far pleasanter reading had the writer only been less diffuse and less flowery in his descriptions. The article does not refer to experiences of a very recent date, for we are told, in the course of the journey to the farm-house, that about a year before Mr. Richardson was brutally murdered on the Tokaido. This reflection, which comes up in a rather promiscuous manner, gives rise to an unnecessary account of that sad affair. One of the best portions of the paper is that on "Baths." "In Japan," the writer says, "even in the lowliest inns, the traveller's request for a bath is never met with that stare of blank astonishment which often attends the demand in our own and every other European country. I know in Ireland once I asked for a bath, and they brought me a bread-pan; and on another occasion, in France, I could get no nearer the article than a horse-trough; while in England and Germany the request has more than once led to a serious breach of the peace between myself and the landlord." Then follows a description of the *modus operandi* in Japan. Considerably less than half the paper is devoted to the doings of the writer during his month at the farm-house; and though we fancy he is not particularly well conversant with the existing state of things in Japan, we are glad that the short sojourn in the quiet Japanese village transformed him "from a weak, pale invalid, trembling between life and death, into a robust, hale man."

Translation of a Chinese Letter. . . . The interpreter who was sent to Yunnan with his servants of the Inner Land, had all reached a place on the frontier of Burmah, by name Mêng-tien (Manwyne), under the jurisdiction of the savages *(shêng fan)*, when they were cruelly murdered by these savages, for what reason your younger brother knows not. The Tsung-li Yamên will assuredly take most stringent measures to trace out and punish the guilty parties; but as yet it is not known at whose instigation the deed was done. Truly it is very heart-rending, so lynx and tiger-like. Your younger brother thinks that with the Formosan difficulty as a warning, and considering the difference between your honourable country and Japan, the Yamên will not dare to slur over the matter, and thus offend all Western nations. On the other hand, the difficulties of position are much greater in the case of the Yunnan affair, though if we could act in concert with troops from India, it would be comparatively easy to bring the thing to a conclusion.

Correspondence.

THE OPIUM DEBATE.

(To the Editor of the *London and China Telegraph.*)

SIR,—I was in the gallery of the House of Commons last Friday during the debate on Mr. Mark Stewart's motion for the gradual withdrawment of the Indian Government from the cultivation and manufacture of Opium. I was interested by much that was said on both sides, and hope you will allow me in your columns to offer some remarks on various statements which were made.

I. The supporters of the motion all assumed that this country had violently overborne the remonstrances of the Chinese Government against the introduction of Opium among its subjects. I believe they were substantially correct in their averments, and nothing of any real weight was advanced to the contrary. Sir George Balfour, however, endeavoured to weaken the case of his opponents by asserting that the Chinese Government had never been sincere in its opposition to Opium, and referred in proof of this to certain Parliamentary papers which he held in his hand, proving, as he said, that the Chinese Commissioners who negotiated the Treaty of Nanking had said to Sir Henry Pottinger that if $3,000,000 (per annum) were guaranteed to their Government, the trade in Opium would be legalised. The statement surprised me, and it was unjustified by the documents on which it was based. At the conference for the settlement of the articles

Digitized by Google

of the Treaty, when our Plenipotentiary wished to speak on the Opium question, the Chinese Commissioners unanimously declined entering on the subject. Being told, however, that he introduced it merely as a topic of private conversation, they evinced much interest, and heard all that he had to say, which was not without force, and was to the effect that, considering all the difficulties of the case, the legalisation of the trade was the most expedient course. One of the Assistant Commissioners, Hwang Ta-jin, having brooded over Sir Henry's exposition, made the proposal to which Sir G. Balfour referred at a meeting with Mr. Morrison, our Plenipotentiary's secretary and interpreter, several months afterwards. He made it as his own suggestion, though I think it likely that the other Commissioners had come to concur with him in opinion as to its being advisable. He said that in making it he was incurring a great risk, which, however, believing the thing to be for the benefit of both countries, he was prepared to incur, "though his life might be the sacrifice." There was no authority, then, in 1843, from the Emperor to submit such a proposal, and when, the following year, it was brought before him, he gave his memorable decision :—*It is true I cannot prevent the introduction of the flowing poison; gain-seeking and corrupt men will for profit and sensuality defeat my wishes; but nothing will induce me to derive a revenue from the vice and misery of my people.* It was not fair in Sir G. Balfour to make the use of Hwang Ta-jin's suggestion which he did. The sincerity of the Chinese Government in its opposition to the introduction of Opium among its subjects ought not to be called in question. I believe that Prince Kung, and the members of the Foreign-office in Peking generally, are now as sincere in their opposition to it. Some of them may have hinted at the plan to which some of the speakers in the debate referred, of authorising the cultivation of the poppy throughout China. *This has not yet been done.* The hint was thrown out as a threat. If the step should be taken, while the Indian revenue would be immensely diminished by it, the condition of China would become much worse even than it now is.

II. I had some sympathy with Sir G. Balfour when he went on to protest against our first war with China being styled "an Opium war;" contending that it was in avengement of the confinement in Canton—incarceration would hardly be too strong a term—of our representative and merchants in Canton. In all this he was partly right and partly wrong, just as the advocates of the motion were partly right and partly wrong in the name they gave to the war. It was the product of two factors. One was the smuggling of Opium from India into China by our merchants; the other was the arrogance of the Chinese Government in assuming the supremacy of its Emperor and officers over our Sovereign and officers, and refusing to be approached by the representative of any foreign Power excepting in the way of "petition" and on bended knees. Of these two factors the first war was the result. Certainly, the Opium smuggling was not less condemnable in the court of humanity than the Chinese arrogance. Whether war could have been averted in the long run, had there been no such provocation as the smuggling, we cannot tell. That, no doubt, accelerated its coming, and gave it an odious aspect in the eyes of other nations. Even Sir Henry Pottinger, in the postscript to a memorial which he addressed to the Emperor on occasion of the exchange of the ratifications of the Treaty, did not hesitate to say that the immediate cause of the war that sprang up between China and England was the trade in Opium. It seems to me important that the origin of the first war with China, as I have briefly indicated it, should be understood. Exaggerated and incomplete statements about it only do harm to the case in whose behalf they are made.

III. A third assertion of Sir G. Balfour is hardly worth adverting to. He said that the poppy was grown and Opium made from it thirty years ago to nearly as great an extent as now. I believe I should be within the mark in saying that ten times the quantity of Opium is manufactured in China now, as compared with what was made in 1840. And this is one of the saddest features in the Opium question at the present time. How with this fact before us the use of the drug is to be combated is a most difficult problem. I deplore the result of last Friday's debate. The Chinese Government might, not to say would, still rouse itself to enforce the law against the growth of the poppy in its dominions if the British Government would discountenance, instead of fostering the growth of it in India. Mr. Mark Stewart's resolution indicated a step in the right direction. The cordial adoption of it by the House of Commons would have cheered the heart of every patriotic Chinese, —and there are millions of such; and would, moreover, have done much to set this country right in the judgment of other nations. I have mourned, as a missionary, because of the obstacles presented by Opium to the progress of Christianity in China; I have been wounded to the quick by what I have heard Americans, Germans, and men of other nationalities, say about Great Britain, in connection with the trade and its history. I should be sorry to think that there are many Indian statesmen who are prepared to say, with Sir George Campbell, that the present monopoly of the production and sale of Opium in our Indian territories affords a happy "reconciliation of the services of God and mammon. "It is a pity he used such words.—I am, &c.,

JAMES LEGGE.

London, June 28, 1875.

THE OPIUM TRADE.

(To the Editor of the *London and China Telegraph.*)

SIR,—The debate on the Opium traffic in the House of Commons on Friday last appears to have been, on the whole, an able one, as the speakers on both sides kept, with few exceptions, to the subject before them, namely, the Government monopoly in India; and the arguments amounted on the one side to the assertion that the Opium revenue, as at present raised, is an absolute necessity; while on the other side the demoralising influence of the drug, both in China and India, was urged with ability, but in vain.

It is pretty certain that until some terrible pressure of a providential nature shall arouse the Indian Government to abandon the Opium monopoly, things will go on just as they are. Meanwhile, the attempt to cover over the plea of necessity in India by denying the existence of the evil in China will not bear inspection. Public opinion in China condemns Opium smoking as a vice, and the native Christian Churches exclude Opium smokers from their communion. Such being the case, to put Opium in China on a par with beer or tobacco in England is to show entire ignorance of the real evil of Opium smoking. It is possible that the native grown Opium in Western China may be smoked there with comparative impunity, as it is much milder than the Indian drug, but the former is used chiefly for mixing with the foreign article.

The fact is, that this tremendous evil is utterly beyond the control of politicians, or even philanthropists. Nothing but the divine power of Christian life can cope with it, and though this process may be slow, it is sure. Christian missions alone can deal with the Opium traffic, now that it has attained such gigantic dimensions, and the despised missionaries are solving a problem which to statesmen is insoluble. Those, therefore, who recognise the evils of Opium smoking will most effectually stay the plague by supporting Christian Protestant Missions in China.

—Yours faithfully, AN OLD RESIDENT IN CHINA.

London, June 28, 1875.

THE TEA TRADE: PURCHASES IN CHINA.

(To the Editor of the *London and China Telegraph.*)

SIR,—Having a long acquaintance with China, I have watched, with much interest, the transactions in new teas that have just now been entered upon in that country. Briefly, these may be described as follows:—The Hankow market has been opened, and in ten days six steamers have been despatched with sixteen million pounds of new tea. Prices have been about the same as last year. In Foochow the market has been opened at three taels higher than last year.

The allusion to prices in Hankow is somewhat vague, because, to form a proper opinion as to cost, we want to know how many chests have cost over 2s., and how many under that price out of the 170,000 chests. But, judging from former years, we may expect that they are in about the following proportions :—

40,000	chests at from	2s. 6d. to 2s. 10d.
100,000	,, ,, ...	2s. to 2s. 6d.
30,000	,, under	2s.

The opinion here is that these teas are worth about

40,000	chests	2s. to 2s. 4d.
100,000	,, ...	1s. 8d. to 2s.
30,000	,, under	1s. 8d.

showing an average loss of about 4d. per lb. This opinion is based upon present prices. Now the comments that I have heard made upon this news are generally couched in a tone of regret and condemnation. For it is said that these prices are quite unwarranted by the state of the trade and the prices now ruling in London.

But this appears to me to be but a superficial view of the matter; and those who hold it seem entirely to forget that the operators have very great experience to guide them, must be much better acquainted with their own business than their critics can possibly be, and that (as is well known) in calm sound judgment and cautious attention to the proper principles of conducting business they will compare favourably with any other body of men that can be found elsewhere. It would, perhaps, be an invidious comparison to do more than allude to the late lamented failures, and the disclosures that they reveal of the state of trade even in this great city itself, which has been so well characterised as the heart of the commercial world.

In the first place, it must be borne in mind that the crop is undoubtedly *short*. It is true that we have no exact or detailed information on this important point, but we may certainly safely *assume* it. For doubtless the able and experienced men who conduct business in China would never have given prices which clearly show a loss of 3d. to 4d. per lb. on present rates (and *with full supplies* most probably more) had they not clearly foreseen a very considerable deficiency in shipments. And their antecedents are a *demonstrative* proof of this.

It is true that shipments, so far, are quite as large as in former years, but this only shows the far-reaching astuteness of shippers who wisely purchase *before* the scarcity of tea becomes so palpable to everybody as to enhance prices to a dangerous degree. This, I believe, to be the correct explanation of the telegraphic news. Of course it *may* possibly happen that shippers have forgotten their former prudence, and that, though the crop is a short one, yet prices are too high for safety; but this very unlikely change in their conduct must be occasioned by some profound cause; and the only possible one that can be assigned is the desire to stimulate production, thus philanthropically sacrificing their own worldly interests, that we in England may have a sufficient supply of tea to keep down prices to a low level; and for this they would surely deserve commendation rather than censure.

Digitized by Google

But, as I shall show, the supply will *not* be so stimulated; and they are far too astute to be ignorant of this, or to be led away to act in so Quixotic a manner; we may therefore at once dismiss this somewhat Utopian course of conduct from our further consideration.

I believe that there is a general expectation on the part of the dealers that they will be able to obtain teas almost for nothing, in consequence of the large quantity coming forward simultaneously. But I cannot believe that they can seriously entertain any such expectation, however they may endeavour to influence the market by their remarks; for men possessed of their shrewdness and intelligence must really be in a state of great anxiety as to the prices they may have to pay, when they consider the vast alteration that has of late obtained in the trade; and the large orders that they are reported to have themselves sent out to China, for investment on their own account, fully confirm my opinion.

It is quite true that, formerly, a large simultaneous import necessitated forced sales on the part of needy holders; but now that the trade is exclusively in the hands of wealthy capitalists (who, if they wanted it, could have the support of that unlimited credit which large capital can *alone* command), teas will no doubt be firmly held; and importers will be able to rule the market in a manner that has been impossible for many years.

The careful manufacture that teas now undergo is another point to be considered. Formerly, if an importer could, financially, afford to hold teas, he was deterred from doing so by the deterioration that they experienced from being kept. But now that such care is taken in the preparation that tea is actually better after it has been kept for twelve-months than when it was fresh, there is great encouragement to hold; because, even should the expectation of improvement in the market be disappointed, the superior quality acquired by the tea will, at all events, pay the expense and interest of money incurred by keeping it.

As I do not by any means wish to overstate the case, I must here notice an objection that may be made, viz., that the high prices that have just been paid in China will certainly induce a large manufacture. This would undoubtedly be true in many cases, but as the objection omits the most important ground upon which to form an opinion, the deduction is quite fallacious, and I must therefore beg leave to call it a perfect cavil.

Allow to the argument its full force, it must be remembered that the production of tea depends upon season, weather, &c.; in fact, upon all the causes that affect every vegetable production. Now (as we have seen) that it is an *established fact*, that, from whatever cause, the production is this season deficient, it is clear that the stimulating effect of high prices will be inoperative, simply from having nothing to work upon.

On a review of the whole subject I very much fear that we shall find that there will be so great a falling off in the supply from China as to cause a considerable advance in the price to the consumer; and it seems therefore a pity that Sir Stafford Northcote should not have been able to see his way altogether to abolish the tax upon an article which has now become almost a necessary of life, and thereby counteract the danger apprehended, and assist the advent of the cheap breakfast table, which has been so long advocated by our most enlightened statesmen.

I am glad to observe that there is likely to be a larger importation of Indian tea, which will to a small extent supply the deficiency. I may as well add another hopeful item, to complete my view of the subject. The losses of tea cargoes have been very numerous during the past few years; and as, *of course*, this will certainly cause greater care to be taken in the loading and management of vessels, we may expect that there will be less to deduct from the supply on this account.—Yours faithfully, OLD CHINA.

London, June 29, 1875.

THE CHINESE AND HOW WE TREAT THEM.

(To the Editor of the *London and China Telegraph.*)

SIR,—At the present remarkable time in our intercourse with China, when she seems being provoked to jealousy by the progress of her inferior neighbour, Japan—when she is rubbing her eyes in order to see clearly what is needed to put her on an equal footing with Western nations—when her messengers are in England studying the operations connected with our coal mines, in order to open up the long-closed treasures of the Flowery Land—when Chinamen are to become our sailors, and perhaps our domestic servants—when Western learning is to be introduced into China, and a Professorship of Chinese established at Oxford—in short, when there is a growing interest among scientific, commercial, and philanthropic men in the rising importance of the Celestial Empire—it seems an imperative duty to consider what is most needed, what more can be done to render our relations with the Chinese thoroughly satisfactory? In directing thoughtful attention to this great question all who can should help. In helping, each should as far as possible take a comprehensive view of all the circumstances of the case. It may be natural, but it is not safe for representatives of Her Majesty's Government, of the Royal Navy, of the Imperial Customs, of the Press, Chinese and English, and of missionary societies, to study the salvation of the country from a private or self-interested point of view. Maudlin friends must not argue that the Chinese, abstaining from strong drink, are better than our own countrymen, or that at least it only needs the desirable object of suppressing the nefarious Opium traffic once gained to secure the salvation of the Empire, and that in fact the reformation of a third of the human family is an easy matter; nor, on the other hand, must open foes, whether suffering from Chinese smartness, or forgetting the injunction "Freely ye have received, freely give," take a position of implacable hostility against the natives. We need, first of all, to understand the people better. Decided opposition was manifested the other evening by speakers in the House of Commons, to judging of the state of things in India merely according to our English ideas; the same objection holds good in regard to China. The Englishman goes out to China with very little concern to fit himself for intercourse with the people; he is full of the thoughts and feelings peculiar to his own country, and does not pause to consider whether it is possible that there may be manners and customs strangely different from his own, yet not less useful, at least for those who adopt them. He is pugnacious, and, so, when with difficulty understood in a language he has taken little pains to learn, he is inclined to fume and storm, and let the unhappy native feel the weight of his hand or foot. That the Oriental is not of a logical turn of mind, is free and easy, wants to be away at his home at some frequent birth, marriage, or death, and has the unfortunate habit of lying, does not occur to him till he is surprised into a passionate outbreak, which timely precaution might have obviated. During many years in China, I have observed that *there are* merchants and business men who, by an acquaintance with and adaptation to the native mind, succeed better. These do not scorn the people, they do not wish them "swept from the face of the earth," but perceive that what they need to make them a noble people is an *education in morality*. The question then arises: How can this be secured?—how can the insatiable greed of the people be checked? How can they be made honest and truthful? How can those superstitions, such as ancestral worship, which make them refuse to amalgamate with other peoples and hurry home with their money to die at home and be buried in connexion with their own family, be removed? How can they be made *unwilling* to ruin their constitution and cut off hope of offspring by Opium? Having many personal friends amongst the Chinese, and being considerably interested in the progress of the whole people—I should welcome any answer to such questions; so far as I can see, the answer is not to be found in the "force," however valuable that may be, which our Government brings to bear on the natives to secure the fulfilment of the Treaty. We cannot *force* men to become truly upright in their dealings. Our commerce, again, indicates no influence superior to that which already actuates the Chinaman—regard for money-making. The trustworthiness of foreigners, in consideration of which they are placed in responsible positions in the Imperial Customs, impossible to the cheating native, is surely calculated to teach a lesson! The admiration of our British rule in the Straits Settlements, awakened in Chinamen, who have experienced the benefits of it, and make it known throughout the country on their return, naturally inclines the people to us, and leads *them* to long for such *just* Government as we enjoy; while the honourable and upright characters, combined with highmindedness and intelligence, of some of our fellow countrymen are always appreciated by every observing native. Still, all these beneficient influences are circumscribed, and to weaken their influence is the baleful effect of our Opium-traffic, in the mind both of those who are injured, and of those who see their fellow countrymen injured. Hundreds of times, when conversing with the natives concerning our being their well-wishers, have I been met with the objection, that in view of our self interest, we were trying to injure them—to poison them by the Opium! How, *then*, can we counteract this ill-fame, and convince them that we are not merely selfish men sinking down to their level, in one point at least, viz., by carrying on our trade and commerce simply with the desire of enriching ourselves at their expense? Perhaps we may find an answer by searching for the most potent influence for developing true morality in our own country. What is this, if not Christianity, showing itself in a variety of institutions for reducing depravity, and obviating that consequent misery which makes the sufferers parasites on Society? It would seem, then, that from *policy* (not to speak of the *benevolence* for which our country is famous) we should endeavour to impart to the Chinese those same enriching and ennobling influences of wisdom and goodness which have made our country what it is. We should encourage and seek to promote all sincere and intelligent efforts, to instruct the mind and purify the heart of the Chinese people—the *people*, because, in the present state of feeling towards foreigners of the gentry and ruling classes it can hardly be expected that instruction coming from us will work so effectually downwards as upwards. In this way political complications are avoided, according to the desire felt and acted on by Protestants. I will only add that my experience in China leads to the conclusion that the representatives of Christian churches in this country are in no small degree successful in making Chinamen better men,—more enlightened, less prejudiced—willing to employ their money, to pay for the mental and moral instruction given by native teachers trained in the mission schools—willing to give up their degrading superstitions, and to learn to speak the truth; and, I repeat, all such work should be encouraged from policy, if from no higher motive.—Wishing that your valuable paper may be more thoroughly appreciated and more widely circulated, I am, dear Sir, yours truly,

June 29. A LOVER OF CHINA.

BURMAH AND CHINA.

(PALL MALL GAZETTE.)

It becomes a serious question what ought to be done. So far, apparently, there has simply been a demand on the part of Her Majesty's Government for inquiry, and the issue of a Commission to take evidence on the spot. It was probably necessary to do so before making specific demands for satisfaction. At first it seemed doubtful whether in this initiatory proceeding we had been careful that the character of the Commission should mark the gravity of the subject-matter. The Chinese official appointed to accompany the British minister's two delegates was a man so destitute of rank or position as to suggest the inference that he was sent as a kind of courier. All mistrust on this head is now dissipated by the appointment of a high and responsible official to represent the Emperor of China on the Commission. Both the Foreign Office and Her Majesty's Minister at Peking are fully alive to the importance of this matter, and all due care has been taken to secure inquiry in good faith, and prompt satisfaction thereafter. Indeed, the telegraphic notice that has now reached us, of the agreement entered into by Sir Douglas Forsyth with the King of Burmah, seems to indicate an intention on the part of the British Government to obtain, as ultimate satisfaction, direct access to Western China from British territory in Burmah. The King's agreement to allow the passage of British troops through his dominions at any time points that way

Digitized by Google

A foul act of treachery and murder has been committed, an attack has been made on British envoys and their escort under a safe pass in time of peace, and the demand for redress should include free access into the Chinese province of Yunnan. No doubt the punishment of the responsible agents and the actual perpetrators of the outrage will form a first condition. But here it is to be hoped that the British Government will cease to follow a series of bad precedents, and decline to be satisfied with blood-money for the life of a British subject. It may be right that a money compensation should be made to the family of Mr. Margary; if so, let it be paid by the British Government, in whose service he fell; but do not let the nation lay itself open to the contempt of an Asiatic people by accepting money for life treacherously taken by official order. There are other ways—and better ways—of making the Chinese understand that they cannot be allowed to indulge in acts of bad faith, involving the lives of British officers and insult to their flag. It may cost us some display of force to obtain all that we may rightly exact; but we had better accept this alternative than lower ourselves in the eyes of an arrogant and treacherous Government, who not unnaturally take their estimate of the value of a foreigner's life, or the power of a foreign State to command respect, from such occasions as that with which we are now dealing. It would be an utter mistake, probably a dangerous mistake, to allow the Chinese Government to make its peace by any satisfaction short of the surrender to justice of the perpetrators of the murder; the absolute disgrace of the Governor of Momein and his delegates in command of the attacking force; and the total removal of all impediments on the Chinese frontiers of Yunnan to the passage of our traders and their merchandise. To accept less would be to lay the foundation for renewed injuries and future war. It is time the Chinese should learn that their desperate efforts to close their vast inland frontiers to trade can no longer be persevered in. Russia, along its 2,000 miles of conterminous frontier on the north, has long ceased to submit to such exclusion; and neither Great Britain nor France can be kept out from the south-western borders, to which their territories are almost contiguous. The French already, by the Sankoi River, recently discovered and navigated, have gained access to the province of Yunnan; and the British must equally be admitted across the Shan Hills, or whichever may prove the most direct trade route from their own territories in Burmah. The time has come to insist on this.

(DAILY NEWS.)

The intelligence from Burmah contained in telegrams from Allahabad is unfavourable. The statement of a previous telegram that the King had promised to permit the passage of British troops through his territory is now contradicted. In noting this announcement upon its first appearance we were the first to point out that it formed no part of the official intelligence from Simla which was published simultaneously with it. It is now stated that the King absolutely refuses to permit the passage of troops through his dominions, and that Sir Douglas Forsyth consequently has returned to Rangoon. We must not be surprised at the difficulties our Envoy has encountered. It was easy enough for the King to give "explanations" concerning his reception of the Chinese General, Leeseetahi, and to disclaim all complicity in the attack upon Colonel Browne's expedition, but he is now called to make a choice which will determine the future relations in which he will stand on the one side to the British Government, and on the other to that of China. Since the last war between Burmah and this country the Chinese Government has conducted military operations in his neighbourhood with a considerable degree of success, and reduced provinces which had been independent of it for twenty years. This consideration, joined to his own views of self-interest, probably weighs with him, and it is believed that the Chinese Government has done its utmost to induce him to refuse Sir Douglas Forsyth's request. It would, however, be premature to speculate upon the future. Sir Douglas Forsyth's return to Rangoon suggests that the negotiations have been broken off; but they may be renewed before the season arrives for bringing military pressure to bear upon the Burmese Government; and perhaps when the Chinese perceive that we are determined to gain access to their Western provinces they may give reasonable counsel to their ally.

Monetary and Commercial.

We regret to announce the failure of Messrs. Gregson and Co., one of the oldest firms in the India and China trade. The liabilities on acceptances, &c., are trifling, and for many years their business has been very contracted. Sir William Baynes, a director of the Oriental Bank, left the firm last year.

We have also to announce the stoppage of Messrs. Kilburn, Kershaw and Co., a firm actively and extensively engaged in the silk trade. The partners have enjoyed a high character for many years, and their failure must be attributed to the system of advances to principals who are unable to make good the losses incurred of late on silk. The liabilities are computed at £500,000. The partners were Messrs. W. Kershaw and H. W. Kilburn, and there was no connection with the firms of Schœne Kilburn and Co. nor E. D. Kilburn and Co. Subjoined is the formal announcement of the suspension:—

We regret having to announce to you the suspension of Messrs. Kilburn, Kershaw, and Co., of No. 28, St. Mary-axe, silk and piece goods brokers. They have placed their books in the hands of Messrs. Turquand, Youngs, and Co., who will at once prepare a statement of their affairs. —With reference to the suspension it is our duty to announce that the only connection between such firm and that of Messrs. E. D. Kilburn and Co., who carry on business at the same premises as East India merchants, is one of relationship between some of the partners in the respective firms. The business engagements of Messrs. E. D. Kilburn and Co. are entirely distinct, and in no way affected by this suspension.—Yours obediently, LATTEY and HART.

A circular has been issued announcing the failure of Messrs. Edmund Jones and Co., East India merchants, of King William-street, consequent on the failure of Messrs. Collie and Co. The liabilities are estimated at £120,000, and the assets are considerable, but their value has not yet been ascertained. The firm had extensive trade connections with Burmah and China.

The suspension of Messrs. Da Costa, Raalte, and Co., merchants, of London and Manchester, is also announced. The firm had correspondents at Alexandria, and is understood to have failed through giving too much of its attention to Egyptian finance and other speculative business, which has not turned out well.

In reference to the failure of Messrs. Kilburn, Kershaw and Co. we have received the following circular:—

I beg to inform you that I have this day established myself as an East India Broker. I have had twenty-three years' experience in the Raw Silk and Silk Piece Goods trades, and have for the last fifteen years acted as Silk Inspector to the late firm of Kilburn, Kershaw, and Co. I venture therefore to hope that I may receive your kind support.

JOHN KERSHAW.

A list of the principal creditors of Messrs. R. Benson and Co. is given in the statement presented to the Court of Bankruptcy. The total liabilities, secured and unsecured, are reckoned at £750,000, and the chief creditors are: S. Mendel, Manchester, £55,259; H. and D. Anderson and Co., £46,124; Aberdare Iron Company, £17,222; Alexanders, Cunliffe, and Co., £15,429; Dod, Kerr, and Co., £15,094; D. Stewart and Co., Liverpool, £8,000; and J. and A. Leigh, Preston, £9,500. The others are very numerous, but for smaller amounts, and are chiefly in Manchester, Birmingham, Sheffield, Liverpool, and Staffordshire. It is stated that the above list does not give a correct impression of the nature of the liabilities. The sums stated are, in many cases, only indirect liabilities to discount houses on acceptances by banks and high-class firms, the whole of which will run off by payment at maturity in regular course.

At the annual meeting of the Ceylon Company (Limited) the directors' report, which was agreed to, stated that the available balance after payment of the interim dividend in December last was only £7,338, out of which a dividend was declared at the rate of 3 per cent. per annum, free of income,-tax, leaving £1,570 to be carried forward.

The profit and loss account of the Jorehaut Tea Company (Limited) for 1874 shows a credit balance of £18,345, equivalent to a net profit of £21 18s. on the paid-up capital. To this was added £6,092, brought from the previous account, making in all £24,437 available for division. Out of this a dividend of 10 per cent. was paid in January last, and it is now proposed to pay a further dividend of 12 per cent., making 22 per cent. for the year.

The directors of the Moyar Coffee Company have declared a dividend of 12 per cent. for the year ended the 31st of March last.

The official liquidators of the London, Bombay, and Mediterranean Bank (Limited) have, with the sanction of Vice-Chancellor Hall, declared a seventh dividend of 1s. in the pound (making 8s. 6d. in the pound).

Mr. McLean has resumed charge of the London Branch of the Hong Kong and Shanghai Bank. Mr. Jackson, lately acting manager, proceeds to China shortly.

A circular has been issued, announcing the liquidation of the firm of Sam Mendel, of Manchester, and that the business will be carried on in conjunction with that of Messrs. John Siltzer and Co.

The deliveries of tea from the bonded warehouses in London during the week ended the 26th ult. amounted to 3,015,097 lb., of which 1,907,054 lb. was for home consumption, 587,041 lb. was removed coastwise, 461,946 lb. was exported, 53,725 lb. was removed coastwise for export, and 5,331 lb. was for ships' stores. The duty received was £47,676, or 7 per cent. less than in the previous week.

The Times prints the subjoined remarks upon the position of the Silk trade:—

The peculiarly depressed position of the silk trade has special interest at the present moment. Throwing a glance over the average prices ruling at this period of the past four years, we find that the quotations for the current qualities of East Indian descriptions are now less than one-half what they were on the 1st of July, 1872, over 40 per cent. less than those of 1873, and about 20 per cent. less than those of last year; while in Chinese and Japanese sorts the diminution is not quite so marked as compared with last year, but about 30 per cent. less than in 1872 and 25 per cent. below the prices of 1873. Although lately signs were apparent of a revival so far as the manufacturing districts are concerned, and a pretty good demand existed for the lower classes of the raw material, it is patent that it arose more from the reduced prices ruling than from any general improvement, and recent events show that the losses sustained by importers have been large and continual. The imports of raw silk, according to the Board of Trade returns, were for the first five months of the present year 1,566,316 lb. from all countries, against 1,872,250 lb. and 1,992,612 lb. in the corresponding periods in 1874 and 1873 respectively, thus showing a diminution in quantity of 16 per cent. as compared with last year, and 27 per cent. as compared

Digitized by Google

with 1873, while the declared value has been 34 per cent. less than that of 1874, and 44 per cent. less than that of 1873. These facts, added to the continued steady advance in the value of the manufactures of silk imported, which have increased during the present year about 14 per cent., go far to prove the wisdom of the course pursued by those firms who have of late curtailed their business relations in this department of trade with the East. Not only in silk, but in tea, is it asserted that ruinous losses have been encountered, and the depreciation in various qualities of tea has been sufficient of itself entirely to absorb the profit which may have arisen from other sources.

The amount of bullion per P. and O. steamer *Mirzapore*, from Southampton on the 1st inst., was—in gold, to Galle, £66; in silver, £74,300; to Penang, £3,935; to Singapore, £68,400; total in gold, £66; in silver, £146,635.

The market for Bar Silver became somewhat weaker when the recent arrivals came to hand, and 55¾d. per oz. standard was the price realised for them; at this rate a Continental demand was strong enough to clear off all amounts offering. Mexican Dollars to the amount of £80,000 have been sold at 54 5-16d. per oz.

ARTICLES OF IMPORT.

Extreme quietude has been again the pervading feature of the Produce Markets. The business done in all articles—with the exception of Coffee, which has been, comparatively, fairly active—has been on an extremely limited scale, and wholly insufficient to test values.

TEA.

The stock of Tea in bond on 30th ult. was 50,000,000 lbs., being 5,000,000 lbs. less than the estimate given in the issue of Feb. 15, and under ordinary conditions this satisfactory statistical position, the smallest figures for very many years, would have afforded a brilliant reception to the new season's country Congous, had shipments been sent forward with some regard to the requirements, and at a range of prices to encourage buyers to act with confidence. As the position now stands, the prospects cannot be even hopeful to importers, of whom there appear to be more outsiders on the scene than for some seasons past, if reports are correct, of Germans being large operators, who know but little of home trade requirements, and also a syndicate, comprising wholesale dealers who, when the "weight note" agitation existed, sent large orders to China, apparently fearing a scarcity; but the producing power of the Chinese has been so much encouraged during the past few years that there need be no alarm of a short supply for the Season 1875-76, especially during a continuance of the high range of prices ruling in China.

Further heavy supplies of Canton teas are at hand, and doubtless this accounts for the decline in Scented Caper of another ½d. per lb. during the past week; the shipments of this class alone from Canton being reported at over 1,750,000 lbs., and though the home consumption continues highly satisfactory, the stock on 30th June showed unfavourably, being 3,400,000 lbs., or five months supplies with unprecedented heavy shipments of new leaf afloat. Green Tea sells at ruinously low prices, and it is not too late for buyers in China to desist operating until something definite is learnt as to the new Adulteration Act. Consumption has doubtless been kept up by the low prices, but there is a growing opinion it will eventually be driven out of general consumption by Indian tea.

Congous.—Red-leaf kinds: In Siftings there is nothing doing. Broken-leaf and fair common to good common, rather dusty, have been sold at 9¾d. to 10½d. Good common, free from dust, may be quoted 11d. to 11½d. per lb., with small demand. Fair to good and fine Kaisows are very scarce, and first arrivals of new season's will be in a favourable position. Finest are only saleable at low rates. Black-leaf descriptions: Common to good common are much depressed in value, but are fairly saleable at 9½d. to 10½d. per lb. Fair kinds are only saleable at low rates, say 11½d. to 1s. 0½d. per lb., and good third crop Oopacks, with a little quality, sell with difficulty at 1s. 1d. to 1s. 1½d. per lb. Good medium to fine are scarce, and first arrivals of new season's at 1s. 6d. to 1s. 8d. will meet with a ready sale. Finest have been forced off, to close accounts, at very low prices; Teas which on arrival were worth 2s. 2d. to 2s. 8d. per lb., selling at 1s. 8d. to 2s. per lb. Canton-make kinds: Further arrivals of common to fair have been realised at 11½d. to 1s., medium to good at 1s. 1d. to 1s. 3d., showing a reduction of about 1d. per lb. on our last quotations. Fine have maintained their value, the few in recent arrivals selling at 1s. 6d. to 1s. 7d. per lb. Oolongs, Souchongs, and Flowery Pekoes show no change. *Scented Teas.*—Canton Capers, of old import, have been forced off at auction at very low rates, common to fair quality selling at 7½d. to 9½d. per lb., and good to fine at 10½d. to 1s. 1½d. per lb. A few parcels of new season's have realised unsatisfactory rates, quality being indifferent. Orange Pekoes show no material alteration. In Foochow Scented Teas business has been unimportant. *Green Teas.*—There is nothing of any importance to note in the business of the past fortnight, sales by auction, without reserve, supplying current requirements, and keeping prices down.

SILK.

Messrs. Durant and Co.'s Circular says:—The periodical public sales commenced on the 22nd ult., and are concluded. The quantity offered was about 1,000 bales Bengal Silk, 4,500 bales China, 1,600 bales Japan, and 600 bales Canton silk, with about 40,000 lb. English Thrown Silk, of which nearly the whole of the Bengal and Canton Silk, fully two-thirds of the Japan, and the whole of the English Thrown Silk and half the China Silk were printed to be sold without reserve or taxed at prices generally below market quotations—in some very few cases only were the tax prices above market values. The result has been much as might have been anticipated. The China and Canton Silk and the English Thrown Silk sold generally at about previous rates, but the mills are so fully occupied with China Silk that the biddings for the Bengal Silk, with the exception of a few of the better parcels of Filature Silk were very unsatisfactory, and for the native Filatures especially so. All the Japan Silk that was taxed, and this was fully one-third of the whole, was refused at the tax prices, while the rest sold at prices barely equal to the lowest rates established previously to the public sales, so that the report of the business may be summarised thus:—The whole thing has gone heavily, but speaking generally without material change of prices.

COFFEE.—There has been no appreciable change in the market, and the public sales have passed off with fair spirit, prices ruling at about previous valuations for all descriptions. Plantation Ceylon has sold, coloury small and low middling at 99s. 6d. to 103s., middling to good middling at 104s. to 107s., and bold at 109s. 6d. to 114s., greyish and palish small to low middling at 96s. 6d. to 99s. 6d., middling to good middling at 102s. 6d. to 105s., bold at 106s. to 108s., peaberries at 123s. to 127s., triage at 84s. 6d. to 87s.

COCOANUT OIL.—Transactions have been restricted. Ceylon is quoted £37 5s. to £37 10s., Cochin, £41 10s. to £43 15s. per ton.

COTTON.—The market has been very dull and depressed, and prices show a downward tendency.

PEPPER.—There is no quotable change in prices, and the market has been quiet. Of *Black* 628 bags Singapore 479 bags sold at 5½d. to 5⅝d. for good to fine, and 5⅛d. to 5⅜d. for damaged; of 2,775 bags Penang 444 bags sold at 4⅝d. per lb. for common. Of 481 bags Singapore *White* 188 bags sold at 7d. for bold bright but rather mixed, and 6¾d. to 6⅞d. for brown and brownish.

RICE.—The tone of the market has continued very quiet, and no sales have transpired either on the spot or afloat.

SUGAR has remained very dull during the week. The only sale of East India has been 400 tons Ilo Ilo at 16s. 6d. per cwt.

SPICES.—*Cinnamon:* 15 bales Ceylon sold at 2s. 7d. to 3s., and 182 bales chips at 5d.; 15 bags broken quill bought in at 1s. 10d. per lb.

Digitized by Google

Cassia: 12 bales Padang sold at 31s. to 38s. per cwt. *Cassia Buds:* 243 boxes China bought in at £5 10s. per cwt. *Mace* has been sold rather cheaper. 12 cases red Penang sold at 2s. 3d., slightly mouldy at 2s. 2d. *Nutmegs* have been sold without material change. 14 cases Penang brown slightly mouldy, average 66 nuts to the lb., at 4s. 2d., 71's to 70's at 3s. 11d. to 4s., 77's at 3s. 8d., and limed 144's at 1s. 11d. to 2s.

SHELLS.—The auctions which were held on the 29th ult. passed off very flatly. Tortoiseshell was only saleable on lower terms. Mother-o'-Pearl Shells also went heavily at reduced rates, Bombay frequently 10s. to 15s., and Manila 10s. to 20s. per cwt. lower. *Tortoise:* East India sold at 12s. 6d. to 17s. 6d., very low at 7s. 6d. per lb. *Mother-o'-Pearl:* 39 cases Macassar were bought in at £17 10s.; 49 cases Manilla partly sold, good and fine large at £11 to £12 2s. 6d. *Other Shells:* 692 baskets Green Snail partly sold at 11¾d. for fine large, 8¼d. to 8¾d. for good bold, 5¼d. for medium, 3¼d. to 3¼d. for small; 935 bales 97 cases Japan Ear bought in at £23 10s. per ton; 10 cases Murex sold at 2s. per dozen.

SAGO has been dull; 100 bags medium sold at 16s., one lot at 16s. 6d. Of 432 bags large sound, 18 bags out at 18s.; rest damaged sold at 12s. to 15s. 6d. for third to first class. *Flour:* 606 bags bought in at 12s. 9d. to 14s. per cwt.

TAPIOCA.—Twenty bags Pearl sold at 20s. per cwt. for medium white; 16 packages flake at 2d. to 2½d. per lb.

FREIGHTS AND CHARTERS.

Current Rates of Freight for Vessels on the Berth.

Per STEAMERS VIA SUEZ CANAL.—To Yokohama: 55s. weight, 50s. to 55s. meast. To Hiogo: 55s. weight, 60s. meast. To Nagasaki: 70s. weight, 70s. meast. To Shanghai: 45s. weight, 40s. meast. To Hankow: 60s. weight, 55s. meast. To Hong Kong: 45s. weight, 40s. meast. To Singapore: 45s. weight, 40s. meast. To Penang: 45s. weight, 40s. meast. To Colombo: 35s. weight or meast. To Batavia: 60s. meast. To Samarang: 65s. meast. To Sourabaya: 70s. meast.

Per SAILING VESSELS.—To Yokohama: 40s. weight, 30s meast. To Hiogo: 40s. weight or meast. To Nagasaki: 50s. weight, 40s. meast. To Shanghai: 30s. weight, 25s. meast. To Hong Kong: 30s. weight, 25s. meast. To Singapore: 25s. weight, 20s. meast. To Penang: 25s. weight, 20s. meast. To Batavia, Samarang, and Sourabaya: 20s. to 25s. weight, 25s. to 30s. meast. To Colombo: 25s. weight, 22s. 6d. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne, per keel—To Yokohama: £33. To Shanghai: £32. To Hong Kong: £26. To Singapore: £23. To Penang: £23, f.c. To Colombo: £23. To Galle: £23. To Batavia and Sourabaya: 23s.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama: 32s. 6d. To Shanghai: 30s. To Hong Kong: 27s. To Singapore: 23s. To Colombo: 24s. To Galle: 24s. To Batavia and Sourabaya: 23s.

From Birkenhead, per ton.—To Hong Kong: 25s. To Shanghai: 30s. To Singapore: 19s. To Batavia and Sourabaya: 23s. To Galle: 21s.

CASUALTIES.

MAURITIUS, MAY 27.—The Maria, De Jong, from Samarang, for Rotterdam, put in here on the 3rd inst., and reports having experienced very severe weather on April 16 in 15 S. 88 E., lasting ten hours, which caused the vessel to spring a leak, making nineteen inches of water every two hours, and lost mainsail, &c.; on 24th bore up for this port, where she made from four to five inches per hour in still water. About 2,000 canisters of sugar, and 5,000 bags of coffee, have been discharged; of the latter 600 bags were sea damaged, and have been sold at auction; a further quantity will be sold shortly; vessel will have to go on patent slip to be surveyed.

MISCELLANEOUS.

GIBRALTAR.—Passed, June 19, Madura (str.), from Batavia, for Nieuwe Diep; 20, Koning der Nederlanden (str.), from Nieuwe Diep, for Batavia; 29, Glenartney (str.), from Hankow, for London.

NAPLES.—Arrived, June 25, Conrad (str.), from Batavia, and left same day for Amsterdam.

PORT SAID.—Arrived, June 27, Glenearn, from Hankow, and left for London; Holland, Koningder Nederlanden, both from Nieuwe Diep, and left for Batavia; 30, Flintshire, from London, Ulysses, from Liverpool, both for China.

SUEZ.—Arrived, June 26, Fleurs Castle, from Hankow, and proceeded for London; Deucalion, Bengal, both from Hankow, and left for London.

HONG KONG, JUNE 25.—The steamer Carisbrooke, which was seized by a Chinese gunboat off the Hainan coast, on suspicion of being engaged in smuggling, is reported to have been released, security being given to the value of the ship and cargo—viz., $340,000—pending reference to Peking.

HOLLOWAY'S OINTMENT

Mr. J. T. COOPER,

In his celebrated TRAVELS IN CHINA, published in 1871, says:—

"I had with me in my travels a quantity of "Holloway's Ointment. I gave some to the people, "and nothing could exceed their gratitude: and, in "consequence—milk, fowls, butter, and horse-feed "poured in upon us, until at last a teaspoonful of "Ointment was worth a fowl and any quantity of "peas, and the demand became so great that I was "obliged to lock up the small remaining stock."

This fine OINTMENT is invaluable in the cure of BAD LEGS, BAD BREASTS, OLD SORES, wounds, ulcers, gout, rheumatism, and all skin diseases.

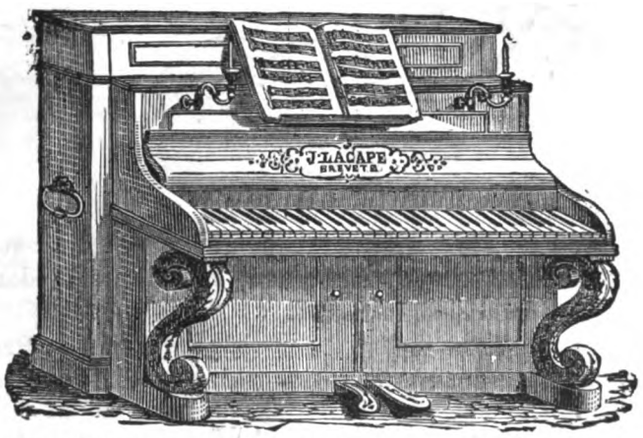
AUTOMATICAL PIANOS.

(NEW INVENTION.)

J. LACAPE,

29 BOULEVARD ST. MARTIN. PARIS.

These Pianos play of themselves, without the aid of a handle, and render every kind of written music desired, without having to be touched. They have a key board of seven octaves, which can be played on, if desired, in the same way as an ordinary Piano, being constructed in exactly the same manner.



ENGLISH AND AMERICAN VISITORS TO PARIS are respectfully invited to hear this most wonderful and unique invention daily, from Twelve to Four.

London, July 3, 1875.

GRATEFUL—COMFORTING.

EPPS'S COCOA.

BREAKFAST.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, nd by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—See article in the *Civil Service Gazette.*

Made simply with boiling water or milk.

Sold in packets (in tins for abroad) labelled:—

JAMES EPPS & CO.,

COURVOISIER'S BRANDY

THIS celebrated Brandy is highly esteemed for its purity, delicacy of bouquet, and softness of flavour. It is used in preference to any other in many of the leading Paris and London Clubs.

It was the only one supplied to his late Majesty Napoleon III.

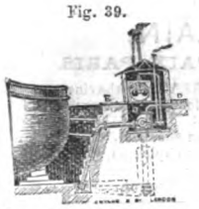
It has also met with the highest approval wherever it has been shipped, and the Proprietors are able to refer with pleasure to the recognitions of its superiority which reach them from every part of the world.

CAN BE OBTAINED THROUGH ANY MERCHANT.

GWYNNE and Co., Hydraulic and Mechanical Engineers,

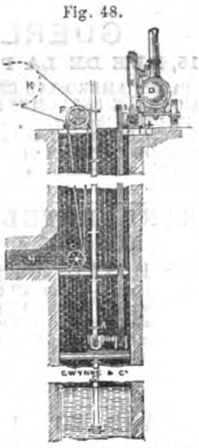
ESSEX STREET WORKS, STRAND, LONDON, W.C.

Fig. 39.



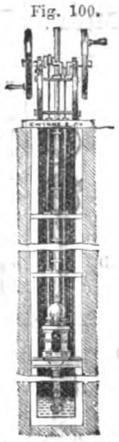
GWYNNE & CO.'S PATENT PUMPING MACHINERY, AS APPLIED TO EMPTYING DOCKS.
The whole arrangement very compact and self-contained. References to many applications combining unparalleled efficiency with moderate first cost will be given

Fig. 48.



GWYNNE & CO.'S IMPROVED PATENT CENTRIFUGAL PUMP.
Fixed in a deep well, mine, or coal-pit, and driven by a portable or fixed engine fixed on the surface of the ground. Can be had of all sizes, and capable of raising any quantity of Water adapted for ordinary or For Hand-power, most careful construction, and on the most approved system

Fig. 100.

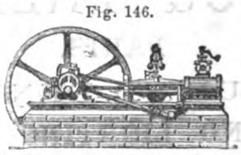


GWYNNE & CO.'S IMPROVED DOUBLE BARREL DEEP-WELL PUMP,

Fig. 86.

GWYNNE & CO.'S IMPROVED CHAIN PUMP, WORKED DIRECT BY STEAM ENGINE.
These Pumps work without valves or packing, and raise a considerable quantity of water. They will lift sand, mud, or grit without choking, and require only very inexpensive repairs.

Fig. 146.



GWYNNE & CO.'S IMPROVED HORIZONTAL HIGH-PRESSURE STEAM ENGINE.
With or without Expansion Gear, for economical working.
From 4 to 100-horse power

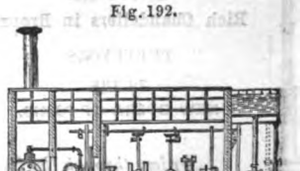
Fig. 154.

GWYNNE & CO. IMPROVED CORNISH BOILERS WITH DOUBLE FLUES.
These boilers are simple and compact They are proved by hydraulic power to double the working pressure, are got up with the greatest care, and none but first-class materials are used in their construction. Estimates given for any size or shape of boiler

Fig. 142.

GWYNNE & CO.'S IMPROVED PORTABLE STEAM ENGINE.
Light, simple in construction durable, and economical, and very superior to "Agricultural" Engines.
From 2½ to 30-horse power

Fig. 192.

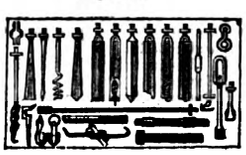


GWYNNE & CO.'S IMPROVED MACHINERY FOR PRESSING OIL FROM SEED, OLIVES, FAT, &C., &C.
The above shows an arrangement for a seed oil mill, and comprises, besides the requisite motion power, a crushing mill, pair of runners, heating apparatus, hydraulic press, and pumps. A Centrifugal Pump is added to lift water or any purpose required.

Fig. 193.

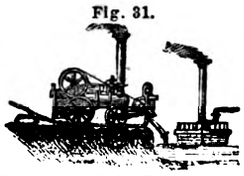
GWYNNE & CO.'S IMPROVED HYDRAULIC LIFTS.
Worked by the supply from a tank at the top of the building, or from main pipe of any water company's supply. Well adapted for lowering wine, or other produce, into or up from cellars, or may be modified for lowering bankers' and jewellers' safes into the strong rooms. The waste water runs into the sewer.
Prices on application.

Fig. 121.



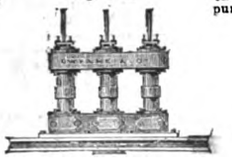
GWYNNE & CO.'S BORING TOOLS.
Of greatly improved construction. The figure represents those most frequently used, but the form and number vary much with the nature of the soil, and size of the bore hole.
G. & Co. can confidently recommend these as the best in the market.

Fig. 31.



GWYNNE & CO.'S PATENT PORTABLE PUMPING ENGINE AND FLOATING IRRIGATOR.
In which the Pumps are furnished with hose for distributing the water over the adjoining plantations. Made in all sizes.

Fig. 105.



GWYNNE & CO.'S IMPROVED TREBLE BARREL LIFT AND FORCE PUMP.
These are made with gun metal barrels, copper piston rods, and brass valves. The workmanship and materials throughout are of the very best class, and comparison with those of other makers is challenged. Gwynne & Co. make single and double-barrelled pumps upon the same principles.

Fig. 207.

GWYNNE & CO.'S IMPROVED DREDGING MACHINERY.
The boat can be constructed so as to draw only 18 inches of water, if required. The machinery is extremely simple, yet thoroughly effective, the workmanship and materials are of the first class, and the amount of work it will do, compared with the cost, most favourable

TWENTY PRIZE MEDALS AWARDED TO THIS MACHINERY IN ALL THE CHIEF CITIES OF THE WORLD.

Large Illustrated Catalogue with many Estimates, and upwards of 200 Engravings, post free for Twenty-four Stamps to any part of the world.

TANJONG PAGAR DOCK COMPANY
(LIMITED).

VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all description of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

LONDON AGENTS.
Messrs. MACTAGGART, TIDMAN, and Co., 34, Leadenhall Street.

E. M. SMITH, Manager.

STEAM FROM SOUTHAMPTON TO BATAVIA VIA SUEZ CANAL.—Regular Monthly Mail Service of the STEAM-SHIP COMPANY NEDERLAND, between NIEUWEDIEP and the DUTCH EAST INDIES (calling at Southampton on the outward voyages), under contract with the Netherlands Government, by means of the magnificent Clyde-built steamers (having accomplished the voyage on an average in thirty-eight steam days):—

Prins van Oranje ...	3,000 tons	1,600-h.p.	(effective)
Conrad	3,000 „	1,600 „	„
Koning der Nederlanden	3,000 „	1,600 „	„
Prinses Amalia ...	3,500 „	1,600 „	„
Voorwaarts ...	3,000 „	1,600 „	„
Prins Hendrik ...	3,000 „	1,600 „	„

The VOORWAARTS is appointed to leave Southampton July 13 for PADANG, BATAVIA, SOURABAYA, and SAMARANG, with through arrangements to all the principal ports in the Dutch East Indies. To be followed by the PRINS VAN ORANJE, Aug. 10. Goods taken at through rates from London, Glasgow, Manchester, &c. Passenger fares from Southampton:—First-class, £60; second-class, £34.

Apply to J. RANKINE and Son, Glasgow; or to the General Agents of the Company, KELLER, WALLIS, and POSTLETHWAITE, 16 and 17, King William-street, London, E.C.; 73, Piccadilly, Manchester; and at Southampton.

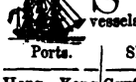
GLEN LINE OF INDIA, CHINA, AND JAPAN STEAMSHIPS.—The undernamed powerful Clyde-built BOATS, specially adapted for the India, China, and Japan trade, are intended to be despatched on their advertised dates for SINGAPORE, HONG KONG, and SHANGHAI, taking goods at through rates for SAIGON, YOKOHAMA, NAGASAKI, and HIOGO:—

Steamers.	Class.	Tons.	Horse-power.	Date of Sailing.
Glenartney	100 A1	2,016	330	July 21
Glencarn	100 A1	2,120	330	To follow
Glenfalloch	100 A1	2,126	275	To follow
Glenfinlas	100 A1	—	—	To follow
Glenlyon	100 A1	2,119	275	To follow
Gleneagles	100 A1	2,120	330	To follow
Glengyle	100 A1	1,676	200	To follow
Glenroy	100 A1	2,121	250	To follow

For terms of Freight and Passage apply to McGREGOR, Gow, and Co., No. 1, East India-avenue, London.

SHORT SEA ROUTE to AUSTRALIA, for First-class passengers only, via Marseilles and Singapore, by STEAMERS of the EASTERN and AUSTRALIAN MAIL STEAM COMPANY (Limited), under Postal Contract with the Queensland Government, leaving every four weeks.

Offices, No. 34, Leadenhall-street, London, E.C.



SHAW, WILLIAMS, and CO will despatch the following high class vessels as under:—

Ports.	Ship.	Class.	Tns.	Dock.	Sailing.
Hong Kong	Gryfe	*AA1	1073	E.I.	With des
Hong Kong	Carricks ...	A1 14 yr.	—	—	To follow
Shanghai ...	Albert Victor ...	A1 13 yr.	858	E.I.	With des
Shanghai ...	Titania ...	A1 16 yr.	879	S.W.I.	To follw.

For Freight or Passage apply to SHAW, WILLIAMS, and Co., 9, Fenchurch-street, E.C.

GELLATLY, HANKEY, SEWELL, and CO., will despatch the following high classed SCREW STEAMSHIPS as under:—

Ports.	Ship.	Class.	Tns	Dock.	Sailing.
Pen., Sing. Hg. K., and Shanghai ...	Teviot.....	100 A1	1946	V.L.D	July 9
Pen., Sing.. Hg. K., and Japan	Lorne ... / Venice...	100 A1 / 100 A1	1614 / 1963	V.L.D. / V.L.D.	July 15 / Aug. 25

For Freight or Passage, apply to GELLATLY, HANKEY, SEWELL, and Co., 1, Fenwick-street, Liverpool; Bridgewater-buildings, Albert-square, Manchester; 51, Pall-mall, S.W., and 109, Leadenhall-street, London, E.C.

Steam via the Suez Canal. Last shipping day, 15th July

FOR YOKOHAMA and HIOGO, calling at Penang, Singapore, and Hong Kong, the splendid Clyde-built screw steam ship LORNE, 100 A1, 1,614 tons gross register, 1,035 tons register, 150-h.p. nominal, 750-h.p. effective; M. J. BUTCHER, Commander; Victoria Docks. This fine high-classed steamer, owned by Messrs. John Warrac'k and Co., of Leith, is favourably known in the Indian trade.

For Freight or Passage apply to GELLATLY, HANKEY SEWELL and Co., 1, Fenwick-street, Liverpool; Bridgewater-buildings, Albert-square, Manchester; 51, Pall Mall, S.W.; and 109, Leadenhall-street, London, E.C.

Steam via the Suez Canal. Last shipping day, 9th July

FOR PENANG, SINGAPORE, HONG KONG, and SHANGHAI, the splendid screw steamship TEVIOT, 100 A1, 1,262 tons register, 1,946 tons gross register, 250-h.p. nominal, 1,250-h.p. effective; W. C. NISBET, Commander; Victoria Docks. This fine high-classed steamer is well known in the India and China trades for her rapid passages.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., 1, Fenwick-street, Liverpool; Bridgewater-buildings, Albert-square, Manchester; 51, Pall-mall, S.W.; and 109, Leadenhall-street, London. E.C.

CHINA

THE following SPLENDID First-class SHIPS will be despatched as under:—

Port.	Ship.	Class.	Dock.	To sail.
Hong Kong	Hopewell ...	A1 14 yr.	W.I.D.	With des.
Hong Kong	Marina	A1 12 yr.	W.I.D.	To follow

THE MAILS, &c.

The French mail, bringing the above advices from China and the Straits Settlements, was delivered, *via* Marseilles, on the 8th inst., being four days early. The next inward (P. & O.) mail, with advices, Yokohama 26th, Shanghai, 30th May, Hong Kong 5th, Singapore 13th June, is due, *via* Brindisi, on Monday next, the 19th inst.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Anadyr*, arrived July 6.—From Yokohama: M. Duplaquet. From Shanghai: Messrs. Jno. Dent, Gale, Dudgeon, Warwick, Graham, Townend, Lunan, Craven, Stafforth, Holen. From Hong Kong: Messrs. Murray, Derrick, Petel, Philp, Ferhmann, Burgalat, Olivier. From Saigon: Messrs. Compain, Monot, Aymonier, Michel, Ohl. From Batavia: The Prince and Princess Radhen-Saleh. From Singapore: Messrs. Robertson, Pye, Simpson, Clarke, De Rojas, Wiselins, Martin, Andina, De Bellecourt, Ying, Nieuvekerk, Mr. and Mrs. Blair, Mr. and Mrs. Bayer, Mr. and Mrs. Combet. From Galle: Messrs. B. Bell, J. Fraser, E. Fraser.

Per steamer *Nestor* (Holt's line), arrived July 9.—From Hong Kong to Suez: Mr. and Mrs. J. C. Wingate, Mrs. Green. Singapore to London: Mr. G. W. Brown, Mr. McIntyre.

Per steamer *Deucalion* (Holt's line), expected to arrive July 13.—From Shanghai: Mrs. Dow, Mrs. Goodwin and three children. From Hong Kong: Mrs. Piersdorff, Mr. Alfred Palmaguist.

PASSENGERS OUTWARD.

Per P. and O. steamer *Malta*, from Venice, July 9.—To Penang: Mr. Jargensen.

Per P. and O. steamer *Khiva*, from Southampton, July 15.—To Yokohama: Mr. S. Mori, Mr. K. Kurobe, Mr. G. Yamada, Mr. S. Matenda, Mr. H. Moudera. To Hong Kong: Navigating Lieut. J. Dixon. To Singapore: Major O. H. A. Nicolls and lady.

Per P. and O. steamer *China*, from Brindisi, July 26.—To Shanghai: Mr. W. H. Tapp.

Per P. and O. steamer *Bokhara*, from Southampton, July 29.—To Yokohama: Mr. and Mrs. Jackson and two children. To Shanghai: Mr. F. J. Marshall.

Per French steamer *Amazone*, from Marseilles, July 18.—To Yokohama: Mr. Chapsal. To Galle: Mr. Hassenaer.

Per French steamer *Anadyr*, from Marseilles, August 1.—To Batavia: Mr. Van B. Vaanders. To Singapore: Mr. and Mrs. van der Erb.

Per French steamer *Djemnah*, from Marseilles, Aug. 15.—To Galle: Mr. Thackwell.

Per French steamer *Tigre*, from Marseilles, Aug. 29.—To Saigon: Mr. Andrew Spooner.

Per French steamer *Ava*, from Marseilles, Sept. 12.—To Shanghai: Mr. J. C. Farnham.

Per French steamer *Iraouaddy*, from Marseilles, Oct. 10.—To Singapore: Mr. and Mrs. Goldie.

Per steamer *Diomed* (Holt's line), from Liverpool, July 6.—To Singapore; Mr. Hargreaves, Mr. Murray.

Summary of News from the Far East.

JAPAN.

Our advices from the Japan Ports by the present mail are of no later dates than those received by Pacific mail on the 29th ult., and published in our last issue.

CHINA.

SHANGHAI.

The present mail brings advices from this port to the 23rd May; the French mail from London, April 9, was received on the 21st May. The following summary of news is from the *North China Herald*:—

The annual meeting of ratepayers was held on the 18th May. Eighty persons, representing 237 votes, were present. Discussion was held upon a variety of subjects. Resolutions were passed in favour of the Municipal Waterworks, of lending Municipal money to build a new general hospital, of excluding proxies of resident ratepayers, and of making the Municipal year end with December instead of in March, and various other matters. A resolution announced by Sir Edmund Hornby, but withdrawn, has been a subject of much private discussion. It is felt that a great deal of work falls upon a Chairman of the Council who gives earnest attention to Municipal work; and we can see no good reason why the community should not give a special acknowledgment of those services. A proposal to give a permanent salary would be certainly unpopular. But the alternative of a special vote on expiry of the term of office would probably commend itself to the ratepayers. There is a great deal to be said, and a great deal has been said, upon the subject; but it is likely that some such recognition as that will by-and-by find approval.

At a meeting of the new Municipal Council Mr. Purdon was elected chairman, and Mr. Lemarchand vice-chairman, and the Council resolved itself into the following Committees:—Defence—Messrs. Purdon, Hart and Kidner. Finance—Messrs. Lemarchand, Cowie and Krauss. Watch—Messrs. Kidner, Hart and Heyden. Works—Messrs. Purdon, Mackenzie and Webb.

Our correspondent "Viator" returns to the charge about local taxation. He really seems to be "retained for the defence." He "furnishes anew every rusty old tool" that has been brandished for the last ten years as a reason to let the Mandarins have their way, and declines utterly to notice the counter-arguments which are patent in the Tientsin Treaty. The Chinese Government has a perfect right to tax its own subjects so long as it does not infringe on that Treaty. But, in levying on Foreign imports a tax of 2½ per cent. in addition to the import duty—while those imports are still within the limits of the Port—it does infringe the Treaty. It is not a question of temporary, fortuitous, or permanent residents of Chinese within the limits of the Foreign Settlement, but of the right of the Chinese Government to tax afresh goods which have already paid the only tax they ought to pay within the limits of the Port. It is likely that reasonable men will hold not only the Foreign Settlements but the Native City to be included within those limits; otherwise the words "Port" and "Interior" can have no distinct meaning. It is not a question as between governors and governed, though our impression is that the Chinese people would be very

Digitized by Google

much obliged to any one who will relieve them from the oppressive taxation of their Mandarins. The point foreigners have to go on is treaty stipulation in regard to imports for which a tariff is laid down in the Treaty. And we repeat that we are convinced the Treaty Consuls would feel themselves justified—on a representation from the Chamber of Commerce—in addressing such a remonstrance to the Taoutai as would land him in this dilemma—either he would have to deny the levy of the squeezes—in which case every *lekin runner* found in the Settlement must be a thief; or he would have to prove that the said taxes are legal—which he cannot do.

It is reported at Tientsin that Mr. Hart's recent visit to Li Hung-chang had reference to the method to be pursued in negotiating such further loans as the Government or any of its provincial officers may need to make; the object being to centralise borrowing operations in Mr. Hart's hands, or at least in those of the general Government. It is hinted also that the recent consideration at Peking, of questions in regard to the construction of telegraphs and railroads, and the opening of mines was so far unfavourable that Li may be obliged to suspend his preparations for mining operations in the south-western part of the province of Chihli. For whatever reason, Li appears to be somewhat unhappy just now. The unfavourable attitude of the Central Government may be one reason for this, put perhaps the condition of his mother's health may be a greater reason. Her demise may happen at any time, and it is altogether likely that the great Viceroy will then be obliged to retire for the customary three years of mourning.

"Massacre fans" have appeared in the southern parts of the province; they are said to be of the most objectionable sort. The Consuls have been informed, and they are likely to take prompt action to have them suppressed. The first steps in any attempt to raise an excitement against foreigners ought to be met promptly. Whenever this is done, there is little danger to be apprehended. All or nearly all difficulties result from the efforts of people who conspire to create alarm and to implicate foreigners. Such persons are disconcerted when promptly shown up, and will generally abandon their operations.

Our Chinese contemporary, the *Wei-pao*, announces that its publication will be suspended for a time, in consequence of intended removal of the office to other premises. The Chinese say there is a doubt among the proprietors whether it shall be continued, as it is said not to have been remunerative.

Chinese of the male gender are again compelled to forego the tonsure for a hundred days, only three or four of which have transpired, the weather meanwhile waxing warm. They seem to think they are having too much of a bad thing, and as regards Chinamen who are living in the foreign settlement, there seems to be a determination to disobey the proclamation, and let those mourn for the late Empress who are obliged to, those who are within reach of the Yamen. It is between the thirtieth and fiftieth days that the discomfort of leaving the head unshaved is said to be the greatest.

It will be remembered that the Consuls referred to Peking, severally, as shown in a printed report of one of their meetings, the question of indemnity for the sufferers in the riot of May, 1873. We hear now, incidentally, that no settlement has been arrived at there. It appears that the Ministers look to the French Legation to press the matter, and that the Chinese have not met the latter in a favourable way. The prospect for the sufferers does not seem bright, under these circumstances.

We regret to hear that some apprehension is entertained for the safety of two Shanghai pilots—Messrs. Snowden and MacDonald. We are informed that on the 6th of May, at two P.M., Mr. Hume spoke the pilot-boat *New York*, outside, having Mr. Snowden, pilot, on board; and at four P.M. of same day, a Chinese boat, with Mr. MacDonald on board. At eight P.M. it came on to blow hard from the north-west, and the gale continued to increase until noon of the 7th. No tidings have been since heard of either boat up to this date.

The cathedralisation of Trinity Church has been arranged, and the ceremony will take place on the 23rd May. Our readers will be glad to learn that Bishop Russell intends to confer the office of Dean of the new Cathedral on the Rev. Canon Butcher, and that the Rev. T. McClatchie is to be appointed to a Canonry. Four very handsome brazen gas-standards, the gift of a friend who desires to be anonymous, have been placed in the chancel of the church. They are in strict keeping with the rest of the iron work introduced into the building, and have a very beautiful effect when lighted.

A meeting of the Temperance Society has been held, at which a number of visitors were present. Admiral Ryder occupied the chair. The Secretary's report and Treasurer's accounts were presented. A sensible address was read by Mr. Martin, several songs were sung, Mr. Iburg played a violin solo which was much appreciated, a congratulatory address was read by the Rev. C. H. Butcher, and the meeting wound up with a vote of thanks to Admiral Ryder for presiding.

The *Deucalion* has been the first steamer to get away with new teas. She was loaded down here, from river steamers, and left Woosung at 2.10 A.M. on the 21st May, but had to anchor until daylight outside the Red Buoy, owing to the thick fog prevailing.

Our correspondent reports an insurrection in Manchuria, and the despatch of troops to suppress it. We hear that the trouble is connected with the mines. The Chinese Government are perpetually endeavouring to repress an industry which they had better legalise. It is said that the mandarin who has been deputed to arrange matters is inclined to report in favour of this view.

A notice has been issued to the effect that the lamps formerly employed at Tunglo-tu, Tantoo, Bethune Point, and Wuhu, in the Chinkeang district of the Yangtsze, have been replaced by dioptric illuminating apparatus of the sixth order, showing a fixed white light.

A Kiukiang correspondent writes:—I hear that the native authorities have behaved very well in the settlement of the late missionary difficulty there. They have agreed to put the chapel building and furniture in good order, and to pay the full amount claimed for sundry losses of the mission servants. I am told also that this result has been reached without the exercise of any great pressure, the native authorities having met the representations of the United States' officials at once, and in a very friendly way.—The weather is close and lowering.

A person named W. Morris has been arrested in Hongkew, by a Consular constable from Chefoo, charged with embezzling about $600. He was taken to the Central Police Station and detained in custody, awaiting his return voyage to Chefoo.

The trial of the suit against the steamer *Ocean* for Tls. 200,000 damages for the loss of the *Fusing* commenced on the 20th May before the Supreme Court, and after occupying the whole of two days was adjourned till the 24th.

H.M. ships *Vigilant* and *Modeste*, with Admiral Ryder and Mr. Wade, returned from their cruise up the Yangtsze on the 19th May.

FOOCHOW.

The subjoined items of intelligence from this port are taken from the *Foochow Herald*:—

The annual meeting of the Foochow General Chamber of Commerce has been held. There were present—Mr. P. G. Laurie, chairman; Messrs. Hales, Haslam, Krohn, Leith, Harton, Hickling, Bathgate, Smith, Dermer, Tatham, Lübbes, and Mitford (secretary). The Secretary read the notice convening the meeting, and the report was then read by the Chairman. The following are its principal features:—

In accordance with the resolution passed at the last annual general meeting of the Chamber, the committee placed themselves in communication with the various Treaty Consuls, on the subject of a telegraph line between the Settlement and the Pagoda Anchorage, and they are happy to say the concession was granted without any demur on the part of the authorities, and promptly placed in the hands of the Great Northern Telegraph Company, who lost no time in carrying out the project. The establishment of a telegraph line between this place and Amoy, thereby placing the community in immediate direct communication with both Hong Kong and Shanghai, is a consummation much to be desired, and this Chamber cannot sufficiently express the importance and value which it attaches to the carrying out of the project.

The regularity with which the steamers of Messrs. Douglas Lapraik and Co. have recently been plying—starting upon fixed days both from this side and from Hong Kong—has proved a great boon to this community, which cannot sufficiently express its recognition of the promptitude and courtesy displayed by the owners in thus making arrangements for the regular conveyance of its mails. The Chamber feels that it would be wanting in its duty were it to pass over this matter without acknowledgment, and without expressing a hope that ere long some arrangement may be made by the Post-office authorities by which Messrs. Douglas Lapraik and Co. may receive some more tangible recognition of their services in this respect than the mere verbal expression of the thanks of this community.

A considerable amount of attention has recently been drawn to the subject of damage to teas by heating, which is one of great importance to this community. There cannot be a doubt that teas stowed near the engine-room of a steamer are liable to get damaged and injured by the great heat which is thrown out. So completely was this recognised that only a few years ago the opinion was freely expressed that teas would not bear shipment by steamer; and that the supply of the leaf, notwithstanding the inroads of steam, would still continue to go forward by sailing vessels. This has not proved the case, and we have now to find the remedy for the evil complained of. Of course it would be very easy for shippers to stipulate that their teas are not to be stowed in the neighbourhood of the engines, but such stipulation, even if made, is liable to evasion, as the steamers would have to sacrifice a very considerable cargo space in accepting such an understanding. Captain Saunders, who is Marine Surveyor to many of our local offices, has suggested as a remedy that steamers should be provided with a false deck in the neighbourhood of the engine-room, leaving a clear unoccupied space of say ten or twelve inches between the main deck and the proposed false deck, and a similar clear unoccupied space at the side round the iron bulk heads of the engine-room, and that the through current of air and ventilation so caused would in a great measure tend to obviate the evil. The proposition is worthy of consideration, and may perhaps be the means of producing some further suggestions from those interested in the subject.

A case which has recently been before the Court in Shanghai; with reference to the subject of freight engagements, renders it desirable, with a view to avoiding disputes, that a clear understanding should exist on this point. It has always been understood to be a custom in Foochow that in the event of a vessel reducing its rate of freight all

Digitized by Google

prior shippers are entitled to the benefit of the reduction, and it rests with this Chamber to decide if this rule is to be understood as binding in Foochow for the future.

From the Secretary's account current for the year ending 31st May, which has been audited by Mr. Masfen, it will be seen that the finances of the Chamber are in a satisfactory condition, there being a credit balance of $335.75, against a similar balance at the same time last year of $69.14. In consideration of the increase of work in the Secretary's department, the Committee considered it expedient to raise that gentleman's salary to $600 per annum, and they trust that this will meet with the approval of the members.

After some discussion, chiefly on the subjects of freight engagements and the Courier service, it was proposed by Mr. Tatham, and seconded by Mr. Hickling, that the report and statement of accounts for the past year be passed, and this was carried unanimously. The following gentlemen were then elected to form the Committee for the ensuing year, viz. :—Messrs. Paterson, Haslam, Pim, Young, and Walkinshaw. The proceedings terminated with a vote of thanks to the Chairman.

An unusually severe thunder-storm passed over this place on the evening of the 17th May. In the Settlement the residence of Messrs. Silverlock and Co. was struck, and several articles of furniture destroyed in the dining-room. Fortunately, nobody was injured, although it might have been otherwise had the accident occurred about half an hour later, when, in all probability, the members of the Hong would have been at dinner, and, as the dining-table was completely swept, escape from more or less injury would have been almost impossible. We hear of loss of life in the city and the southern suburb, but as to what extent there is no reliable information.

A sailing match came off on the 17th May, at the Pagoda Anchorage. The prize was a silver goblet presented by Captain Farrow ; and the conditions were that the Cup should be won by the same boat in two successive heats. Captain Pitman, of the steamship *Kwangtung*, kindly placed his vessel at the service of the committee, as a flag-ship, and such she literally was—being decked from stem to stern with bunting. The course selected was round a red buoy off Spiteful Island, and home to a line between the *Kwangtung* and a mark on Loo-sing Island. There were eight entries, and the match was won by the *Etta*, sailed by Mr. Goode.

We are informed, on very reliable authority, that the Foochow-Amoy Telegraph difficulty is completely at an end. The line will, we understand, be constructed by the Great Northern Telegraph Company, and worked by them for the Provincial Government ; but the company stipulate that the wire shall be open to foreigners at all times, when not absolutely required for Government purposes.

H.B.M.'s *Kestrel* has been relieved by the *Hornet*. The former vessel had been on this station for a considerable time, during which period both officers and men have earned the respect and good will of the community.

HONG KONG.

Our advices by the present mail extend to the 29th May ; the P. and O. mail from London April 16 was received on the 23rd May. The following items of intelligence are from the *Hong Kong Daily Press* :—

An extraordinary meeting of shareholders in the Victoria Fire Insurance Company was held on the 25th May, to take into consideration a proposition to wind up the Company. There were present :—Messrs. A. André (chairman), F. D. Sassoon, Sands, Hayllar, Q.C., C. P. Chater, Ladstein, W. H. Bell, Anton, Wheeler, J. T. Chater, Middleton, Nicaise, H. Cope, J. Greig, H. H. Nelson, Sandeman, McCulloch, J. J. dos Remedios, Kruse, Elwell, Karberg, da Costa, Head, Marafelt, Burrows, Hancock, Joost, Hubbe, &c. The Chairman, having read the notice calling the meeting, read the following letter which had been addressed to the directors, by thirty-seven of the shareholders, representing five hundred shares :—

We the undersigned, Shareholders in the Victoria Fire Insurance Company, Limited, have to request, in accordance with No. 51 of the Articles of Association, that you will be good enough to call an Extraordinary Meeting of Shareholders to take into consideration a proposition for voluntarily winding up the said Company, and for appointing Liquidators for said purpose.

The Chairman then spoke as follows :—

Before I request any of the gentlemen who have signed this letter to place a motion to that effect before the meeting, I consider it my duty to express to you the views of the directors in regard to winding up this company. Owing to the absence of any large conflagrations during late years, the financial position of the company is at present very satisfactory. On the other hand, the directors cannot close their eyes to the fact that the premia account shows a constant decrease, and any disaster coming over us would easily wipe out the profits of one or more years. The directors, on their part, do not wish to advocate any steps either to one side or the other ; but they cannot help thinking that if the company is to be wound up, no better time than the present can be chosen. The shareholders now will get a very fair return for their shares, while the future is uncertain, and it would not be wise to expect that we shall continue to be spared from losses. I have nothing else to say on behalf of the directors, but will be glad to receive a motion from one of the gentlemen who signed the requisition.

Mr. Burrows then proposed that the company be voluntarily wound up forthwith, and the motion was carried unanimously. Mr. C. P. Chater proposed, "That Messrs. André and Sassoon be appointed liquidators, and that their remuneration be at the rate of one per cent. on the total amount distributed to the shareholders." This was also carried unanimously. The Chairman then said there would be another meeting held in a fortnight to confirm the resolution which had been passed, and the proceedings terminated.

In the Supreme Court their lordships have delivered judgment in the case of Ow Shing Kew *v.* Bjorck. A special verdict was found in the case, which was an action brought by the charterers of the steamship *August Leffler*, against the master, as the agent for the owners, to recover damages for injury to certain goods belonging to the charterers and other shippers, by the alleged negligence of the master and mariners in the management of the vessel. The jury found that the injury was proximately caused by the coming in of the sea water. The plaintiff sued to recover not only for damage done to his own goods but to those of other shippers under bills of lading in the usual form signed by or on behalf of the captain. It was argued for defendant that the damage was caused by one of the excepted perils, but the answer to that was that where negligence was proved (the water entered by one of the sea cocks) exemptions in a bill of lading did not apply. The case turned upon the liability of the captain as agent of the owner, and the extent to which the charter party divested the owner of the responsibility. The Court found that the master was responsible, stating, however, that the owner might have been relieved of this liability had the point been raised at the trial. As it was, the plaintiff adopted the charter-party, and it was assumed on all sides that the charterers and the other shippers stood on the same footing, and were suing in the same right. Their lordships were of opinion that the verdict for plaintiff must stand.

An action has been commenced in the Supreme Court before Chief Justice Smale ; Captain Singleton (of H.M.S. *Ringdove*), and Captain Turton (of H.M.S. *Egeria*), two nautical assessors, in which the Great Northern Telegraph Company sued Messrs. Douglas Lapraik and Co. to recover $15,000 damages done to the plaintiffs' cable near Amoy by the *Yesso*, on the 7th of April. It was admitted on defendants' part that the damage was done by the *Yesso*, but it was urged that it was done by accident, and under the pressing emergency of deadly peril. The proceedings have not yet concluded.

On the 24th May three gentlemen started in a sampan for a sail across to Kowloon, but finding the wind rather too strong against them turned back when they had accomplished about half the distance. They then told the boatman to take in the sail, but he replied that he knew his "pidgin," and paid no further attention to the order. Almost immediately after the boat capsized, and the occupants were struggling in the water. Captain Drewes, of the steamer *Amoy*, who witnessed the accident, lost no time in getting out his gig and proceeding to the rescue. Happily he was successful in his attempt, though one member of the party had a very narrow escape. The police-boat was also promptly on the scene, and the party were transferred to their care. Subsequently they were transferred to the Yowmahtee ferryboat, which was passing at the time. Great credit is due to Captain Drewes for his praiseworthy efforts, and also to the police for the alacrity they showed in hastening to afford assistance. A sampan steering directly towards the spot altered its course when the occupants were aware of the occurrence. This is, we regret to say, a characteristic of the Chinese boat-people, and one that does not redound to their credit.

On the 26th May the Hong Kong Dramatic Amateurs gave a most successful performance of Mr. H. J. Byron's popular and well-known burlesque, *Aladdin, or the Wonderful Scamp*. It was preceded by a farce, entitled *An Unwarrantable Intrusion*, by Mr. J. Maddison. No expense was spared in the get up ; the costumes were most of them splendid and appropriate, and the scenery suitable and well painted. The Amateurs are to be complimented on their spirit in attempting a piece involving such numerous and elaborate preparations, and which compels so much exertion in order to ensure a proper representation. The piece is too well known here, and everywhere else, to necessitate our giving any sketch of the plot. We may mention, however, that a great many local hits were introduced, which were charged with fun, and were received with evident relish and gusto.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 5th June ; the French mail from London May 7 was received on the 5th June. The following summary of news is from the *Straits Times* :—

The s.s. *Glenartney*, of the Glen line, Captain Gulland, has passed through with the first cargo of the new season's teas, having made the quickest voyage on record from Hankow and from Woosung. The passage from Woosung was accomplished

Digitized by Google

in just 8 days 12½ hours, and from Hankow in 10 days 9 hours, the steamer reaching this port at 10.30 A.M. on the 30th May. The despatch with which her coaling was effected reflects great credit upon the Tanjong Pagar Dock Company; it was completed in exactly four hours, during which time 690 tons of coal were put on board—an average of 172½ tons per hour. The *Glenartney* left at five o'clock on the afternoon of the 31st May. The *Fleurs Castle*, Captain Dickie, arrived on the 3rd June, with teas from Hankow. She left Hankow on the 23rd, and passed Woosung on the 25th May. She left here on the 4th June. The s.s. *Glenearn*, Captain Auld, arrived at Tanjong Pagar Wharf on the 5th June, and left the same day. She left Hankow on the 24th, and passed Woosung on the 27th May. On the night of the 31st May she encountered a heavy typhoon. The gaffs were blown in two aloft, although no sails were set; the sails were blown to ribbons from the gaskets, and fears were entertained that the funnel would be blown or washed over; the steam pipes were bent and twisted, and even the steam whistle was twisted out of shape. The two after-wheels were smashed and two boats stove by the heavy seas which broke on board, all the booms on were broken in two, and the fires in the lee stokeholes extinguished by the water pouring down the engine-room skylight.

The carriage thieves are again at work, but we are glad to be able to record that one of them, operating in broad daylight, has met his deserts, having been caught in the very act. About midday, a Malay was riding in a hack carriage towards Campong Glam, having $73 in silver, tied up in a handkerchief, lying on the seat beside him. A Chinaman had got up behind the gharry, apparently for a ride, but he suddenly seized the bundle of dollars, and, springing to the ground, made off at the top of his speed. The Malay at once gave the alarm, and the carriage being stopped, some passers-by gave chase, and succeeded in apprehending the thief with the wole of the money in his possession. He was taken before the magistrate and sentenced to six months' rigorous imprisonment, and afterwards to find two sureties in $50 each for good behaviour.

A murder has occurred at Changhie, under somewhat curious circumstances. It appears that a fisherman had a young wife, of whom he entertained suspicions. One day he left his house as usual, telling his wife he was going out fishing, but instead of going he secreted himself on a platform among the poles where his nets were hung to dry, and kept watch over his house. He had sat there some hours, when, according to the story of the wife, she was sitting in her door, stitching, and an acquaintance came up; she having occasion just then to enter the house to put her child to bed, was followed by this man. They had scarcely got fairly inside the house before they were confronted by the husband, who had sprung from his hiding place and dashed into the house, armed with a sharp knife. He seized both his wife and her supposed paramour, but the wife, holding up her child, induced him to stay his hand for a moment, and by this means succeeded in escaping with a slight cut on the wrist. She fled from the house to a neighbour's, but gave no alarm, leaving her husband and the other man to fight out the battle as they might. Judging from the appearance of the house, the two must have had a desperate struggle; everything was overturned in the utmost confusion, a partition was broken down, and there were marks of blood in all parts of the house and on almost every article in the room; and the husband, who commenced the attack, was killed, while the supposed paramour was covered with ghastly wounds. Whether the survivor tells the truth it is impossible to say as yet, but that he killed the husband to save his own life scarcely admits of doubt.

The *Gazette* contains the financial statement of the Malacca Municipal Commissioners for the year 1874, with a comparative table for 1873 and 1874. There are no items in the receipts or disbursements that call for special remark; the total receipts from all sources amounted in 1874 to $21,626.83½, and the total disbursements to $20,606.84, leaving a surplus of $1,019.99½. The figures for the preceding year correspond very closely. In 1873 the total receipts aggregated $20,247.41, and the disbursements $21,062.46, leaving a surplus of $1,009.66½, or $10 less than the balance in hand at the end of the year.

On the 23rd May the following official telegraphic intelligence from Atchin was published at Batavia:—

On the 19th inst. a telegram was received *via* Padang, from the military and civil commanding officer at Atchin, dated the 15th inst., and running as follows:—"News has been received that Tuanku Daud has been appointed Sultan by the head men of the three Sagies. Pontianak left on the 13th for the West Coast with Sidi Tahir on board. State of health satisfactory—a few cases of cholera have appeared."

The *Gazette* notifies the appointment of the Hon. H. Plunket as Superintendent of Prisons, Penang, vice Captain Hatchell, resigned.

The average note circulation of the local banks during May was:—

Oriental Bank	$236,800
Chartered Bank of India, Australia, and China...	647,519
Chartered Mercantile Bank of India, London, and China	562,555

A telegram has been received from Hong Kong, stating that the s.s. *Douglas* was most daringly attacked by pirates in Foochow river on the morning of May 27. One Englishman and several Chinese were killed.

Commercial Report.

(For dates see first page.)

EXPORTS.

TEA.

KIUKIANG.—The total settlements up to latest advices had been 11,000 half-chests. Two chops had been bought at Tls. 54, which s equal to about 3s. 3d. per lb.

HANKOW.—Messrs. Evans, Pugh, and Co.'s Report says:—The first musters of the new crop were placed on the market on the 12th May, being about a week earlier than last season, and, as usual at this port, the market opened the same day, by the settlement of a chop of Oonahm at Tls. 26½ per picul, followed by purchases of 6 chops Yong-low-tongs at Tls. 29 to 30, 1 chop Nip-car-see at Tls. 23½, 1 chop Ko-kew at Tls. 25.80, and 4 chops of Ning-chows at Tls. 40 to 48 per picul. During the next four days business, except in Kew-kiang Teas, was much restricted, owing to the scarcity of supplies, which were kept back by bad weather, and buyers who were eager to enter the market had in many instances to pay an advance of Tls. 1 to 2 per picul. The weather having become finer supplies are coming down freely, and we hope to see a lower scale of prices established. All teas suited to the Russian market are bought freely at full rates. Settlements of Hankow district Teas we estimate at 42,000 chests, of which about 15,812 chests have been taken by Russian buyers. There has been a very keen competition to secure all fine and choicest Ning-chows for the Russian market, and as much as Tls. 61 for Foey Gar chop, Tls. 62½ for Fock-pow and Tls. 63 for Ee-lan chops has been paid. These prices show an advance of nearly Tls. 10 per picul on the highest ever known. About 36,000 half-chests of this class have been purchased. It is as yet early to express an opinion as to the general quality of the crop, but we are inclined to think well of the teas from the districts of which we have so far received musters; excepting perhaps the Chon-sow-kais. The Ning-chows are again fine, and some few chops very choice; though we do not consider the average quality of these teas quite so good as they were last season. No Oonfas have as yet arrived. Prices have ranged:—For Ning-chow, Tls. 32 to 63 per picul, against Tls. 36 to 54 per picul last season; finest Oopacks, Tls. 33 to 42½, against Tls. 32 to 37 last season; other Oopacks, Tls. 24 to 32½, against Tls. 24 to 31½ last season; Oonahms, 23½ to 32, against Tls. 21¾ to 29½, last season. No low class teas have been sold. The steamers on the berth for London are the Glenartney, Glenfalloch, Fleurs Castle, Gordon Castle, Lotus, Hankow and Bengal. The rate of freight at present named is £5 per ton direct, £4 5s. per ton for transhipment from Shanghai per O.S.S. steamer, and Taels 21 per ton by the present French Mail boat. The Strassburg is also in port with her destination undeclared.

NEW SEASON'S TEA.

Since the arrival of the *Glenartney* we have to note the *Glenearn*, *Nestor*, and *Bengal*, and their samples are now on the market, but with little more animation than the sales ex *Glenartney*.

Dewsberry: 100 tons gambier, 345 tons sago flour, 17 tons pearl sago, 3 tons white pepper, 180 cwts. rattans, 363 cwts. hides, 22 tons tapioca. Windermere: 185 tons gambier, 50 tons sago flour, 275 tons pearl sago, 95 tons black pepper, 2 tons white pepper, 6 tons gutta, 240 cwts. rattans, 120 cwts. hides, 23 tons india-rubber, 70 cwts. damar, 17 tons tapioca. Pauline: 20 tons tin, 245 tons black pepper, 10 tons white pepper, 57 cwts. nutmegs and mace, 380 cwts. rattans, 263 cwts. hides, 295 tons sugar, 55 tons tapioca. Eastern Province: 316 tons gambier, 55 tons black pepper, 60 tons white pepper, 366 tons gutta, 200 cwts. rattans, 357 cwts. hides, 5 tons horns, 2 m. Malacca canes, 36 tons tapicca. Brisbane: 255 tons black pepper, 280 cwts. rattans, 417 cwts. hides, 315 tons sugar. Nestor (str.): 109 tons tin, 11 tons gutta, 170 cwts. nutmegs and mace, 63 tons coffee, 73 cwts. hides, 15 tons india-rubber, 31 m. Malacca canes, 22 cwts. dragon's-blood, 15 cwts. cloves, 7 cwts. benjamin gum, 1,250 cwts. mother-o'-pearls, 35 tons tapioca, 75 cwts. gamboge.

MANILA.

Mikado: 405 tons sugar, 7 tons sapanwood. Canaan: 500 tons sugar, 445 tons hemp, 30 tons sapanwood, 1,140 cwts. mastic, 140 mil. cigars. Star of the West: 1,000 tons sugar, 480 tons hemp. Monte Rosa: 25 tons sapanwood. Envoy: 750 tons sugar, 43 tons hemp, 12 tons sapanwood. Lyra: 406 tons sugar, 140 tons hemp, 6 tons sapanwood, 10 cwts. mother-o'-pearls. Estrella: 570 tons sugar, 230 tons hemp, 12 tons sapanwood. Invincible: 500 tons sugar, 306 tons hemp, 12 tons sapanwood, 250 mil. cigars. Araby Maid: 1,190 tons sugar. Angostura: 547 tons coffee. Penrith: 800 tons sugar. Belted Will: 1,000 tons sugar, 152 tons hemp, 15 tons sapanwood, 120 cwts. mastic. St. Kilda: 500 tons sugar, 632 tons hemp, 5 tons sapanwood. John Nicholson: 600 tons sugar, 354 tons hemp, 5 tons sapanwood.

Shipping Intelligence.

ARRIVALS.

At SHANGHAI.—From London, May 19, Horriang (str.), Craigforth (str.); from Liverpool, May 14, Antenor (str.); from Cardiff, 16, Zephyrus; from Hamburg, 18, Galatea (str.); from London, &c., July 3, James Shepherd.

At FOOCHOW.—None.

At HONG KONG.—From London, May 25, Glenlyon (str.); from Liverpool, 27, Oceanic (str.); from Glasgow, 25, Rajanattianuhar (str.); from Cardiff, 27, Harwich; June 28, Virginia; from Swansea, 26, Cap Horn; from London, &c., June 26, Galley of Lorne, Golden Spur, Bowen (str.); July 5, Sarpedon (str.), Erl King (str.), Glengyle (str.); 7, Devonhurst (str.).

At MANILA.—From Liverpool, May 22, Yrurac Bat (str.); from Boston, 15, Anahuac.

At BATAVIA.—From Liverpool, July 1, Strathblane; from Glasgow, County of Berwick; from Amsterdam, Aurora.

At SINGAPORE.—From Liverpool, June 2, Glaucus (str.); from Sunderland, Empress; from Cardiff, May 31, Ysusquiza; from London, &c., July 3, Argyll (str.); 5, Glenroy (str.).

DEPARTURES.

From SHANGHAI.—None.

From FOOCHOW.—For London, June 23, Viking (str.).

From HONG KONG.—None.

From MANILA.—For Liverpool, May 9, John Nicholson; for Channel, f.o., 12, Mary Blundell; 22, Lud and Charles; for New York, 17, Cleopatra, Regent.

From BATAVIA.—For Rotterdam, July 4, Hampton (str.).

From SINGAPORE.—For Liverpool, May 31, Aurera (str.); June 1, Tecumseh; for Marseilles, 5, Luigi C.; for London, 30, City of Baltimore (str.); July 2, Viking (str.).

TELEGRAMS FROM THE FAR EAST.

BURMAH.

CALCUTTA, JULY 6.—Sir Douglas Forsyth is expected here to-day. He will probably proceed immediately to Simla to report the result of his mission. It is believed that the refusal of the King of Burmah to concede a passage for British troops through his territory will be left for future consideration.

THE SILK AND TEA CROPS.

SHANGHAI, JULY 3.—Heavy rains have damaged the silk and the second crop of tea.

Digitized by Google

A TURKISH EMBASSY TO PEKING.

("MORNING POST" TELEGRAM.)

BERLIN, JULY 9.—The Sultan proposes sending a special embassy to Peking, with a view to the furtherance of the interests of the Mahomedan subjects of the Emperor of China.

CHINA MARKET REPORT.

HONG KONG, JULY 8.—Grey shirtings, 8¼ lbs., $2.55. Cotton, fair medium Bengal, $12½. Tea, settlements at Foochow checked, owing to home advices. Total exports from China and Japan to the United Kingdom from June 1 to date, 53,125,000 lbs.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—July 8, at Nieuwe Diep, from Batavia, Conrad (str.); 9, at London, from Hankow, Glenearn (str.); from Shanghai, Nestor (str.); off Queenstown, from Rangoon, for London, Wiltshire; 10, at London, from Hankow, Bengal (str.).

DEPARTURES.—July 6, from London, for Yokohama, Flying Spur; 3, from Hamburg, from Shanghai, August Reimers; 9, from London, for Penang, Salus.

SPOKEN.—N. R. S. W. (British barque), from London, to Hong Kong, May 23, 0.5 S., 28 W.

MISCELLANEOUS.—Gibraltar, July 6.—Passed, Fleurs Castle (str.), from Hankow, for London. Port Said.—Arrived, July 4, Glenfalloch, from Hankow, for London; 9, Quang Se, from London for China. Suez, July 8, arrived, Lotus, from Hankow, for London; Sumatra, from Batavia, for Nieuwe Diep.

THE MAILS.

PRESENT INWARD MAIL.—MARSEILLES, JULY 6.—The Messageries Maritimes steamer Anadyr, with the inward French mails from China and Japan, arrived here to-day at 6 P.M. She brings 93 passengers and a general cargo, including 253 bales of silk, 31,457 packages of tea, 134 packages of straw plaits, 141 of tobacco, 315 sundries, and £24,192 in gold for London, which part of her cargo will be forwarded to its destination per Company's steamer Euphrates.

HEAVY PORTION OF LAST INWARD MAIL.—GIBRALTAR, JULY 6.—The P. and O. Company's steamer Mongolia leaves at 4 P.M. to-day for Southampton, where she may be expected to arrive about the 11th inst.

INWARD MAIL DUE AUGUST 2.—GALLE, JULY 9.—The P. and O. Company's steamer Zambesi, with the China and Australian mails, leaves for Suez to-day. Australian gold for Europe, £460,000.

HEAVY PORTION OF LAST OUTWARD MAIL.—GIBRALTAR, JULY 6.—The P. and O. steamer Mirzapore, from Southampton, 1st inst., arrived at 6 A.M., and left at 10 A.M. to-day for Malta and Port Said.

OUTWARD MAIL OF MAY 21.—SHANGHAI, JULY 5.—The Messageries Maritimes Company's steamer Hooghly, with the London mails of May 21, arrived here to-day.

OUTWARD MAIL OF MAY 28.—SHANGHAI, JULY 8.—The P. and O. Company's steamer Sunda, with the London mails of May 28, arrived here to-day.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BAKER—On the 17th May, at Hongkew, the wife of J. H. Baker, of a daughter.
BONHAM—On the 3rd July, at Enzersdorf, near Vienna, Lady Bonham, of a son.
MCLEAN—On the 5th July, at Inverness-terrace, Bayswater, the wife of David McLean, of a son.

MARRIAGES.

POLLOCK—COWIE.—On the 27th April, at Swatow, by H.B.M.'s Consul, assisted by the Rev. H. L. Mackenzie, M.A., William Pollock, of the Imperial Maritime Customs, to Maggie, fourth daughter of Thomas Cowie, of Montrose.

DEATHS.

ANDERSON——On the 5th June, at Bukit Tunggal, Singapore, Captain John Anderson, aged 83 years.
HALL—On the 29th June, at the Admiralty House, H.M. Dockyard, Devonport, the wife of Rear-Admiral Sir Wm. King Hall, K.C.B.
KELLY—On the 15th May, at Shanghai, Annie Josephine Kelly, aged 16 years and 4 months.
MACVICAR—On the 19th May, at Yokohama, Charles Young Macvicar, aged 35.
NISSEN—On the 3rd July, at Brompton, L. Theodor Nissen, of Altona, aged 32.

HOUSE OF COMMONS.

RUSSIA AND KHIVA.

(July 6th.) Mr. BAILLIE COCHRANE (C.), in moving for papers relating to the occupation of the Khanate of Khiva by Russia, called attention to the rapid advances made by that Power in Central Asia, and observed that the policy of extension of territory in the East which Russia was pursuing had created considerable anxiety and ought not to be met by a policy of "masterly inactivity" on the part of this country. Since the Crimean War Russia had extended her frontiers to the Caucasus, the Black Sea, and the Caspian, and had recently advanced her lines to Khiva and the Oxus. By means of the communications which she had thus established she could speedily concentrate large bodies of her troops in the immediate neighbourhood of our Indian frontier. Remonstrances with Russia being useless, the question was what was to be done. We should remember that Affghanistan was the key of the position, and our first steps should therefore be to appoint a person of great consideration and distinction as our representative at the Court of the Ameer. We ought also to favour the construction of a railway along the valley of the Euphrates and to keep a watchful eye upon Russian diplomacy.—Mr. HANBURY (C.) seconded the motion, and declared that throughout the whole of our history pledges and promises had never been so ostentatiously broken as they had been by Russia. Sweet credulity and innocent confidence had been the characteristics of the policy of our Ministers of State in recent years.

Sir G. CAMPBELL (C.) entertained views diametrically opposed to those which had just been expressed. The true policy for this country to pursue was that which had been described as one of "masterly inactivity." We could not prevent the advance of Russia, and when we were attacked we must rely upon our own strength for our defence. But to continue useless talk about Central Asia when we could not act might do very great harm, and could only serve to expose a raw in our political hide.

Mr. BOURKE (Under-Secretary for Foreign Affairs) said the papers asked for had already been laid upon the table; but further communications had passed between her Majesty's Government and the Government of Russia with respect to Central Asia which were not yet ripe for publication. When those papers were produced, as they would be at the proper time, they would show the great friendliness which existed between the two Governments. He admitted that Russia had not acted up to her engagements with respect to Khiva, but for obvious reasons it would be wrong for him to dwell upon that now, for not a single advantage would be thereby gained. As to the pursuit of a policy of "masterly inactivity," the amount of activity or inactivity to be displayed with regard to the foreign policy of England would entirely depend upon circumstances; but he remarked that he hardly knew exactly what "masterly inactivity" was. As to the question of what was to be done, it had never been the policy of England to declare beforehand what course she would take in the event of certain hypothetical circumstances occurring and under conditions which did not exist. Her Majesty's Government had no desire to advance their frontier in the direction of Central Asia, and they thought it the interest of both England and Russia that a reasonable distance should always exist between the frontiers of these two great empires. To define a neutral territory, however, would lead to differences and misunderstandings, and it was not the intention of Her Majesty's Government to enter into any formal engagement for that purpose. With regard to the States on our Indian frontier, it was the wish of the Government that they should be powerful and independent, and should be convinced that we were not an aggressive people; but it was not intended to enter into any engagements which would prejudice the interests of either side or hamper our future action with regard to them. Of the general foreign policy of the Government of India it was not his province to speak; he might remind the House, however, that the establishment of friendly relations with Affghanistan was no new policy.

Mr. BUTLER-JOHNSTONE (C.) indicated China as the India of Russia in the future. Why (he asked) had Russia been so anxious to get to Bokhara? For the obvious reason that that was the centre and focus of all the caravan routes to the Empire of China. If Russia could bring China within the scope of her trade, the result would more than compensate any expenditure which might have been incurred to bring it about. By that means she would obtain something like a monopoly of the trade of Asia, and she would, moreover, take up a much more important position than she at present enjoyed in the trade of Europe. By every means possible Russia had been endeavouring to get into China. While we in the most brutal manner were sacking the Summer Palace—while we, at all events, were carrying on the Opium war in a manner unprecedented in our history—Russia was intently engaged in securing advantages by means of commercial treaties with the Chinese Empire. Were he a Russian he would contemplate with pride the growth of Russian dominion and trade in Asia, but the question he had now to consider was whether the interests of England were at stake. If English goods were allowed to compete freely with Russian goods, that extension of Russian dominion would be of great advantage to this country. But Russia absolutely prohibited our goods from going into the countries over which she exercised jurisdiction. In one instance there was a duty of 40 per cent. on our goods, and a duty of only 2½ per cent. on Russian goods. We had grown tea in India with eminent success, and yet Russia absolutely prohibited Indian tea from coming into her markets. He held that this country, by a proper diplomacy, might exercise a greater influence at Peking than Russia, and he would be sorry to see "a policy of masterly inaction" carried out by England in China. The Russians were doing all they could in Japan as well as in China to show that they were the only true friends of that country, and that France and England were its enemies; and he was told that Russia was entering into an alliance offensive and defensive with Japan, so that the latter should close her ports against those countries with which Russia was at war. In conclusion, he begged to express his satisfaction at the statement which had been made by Her Majesty's Government,

Mr. BAILLIE COCHRANE withdrew his motion.

OUR RELATIONS WITH BURMAH

(8th.) Mr. GRANT DUFF having asked the Under-Secretary of State for India whether he was able to make any statement with reference to the recent negotiations with Burmah and the present state of our relations with that country—Lord G. HAMILTON said differences have during the last few years arisen between the Government of India and the King of Burmah. Sir Douglas Forsyth was sent upon a special mission to Mandalay to secure an amicable settlement of these disagreements, and we have reason to believe that a satisfactory settlement of the earlier matters in dispute has been agreed to; but the recent attack in Chinese Burmah upon the English Exploring Party, the murder of Mr. Margary, coupled with the very cordial reception accorded by the King of Burmah to the Chinese General Li-see-tahi, who we have reason to believe was implicated in, if he did not instigate, the recent outrage, rendered it necessary to insist upon the King of Burmah placing no obstacles in the way of obtaining redress. The King of Burmah has chosen this particular moment to refuse that which he had permitted in former expeditions—viz., the passage of British soldiers through his territories. It is earnestly to be hoped, and I believe there is every ground for believing, that the King of Burmah will yield to our just demands, and that no collision will occur. In reply to another question

Digitized by Google

on the paper by Mr. RICHARD, the noble lord added that the production of papers on this subject at the present moment might be detrimental to the public service.

CONSULAR CHAPLAINS.

(9th.) Mr. HEYGATE called attention to the report from the Select Committee "appointed to inquire into the circumstances attending the withdrawal of the allowances granted to Consular Chaplains under the provisions of the Act 6 Geo. IV., c. 87," and moved that, in the opinion of the House, the withdrawal of Government grants in aid of the maintenance of Consular Chaplains under the provisions of the Act 6 Geo. IV., c. 87 was uncalled for and inexpedient, and should be reconsidered by Her Majesty's Government.

In the course of a somewhat lengthy discussion Colonel ALEXANDER pointed out that the Select Committee did not say a word about Consular Chaplains or their allowances; the only reference being a paragraph in the appendix in the report of Major Crossman, who, referring to a Consular church in China, said he thought it hard that a religious service should be maintained at the expense of English taxpayers for the benefit of seven tea-tasters on the banks of the Yangtsze. But these Consular churches were built for the benefit not of the permanent but of a migratory population, and if these allowances were withdrawn in the Consular ports, we virtually forced the residents there to make spiritual provision for the sailors resorting to those ports. Another reason for maintaining the relation between the Consular Chaplains and the Crown was that as long as you maintained it you had a hold over them, and could call upon them to minister to our sailors in the ports; but when the Chaplains were paid solely by the residents themselves, then you lost control over them. This was not a question of Chaplains, but of maintaining our name as a Christian people.

The Under Secretary of State for Foreign Affairs, Mr. BOURKE, said this question arose in 1869, when an inquiry was instituted into the whole of our Consular service, and the grant to our Consular Chaplains in China was withdrawn. Nothing was said against the measure. Every one of these Chaplains had been given a pension, and they were now being supported in their different localities by voluntary contributions. He trusted the House would support the decision arrived at by the committee. There was nothing to prevent the re-establishment of a Consular Chaplain in any place if a case for the other side was made out. He hoped the Government would be supported in adhering to the unanimous report of the committee.

The motion of Mr. Heygate was negatived.

CHINESE LEGATIONS.—THE MURDER OF MR. MARGARY.

(9th.) Mr. EATON asked whether any advice had been received from our Minister at Peking as to the decision of the Chinese Government to establish Legations and Consulates in Europe, and whether the mission appointed to inquire into the death of Mr. Margary had left Peking.

Mr. BOURKE said no official information has reached the Foreign-office on the first subject. Mr. Wade, our Minister at Peking, had not been there for some time when he wrote the last received despatch. Perhaps we may hear from him before long. The Mission appointed to inquire into the death of Mr. Margary has not yet left Peking, and the reason is the weather is extremely hot, and it is thought undesirable it should leave until the cold weather commences.

MR. ALEXANDER M'ARTHUR proposes to ask the Under-Secretary of State for India whether he can lay upon the table any report showing the nature and probable value of the trade which it is proposed to open up through Burmah with the western provinces of China.

Naval and Military.

The iron troopship Adventure, Capt. J. Darcy, arrived in Plymouth Sound on the 2nd inst., from Natal, with the battalion of Royal Marine Light Infantry from Yokohama on board, under the command of Lieut.-Colonel Richards. The Adventure was visited by Admiral Sir Henry Keppel on arrival. The Plymouth Marines were landed, and the Adventure then proceeded to Portsmouth with the section for that port. The Adventure will subsequently proceed to Chatham, where, it is understood, she will refit for further service. The corporals, drummers, and privates of the battalion have presented to Sergeant John James a silver watch and gold chain, as a mark of the respect and esteem in which he was held during his period of service as hospital-sergeant with the battalion. It is stated that differences of a serious nature having arisen between Colonel Richards, the officer in command of the battalion, and Lieutenant-Colonel Burton, second in command, a Court of Inquiry is to be held with a view to ascertain whether a court-martial is necessary. The consequences to one or the other of these officers is likely to be serious.

Lieutenant-Colonel R. J. Hay, Royal Artillery, has been appointed Superintendent of the Royal Gunpowder Factory, Waltham Abbey, vice Lieutenant-Colonel C. F. Young, R.A., deceased. Colonel Hay served as Assistant Adjutant-General of Royal Artillery with the Expedition to China in 1860, and was present at the capture of the Taku Forts and the surrender of Peking. He received a Brevet of Major and the medal with two clasps for his services in China. He joined the army in 1846, and became Lieutenant-Colonel in 1870.

The Glasgow, screw frigate, Capt. Theodore M. Jones, the flagship of Rear-Admiral Cumming, late in command of the East India station, arrived at Spithead on the 1st inst., having been relieved by the Undaunted. The passage home has been slow and tedious, in consequence of a breakdown in her machinery. The crew suffered greatly from the excessive heat at Aden. Having been away four years, the Glasgow has gone into harbour for the purpose of dismantling and paying off.

Commander U. C. Singleton, of the Ringdove, gun vessel (on the China station), has prosecuted the master of a merchant vessel at Mauritius for harbouring a deserter.

Among the late successful candidates for Naval cadetships was Mr. C. Keppel, son of Admiral Sir Henry Keppel, G.C.B., Commander-in-Chief at Devonport.

A report that Lord Clarence Paget will succeed Admiral Sir Henry Keppel as commander-in-chief at Plymouth in October next is officially contradicted.

Lieut. J. R. Broadley (1874) has been granted a year's foreign leave, to navigate a gunboat for the Chinese Government from Birkenhead to China.

The Cygnet, gun-boat, has been commissioned at Devonport for service on the Cape of Good Hope and the West African Station.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, JULY 7.

The utmost quietude prevails in politics, and we seem to have entered upon the *saison morte*. The Parliamentary optimists hoped that the Second Chamber would meet in order to clear off some Bills before the session finally closed; but this hope has proved to be fallacious. The papers are of course still discussing the results of the late elections, and all sorts of predictions are made regarding the future. On the Bourse also a lull prevails. The magnates of the Money Market have deserted the field, and speculation has consequently come to a standstill, while another check to business has resulted from over-speculation in the dividends of the Dutch Trading Company. For several years past enormous transactions have been entered into regarding dividends, of course absolutely speculative. This wild betting caused all sorts of squabbles every year, and it seems to be impossible to put a stop to it. Some houses have, it is said, gained half a million of money, and, notwithstanding that, some speculators have had to stop payment. This year a sort of clearing-house was organised to settle the accounts. The Money Market is well provided, and perhaps this fact will have a good influence on a small loan which is being raised on behalf of the Java Steamship Company. Only a sum of two millions is wanted, to be repaid in the current course of twenty-five years. The shares will bear an interest of 5 per cent, while the price of issue is 90½ per cent.

Mr. J. C. Daru, Liberal, M.P. Zutphen, has died suddenly at Neuenahr in Germany. As candidates for the vacant seat are named Mr. Mackay for the anti-revolutionists and Mr. Tak van Poortvliet for the Liberals. It seems pretty certain that the last named will gain the victory.

The East India Association has resolved that the questions to be brought forward for discussion will for the future be made public some months before, in order that those members residing in Java may be able to give their opinion by letter.

I regret to state that the American Minister at our Court, Mr. Gh. T. Gorham, has resigned his post, and has left the Hague. His departure is most certainly a loss.

The direct communication between Flushing and London will be opened in the course of this month, some say on the 19th, others on the 26th. Powerful steamers will be employed in this service, which will be another improvement in the rapidity of our postal communication.

A LADY'S MISSION TO SEAMEN AND MARINES.—Mrs. Digby Dent, widow of the late Lieutenant Dent, Superintendent of Singapore Prison, has since her arrival in England, in the early part of May, been carrying on a wonderful work among the Marines of the Gosport Division. On one occasion she addressed about four hundred men with the permission of the Colonel-Commandant. She told them, in affecting terms, that as her martyred husband had been for several years attached to Forton Barracks, she felt particularly drawn toward its occupants, and she could not refrain from delivering to them a message, which was "Be ye also ready," for, as she pathetically put it, "If my husband had put off the question of his salvation until he had been stretched on his bloody bier, where would he have been?" "But he did not do so," she continued; "he was ready when the Master called, and he is now with Him in glory." She went on to urge her hearers to seek the one thing needful, and dwelt at some length on the compatibility of a man being at the same time a good soldier to his Queen and a true soldier of the Cross. In fact, she insisted that the more spiritually-minded was the man the braver would he be, and the more ready would he be to lay down his life at the call of duty. Many of her hearers were moved to tears, and some audibly sobbed. Last week she gave a tea to 200 Marines at Cook's Mission Hall, Stoke-road Alverstoke, when she gave another touching and solemn address. Several ladies, the wives, widows, and relatives of officers of both services, were also present, and sang many of Sankey's hymns, accompanied by the harmonium. The men heartily joined in the chorus. All returned orderly and quietly to their quarters, and it is believed that much good has been implanted, and that the effect produced is not one of a merely passing character. On Tuesday night Mrs. Dent proceeded to the Bethel at Gosport, where were gathered, at the invitation of Mr. Cooke, nearly 300 Marines, and again gave a stirring address, which was listened to with rapt attention by these gallant fellows and many of their relatives and friends, who had been purposely invited to take tea with them.

THE NEW SEASON'S TEAS.—Last year we noticed the arrival of the s.s. *Glenartney* from Hankow with the first seasons teas. This year she has again come in first, having made the passage in less time than last year. We have also to notice the arrival of the *Glenearn*, belonging to the Glen Line, as second ship from Hankow, she having made the passage in a few hours' less time than the *Glenartney*, notwithstanding she had to encounter heavy weather in the China seas. The *Glenfinlas*, another of this line, is shortly expected with the new season's teas from Foochow; her passage to Port Said shows the same average speed as the *Glenartney* and *Glenearn*.

LONDON: MONDAY, JULY 12, 1875.

RUSSIA IN INDIA AND CHINA.

ON Tuesday last there was a debate in the House of Commons on the Central Asian Question, which had its origin in Mr. BAILLIE COCHRANE'S rising to call attention to the progress of Russia in that part of the world, and moving for papers relating to the occupation of the Khanate of Khiva. Although disclaiming the slightest feeling of antagonism towards the Russian Government, Mr. B. COCHRANE spoke in a somewhat contrary sense. He expressed the opinion that "no country, except Ger- "many, had made such rapid progress as Russia during "the last half century;" and he further remarked that "there was a phrase that she always had an Eastern iron "in the fire, and her territorial advances might lead to "the gravest complications not only in the East but also "in the West." In support of his ideas he cited the ancient plan of Russian operations, as laid down by a statesman early in the century, part of which was to send 50,000 men through Persia to India and drive England out of all her Eastern dominions; "therefore," added the honourable member, "the progress made in recent years "by Russia in Central Asia should not be a matter of in- "difference to this country." A passage in the speech of the succeeding speaker, Mr. HANBURY, is worthy of notice, for several reasons:—"If we saw her (Russia) "advance to Kashgar she would have no justification for "going any further, but then of what use to her is her con- "quest of the desert steppe with its three oases? But "she must advance, and as a proof that she meant to do "so, he might mention that the only things she attended "to in her recent conquests were the roads, which was "the more remarkable, as her own internal roads were the "worst in the world. (Hear, hear.) If she did so advance "she might not invade India, but she would intercept "our trade with China, a country with 400 millions "of producers and consumers. The whole history of "Russia had been one struggle to reach the Pacific "Ocean." Mr. HANBURY was succeeded by Sir GEORGE CAMPBELL, than whom, from the high position he has recently occupied in India, no one in the House, perhaps, has a better right to be heard on the knotty question of Central Asian politics. Sir GEORGE said that he had come to conclusions diametrically opposed to those of the previous speakers. He thought that our only course in the matter was one "of masterly inactivity, which could be adopted without leading to danger," and that if we could not stop the advance of Russia in Turkistan, the only other means of checking her was to march into Afghanistan. That course is, for many reasons, open to serious objections. "Our true policy, therefore," remarked Sir G. CAMPBELL, in conclusion, "was that, as we could not act, "we should not talk. . . . At the same time he be- "lieved Russia had other matters to attend to, and that "this question might be left to our sons and our grand- "sons." Mr. BOURKE, the Under Secretary of State for Foreign Affairs, then rose to speak on the part of the Government, a task which was rendered the more easy by the common sense view taken of the matter by his predecessor. On the whole subject of Central Asia Mr. BOURKE felt himself at liberty to say that communications had passed between Her MAJESTY'S present Government and the Government of Russia, and he confirmed an opinion which we ventured to express three weeks ago. "These com- "munications and despatches," added Mr. BOURKE, "are "not ripe for publication, but when the time comes to "produce them the House and the country will approve "the course taken, and will find an explanation of the "great friendliness existing at this moment between the "Government of Great Britain and the Government of "Russia." This assurance is very satisfactory, and was seemingly received in that sense by the House of Commons. In concluding his speech, the honourable member observed that allowing peaceful commerce between Turkistan and India to follow its natural course would, in his opinion, tend to confer untold benefits on both those countries; at any rate, it would help to cement the friendship which happily existed between the two great Empires of England and Russia; and he trusted that nothing which had been said that night would tend for a moment to disturb that friendship. Mr. BOURKE was succeeded by Mr. BUTLER-JOHNSTONE, who uttered the most arrant nonsense about the Opium trade and the Summer Palace.

BURMAH AND WESTERN CHINA.

THERE is such an unvaried agreement in the telegraphic intelligence and the letters from correspondents of the press, as to the precise position of our dispute with Burmah, and as to the exact demand which has been made and refused at Mandalay, that we cannot help accepting the version generally given as the truth. At the same time, we must call our readers' attention to the circumstance that we are still without any explanation from official sources; no statement has been made in Parliament, no authoritative announcement has appeared in Calcutta; and when we remember the peculiar pains which diplomatic agents usually take to keep their business secret, we cannot feel quite sure that the news sent us is thoroughly correct. If it is, then how odd that it should have leaked out. We must conclude that the information has got about either through Europeans "on the spot," that is, resident at Ava, or else through native officials attached to the Court. We make this reservation as to the substantial accuracy of the telegrams; at the same time we are far from thinking that our relations with Burmah have not assumed a very serious phase. Sir DOUGLAS FORSYTH has demanded a free right-of-way for British troops across the Emperor's territories, and this request has been refused. The Indian Government, before giving their agent his final instructions, must at least have foreseen the possibility of that what was asked would not be conceded; they must have been aware that it was suicidal impolicy to offer any conditions to the King of BURMAH which they were not prepared to enforce if necessary; they must have taken into account, too, the abstract right of every independent Sovereign to forbid the passage of foreign soldiers through his own territory, and that, consequently, the onus of justifying such a demand in the eyes of the public of this country will rest with those who took upon themselves to make it. All these points, as we say, cannot have escaped the Governor-General and his advisers, and the only conclusion therefore which we can draw with any confidence from what has taken place is that our Indian authorities are in possession of evidence which establishes the real complicity of the Burmese Court in the assassination of Mr. MARGARY, and that they have consequently determined long ago that, while the Chinese must be brought to book for their share in the guilty deed, Burmah also will have to be chastised. In brief, unless Lord NORTHBROOK had made up his mind for war in case of a refusal, he would not have run the risk of insult by asking for such a concession from the not too friendly Burmese. Affairs look exceedingly warlike. A war with Burmah may be a very proper and a very necessary course, or the reverse; we cannot well judge; because we are as yet but scantily informed as to the true issues of the dispute; but when Parliament has broken up some three weeks hence, the Government will have seven months of independence before them, and this little circumstance is not without its influence when a question of a petty war with an Indian Potentate has to be decided. The "peace-at-any-price" party will be chained to silence till the whole affair has been settled in the next cold season.

Digitized by Google

In the event of hostilities we should of course seize Mandalay, and, perhaps, one or two other of the more important settlements on the banks of the Irrawaddy, driving his Burmese Majesty back into the jungle or to seek refuge among the Shan tribes. All this we can readily do; but are we to go on to annex independent Burmah, or should we set up some new monarch at Ava bound by more stringent treaties than his predecessor? The views entertained by many are opposed to annexation, partly on the ground that it would be unjust, and partly because, as they contend, it is good policy to have an independent kingdom in alliance with ourselves between our own frontiers and China. On the other hand, there are two points which ought never to be lost sight of: one is that until we have the valley of the Irrawaddy entirely under our own control we can never open up the much-talked-of trade route to Yunnan; and, secondly, by dividing Burmah into two halves we have produced an atrophy, and misgovernment in the independent portion. The authorities at Mandalay are demoralised by our over-shadowing supremacy, the country is in disorganisation, commerce is stagnated, and the people suffer from bad and impotent rulers who cannot maintain peace and good order within their own dominions. In justice to the inhabitants we ought not to cut off one or two provinces from a country and leave the remainder to get on as it can.

Since the above was in print Lord G. HAMILTON has announced to the House of Commons that a demand for troops to pass has really been made, and the very guarded language he used—("He hoped and believed the King would yield, &c.,")—fully confirms the general view as to the really serious character of the misunderstanding.

THE CHINA TRADE.

I.

IN a recent issue we extracted from *The Times* some remarks bearing upon the unsatisfactory nature of the China trade, to which attention was at the time directed by the failure of Messrs. COLLIE and Co., of Manchester. Some good may come out of considerable evil, if one effect of that failure be to call general attention at home to the nature of our trade with China, and to the causes which have gradually reduced a traffic which once was justly reputed one of the most paying in the world, to a position in which unsoundness, speculativeness, and unprofitableness have become its most generally recognised characteristics. Although the subject is unfortunately not new to China readers, and has in fact been dealt with only too frequently in these columns, we deem the present a fitting opportunity to pass in review some of the more prominent circumstances which have conduced to this state of affairs; to estimate broadly the existing position of the trade, and, finally, to suggest such remedies as may seem feasible in order to place the China trade upon a more satisfactory basis.

In order to form an accurate conception of the various circumstances which have worked together to bring the trade with China into its existing condition, it is necessary to go as far back as the year 1860, when the existing commercial treaty with China was concluded. At the time when that instrument was under negotiation it had been discovered that our trade with China was materially hampered by a variety of restrictions, both as to those who should be allowed to trade and in the form of oppressive internal duties of the nature of barrier, lekim, and other dues, which prevented the free circulation of our imports in the country, and enhanced the price of produce brought down to the Treaty Ports, then only five in number, for sale to our merchants. After much difficulty and protracted negotiation the Treaty of Tientsin was concluded, and it was hoped that its provisions would prove such as to do away entirely with the obstacles existing to a free development both of the export and import trade. "The design of the Treaty," says the Shanghai Chamber of Commerce, in the memorial with reference to the revision of the treaty which they addressed to Sir RUTHERFORD ALCOCK, H.M.'s Minister at Peking, in 1867, "was, "by throwing open the producing and consuming districts "to foreign capital and energy, and by fostering a closer "communication between the Chinese people and Euro-"peans, to introduce an element of progress into our "trading relations, previously shackled by innumerable "artificial and unjust restrictions;" but the memorialists add, "this object has only been attained to a limited extent." The opening of the new Treaty ports had no doubt given an impetus to the trade for some time, but as years went on it had been found that at each port trade was much hampered, and that the circulation of our manufactured goods in the interior was still greatly curtailed by barrier dues and other like exactions. This was impressed upon Sir RUTHERFORD ALCOCK in the memorial above quoted, and in others from the remaining Treaty ports, which were sent in to him at the same time. The difficulty was frankly admitted by Sir RUTHERFORD ALCOCK to exist, and he drew up a Convention with the Chinese Government for the revision of the Treaty, which, he held, would have the effect of greatly modifying the restrictions; but this Convention was considered so defective by mercantile men, both in China and at home, that sufficiently strong representations were made to the Government to induce them to refuse to ratify the Convention, and accordingly the China trade, to the present day, retains the defects found to exist in it when the Tientsin Treaty came into force, and admitted by Sir RUTHERFORD ALCOCK himself to have been only partially removed by that instrument. These defects, it will be shown further on, have largely contributed to the lamentable state of affairs which has for years past been deplored in China, and of which the effects are beginning to be appreciated at home.

(To be continued.)

IN consequence of the short interval between this and September it has been decided that no meeting of the Oriental Congress will be held this year; and according to present arrangements the meeting of 1876 will be held at St. Petersburg.

REGISTRY OF SHIPPING IN CHINA.

We have received copies of the "Instructions to Consuls in China and Japan" and of the "Instructions to Surveyors" in the same countries, which have been prepared by the Board of Trade and approved by the Secretary of State for Foreign Affairs. These books have been issued, and have been transmitted to China in consequence of the constitution of Shanghai into a port of registry under the China and Japan Maritime Order in Council of 1874, and are designed to give the necessary information to Consuls with reference to the subjects of which they respectively treat. There can be no doubt that these little handbooks will be of very great service both to officials and to those connected with the mercantile marine in China and Japan. The "Instructions to Consuls" forms a most convenient compendium of that most complicated portion of our law, the Acts relating to the registry of merchant shipping. The Consul is supposed, by a happy fiction, to be thoroughly conversant with all the sections of these Acts which apply to vessels abroad, but as a matter of fact, it is rare that even experienced Consular officers are found who have thoroughly mastered the details of these useful but eminently unattractive enactments. The various statutes regulating British merchant shipping extend from the year 1854 to the year 1873, and, as most of our readers are aware, a further Merchant Shipping Amendment Act is now under the consideration of Parliament. There are at the present extant no less than eight different Acts relating to British shipping, exclusive of the Colonial Shipping Act of 1868; and the great difficulty in regard to them is that one Act has the effect of amending certain sections of another; so that, before anyone can be certain of the actual law which applies on a given point, he has to consult very carefully the whole of the statutes now in force. If anything were wanted to prove the urgent necessity of something being done to reduce the unweildy mass of our statute law into a regular shape, it is to be found in the merchant shipping laws; and it is with no little satisfaction that we observe the skill with which this end has been accomplished, as far as is practicable under the existing state of things, in the compendiums under notice. To every section of the portions of the Acts relating to the registration or survey of vessels is appended an italic memorandum indicating repeal or modification by any subsequent section in any Act at present in force; and it is thus rendered comparatively easy with anything like reasonable care for those concerned to ascertain with certainty and precision the law with reference to any given point. Seeing how frequently mistakes have been fallen into not only by private individuals but by Consular and other officials in regard to important points connected with the registration and survey of ships, it is a subject

Digitized by Google

of congratulation that a simple and effectual guide has been issued by the authority of the Board of Trade.

We understand that Mr. W. H. Tapp, the Registrar appointed under the recent Order in Council, has been engaged in the compilation of these handbooks. Mr. Tapp will proceed to Shanghai by the next P. and O. mail to take up his post as Registrar. Some slight hitches arose in consequence of a division of authority between the Board of Trade and the Foreign-office in the matter, which, however, was finally settled by the office of Registrar of Shipping at Shanghai being transferred to the former. This has caused some delay in Mr. Tapp's departure. It is satisfactory that the office has been placed under the Board of Trade, and it would probably be desirable that the Shipping-office at Shanghai should follow it, so that all shipping matters at that port should be under the responsible control of one department.

Literature.

Letters from China and Japan. By L.D.S. Henry S. King and Co., London. 1875.

The first six letters take us from England, *viâ* Marseilles, to Hong Kong, where "Miss F. became Mrs. —, and 'H. and I.' were merged in *we*." The writer's husband having but a brief leave of absence from his duties at the Foochow Arsenal, the happy couple had to leave Hong Kong a few days after their marriage, and the writer's experiences of China, or rather of the Arsenal near Foochow, then commence. Letters VIII. to XXXIV. describe her daily life at the Arsenal, which is varied only by occasional visits to Foochow. A few of the chief characteristics of the Chinese are lightly touched upon, and two or three festivals have a few lines devoted to them; the writer speaks rather more fully about some of the customs connected with deaths and funerals, her attention being called to that subject by the death of Shên Pao-chên's father, and she takes the opportunity of remarking, reasonably enough, that "the reverence of the Chinese for their parents is certainly one of the best features in their character, though some of the ways they have of testifying it are very ludicrous to European notions." Letter XXXV. is devoted to a pleasant trip on the River Min in a house-boat, and in the next two letters the writer records her visits to Shanghai and Ningpo. L. D. S. and her husband then crossed over to Japan, where they spent about two months before returning home. Their stay was chiefly at Yedo and Yokohama, in the neighbourhood of which they made some interesting excursions, and they were also able to get a peep at Nagasaki and Osaka. We will cite one passage, in which the writer sums up her impressions of the Japanese:—"They appear," she says, "to be even a more intensely conceited nation than the Chinese, and after attaining the most superficial knowledge on any subject, are quite satisfied they know as much as those who are teaching them. Notwithstanding also their eager desire to imitate everything European, it is astonishing how jealous they are of its being known that they have foreign instructors, and how anxious they are, on all public occasions, to keep them as far as it is possible to do so in the background." The last-mentioned trait in the Japanese character L. D. S. naturally could not be expected to look upon with a kindly eye; still she and her husband left the country, regretting that they were not able to see more of so beautiful a land, and so curious a people.

Under the heading of "Fine Art Notes and News," our contemporary, the *Academy*, contrived last week to fall into an odd blunder, which shows how little attention is paid by some people in this country to matters Chinese. "There has just arrived in Paris," we are told, "a most interesting collection of Chinese works of art, brought over by M. Sichel." So far so good; but our contemporary proceeds, "It appears the late Emperor Kien-long (*sic.*), anxious to replace his treasures destroyed in the burning of the Summer Palace by the French and English troops, sent emissaries to every part of his dominions to collect them." Now, as the reign of Kien-Lung lasted only from 1736 to 1795, we are not clear how that Emperor can, by any stretch of imagination, be supposed to have known anything about the burning of Yüan Ming Yüan. As the remainder of the note in question may prove interesting to those of our readers who are anxious to enrich their collections of Chinese "curios," we give it in full:—"On the death of the Emperor, the guardians of his infant successor caused the whole to be sold by public auction (?). M. Sichel was one of the chief purchasers, and these, together with the objects which he has himself collected at Peking, form a series of works of the highest interest and importance. The collection is not yet wholly unpacked, but will be displayed in the Rue Pigalle, until dispersed by public sale either in Paris or London."

Under the head of "Central Asia," it is stated in the current number of Trübner's *Oriental Literary Record* that Mr. H. W. Bellew, C.S.I., Surgeon-Major, Bengal Staff Corps, and author of a "Journal of a Mission to Kandehar in 1857-8," "Grammar and Dictionary of the Pukkhto Language," "From the Indus to the Tigris," &c., has just returned from his great mission in Central Asia, and is preparing for the press a work entitled "Kashmir and Kasghar—a Narrative of the Journey of the Embassy to Kasghar in 1873-4." As Mr. Bellew has probably the most extensive acquaintance with Central Asia of any living European, his work cannot fail to be exceedingly interesting.

From the same periodical we learn that 350 guineas is the price of the unique collection of works by, and relating to, Camoens, to which we made reference on a previous occasion.

Messrs. Trübner and Co. announce for publication, in October, the two lectures on Chinese Language and Literature, recently delivered at the Royal Institution, by Mr. Robert K. Douglas, of the British Museum, Professor of Chinese at King's College, London, and formerly of H.M.'s Consular Service in China.

The Geographical Congress at Paris.—This Congress will be opened on August 1, and promises to be a complete success, as far, at least, as the exhibition of maps and other objects bearing upon geography is concerned. The refusal of the Government to appoint a Commissioner has excluded private firms from the Exhibition; but there will be collections of maps and charts from the Admiralty, the Topographical Department of the War-office, and the Indian Survey-office. The Geographical Society will be represented by Sir R. Alcock, one of its Vice-Presidents, and will exhibit a collection of its *journals*. Most foreign Governments have appointed Commissioners and Commissions. Thus, Sweden will be represented by Colonel Versteek, Director of Topographical Surveys; M. Stiffe, librarian at Upsala University; Professor Forell, of the Geological Survey; M. Sidenbald, of the Statistical Department; and M. Rubenson, of the Meteorological-office. The Netherlands will be represented by Colonel Versteeg, Egypt by Dr. Sceweinfurth, &c. The business of the Congress will be transacted in sections, and the meetings are not to extend over ten days. The sections are, (1) mathematical geography, geodesy, and topography; (2) hydrography and ocean geography; (3) physical geography, meteorology, anthropology, and geology; (4) historical geography, ethnography and philology; (5) economical geography and statistics; (6) didactic geography; (7) travels. The programme already contains no less than 123 questions to be discussed by these sections. A general meeting will be held daily, in the forenoon. Amongst foreign geographers of note who will attend the Congress are Professor H. Kiepert, Dr. O'Peschel, D. A. Petermann, Weyprecht, and Payer, Dr. Nachtigall, and Dr. Schweinfurth. The Paris Committee have made arrangements with several hotels for a reduction of their ordinary charges, and every facility will be afforded to members to inspect the scientific collections and make excursions into the neighbourhood of Paris.

Correspondence.

THE SUPPRESSION OF THE OPIUM TRADE.

(To the Editor of the *London and China Telegraph.*)

SIR,—Your correspondent, "An Old Resident in China," appears to be a friend to the Anti-Opium movement, but his letter is calculated to prevent people from helping us. May I be allowed a few words in reply?

(I.) The performance of one duty is no excuse for neglect of another. As Christians our duty is to send the gospel to China; as British citizens our duty is to relieve China from the injustice she has suffered at our hands. *We* are the sovereigns of India; *we* are responsible for the Opium trade, and no man can shake himself loose from this grave responsibility by pleading that he supports missions.

(II.) Christian missions show no peculiar power for coping with the effects of opium-smoking. In England Christianity saves some from drunkenness and other vices, but in spite of its pure and mighty influence, these vices are not nearly extinct, are, indeed, not sensibly diminishing. In China, where Protestant Christianity numbers ten or twenty thousand converts, a mere drop in the ocean, it is not reasonable to expect that its progress can do much in this, or within several generations, to arrest the Opium-plague.

(III.) The best service English Christians can do to missions in China is to undo the evil and wrong of the Opium trade. As a missionary myself, acquainted with many missionaries now in China, I am bold to say that there is hardly a missionary there who, if you were to ask him which he would choose, the reversal of British Opium policy or a reinforcement of a hundred missionaries for China, would hesitate for a moment. No possible increase to missionary operations could render such service to Christianity in the East as the spectacle of a great Christian nation acknowledging and endeavouring to repair this grievous fault.

It is a pity that your correspondent has not more faith. If he and every other friend of missions in the United Kingdom would simply take so much trouble as to sign a petition to Parliament the thing would be done next session without any miracle. They are numerous and influential enough, if only they knew their power and would combine.—I am, &c.,

London, July 7, 1875. F. S. TURNER.

Nang Choy has written a long letter to *The Times*, which we regret our space prevents our giving in full. He says:—But if the English Go-

Digitized by Google

vernment should after all decline to stir in this important question, for fear of the Indian revenue being put in jeopardy, let them declare their reasons in plain language. Let them admit this: We are perfectly aware of the evils and miseries caused to China by the use of Opium. We are responsible for the extent to which the Opium trade is now carried on in China, and for having introduced the drug into the tariff of our Treaty with China. We are licensing and encouraging its cultivation in our territories in India, and are deriving from that source a revenue of six millions sterling annually. We are very sorry for the evil consequences which ensue from Opium; but we cannot help it, because we cannot afford to give up the revenue. Let them boldly declare this to the world that all people may know how a Christian nation is treating China. But I am persuaded that the English nation is not so cruel as that. The English people, so famous for their love of right and justice, will surely not do to others an injustice which they would not tolerate themselves. It must be the mistaken policy of a few, and it needs but to call the attention of the English public to the grievance, and they will bring their unanimous opinion and influence to bear upon their Government with a view of inducing them to alter the objectionable policy.

With respect to the other part of the question—that if India should cease to grow the poppy other nations may supply Opium to China—I need not say much. For if the English Government were to strike out the clause concerning Opium in the Tientsin Treaty, the Chinese Government would prohibit all importations of the drug, and it is therefore not likely that other nations would go to the expense and trouble of growing an article for importation into a country where it is liable to seizure.

To insure, however, that substantial benefit will accrue to China in case of India ceasing to cultivate the poppy, I have every reason to believe that the Chinese Government will guarantee, on reasonable terms, the enforcing of the prohibitions against the importation, growth, and consumption of opium in my country.

To sum up in conclusion. I believe I have clearly proved that Opium is a poisonous drug, and its use has produced endless miseries to my country; that the British Indian Government is reprehensible, for the sake of a few millions sterling, for encouraging the cultivation of the poisonous drug and for fostering a trade which has such an evil tendency; and that the Government of my nation is very anxious to cope with the national evil, but owing to the legalisation of the Indian drug it is impossible for the Chinese Government to put a stop to it. These are the plain facts, and no one can dispute them. Whether the British Government, now that the Opium question in all its phases has been fully discussed in and out of Parliament, will still let things remain *in statu quo*, or will see the expediency of discontinuing the objectionable Opium system and adopting as ounder course of policy in India, remains to be seen.

That, for the sake of the national character of Great Britain, Her Britannic Majesty's Government may be moved to efface the foul stain from their escutcheon by reason of their national complicity in a pernicious traffic which has ruined millions of my countrymen, and which impedes greatly the progress of civilisation, cannot but be the wish of every true Englishman and the prayer of the Government and people of my country and of, I venture to say, every good Christian in the world.

BURMAH AND WESTERN CHINA.

(THE TIMES.)

In order to understand the refusal of the King, we must call to mind both his commercial and his political objects. A strip of debatable land, governed by savage and half-independent tribes, cuts off the north-east of Burmah from the Chinese Province of Yunnan, which is, perhaps, the richest part of China. Its precious metals, its coarser minerals, the fertility of its soil, its silks, and its manufactured stuffs long ago marked it out as a place that might be made one of the best markets in the East. It was cruelly wasted by the Panthay War, in which the Mohammedan part of the inhabitants made themselves masters, for a time, of a large stretch of territory, but it is nearly as good a field as ever for commercial enterprise. Two important attempts have been made to open it up to English merchants, by means of a route from India through Bhamo, which lies about 300 miles above Mandalay, at the very place where Burmah meets the debatable land. One, as we have said, was undertaken in 1868 by Major Sladen, and the other a few months ago by Colonel Brown. Both were defeated by the mingled agency of the Chinese and the Burmese Governments. The Chinese authorities were, doubtless, actuated by their inveterate dislike to strangers in general, and especially to those English traders who, in the name of peace, usually split up the nationalities of the East like a wedge. The traders of Yunnan were also anxious to keep the trade in their own hands. The King of Burmah had equally strong motives for wishing to keep our countrymen away from the rich Chinese Province. He concentrates all the wholesale trade of his dominions into his own hands by forcing the dealers in any commodity that will yield a profit to sell it at the price which he names, and by then re-selling it at any sum he can extract from the foreign merchants. Such is a great source of his revenue, and so much does he value it that, although he pledged himself to give freedom of trade to our countrymen by the Treaty of 1862, he afterwards systematically refused to abandon his monopolies. Apparently brought to reason by the retaliation of the Indian Government, he signed another Treaty of Commerce in 1867; but he has broken the second bargain as flagrantly, if not as openly, as he broke the first. Nothing but force will make him give up his monopoly of the wholesale trade. Hence one of the main reasons why he has been persistently hostile to the attempts of our merchants to open up an overland trading route with Western China. He knows that the trade with Yunnan would slip out of his hands if English caravans were to ply through Bhamo. It may be open to doubt whether such a line of traffic would prove highly profitable to our capitalists, and the lawless tribes of the debatable land would certainly make it perilous; but since we have begun the enterprise we cannot permit ourselves to be turned back either by the King of Burmah or the authorities of China. We cannot afford to make such a confession of weakness to rulers who lie in wait for an opportunity of breaking our hold on the East, and therefore the Indian Government does right to insist that it shall be allowed to send troops through Burmese territory for the protection of our merchants.

(DAILY NEWS.)

The stipulation to which the King of Burmah has refused his assent and the rejection of which has brought on the present difficulty was that he should allow British troops to pass through his territory if called on to do so by our Government. The only country conterminous with Burmah to which we could not send troops much more conveniently than through the Burmese territory is Western China. With Siam, which borders Burmah on the south-west, we are on the best of terms, and with Anam we have no quarrel, while each of these States is accessible from the sea. Burmah, on the other hand, since we have deprived her, first, of Arracan, Senassarim, and then of Pegu, is an inland State, presenting its north-eastern frontier to China for a distance of three hundred and fifty miles. For many years the attention of British statesmen has been directed to the importance of opening up trade with the west of China from British territory east of the Bay of Bengal. Captain Sprye suggested such a trade to Lord William Bentinck, and in 1844 memorialised Sir Robert Peel on the subject. In 1862 Colonel, now Sir Arthur Phayre, the able administrator of British Burmah, visited Mandalay under orders from the Government of India, to negotiate a treaty for the same objects, which, however, remain to this day unfulfilled. It is only in the interests of such trade that any importance can be ascribed to a demand for permission to send troops through Burmah. The permission of the Mandalay Government to carry goods up to the frontier of China might possibly become of no avail were there no means of overcoming opposition offered by the Governors of Yunnan. Questions have been raised from time to time as to the relative advantages of particular trade routes in this part of the world, and it was to throw light on these that the Indian Government lately sent an exploring party to survey the route from Bhamo in Burmah to Salifoo in the Chinese province of Yunnan. Various schemes have been proposed for effecting the same main object. At one time it was thought that goods now sent from Bengal round the Straits of Singapore to a Chinese port for Western China might be sent to their ultimate destination by opening the navigation of the Salween, which flows southward from the Chinese frontier to the Gulf of Martaban, but the river was found to be a series of rapids. During the former administration of Lord Salisbury a scheme was sanctioned for the survey of a line of railway from Rangoon to the Chinese frontier at Kiang Hung, but he went out of office, and the scheme was dropped. Six months ago a favourable opportunity seemed to present itself for attempting once more the opening of an intercourse which had suffered so many impediments. It was at first intended to send Colonel Horace Browne's party by the Mandalay and Theinee road to penetrate to Yunnan-foo and return by way of Tali-foo and Momein to Bhamo, but at the wish of the King of Burmah this plan was modified, and the examination of the Theinee road was postponed. The Bhamo route then alone remained to be taken in hand, and the mission was proceeding by it to the provincial capital of Yunnan to endeavour to work out there the problem of establishing a direct trade road by agreement with the Chinese authorities. How disastrously the enterprise ended is well known.

(STANDARD.)

The ground on which the King of Burmah has broken off the negotiations with the Indian Government irresistibly suggests some sort of understanding between him and China. So far as Burmah itself is concerned there should be no objection to the free passage of British troops. The King cannot seriously believe that we are aiming at any territorial acquisition at his expense. Were the relations between Burmah and China the same as those which have hitherto prevailed, almost from time immemorial, he should be inclined rather to help than to thwart any measures having for their object the repression of the Chinese influence on his northern and eastern frontiers. The trade between the British provinces and Yunnan cannot be otherwise than beneficial to the country through which it passes, and there has been nothing hitherto to lead us to suppose that it was regarded with jealousy by the Burmans. A good understanding with the Indian Government would appear to be not only the most expedient but the most profitable policy for Burmah, which has nothing to fear from British aggression, and everything to dread from the newly-awakened military ambition of her Chinese neighbours. That in view of all these considerations, which, doubtless, have been urged by Sir Douglas Forsyth upon his Golden-Footed Majesty, the King of Burmah has declined our friendship and preferred that of China makes the situation more serious than if it were simply a quarrel, as in 1825 and 1852, between ourselves and the Burmans. This is, in fact, the first appearance of China on the stage of Indian politics since the establishment of our Empire in India. The time has been, indeed, when the Chinese legions were able to carry their standards beyond the Burhampooter, and to overrun a great part of Bengal; but since we have been conquerors in India we have ceased to think of China as even a possible competitor on that ground. It may be that we shall live to see a great change in the ever-shifting scenes of the Indian drama. The China of to-day is a very different nation from that which was our neighbour and Burmah's even so late as 1852. It is no secret that her Government nourishes ideas of a great national regeneration; that her military forces have been vastly increased, and her armaments strengthened and made efficient by the introduction of European discipline, science, and weapons. The knowledge of all this must have reached the ears of the Burman Court at Mandalay, and it is not unreasonable to suppose that it has had some influence in determining the King to reject the demands of England. The Manwyne outrage is now proved beyond a doubt to have been the work of Chinese soldiers acting under the authority of Chinese officials. All this, while it increases the gravity of the question now pending of war or peace with Burmah, makes it doubly imperative upon us to insist not only upon a due atonement for the outrage, but upon such guarantees as shall secure us from any further annoyance to British trade on the Chinese frontier.

Digitized by Google

Monetary and Commercial.

Referring to our last week's publication as to Messrs. Gregson and Co., we are glad to be able to correct the statement therein made as to their failure. The explanation given to us is that no acceptance of theirs was ever dishonoured, and that the indebtedness of the firm has been in liquidation in the ordinary way, and is now wholly discharged. It is with much satisfaction that we make this announcement.

In connection with the failure of the firm of Kilburn, Kershaw, and Co., the London and Westminster Bank now find that the securities held by them have been grossly over valued, and that William Kershaw, by fraudulent representations, obtained advances to the extent of about £150,000. The directors of the Bank have caused a warrant to be issued and a reward of £200 to be offered for his apprehension.

The Eastern Telegraph Company announce a dividend of 2s. 6d. per share, making, with the interim dividends already paid, 5 per cent. for the year.

It is notified, with reference to the estate of Mr. H. H. Severs, who was adjudicated bankrupt in December, 1869, that a dividend meeting will be held at the Bankruptcy Court on the 20th inst. At this meeting the assignees will submit statements of the bankrupt's estate recovered and outstanding, and of all receipts and of all payments made or to be made, and the creditors will declare whether any and what dividend shall be paid. Proofs of debts will be received, and creditors who have not proved, or do not then prove, will be excluded the benefit of the dividend, and all claims not proved will be disallowed.

The suspension has been announced of the firm of John Ranking and Co., merchants, of St. Helen's-place. The firm has been established for nearly a century, and was in high repute. The cause of the stoppage is stated to be the failure of shipments and remittances. The liabilities are estimated at about £150,000.

We have received a circular from Messrs. Arles Dufour and Co., Lyons, stating that their firm has been formed into a company, with a capital of 6,000,000 francs.

A dissolution of the partnership of Messrs. James Fergusson and James Goddard, of Mincing-lane, tea-brokers, is gazetted.

Messrs. Nathan and Wood notify that in consequence of the retirement of Messrs. Percival and Co. they have made arrangements with Mr. Richard Aspinall, the acting partner in that firm, to continue in their name the business which he has hitherto conducted.

Mr. J. D. McKenzie's New York Tea Circular, dated 22nd ult., contains the subjoined remarks :—

Auction sales for cash continue without reserve, aud the immediate outlook for any favourable business is far from satisfactory. Excessive supplies crowded upon unwilling purchasers—who have already more Teas in stock than they can readily sell to their trade—must, of necessity, cause lower and lower prices as long as such a course is pursued. Settling day seems to have come at last to many people who have been doing large business on credit, and not on actual capital—who have traded, in order to keep afloat a little longer, with the vain hope that something would turn up to bring them out all right, and this, too, when a forced liquidation is the general condition of all branches of business in every commercial country in the world.

The traffic receipts of the Great Northern Telegraph Company for the month of June were this year f.393,080, last year f.386,374; the total receipts from 1st January to 30th June were this year f.1,995,477, last year f.2,076,371.

The average time of transit of messages by the Indo-European Telegraph Company between London and India *via* Teheran of all outward messages to India, the Straits Settlements, China, Japan, Java, and Australia, during the week ending July 2, was one hour eighteen minutes.

Bar Silver has slightly declined, and we quote it at 55 11-16d. per oz. A few orders for Mexican Dollars have come to hand, and in the absence of supplies a higher rate has been quoted, without, however, finding sellers, the market being cleared of this coin.

ARTICLES OF IMPORT.

The markets for almost all Eastern Produce have remained in a languid state, in some instances accompanied by a further considerable reduction in value, and generally the tendency in prices has been unfavourable to the importer. The exceptions to this depression have been few, the most important consisting of Coffee, which with only slight fluctuations has sustained previous rates. The Tea Market has been flat, and the first arrival of new season's Teas has attracted less attention than usual, and prices have opened about 1d. lower than in 1874.

TEA.

Messrs. Arthur Capel and Co.'s Circular says :—The chief feature of interest has been the arrival of the Glenartney on the 5th inst. with the first cargo of Teas from Hankow. The samples were shown freely, but the trade have exercised more caution than usual, and only about two-thirds of the cargo has been sold, prices ranging from 1s. 7d. to 1s. 9d. for good medium, 1s. 10d. to 2s. 1d. for fine, and 2s. 2d. to 2s. 7d. for finest grades. Exporters have bought very sparingly. The quality on the whole may be considered fully equal to the previous season, with perhaps the exception of the finest Ningchows.

Congous.—Red-leaf kinds : Old season's Teas have been neglected during the past week, and there is no change in prices to quote, or remarks to make as to the various kinds. Black-leaf kinds : A few sales have been made without change in prices. The attention of the trade has been given to the new Teas. New season's new-make kinds : Sales have been made from 11d. to 1s. per lb. for common to fair, 1s. 1d. to 1s. 3d. for good, showing rather firmer rates than those of the previous week. Ooloongs and Souchongs have been neglected, but prices are nominally without change. *Scented Teas.*—Canton Capers : Old seasons show no improvement, the demand being moderate. Further arrivals of new found only a slow sale at from 1s. 1½d. to 1s. 3d. for fair to good, the scent being poor. Orange Pekoes : Old season's Canton kinds show no change. New seasons have met with a fair demand, and previous prices have been fully maintained, especially for the finer qualities. Foochow kinds are without animation, buyers waiting the arrivals of the new season's. *Green Teas.*—There has been but little done privately. At public sale prices continue to show a low range, especially for common to medium kinds.

Messrs. James Goddard, Junior, and Co.'s Circular says :—The Glenartney arrived from Hankow with New Season's Congou on the 5th ; samples were on show on the same day. Some 4,000 or 5,000 chests and half-chests found buyers at from 1s. 7d. to 2s.; finest 2s. 3½d. to 2s. 6d.; but the trade have only bought in small parcels. Since the first day, sales have been slow and difficult to make ; the quality, as far as any opinion can be formed from a first cargo, is a fair average, somewhat light but rather well made. In all other kinds besides the auctions there has been very little doing ; the market is quiet. A few New Paklings have been sold for export at 2s. 3d.

SILK.

The market has been extremely quiet since the commencement of the month, business having been confined to small daily transactions for the supply of immediate requirements. There has been some little demand for certain classes of China Silk, and a few transactions have taken place at about former rates. Cantons and Japans have to a great extent been neglected, and prices of the latter have undergone a further slight decline. Deliveries 1st to 7th inclusive :—China, 694 bales ; Canton, 120; Japan, 87—total, 901 bales.

Messrs. Durant and Co.'s Circular says :—We are now entering upon the second half of the year, fortunately with brighter prospects than in January, although even then there appeared to be good ground for hope. The aggregate stocks are materially less than at this time last year ; our figures show a diminution of nearly 7,000 bales—of which China Silk alone stands for nearly 5,000 bales. Our quotations too are certainly not higher, even for China Silk as a whole, whereas in Bengal and Japan Silk they are very materially lower. All looms and mills are going full time, and at present the looms are gaining upon the mills, so that the large heaps of thrown Silk are gradually if not rapidly vanishing.

Messrs. Arles, Dufour and Co.'s Lyons Circular says :—We have had a well-sustained activity without excitement. Under the influence of high prices paid for cocoons in Italy, all descriptions of European Silk realised a small advance. Several contracts have been made for new French Silk, but in Italian sorts transactions to arrive have been so far extremely limited. As regards Chinas consumption remains very large, but stocks being far from exhausted, and holders apprehending the competition of a large production of common Italian Silk, there is not the least rise, in spite of high prices telegraphed from Shanghai.

COFFEE.

Supplies of Plantation Ceylon have met a good steady demand, and fluctuations in prices have been unusually slight, closing exactly on a par with those previously given, middling selling at 103s. to 105s. In Native business has been almost suspended. The closing quotations for Plantation Ceylon are :—Triage and ordinary 80s. to 95s., common to good small 95s. 6d. to 101s., low middling 100s. 6d. to 102s. 6d., middling 103s. to 105s., good middling to fine middling bold 105s. 6d. to 108s., good to fine bold 109s. to 114s. 6d., pea-berry 122s. 6d. to 128s.

SUGAR.

The production of refined having been on a smaller scale than for some months past, refiners have again bought with hesitation, prolonging the previous depression in the market and downward tendency in prices. Scarcely any business has been done in East Indian kinds, the only sales reported being 300 mats Native Penang at 16s. 3d. to 16s. 6d., and 400 tons unclayed Ilo Ilo at 16s. 6d. per cwt.

COCOANUT OIL has been rather more inquired for, and sales of new Ceylon have taken place at £37 5s. to £37 for pipes, and at £37 10s. for hogsheads. Cochin is quoted £41 to £43, according to quality.

CUTCH is firmer, and about 1,500 boxes have been sold at 24s. to 24s. 6d. for fine Pegue, with 25s. for fine Pagoda mark. In auction 11 boxes middling Pegu kind from Aden were sold at 21s.

CHINA PRESERVES.—35 casks Ginger were bought in at 6d.

CHINA HAIR, &c.—At auction of 15 cases Horse 8 cases sold at

Digitized by Google

2s. 11d., 20 cases ditto Human bought in at 3s. to 10s. 6d. per lb., and 16 bales bristles were chiefly bought in at 2s. to 5s. per lb.

COLOMBO ROOT.—In public sale of 121 bags Ceylon offered a few only were sold at 24s. per cwt. for medium quality.

CAMPHOR has been steady at the recent decline; 250 boxes have changed hands at 70s. per cwt. for old re-weights and 67s. 6d. new landing weights.

CUBEBS.—Quiet but steady; retail sales effected at previous quotations.

DRAGON'S-BLOOD has been very quiet.

EBONY.—No business done.

ESSENTIAL OILS.—*Cinnamon* dull and supply abundant, and of 8 cases 5 sold at 2⅛ to 3d. per oz. for leaf. *Citronelle* has declined ½d. per oz., and of 151 cases, over one-third sold at 1½d. per oz., and a few cases at 1⅝d. *Aniseed* firmly held, and has sold in small lots at 10s. 6d. to 10s. 3d.; 8 cases at auction retired, closing quiet. *Cassia* dull; small sales at previous value, and of 32 cases at auction 3 sold at 4s. 4d. *Lemon Grass* steady, with small sales. *Nutmeg* quiet; 8 cases bought in.

GUMS.—*Benjamin* steady: One case fine Siam sold at £28; of 100 cases Sumatra a few only sold, middling seconds at £8 10s. *Copal:* Small trade at previous value. *Damar* quiet: Of 84 cases half sold at 57s. 6d. to 58s. for good. *Gamboge* quiet; 17 cases offered and retired.

GAMBIER has been quieter, and sales have been moderate, amounting to about 1,000 bales on the spot, at a reduction of 1s. per cwt. at 26s. 9d. to 27s. for whole bales, and 26s. 9d. ex quay; 50 tons just arrived have been sold at 26s. ex ship, all faults. For arrival the sales are about 200 tons, including June at 25s. 9d. ex ship.

GALLS.—China have been in steady demand at fully previous prices. By private contract about 100 cases worked have been sold at 53s., and for arrival about 250 cases unworked at 52s. 6d. At auction 187 cases unworked were bought in at 53s. per cwt. Statement of the movements of China and Japan Galls for the first six months of the three years—

Delivered	3,065	3,481	4,454
Stock, June 30	1,472	2,129	2,955

GALANGAL ROOT.—Market dull, and no business doing.

GUTTA-PERCHA is very quiet, but prices are steady at the decline recently noted.

HEMP.—There has been less demand for Manila, and only small sales have occurred at rather lower rates. Of the moderate supply catalogued for the public sales the greater part had been previously disposed of at rather lower prices, and the small remaining quantity met little demand, and was bought in. Of 860 bales offered about 500 bales were sold before the sale, price not reported; the remainder was bought in at £31 10s. One bale China was sold at £34.

HIDES.—Messrs. Dyster, Nalder and Co.'s monthly report is as follows:—Singapore, Penang and Rangoon, &c., Ox and Cow Hides: The market is dull, and a large portion of the hides offered remained unsold, although for those disposed of nearly late prices were obtained. The sales consist of 3,872 Singapore and Penang; light 13d. to 13½d.; seconds 10½d. to 11d.; thirds 7d. to 7½d.; heavy seconds 8d. to 10½d.; extra heavy 6d. to 8½d.; small, seconds 11½d. to 13d.; 2,228 Rangoon: light seconds 12d.; thirds 6½d. to 7d.; heavy, seconds 8½d.; extra heavy 7½d.; small, thirds 8d. per lb. Singapore, Penang, &c., Buffalo Hides: The supply has been moderate, and the demand good, but the prices required by holders have restricted business. The sales comprise 2,379 Singapore, &c.: Slaughtered, 1st heavy, average 34¾ to 42¼ lb. 5⅞d. to 6⅝d.; seconds 5d.; fair, ordinary, 1st heavy, average 28⅝ lb. 5⅜d.; seconds 5d. to 5¼d.; light average 11 to 11⅛ lb. 6d. to 7d. per lb. 371 Rangoon: 1st. heavy, average 37 to 42¾ lb. 4⅜d. to 5d.; seconds 4¼d.; Thirds 2⅛d. per lb. Java Hides: There are no sales of Ox and Cow to report. Few buffalo have been offered, and the only sales are 115 hides: Unshaved, 2nd heavy, average 23⅛ to 23¼ lb. 5⅜d. to 6⅛d.; 1st light, average 11⅝ lb. 7⅜d. per lb.

INDIA-RUBBER.—No transactions effected; 40 cases Borneo bought in at 1s. 4½d. per lb.

ISINGLASS.—No business done.

JAPAN WAX.—The market has continued quiet, with but small business privately at 50s. to 53s. for fair and fine, and of 74 boxes at auction half sold, yellow saucers at 48s. per cwt. There are signs of an improved inquiry at the close.

MUSK has been firm, and in good demand. At sale, of 105 caddies, &c., Tonquin, one-fourth sold at 43s. 6d. to 45s. per oz. for good selected well-shaped pods; 15s. 6d. to 16s. rough and bally, and 20s. wet pickings; 2 caddies Cabardine retired, and 15 tins Grain retired, but part subsequently sold, good at 50s. to 52s. 6d. per oz.

PEPPER.—*Black* has been quiet, with small private sales of Singapore at 5 9-16d. to 5½d., and Penang at 4⅝d. to 4½d. Auctions have embraced 7,307 bags, of which about one-third sold, Singapore at 5½d. to 5⅝d., closing with sellers at the lower figure; Penang at 4⅝d., with a few lots at 4½d.; Siam at 4⅝d. to 4½d., making the decline fully ¼d. per lb. Afloat, over 100 tons have been sold, Singapore, March shipment, at 5½d. Penang 4½d., with sellers at the close at lower rates. *White* is nearly ½d. per lb. down, and of 1,183 bags offered one-half was quitted at 6⅝d. to 6¾d. for fair Singapore, and 6⅛d. to 6¼d. Penang. Privately over 500 bags Singapore are reported at 6½d. cash.

PLUMBAGO.—At auction of 312 bales Ceylon about one-half sold, common dust at 8s., good fair ditto 8s. 9d., good bold chips 11s., medium small lump at 14s. to 15s., good to fine ditto 17s. to 18s. 6d.

RICE.—On the spot the demand has again been of the most limited character, and only scanty sales have been made at easy rates. Of the exceptionally heavy quantities afloat the first arrivals have taken place, but no business has been reported, and sales can only be effected at a further decline.

RATTANS.—Market steady; 13,700 bundles Singapore have been sold at £16 to £25 per ton for good quality.

RHUBARB.—The market for China has been steady; 70 cases sold, fair to good bold at 2s. 6d. to 3s. 11d., middling to fair 1s. 2d. to 1s. 10d.

SAGO.—Small pearl is in good demand, and for arrival 700 bags have been sold at 17s. 6d. ex ship, and 18s. 3d. landed. At auction 739 bags medium chiefly sold at 16s. to 16s. 6d., of 432 bags large the sound was bought in at 18s., but 370 bags damaged were sold at 15s. to 15s. 6d. for first class. *Flour* is dull, and at auction 1,186 bags Singapore 700 bags sold at 12s. to 12s. 3d., being 1s. lower.

TAPIOCA.—Of 700 bags Penang (Alma mark) 500 bags very fine were sold at 2⅞d., 300 bags Singapore partly sold, small white at 2⅛d. to 2¼d. Privately 250 bags very fine Penang have been sold at 2⅜d. *Pearl Tapioca:* 230 bags medium were bought in at 21s.

TIN.—The market is flat, and transactions have been very limited. The current quotations are: Straits on the spot £80 to £81, afloat £80; Banca £88 to £89; Billiton £83 per ton.

ARTICLES OF EXPORT.

METALS.

IRON.—Welsh: Rails, £7; Bars, £8; Staffordshire Best: Bars, £9 to £10; Nail Rods, £9 to £9 10s.; Hoop, £10 10s. to £12; Sheets, £12 to £13; Scotch Pig, No. 1, £3 to £3 7s.; Swedes, Bars, Hammered, £17 to £17 10s.; Swedes, Steel in kegs, ½ and ⅝ in., £19 10s.

YELLOW METAL.—Sheets, 4 by 4 ft., 7¾d. to 8d.; Sheathing and Rods, 7¾d. to 8d. per lb.

TIN.—English Refined, £91. Tin Plates: Charcoal IC, per box, 30s. Coke, 23s. to 26s.

LEAD.—WB, £23 5s.; do., other brands, £22 to £22 2s. 6d.; Spanish soft, ex ship, £21 10s.; Sheet, £23 to £23 5s.; Shot (kegs extra), £26 10s.; White do., £29; Red do., £25.

SPELTER.—Silesian, £24 to £24 10s.

QUICKSILVER.—In bottles of 75 lbs. each, £11.

Messrs. French and Smith's Circular says:—Iron is nominally £1 per ton lower in Staffordshire; the drop has, however, been to a great extent discounted. Copper is dull, in consequence of the last telegram of large charters from Chili, over 4,000 tons, for the fortnight. Tin Plates rather better in demand. Lead more inquired for. Quicksilver dull.

MANCHESTER GOODS.

Larger sales of Cotton in Liverpool have given a better tone to this Market, but so far no improvement in the demand is noticeable, and transactions in all departments continue of a very limited character. Prices are quotably the same, and generally these have been held for, slight concessions having been made in only a few cases, and for unimportant quantities.

CASUALTIES.

THE PAU TAH.—On the 1st inst., while on her trial trip, this new steamer, recently launched from the yard of Messrs. Denny Brothers, Dumbarton, for the China Merchants' Steam Shipping Company, struck on Roseneath Point; shortly after striking there were eight feet of water in the main compartment; the fore part, engine-room, and after hold remained tight; the pumps were set to work, and with the aid of two powerful tugs she was floated and beached at Helensburgh, and during the night pumped dry; at the time of the accident she had on board 1,000 tons dead weight. But for the vessel striking the trial would have been most satisfactory, she making an average of 11·620 knots. The coals have been discharged, and she was taken over to Messrs. Caird and Co.'s graving dock on the 4th inst., to undergo the necessary repairs.

FALMOUTH, JULY 4.—The barque Fidente, and the ship Reichstag, from Cardiff for Java, have been in collision. The latter vessel sustained some trifling damage to main rigging.

ST. HELENA, JUNE 11.—The Henriette, from Sourabaya, for Marseilles, which arrived here June 2, reports that her foretopmast was carried away at the cap by the heavy rolling of the vessel on April 15.

BATAVIA JULY 3.—The Petronella, from Rotterdam to Samarang, has stranded in Bali Straits; later advices state that five hundred tons cargo have been landed on the coast of Bali. A steamer has been sent to get her off; prospects doubtful.

FALMOUTH, JULY 8.—The Bastiaan Pot, from Cardiff, June 29, for Singapore, has put in here leaky.—Shanghai, May 22.—The Zephyrus, from Cardiff, arrived here May 16, reports that on the 10th January, in lat. 7 S., long. 28 W., while endeavouring to exchange time by chronometer with the ship British Princess, the two vessels came into collion, when she sustained considerable damage to port quarter and topsides. A leak was discovered after the collision, but kept under with the pumps; threw overboard twenty-five to thirty tons of coal. On the 15th March experienced a hurricane, and lost lower topsails, and split several others, in lat. 46 S., long. 157 E. She is undergoing repairs, and requires also to dock and r-emetal.

MISCELLANEOUS.

CAPE ST. VINCENT.—Passed, July 1, Conrad (str.), from Batavia, for Nieuwe Diep.

MALTA.—Passed, July 1, Glenearn (str.); 2, Fleurs Castle (str.), both from Hankow, for London.

PORT SAID.—Arrived, July 2, Groningen, from Batavia, and proceeded for Nieuwe Diep; 6, Glenfinlas, from Foochow, and left for London.

SUEZ.—Arrived, July 2, Hankow; 4, Glenfalloch, both from Hankow, for London.

ADEN.—Arrived, June 28, Sumatra, from Batavia, for Nieuwe Diep; July 4, Braemar Castle, from Foochow, and proceeded, after coaling, for London.

NEW YORK, JUNE 23.—The Hamilton, which arrived here on the 20th inst. from Manila, reports that on June 4, in lat. 19 N., long. 58 W., felt the shock and heard the noise of an earthquake, lasting about ten minutes, and commencing in smooth water; vessel pitched bows under during the disturbance.

ST. HELENA.—Arrived, June 2, Henriette, from Sourabaya, for Marseilles; 3, Pieter Adolph, from Banjoewangie, for Amsterdam; Hollinside, from Maulmain; 5, Yanikale, from Sourabaya, both for Falmouth; 8, Bolton Abbey, from Rangoon, for Queenstown; 9, Deutschland, from Rangoon, for Bremen; 10, Carlisle, from Rangoon, for Liverpool; Cornelia, from Passaroeang, for Amsterdam.

PASSED.—June 3, Guiseppina P., from Rangoon, for Liverpool; 9, Eurynome, from Akyab; Oswingo, from Rangoon, both for Liverpool.

ASCENSION.—Passed, May 26, Schiehallion, from Maulmain, for Falmouth; Lady Rowena, from Bassein, for Liverpool; 28, Deogaum, from Nagasaki, for London; June 2, Eagle, from Bassein, for Falmouth; 4, Albert William, from Rangoon, for Falmouth; Houri, from Bassein, for Liverpool; 5, Geerdina Wilhelmina, from Macassar, for New York; P.J.K.B., from Batavia, for Amsterdam; Virginia, from Akyab, for Falmouth; 11, John Ritson, from Maulmein, for Falmouth; Acadian, from Bassein, for Amsterdam; 12, Valentine, from Bangkok, for Marseilles; 13, Fearnought, from Rangoon, for Liverpool; 14, Envoy, from Manila, for London.

The steamer Glenartney, Captain Gulland, with the new season's teas, from Hankow, arrived at Gravesend on the 4th, having made the run from Woosung in 43 days 16 hours, and from Hankow in 45 days 12 hours, including stoppages. She is now on the loading berth for China ports.

LAUNCHES.

On the 29th ult. there was launched from the building-yard of Messrs. J. T. Caird and Co. an iron screw steamer of 1,249 tons B.M., and 220-horse power, for the Netherlands Steam Navigation Company of Batavia. The vessel was named the Bromo, by Miss Saunders, and is the fifth steamer built by Messrs. Caird for the Netherlands Company. The Bromo will be employed in the goods and passenger trade between Java and Sumatra.

Amongst the launches from the Clyde shipbuilding yards during last month were the following:—Steamers: Orestes, 2,000 tons, 250-horse power, for Messrs. Alfred Holt and Co., Liverpool, for the China trade, by Messrs. Scott and Co.; Rajah, 500 tons, 70-horse power, for the Borneo Company, for local trade, by Messrs. Murray and Co. Sailing vessel: Brodick Castle, 1,923 tons, for Messrs. T. Skinner and Co., Glasgow, for the Castle line of Clyde and Singapore traders, by Messrs. Wingate and Co.

MISSING SHIP.

On April 4, 1874, the Earl of Dufferin, owned by Messrs. W. R. Rice and Co., sailed from Cardiff for Yokohama, but was towed into Vigo dismasted, from thence to Liverpool, and again sailed on Nov. 26 she has not yet arrived at her destination; 75 guineas for reinsurance.

* By Pacific mail *via* San Francisco.

THE MAILS, &c.

The P. and O. mail, bringing the above advices from China and the Straits Settlements, and the Pacific mail with the Japan advices, were delivered, *via* Brindisi and *via* San Francisco respectively, this morning, their due date. The next inward (French) mail, with advices, Yokohama 2nd, Shanghai, 6th, Hong Kong 12th, Singapore 20th June, which is due, *via* Marseilles, on Monday next, the 26th inst., left Suez on the 14th inst., two days early, and may be expected on Saturday.

List of Passengers.

PASSENGERS INWARD.

By this mail to Brindisi, per P. and O. steamer *Baroda*, arrived July 16.—From Galle: Rev. J. Killner. To Venice, arrived July 19.—From Singapore: Mr. W. Lorrain. To Southampton, per P. and O. steamer *Hindostan*, expected to arrive July 25.—From Yokohama: Mr. F. Johnston, Mr. Malhiran. From Shanghai: Mr. D. Ross, Mrs. Featherstone and two children, Mr. W. Duffie, Mr. W. Grunnel. From Hong Kong: Mrs. Whittal and two children, Major and Mrs. O'Shaughnessy, Mrs. Pitman and three children, Mr. and Mrs. Sampson, Miss Carroll, Mr. G. A. Bencke, Mrs. Davis and child, Mr. J. Meldrum, Sergeant-Major Merritt, Mr. A. E. Atherley. From Singapore: Surg. F. McNamara, Captain Carleton, Mrs. Campbell, Master Alabasta. From Yokohama, to Malta, Mr. J. Farrugia.

PASSENGERS OUTWARD.

Per French steamer *Amazone*, from Marseilles, July 18.—To Yokohama: Mr. Luther. To Hong Kong: Mr. Saunders. To Saigon: Mr. Poligni, Mr. Le Page. To Batavia: Mr. Rouff. To Singapore: Mr. Wickham, Mr. Seurtrie, Mr. Bern, Mr. Petit, Mr. Beman, Mr. Ellateria, Mr. Witte. To Galle: Mr. Hassenaer, Mr. Ormitage.

Per French steamer *Anadyr*, from Marseilles, August 1.—To Yokohama: Mr. Seconda Salla. To Batavia: Mr. Van B. Vaanders. To Singapore: Mr. and Mrs. Van der Erb.

Per French steamer *Djemnah*, from Marseilles, Aug. 15.—To Galle: Mr. Thackwell.

Per French steamer *Tigre*, from Marseilles, Aug. 29.—To Saigon: Mr. Andrew Spooner. To Galle: Capt. Fairlie, Mr. Elphinstone.

Per French steamer *Ava*, from Marseilles, Sept. 12.—To Shanghai: Mr. J. C. Farnham.

Per French steamer *Hoogly*, from Marseilles, Sept. 26.—To Shanghai: Mr. and Mrs. Vardel.

Per French steamer *Irawaddy*, from Marseilles, Oct. 10.—To Singapore: Mr. and Mrs. Goldié, Mrs. Spooner, Mrs. K. B. Spooner.

Per P. and O. steamer *Khiva*, from Southampton, July 15.—To Yokohama: Mr. S. Mori, Mr. K. Kurobe, Mr. G. Yamada, Mr. S. Matenda, Mr. H. Moridera, Mr. T. Scott, Mr. T. Bellamy, Mrs. Kourimoto. To Hong Kong: Mr. J. Beale. To Singapore: Major O. H. A. Nicolls and lady, Mr. Suermont, Mr. A. Colquhoun, Mr. W. Park, Mr. J. Jolly.

Per P. and O. steamer *China*, from Brindisi, July 26.—To Shanghai: Mr. W. H. Tapp.

Per P. and O. steamer *Bokhara*, from Southampton, July 29.—To Yokohama: Mr. and Mrs. Jackson and two children. To Shanghai: Mr. F. J. Marshall. To Hong Kong: Navigating Lieut. J. Dixon, Lieut. H. H. Harward. To Singapore: Major R. W. Davies.

Per P. and O. steamer *Lombardy*, from Southampton, Aug. 12.—To Hong Kong: Mrs. E. Moore. To Ceylon: Mr. Cowley.

Per P. and O. steamer *Malta*, from Venice, Aug. 20.—To Yokohama: Rev. and Mrs. S. G. McLaren.

Per Nederland Company's steamer *Voorwaarts*, from Nieuwe Diep, July 10.—To Batavia: Messrs. G. Folkertsma, E. Canneman, Mr. and Mrs. F. W. H. Muller, Mr. F. H. van Dommelin, Mrs. Mounier, Messrs. W. op ten Noort, H. Grondys, K. C. H. Sadee, J. A. J. Vorderman, A. Gording, D. S. Schoyer, Mr. and Mrs. Th. Kley and two children, Mr. and Mrs. N. Wafellakke and child, Mr. and Mrs. T. G. M. A. Carlier, Mr. and Mrs. T. Kesler, Messrs. C. J. Lacculle, J. A. Sianighe, F. L. Oostenbrock, C. Vreedenburgh, A. de Baat, W. Nieuwenhuys, G. Heuff, T. W. Bosch, C. Haccou, seventeen subaltern officers, 350 soldiers.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present P. and O. mail brings advices from this port to the 26th May, and by the Pacific mail we have news to the 13th June; the French mail from London April 23 arrived out on the 10th June, and the following P. and O. mail of April 30 was received on the 11th June. The *Japan Mail* supplies the following items of news:—

A writer in the *Hochi Shimbun* makes a great lament about the burdens "borne by the people"—the incomes and pensions paid the nobles and samurai, the paper currency, the foreign debt, &c. He wants the command of the grain and the money, and summons "the boys of Japan" to urge on the movements *it matters not where*. Five years ago his head would have been in a basket by this time had he used such language. This is not the use to make of freedom. All this is pot-house and tavern talk—very well for men who frequent these haunts.

The robberies and attempts at robbery continue, and the police seem unable to cope with them. Of course the matter will be represented to the local authorities in a strong light, but a couple of mounted European constables should go the rounds of the settlement once or twice between 9 P.M. and sunrise. The nights are now short, and this plan could easily be carried out with an extra man or two on the staff—even if it require this.

An entertainment has been given at the Temperance Hall, which was largely attended by the crews of the men-of-war in harbour. The band of the *Challenger* performed during the evening, and a selection of vocal music was given by a party of amateurs. Mr. G. Pauncefort gave some recitations, which afforded great amusement to the visitors.

A Royal Arch Chapter will be consecrated at the Masonic Lodge on the 14th June.

H.M.S. *Audacious*, bearing the flag of Rear-Admiral Ryder, arrived on the 12th June.

A party of Chinese officials has arrived here by the *Kanagawa Maru*, with the view of visiting the various mines in this country.

A second meeting for the purpose of considering the best means of educating the numerous blind in this country has been held at the residence of Dr. Hall in Tsukidji. After a lengthened conference it was resolved to procure from America the necessary works printed in raised letters for that purpose.

The *Hochi Shimbun* says that a speculator has engaged the services of some twenty-five *geishas* (singing and dancing girls) in Yedo, who will shortly proceed to Melbourne. The remune-

Digitized by Google

ration is said to be one thousand *yen*—the half of this being paid in advance and the remainder upon the accomplishment of the engagement.

A few nights since about a hundred of the prisoners confined in the new Yetchigaya gaol in Yedo made an attempt at escape, in which they nearly succeeded. A more stringent prison discipline would appear to be necessary.

The native newspapers give no account of the results of the practice upon the iron plates which the Government imported from Europe for experimental purposes. One incident alone is recorded: a gun was so badly pointed that the ball, in place of touching the target, struck and severely damaged the roof of a house.

Arinori Mori has been appointed Vice-Minister for Foreign Affairs, the post formerly held by Wooyeno, now Japanese Minister in London.

The French and German Departments are now excluded from the Kai Sei Gakkô. Hereafter the English language only is to be employed in technical and scientific studies. The scholars selected from the Kai Sei Gakkô to be sent to America to complete their education—about twelve—will start in the middle of July, the leaders in classes of law, mathematics, and engineering science.

The British and Belgian Ministers were to be honoured with an interview by his Imperial Majesty on the 11th June.

The steam-ship *Taiyu Maru*, which has been presented by the Government to Loo Choo, was to leave on the 11th June, stopping on her way at Osaka and Kagoshima.

Honno and Kondo, Japanese Secretaries of the Imperial Legation in London, arrived from England on the 8th June.

We have the authority of the *Hochi Shimbun* for the statement that the *Sumida Maru* and *Hiogo Maru*, steamships belonging to the Mitsubishi Company, have been appointed to sail for San Francisco, with exhibits for the Centennary Exposition at Washington on or about the 15th June.

CHINA.

PEKING AND TIENTSIN.

The Tientsin correspondent of the *North China Herald* writes as follows:—

I once more, with your permission, presume to lay before the British public a few observations respecting the intended investigation into the assassination of Mr. Margary and his servants in the province of Yunnan, and which I trust your readers will at this moment deem acceptable. Mr. Margary, on his making the journey through China from east to west, stayed some days—report says a week—at the town of Manwyne; and was entertained by the Chinese civil authority of that place; Mr. Margary having been furnished with a passport, which was drawn up in the English and Chinese languages, and which bore the seals of Great Britain and China, and being besides furnished with despatches from the Tsung-li-yamên, at the desire of Mr. Wade, Her Majesty's Envoy, to the provincial authorities on the route. The Chinese functionaries at Manwyne were thus well aware that Mr. Margary was a British subject, and a British officer, travelling in the Empire of China by the written permission of the Chinese Imperial Government; and that it was consequently their duty, as stated in the passports, to protect and aid him while on the journey within their jurisdiction. Consequently, on Mr. Margary's second appearance in Manwyne, and still provided with a passport and despatches as before, the local authorities were fully cognisant of his nationality, and of his position as a British officer; and as the inhabitants of the place had already seen him holding official intercourse with their authorities on his first coming to Manwyne, they also, most undoubtedly, were perfectly cognisant of his nationality, and of his rank, for the Chinese people have the habit of asking for information on these points on seeing foreigners; and, consequently, when Mr. Margary was assassinated at Manwyne, both the Chinese functionaries and the Chinese people of the place were aware that a British subject, and a British officer, was being assassinated.

The civil authority of the town of Manwyne is Foo-sze, or native magistrate, and the military officer stationed there will be found to be of the rank of a Major in the Imperial service. The chief civil functionary at Tang-yue (Momein) holds the rank of Sub-Prefect, and from the Chinese Red-book I learn he is named Fang-kwei-fang, and is a native of Anhwuy province (a native of the same province as Li Hung-chang, and, I think, also as Pwan Ting-sing, the Fantae of Yunnan). The chief military authority at Tang-yue holds the rank of Major-General, is named Le Wei-shuh, and is a native of Yunnan province. From the accounts we have before us, it is shown that the town of Manwyne lies only a short day's journey, some seven or eight miles from the garrison town of San-ta-fu (by Du Halde), Santa (by D'Anville), in the "Middle Kingdom," Tsan-tah, and by the Sladen Expedition, Sanda. I will write the name, however, Chan-tah, as given in Williams's New Dictionary. Chan-tah appears to be a fortified place, and, of course, contains a suitable garrison, and lies on the route by the Tee-pe Pass from Bhamo to Tang-yue. The soldiers who attacked Colonel Browne's party were no doubt drawn from the garrisons of the fortified town of Chan-tah and of the city of Tang-yue. The commandant of the Imperial troops in the Tang-yue region holds the rank of Tsung-ping, or Major-General, and is named, as said above, Le Wei-shuh. General Margary, in his letter to *The Times*, alludes to the Chinese troops who attacked Colonel Browne's party "as being commanded by the nephew of Lee See-hie." Le Wei-shuh and Lee See-hie may be the same general under different names.

It is, under all these circumstances then, of great importance, for the strict and just carrying out of the investigations, that an official of high rank be appointed by the Central Government of China to go to Yunnan with the British officers, to aid them in every way possible, by his superior standing in the Imperial service, and by his being unconnected, as a provincial official, with the local provincial authorities of that part of Yunnan where the outrage was perpetrated, to obtain the actual facts regarding the assassination, so that the British officers may later have no doubts left on their minds as to who are the guilty parties. I have in my former letters already pointed out that Sung Paouhwa, the officer selected by H. E. Li Hung-chang to go with the two British officers in the Yunnan Commission, is not a proper man for the important business of investigation, in consequence of his subordinate standing as a Chinese officer giving him no authority over the Yunnan officials; for even the civil functionary of Tang-yue (Momein) is of higher standing, being a Sub-Prefect, than the officer selected by Li Hung-chang; and if the accounts we have received be true that the head of Mr. Margary was exposed over the gate of Tung-yue (Momein), the chief civil functionary of Tang-yue is assuredly a guilty party; and according to Chinese law must be interrogated, together with all his people, in regard to the assassination of Mr. Margary and his servants.

The *Peking Gazettes* of 15th and 16th May are to hand. In the first there is a long memorial—in fact the whole *Gazette* is filled with the memorial and its supplement—by Chin Yuh-ying, in his double capacity of Acting Governor-General (Tsung-tuh) of Yunnan and Kweichow provinces, and Governor (Suen-foo) of Yunnan, on the tribute sent by Mung Tun, the King of Burmah, to the Sovereign of China. There is no date appended to this State paper to show when it was penned by Chin Yuh-ying; but in the memorial itself it is mentioned that the Burmese tribute party crossed the borders of the prefecture of Tang-yue (Momien) on the 22nd January, and arrived at the capital city of Yunnan on the 9th and 22nd March; thus the memorial must have been penned after the latter date, and consequently after the assassination of Mr. Margary at Manwyne on the 21st of February.

I have no additional information to send you in the way of further direct proceedings on the part of the Chinese Government for investigating into the assassination. At present all eyes are upon Mr. Wade, Her Majesty's Minister, anxious to learn and to see what steps he will take in the Margary affair. Time, we are all well aware, will cause the wearing away and the disappearance even of a granite stone; what then must it not be doing every hour upon the persons of the Chinese officials in Manwyne and Momein regions? Every hour, consequently, that we allow to pass over without action is an hour of valuable time lost to acquire accurate data on the events of the assassination; for within an hour, those who perpetrated, or instigated others to commit the deed, may disappear from the stage; nominally by the course of nature, but virtually, more probably, by political action, through removal to another place. Every Englishman must at this moment be anxious that Her Majesty's Minister and the Government generally shall be put in possession of irresistible data respecting the murder, on which to ground a rightful demand for the most complete justice. For should we hereafter be compelled to throw away the scabbard, I trust it will be in our power then and afterwards to show to the whole civilised world that our cause, based on undeniable facts, is a just one; and I trust also that the whole civilised world will likewise then and afterwards approve of our action.

On the 17th May H.E. Li Hung-chang came to the mercantile establishment of the C.M.S.N. Company, situated in Tientsin, and after staying there for a quarter of an hour, went on board the C.M.S.N. Company's steamer *Yehsin*, and inspected her, this being her first trip to Tientsin from Shanghai, since her arrival from England. He remained on board for about half-an-hour, after which he proceeded in his sedan to the lately erected granaries of the Grain Transport Service, situated near the Rampart Forts, about 600 yards below the British settlement. He stayed there for a quarter of an hour, after which he returned to the city in his steam launch, which towed a gig conveying some of his people. His Excellency was accompanied in his inspection of the steamer and granaries by General Chin, the Commandant of the Tientsin garrison; by Woo, the Territorial Taoutai; by Sun, the Customs' Taoutai; by Choo, the Salt Taoutai; by Ma, the Prefect (Chee-foo) of Tientsin-foo; by Yin, the Magistrate (Chehsien) of Tientsin; and by Choo, the Taoutai of the Grain Transport Service, besides a host of petty mandarins, and escorted by a company of the Southern Legion. On his Excellency reaching the granaries, the Chinese gunboat manned yards and fired a salute of three guns. On his departure in his steam launch this was repeated.

Digitized by Google

I recently mentioned that we had received tidings here that an insurrection had broken out in Manchuria, and that the Governor-General of this province had received instructions from the Central Government to send troops as soon as possible to the disturbed region. On the 18th May General Chin, the commandant of the garrison at Tientsin, inspected a regiment of foot soldiers—one thousand strong in rank and file, besides officers—a regiment of cavalry, five hundred strong in troops, besides officers, and a battery of artillery, and paid them one month's pay in advance. These troops will leave here on the 23rd May for Newchwang—the foot soldiers going by sea, and the cavalry and artillery going by land, *via* the Shan-hae Pass. The men are all natives of the province of Chihli, and drilled after the foreign fashion.

SHANGHAI.

The present mail brings advices from this port to the 30th May; the P. and O. mail from London, April 16, was received on the 27th May. The following summary of news is from the *North China Herald*:—

An important case has been heard in the U.S. Consular Court. F. B. H. Jenkins sued George B. Glover, Commissioner of Chinese Imperial Maritime Customs at this port, to recover Tls. 6,687, the alleged contract price of 275 revolving rifles and 140,000 cartridges. Plaintiff alleged that the contract was made by him with a duly authorised officer of the Chinese Government, and that the arms were imported under a special permit from the Superintendent of Customs at Shanghai, but that on their arrival the agent of the said officer refused to take them. In April last the plaintiff offered the arms and ammunition for sale by public auction, but the defendant was alleged to have stopped the sale, as being illegal and in violation of the treaty between the United States and China, signed on the 18th June, 1858. The hearing was confined to the question, raised by Mr. Wainewright, whether the defendant, as being a servant of the Chinese Government, and acting under its authority, was amenable to a Consular Court. Mr. Eames, for the plaintiff, contended that he was amenable, insomuch as it was not shown that he had not acted outside his instructions, and, further, that the arms, having been legally imported to the order of the Chinese Government, though afterwards refused by its officers, became disposable in the same way as ordinary merchandise. The Court decided in favour of defendant, holding that he was acting under instructions, and was justified in his action. It seems to us that the Court carries its idea of the possible duties of a Commissioner of Customs rather far.

The French Municipal report for 1874-75 shows a credit balance of Tls. 43,000. It is proposed to expend nearly all this during the ensuing year on public works, but a reduction on taxation is also promised. While certain people in the English Settlement are crying out to tax the Chinese more heavily, the French policy is to lighten their burdens. It is not difficult to foresee what would be the relative effect on the value of property in the two Settlements, if the different policies were carried out.

The English Council meeting of the 19th May was little more than a formal one, for the transfer of responsibility from the old to the new Council. While regretting that their resolution about an abatement of Mr. Fogg's land-tax was lost, the Council have, of course, no alternative but to collect the outstanding sum. As we have already remarked, we anticipate that steps will be taken to obviate this source of trouble in future. Further consideration of the Land Regulations is to be deferred till Mr. Rennie's report is received. Perhaps, as the matter has lapsed for the moment, it is well to have this document, as well as others, to lay before the ratepayers when discussion is invited. We hope, however, that neither matter will be left over till next spring. The annual meeting has enough to do with current business.

The Supreme Court has been again occupied for two days with the *Fusing v. Ocean* collision case. Judgment was delivered to the effect that both vessels were in fault, and that the damage sustained by both, together with that occasioned to the cargo, be added together, and that half the damage be borne by each vessel.

The *Courier* learns that one of Mr. Margary's Chinese attendants has arrived at Hankow, having escaped death himself through being absent from Manwyne on an errand at the time of the murder. "He was told that the two Chinese with Mr. Margary at the time (his cook and a man he had brought with him from the Shanghai Consulate) fought desperately—the latter killing several of his opponents before he himself was overpowered. Margary was killed before he had time to strike a blow. After despatching him and his two attendants, the crowd proceeded to his lodgings, where they found the teacher and the boy, whom they literally cut in pieces. Of course they stole everything they could lay hands on. Our correspondent gathered this information from his teacher, who saw and talked with the man the morning he wrote to us. But we hear that the man is half silly from privation and suffering, and is as yet unable to give a very coherent account of his proceedings." He had begged his way to Hankow, hiding all through the day, and travelling only at night.

Within the last ten days there have been several narrow escapes from fire within Chinese precincts, arising in every instance from the carelessness of the occupants of the houses. Of this it will be sufficient to cite one instance. At a late hour on a recent night an alarm was given that a fire had broken out in a chow-chow house in the Shantung-road. The cook, it appears, having put too much fuel in the stove, it blazed up and set fire to some wood-work close by. Running quickly up, the flames caught the roof, and had just broken through it when a foreign member of the police force luckily came up. The occupants of the house were making no effort to stop the progress of the flames. The policeman at once set to work, and by the aid of some of the women of the neighbourhood, who carried water for him, he succeeded in extinguishing the fire, which in a few minutes would have been beyond control. Cannot the Chinese be made to feel the necessity of carefulness in regard to fire!—perhaps by way of penalty at the Mixed Court in case gross carelessness is proved.

The gale of the 20th and 21st May is said to have been one of the most severe that has happened on this coast for a long time, and in the neighbourhood of the Saddle Islands it was felt with terrible intensity, involving much loss to native shipping and lamentable destruction of life. Mr. Snowden, the pilot concerning whose safety, and that of his crew, some anxiety was felt last week, came up the river on the 22nd May, having been weather-bound for several days among the islands. He reports that on the previous day he saw at one time three Ningpo boats bottom up, with several men clinging to the keels. At great risk he put out from his anchorage, and steered towards them in the hope of saving life. He succeeded at one time in getting close enough to see their features, but the sea was running so high, and the wind was so fierce, that it was equally impossible either to lower a boat, cast a rope to them, or steer the schooner near enough to take them on board, although he remained in their vicinity the entire day, experiencing the horror of seeing the unfortunate wretches washed off one and two at a time, until all were drowned before his eyes. The scene was, he says, most agonising, but owing to the noise of the wind and sea, he was spared the additional pain of hearing their cries for help. Large quantities of junk wreckage were floating in the neighbourhood of both the False and North Saddles, betokening the force of the gale. The brig *Georgina*, from Nagasaki, is on shore at the Block House Spit. Lighters have been sent to her assistance. She has been sold at auction as she lies. The hull, &c., realised Tls. 720, and the cargo (coals) Tls. 140.

We are glad to learn that the new Chehsien of Shanghai has arrived, and has taken over the seals of office. The departure of Yeh, the late incumbent, will be a source of congratulation both to foreigners and Chinese. No magistrate who has held office here since Shanghai was a Treaty port has excited such a feeling of indignant dislike by the cruel tortures that have been often used in this Yamen; and in one case at least, that of the actor Yang Yeh-liu, his conduct was as unjust as brutal.

We hear that the Chinese Government have decided to appropriate the amount required to secure a representation of their produce, manufactures, &c., at the Philadelphia Exposition. The sum which is needed is about 40,000 taels, and it is expected that for this they can make a better display than they did at Vienna. It is said that Hoo, Taoutai of Hangchow, will send on his own account about 10,000 taels worth of silks, porcelains, &c.

A Chefoo correspondent writes that the Chinese have a rumour of the death of Tso Tsung-tang, the Viceroy of Kansuh, and lately appointed Special Commissioner for affairs in Turkestan. We have heard nothing of it otherwise, and mention it for what it may be worth. It is important, if true, as Tso was the only Chinese who could compare in power and influence with Li.

The M.B. steamer *Kanagawa Maru* went on shore in the river above Half Way Point, and had to discharge cargo before she could be got afloat. The German barque *Saturnus*, from Hamburg, having some 23,000 kegs of powder and ammunition on board, is berthed outside the lower limits of the harbour.

The vexed question of the Bund frontage came up for discussion again at Kiukiang at a meeting of landrenters held on the 12th May. It was resolved to leave the Municipal Council to make such terms as they think fit, provided these are not less than Tls. 500 per annum for 500 feet. Tls. 100 per annum is to be charged for the privilege of attaching a pontoon to the Bund.

A flower show has been held in the British Consular compound, and went off successfully. The band of the *Audacious* was present, and the weather fine.

A cricket match between eleven of the Shanghai Cricket Club and eleven of H.B.M.'s Navy has been played, and resulted in a crushing victory for Shanghai in one innings.

On the Queen's birthday the various men-of-war and merchant-vessels in the river were dressed with flags, presenting a very gay appearance.

The Chinese gunboat *Fau Paw* is alongside the Hongkew

Digitized by Google

Wharf, taking in one ten-ton Krupp gun and several others of smaller calibre for the forts near Ningpo.

On the 23rd May, Trinity Sunday, the Church of the Holy Trinity at Shanghai was erected into the Cathedral Church for the diocese of Bishop Russell, in North China. The *Celestial Empire* supplies the subjoined account of the ceremony :—

An almost overflowing congregation assembled last Sunday morning in Trinity Church, upon the occasion of its formal recognition by Bishop Russell as the Cathedral-Church of his diocese in North China. The step was one, as our readers are well aware, which had been in contemplation for some months previously, and the large attendance testified to the unusual interest felt in the proceedings by the community in general. By eleven o'clock A.M., the hour appointed for the commencement of the service, a large congregation had assembled, amongst them being H.E. the British Minister, Admiral Ryder, Sir E. Hornby, Judge of H.M. Supreme Court, G. F. Seward, Esq., U.S. Consul-General, and many officers of H.M. Royal Navy.

No fewer than nine clergymen took part in the service, which was opened by the choir singing the familiar old anthem, "I will arise." The service was read by the Rev. C. P. Scott, the Absolution being pronounced by the Right Rev. Bishop Williams, of the American Episcopal Church. The First Lesson was read by the Rev. F. F. Gough, and the Second Lesson by the Rev. J. D. Valentine ; at the conclusion of which a voluntary was played, and the Rev. Canon Butcher led the way down the nave of the church, followed by all the other clergymen (with the exception of Bishop Williams) in single file, meeting the Right Rev. Bishop Russell at the western door. They then returned in reversed order, the Bishop bringing up the rear, and supported on either side by Messrs. Krauss and Bell respectively, each trustee bearing the keys of the church upon a velvet cushion. Arrived at the chancel, the Bishop took up his position in front of the Throne, when the Rev. Canon Butcher thus addressed him :—"I, Charles Henry Butcher, Consular Chaplain of Shanghai, and Incumbent of this Church, do now, on behalf of its trustees and in the presence of this congregation, request you to state for their satisfaction and that of all others whom it may concern, whether it be your wish and purpose to select and assign this church as the Cathedral for your Diocese in North China." To which the Bishop replied :—"It is my wish and purpose so to do ; and I hereby declare that this Church is to be the Cathedral for my Diocese." The Rev. Canon Butcher then inducted the Bishop to his Chair, presenting to him at the same time the keys of the Church in token of his investiture. The Rev. Canons Butcher and MacClatchie then retired from the chancel while the Bishop took up his position within the rails of the communion-table, when they were both presented by the Rev. F. F. Gough, and invested by the Bishop, the former with the office of Dean, and the latter with a Canonry, of the Cathedral. The "Benedictus" was then immediately sung, and the service proceeded as usual to the end. The anthem was taken from Psalms 146, 122, and 125, music by Goss. The ante-communion service was read by Bishop Williams, and the *Kyrie Eleison* (Best) chanted by the choir, the Gospel and Epistle being read by the Revs. G. D. B. Miller and Elliott H. Thomson respectively. The hymns selected for the occasion were the well-known Trinity hymn, "Holy, holy, holy, Lord God Almighty" (No. 135, *Ancient and Modern*) and "Christ is made the sure foundation" (No. 244). The sermon was preached by the Right Rev. Bishop Russell from Isaiah ii. v. 3, after which the sacrament of the Holy Communion was administered to the clergy present by the Bishops, and by the Dean and other clergy to the congregation. The entire proceedings were very impressive, and such as will be long remembered by all who took part in them.

The following items of intelligence are also from the *Celestial Empire* :—

The state of the Tea market in Hankow is peculiar. It seems that the teas which have fetched the extravagant prices already quoted in our columns are not only inferior to last year's but actually cost ten per cent. less in the interior. The celebrated "Tls. 61.50" chop was bought last year at Tls. 54, and is not up to the previous one in quality. There has been such a rush for teas that it has been almost impossible to make satisfactory purchases, and everything goes to show that our correspondent was not far out when he characterised the opening of the market for 1875 as the maddest time of all the mad new year.

A question of damages, arising out of a collision between the steamer *Europe* and a Chinese junk, which occurred between Collyer's dock and the harbour-master's hulk, has been submitted to arbitration by common consent. Mr. Viguier, harbour-master, and Captain Roskell, of the P. and O. steamer *Hindostan*, are the arbitrators. The hearing of the arguments and facts on both sides was private, but the decision will shortly be made known.

H.M.S. *Modeste* went out from Woosung on the 27th May for target practice, returning next day. It is believed that she will remain at Shanghai until the end of July, when she will go to Hong Kong. The *Audacious* was said to be coming up the river with the first sufficient tide, but this seems unlikely, on account of her draught of water.

FOOCHOW.

The subjoined items of intelligence from this port are taken from the *Foochow Herald* :—

We hear of a bold attack upon the Customs' establishment at Pagoda anchorage. It appears that a short time ago two chests of opium were smuggled from one of the steamers in port, and landed in a village at the back of Nan-tai. The Customs' officer in charge of the steamer obtained information which led to the discovery of the smugglers, and subsequent confiscation of the drug—a result by no means pleasing to the contrabandists, who, Chinese fashion, immediately set to work to discover the informers. Suspicion was fastened on a sampan man in the employ of the Customs ; and one night, about ten o'clock, an armed snake boat pulled up to the Custom-House jetty, attacked the sampan in question, wounded the boatman's wife, and carried off their son—a lad of fifteen. We understand that the matter has been reported to the Tartar general, and that the people of the offending village will be severely dealt with.

The conditions under which the settlement of the Foochow-Amoy telegraph difficulty has been made are to the following effect. The Great Northern Telegraph Company have undertaken to properly construct for the Chinese Government an overland telegraph between Foochow and Amoy, and to commence the work not later than the 15th August next. The Chinese authorities have agreed to pay the company $154,500 in instalments at fixed periods. The company is to work the line on account of the Chinese Government, and teach Chinese pupils the art of telegraphy. The Chinese Government guarantee to protect the material required for the erection of the line, and hold themselves responsible for any delay occasioned through the unlawful interference of the inhabitants or others.

From Taiwan, we hear of extensive preparations on the side of the Imperialists ; but we do not learn of any further hostilities having taken place. *On dit*, that the foreign drilled troops, under command of Captain J. P. Macmahon, are expecting orders to proceed to Formosa, for service against the aborigines. H.E. Shen Pao Chen—the Imperial Commissioner in Formosa—is about to relinquish his office. The Footai of Fohkien will specially administer the Government of the island—aided by a valorous soldiery.

We understand that Tchun, the Mandarin in charge of the Gun Foundry at the City Arsenal, has been called upon to pay the sum of Tls. 1,000, as compensation to the family of the man who was recently killed by the bursting of a gun—on the principle, we suppose, of encouraging others.

HONG KONG.

Our advices by the present mail extend to the 5th June the French mail from London April 23 was received on the 1st June, and the following P. and O. mail of April 30 arrived out on the 4th of June. The following items of intelligence are from the *China Mail* :—

By the arrival of Messrs. Lapraik's steamer *Douglas*, on the 3rd June, we learned of a bold and as yet unprecedented attack upon that vessel, which anchored off Pagoda Island on the night of the 26th May. It appears that on reaching her destination she was boarded by Mr. Blacklock, one of the tide-waiters, who, having had considerable trouble before from smugglers, resolved to be on the alert—the more so as he was warned that an attempt to get away some of the opium on board would be made that evening. It was also said that the smugglers, some of whom had been foiled in a similar attempt on board the *Kwantung*, had vowed vengeance on whoever should interfere with them. He had taken the place of an officer named Le Breten, against whom the smugglers have a strong grudge. Most of those on board went to rest about ten o'clock. Mr. Brett, however, the chief officer of the *Namoa*, who was on board, remained up with the Custom House officer for some time later. When Mr. Brett turned in, Mr. Blacklock asked him for his revolver, saying that he expected to have a visit from smugglers in the course of the night, but he had omitted to bring any arms with him.

Nothing occurred till after midnight, when a snake boat was observed approaching the *Douglas*, with nearly a dozen of men on board. Mr. Blacklock on seeing them at once ordered them off, firing a shot over the boat. Of this, however, they took no notice, and attempted to climb up the ship's side. He then discharged the three remaining chambers of his revolver into the boat, which was so close that some of the shots must have taken effect. He was then leaning over the rail, and directly he had fired all his cartridges the pirates opened fire on him, and he received no less than twenty-five slugs right in the breast. He fell on the deck, expiring almost immediately. Upon seeing this the smugglers made off as fast as possible, and not a minute too soon for their own safety, as the chief engineer, Mr. Cornforth, Captain Burnie himself, and several of the crew, attracted by the noise of the firing, had by this time got on deck, the captain bringing with him a rifle and revolver. He fired both of these at the retreating boat, but whether with any effect is not known. It is, however, probable that the shots told, as the Chinese state that four men in the boat were killed, besides several wounded —a result that could scarcely have followed from Mr. Blacklock's three pistol bullets. Upon turning to look at the unfortunate officer, it was evident that he was dead. As a last hope, however, a boat was sent to the *Hornet* for medical assistance, and her surgeon at once confirmed the fact. Mr. Cornforth had a very narrow escape, he having "ducked" as the volley of slugs laid Blacklock dead at his side.

A gale passed over Hong Kong on the night of the 31st May.

Digitized by Google

At times the gusts fully equalled those of a *bona fide* typhoon, and though both the city and the vessels in harbour have escaped with comparatively little damage, enough was done to show that it was no ordinary storm. On shore no great traces of injury are visible. Branches of trees were torn down along the roads, and the tiles have disappeared from the verandahs of some of the Hollywood-road houses and from those facing seaward belonging to Upper Wyndham-street. In Queen's-road Nos. 260 and 262, the latter occupied as the *Empire* tavern, had their first floors blown in, but the roofs appeared to have suffered only slightly. A few houses on Caine-road had their servants' quarters injured, and the Sing Ping Theatre lost a few tiles. Eastward the damage was greater. Nearly the whole of the Eastward end of the boat-house was blown in, and a part of the roof also sustained considerable injury. Along that part of the Queen's-road trees were torn up bodily. Several of the granite stones forming the Praya coping are again displaced and many of the davits were broken and the boats sunk. In the Public Gardens the damage done to trees and shrubs has been considerable. The City Hall had 53 panes of glass broken, besides several venetians, &c.

It was, however, of course, afloat that the storm was most felt. Nearly every vessel dragged considerably, but as the steamers had almost without exception got up steam but few accidents occurred. The *St. Andrews' Castle* and *Sudan* fared worst. At 11.15 P.M. the former vessel was struck by a violent squall, which laid her on her beam ends, and shifted her ballast. It was found necessary to cut away the masts to save the vessel; two of the crew were slightly injured. The German barque *Sudan* fared almost equally badly; at 11 P.M. she had to cut away her main and mizen masts. The *Princess Charlotte* and *Meanee* both lost a portion of their permanent roofing. The *Ferntower* lost one of her anchors. A collision took place between the *Black Prince* and *Gunga*, but no great damage was done. At Yowmahtee a junk was thrown up high and dry on the Eastern point, where she remains apparently undamaged. A cargo boat was also driven over there from West Point, and is in a similar state, her only loss being three guns which she had on board. A junk carrying a cargo of rice was sunk, as was also a boat trading between Hong Kong and Macao. A cargo-boat driven over there had on board 170 sheep, four of which died from the exposure or fright.

At Macao the storm appears to have spent a good deal of fury. A part of the Governor's residence has gone, and H.E. is now living with the Baron do Cercal. Several European families are staying there, but none have been injured. In the harbour, however, the destruction has been great. Whampoa appears to have suffered most, and Canton but slightly. The native houses at the former place have all been blown down, while the river between the two places is covered with wreckage.

We learn with sincere regret of the loss of the Macao steamer *Poyang*, Captain Carroll, while on her voyage to Macao, on May 31. The *Spark*, which brought the news next morning, reports that the sad catastrophe occurred a little to the southward of the Nine Islands. The *Poyang*, on her return trip from Hong Kong, took the inner passage; and after passing Lantao encountered a very heavy sea, which obliged Captain Carroll to anchor off the Nine Islands; but the sea was so terrifically heavy that nothing could be done, and the frail craft heeled over and foundered about eleven P.M. The great loss of life, especially of those who were much respected and very popular both here and at Macao, adds materially to our regret on this occasion. There were several passengers on board, and the captain, officers, and crew of a Portuguese vessel sold at Penang, many of whom are amongst those supposed to be lost. The total is stated at about 124, viz.:—Captain Carroll, the chief mate (Mr. Drummond), one Parsee (Mr. Colah), about twenty Portuguese, and say 100 Chinese. There were saved from the wreck two engineers (Messrs. Murphy and White), Captain Wade (of the *Chen Jui*), the purser, two watchmen, two pilots, four sailors, three firemen, one Chinese passenger, and captain's boy—making seventeen in all. The chief engineer, Mr. Murphy, was saved by clinging to the walking beam. He eventually seized some wreckage and drifted to an island, whence he was taken on to Macao by a native boat.

The passengers, it is said, would not take to the boats, but preferred to remain and take their chance on board the steamer, upon which life-preservers were distributed to those on board. The cargo would not seem to have been of very great value, as eighteen chests of opium and fifty slabs of tin are the only items given. At the point where the steamer foundered, slightly to the southward of Nine Islands, the typhoon appears to have struck with terrible force. Only the beam of the *Poyang* and tops of the guards are visible above water. When the intelligence reached Macao the authorities there tried their utmost to obtain boats to proceed to the spot, but all were so damaged that nothing could be done.

We cannot but concur with the generally expressed opinion that stringent measures should be taken to stop the frauds perpetrated upon houses in this colony which either manufacture ærated waters on the spot, or vend beer and other liquors imported from England. Two Chinese were yesterday charged at the Police Court, the one with selling and the other with buying for his master a liquid manufactured by themselves but bottled with the corks, capsules and labels of the Hong Kong Dispensary. The sitting magistrate discharged them with a caution, treating the offence simply as a very mild and scarcely punishable deception towards the second prisoner's master. We must say that it seems to us there was another party interested—the proprietor of the manufactory of which the corks and capsules had been thus dishonestly used. The only way in which the law can protect him is by severely punishing those who sell spurious soda water, &c., under what amounts to his own guarantee.

The action in the Supreme Court, in which the Great Northern Telegraph Company sued Messrs. Douglas Lapraik and Co. to recover $15,000 damages done to the plaintiff's cable near Amoy by the *Yesso*, on the 7th of April, has been concluded. The judgment delivered by Chief Justice Smale says:—I am of opinion that, regarding all the circumstances in which the *Yesso* was, she is not liable for any damage, and that the Company are not entitled to any of the relief they have asked. Considering, however, that the conduct of the captain in having given so little thought to the matter before cutting the cable, and his implied admission that he had not taken care enough in his promise to the Telegraph Company's agent when he said to him that he would take more care in future, considering also that the facts appeared in a very different light to the provements before the hearing than they now present themselves to the Court, I think that each party must pay their own costs.

The *Gazette* states that the Secretary of State for the Colonies has approved the appointment of Mr. Seth to be 1st clerk, and of Mr. James Parker to be 2nd clerk, in the Magistracy.—It is notified that His Excellency the Administrator has been pleased to appoint Mr. William Wilkinson Toller to act as Crown Solicitor during the absence on leave of Mr. Edmund Sharp.

The certificate of Captain Tannock, of the s.s. *Viking* (which vessel grounded on the Bombay Shoal in April last) has been suspended for three months. His conduct after the vessel grounded was approved.

We note the arrival, per *Thales*, of Col. Horace Browne, who was in command of the Birmo-Chinese Exploring Expedition. He is, we believe, on his way to Shanghai to confer with Mr. Wade.

The Rev. Sholto D. C. Douglas, Vicar of All Saints, Derby, has been preaching in Hong Kong. Printed addresses have been issued to the public, inviting their attendance to a series of services.

A new Government steam launch has been launched from Kowloong. She is a well-built powerful boat.

The Colonial Surgeon, Dr. Ayres, is now so much better as to be deemed out of danger.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings advices from this port to the 12th June; no later mail from London had been received. The following summary of news is from the *Straits Times*:—

The news of the interval has been of the most meagre description. Consequent upon the recent change in the administration of Government, necessitating close application on the part of our new Governor to enable him to master all the details, matters political remain in abeyance, and nothing has transpired of interest to Home readers. The native States remain tranquil, and there is no indication of any desire on the part of the chiefs to disturb the existing peace. We understand Sir William Jervois does not purpose visiting the Native States at present, lest the native rulers misconstrue the intentions of this Government into a too officious surveillance—but prefers to deal with them for the present through the British Residents appointed for that purpose, who will thus, having more apparent personal responsibility, be able to exercise a greater influence over the chiefs than if placed in a false position as merely the mouthpieces of the Governor, having no power to act in even the most trivial matters without previous reference to the central authority. Mr. Swettenham, Assistant Resident at Langkat, who has been here for the past four or five weeks, has returned to his post, and we learn that Mr. Davidson, Resident at Salangore, will visit Singapore after Mr. Swettenham's arrival.

The Committee of the Sailors' Home, at their meeting on the 3rd June, in view of the great increase in drunkenness among seamen, determined to urge upon the Government the necessity for restricting the number of beer and grog shops, which have latterly become very numerous. It was suggested that the difficulty would be met by giving the licensing power to a Bench of Justices, sitting regularly to hear applications, as at home and in some of the other colonies, instead of entrusting it to a regular Licensing Officer, as at present. So much inconvenience now results to shipmasters, especially in the case of steamers, through the temptations placed in the way of their men here, that any measure for restricting the number of grog shops within reasonable limits, while benefiting the morality of the place, must also prove of great advantage to them.

Digitized by Google

The Committee of the Legislative Council appointed to consider the conditions upon which the Singapore markets should be handed over to the Municipality, presented their report on the 6th May, but it has only just been published. The report is very brief, and recommends that the whole of the Town Markets, with an annual income of about $25,000, be given over to the Municipality from the 1st July next, on condition that the latter undertake the upkeep of all the public roads in the island, which now cost about half that sum for maintenance. It is desirable, for the better management of the markets, and the better to enable the Municipal Commissioners to keep them clean, that the sole control should be placed in their hands, and the transfer will be advantageous both from an economical and sanitary point of view.

Edward Darke, an engine-room artificer of H.M.S. *Thistle*, was found drowned at Dalhousie Pier on the 7th June, having probably accidentally fallen into the water the previous evening when returning to his ship. This is the second fatal accident at Dalhousie Pier, and it is a somewhat singular coincidence that the victims in both instances were employed in the engineers' department of Her Majesty's Navy.

PENANG.

Our advices extend to the 14th June; the P. and O. mail from London May 14 arrived out on the 11th June. The *Penang Gazette* contains the following items of news:—

The steamer *Eastern Isles*, from Negapatam, arrived here a few days since with 350 coolies on board for this port and Singapore. Cholera, however, had broken out on board on the voyage, and up to the date of her arrival in Penang twenty cases had ended fatally. The port authorities here had the vessel anchored in the quarantine ground outside harbour limits, and the Colonial Surgeon attended to the sick. Subsequently the vessel went on to Singapore with the whole of her passengers, a Government Apothecary being sent down in her to attend to the sick.

Our latest advices from Atchin contain the subjoined item of intelligence:—A general attack upon the Dutch positions had been talked of for some time, and on the night of the 26th May an effort was made by the Atchinese chiefs to bring their men into the field. The attack, directed against two outposts only, Lamteboo and Lamara Oleyloo, was easily and speedily repulsed by the Dutch, without any loss whatever on their side. Evident signs of discouragement are beginning to display themselves in the Atchinese camp, and one of the influential headmen is said to have refused to take any further active part in the struggle. The state of health of the Dutch troops remains unsatisfactory.

A meeting of the Municipal Commissioners was held on the 8th June. The President, Colonel Anson, Messrs. Herriot, Noordin, and Tye Sin being present. A long discussion was raised regarding some proposed alterations which some of the Commissioners wished to have effected in their constitution by the Legislative Council, but the proposals were as vague as the Commissioners' opinions on their merits were undecided.

Commercial Report.

(For dates see first page.)

IMPORTS.

YOKOHAMA.—There had been little change in the market. There had been a slight increase in the demand for goods, but no improvement in prices, which showed in most cases a lower tendency. Woollens: As usual at the season the business in Woollens was restricted, and prices were merely nominal. Sales of plain Mousselines-de-laine had been made, but at low rates.

TIENTSIN.—The market is reported quiet, with accumulating stocks, and dealers appear to be holding off.

HANKOW.—The business had been very small, attention being almost exclusively directed towards the Tea market.

CHINKIANG.—Messrs. Spencer and Wolff write:—There has been a moderate inquiry for Cotton Goods since the date of our last. At the commencement of the week the prospects of trade looked brighter, and an improvement in the demand was confidently anticipated; later on, however, the market again became inactive; it closes quiet at quotations. A fair business has been conducted in Nailrod Iron.

SHANGHAI.—The Chamber of Commerce Circular says:—Cottons: There has been some inquiry for Drills during the fortnight, but the business which has resulted has not been large, and for other descriptions of Plain Cottons the market has been depressed. Best T-Cloths are easier, but do not show the decided decline in value which is noticeable with reference to other Grey Goods. Grey Shirtings of all weights and common T-Cloths of 7 lbs. are lower. 6 lbs. ordinary T-Cloths are quoted nominally the same as last reported. 64 reed White Shirtings are cheaper, other kinds nominally unchanged. In Fancy Goods the business has been trifling. Auction sales of Woollens have established lower rates for Cashmere, Long Ells and Spanish Stripes.

HONG KONG.—The arrivals besides mail steamers had been the P. Tchihatchoff, Tartar, Cheviot, Glenlyon, Rajanattianuhar, and Achilles, bringing full supplies of manufactured goods for this market and the North. The tone of the market had been generally very quiet throughout the fortnight. Prices were very much the same as last quoted, but there was little disposition on the part of the dealers to go further into stock, except at a decline; on the other hand, importers were not pressing sales, and for such goods as were in request full prices were obtainable.

CANTON.—Lead The demand had subsided, and forced sales of small lots had been made at $8.20 for ordinary brands, but there were few sellers at such a rate. WB was quoted $8.30 to $8.40 per picul.—Quicksilver after dropping to $110 had again rallied, and was worth $115 per picul.

BATAVIA.—The market continued almost at a stand-still, and there were no signs of a revival of activity.

SINGAPORE.—Messrs. Boustead and Co's. Circular says:—Piece Goods. The market has been somewhat more active since the date of our last advices, and clearances have been on a larger scale than for some time past. In prices of some descriptions there have been a slight decline. 8½lb Grey Shirtings have changed hands to a fair extent, but closing prices show a decline of 2½ cents. 6lbs. and 7lbs. are quiet. T-Cloths: 6lbs. in good request, and late arrivals have all found buyers. 7lbs. in moderate supply and fair request. 5lbs. taken at low prices. Mexican 7lbs. have moved at late rates. White Shirtings: Fine reeds are taken to a fair extent, but medium and low counts continue dull of sale. Grey Yarn: 40's keep dull and price is weak; 16 to 24's asked for to a small extent. Iron continues dull, and prices still have a drooping tendency; the few transactions reported show a decline in price.

PENANG.—There had been a more general demand for imports, and a moderate business is reported, but at prices showing a slight decline on previous quotations.

EXPORTS.

TEA.

YOKOHAMA.—The market had shown great activity, prices, however, ruling at times somewhat irregular, owing to anxiety on the part of sellers combined with the general cautious tenor of instructions from New York and the consequent restricted action of some buyers. Settlements, however, amounted to the large total of piculs 13,200 for the period, embracing all classes over common grades. Prices were a little firmer and ruled as under:—Good common, $28. to 31.; medium, $32.00 to 35.00; good medium, $35.50 to 37.00; fine, $38.00 to 41.00; finest, $42.00 to 45.00; choice, $47.00 to 50.00; arrivals were pouring in freely, but no large accumulation of stocks was likely to ensue for some time.

KIUKIANG.—Settlements of Tea from 9th to 25th May:—18 chops—5,000 ½-chests Kiukiang packed, Tls. 17 to 40; 45 chops—18,777½-chests, Ningchow, Tls. 30 to 56; 5 chops—2,255 ½-chests Hankow, Tls. 26½ to 35.

HANKOW.—Messrs. Drysdale, Ringer and Co's. Report says:—In our last we advised the opening of the Tea market, and the transaction of a large business at prices which had ruled somewhat irregularly, at one time showing an advance on opening rates, amounting in some instances to three taels per picul, and subsequently a sensible decline. Since this time we have seen the teas from all the various districts, and can now report more accurately thereon. Buyers for Russia have paid for choicest teas prices that entirely preclude their being offered on the London market, and it is not likely that any of these kinds will be seen by the home trade. A fair quantity of teas intrinsically but little inferior yet not coming up to the Russian standard have been taken for England at prices out of all proportion to the difference in quality, but the quantity of such grades is limited, and it will very likely be found that the supply of finest tea is not excessive. The bulk of the first cargoes destined for England consist of good medum to fine, costing 1s. 8d. to 1s. 11d., and as with each lot a falling off in quality is apparent, such kinds will hold their own against later shipments. The Ningchow district gained the reputation some years ago of producing the choicest black leaf teas, and this year has proved no exception to the rule. Last year the crop was an extraordinary one, both from the quantity of very choice teas and from their remarkable quality. Now, there is much less of the very choicest, but there is a good quantity of fine. The first purchases of Ningchows were made in Kiukiang on the 8th May, when Tls. 40 was paid for finest, and Tls. 50 for choice. On the 12th samples were shown in Hankow, and when it was found that choicest parcels were so scarce they were eagerly competed for at Tls. 50 to 62½. These grades were probably as fine as any of last year, being very strong full teas, with rich pekoe souchong flavour, and small, well made, even leaf. The first purchases commenced on a par with last season but gradually stiffened till an advance of Tls. 7 per picul was touched. The next grades which compared less favourably with the same standard of 1874 were taken at Tls. 40 to 50. Others again with less style in leaf but almost equal in liquor ruled from Tls. 30 to 37 about the same range as last year.

Comparative prices.

Young-laou-toons composed the principal settlements on the day our market was opened, and were bought at Tls. 29 to 30, prices gradually advancing to Tls. 32 for no better quality. After all the first chops were settled, inferior grades were taken at the same prices, but latterly the decline has been equal to the previous advance. These teas are superior in quality to late years, having strength, in which they are usually deficient.

Soon-yongs have been in great favour for the Russian market. They are very strong full teas, and have been bought up to Tls. 42 per picul. The second grades from Taels 30 to 33 are but little inferior, whilst the qualities ranging from Tls. 26 to 30 show probably as good value as anything settled.

Cheong-sow-kyes: The first purchases was on the 16th inst. at Tls. 36.50 to 37.50. On the following day a string of some 8,000 half-chests, not very much inferior were taken at Tls. 30 to 32, and further settlements were made on the same basis on the following day. Second chops, which are mostly strong useful teas, have been bought at Tls. 25.50 to 28.00 per picul.

Oonfars also opened at high rates for chops supposed to have some superiority. The next grades ranged from Tls. 30 to 33, being comparatively cheaper. These teas are greatly superior to last years, they then had all a suspicion of admixture with Lye-ling and Shun-tam leaf, now they seem free from this fault, and are strong useful teas with quality and Oonfar character, though generally the leaf is irregular and uneven.

Lye-lings have a large ragged leaf, and strong, harsh tarry liquor, though with more quality than last year. Business in them commenced at Tls. 25 to 25½ per picul, a price they have fully maintained, any lower tael price only representing lower qualities.

Ho-hows are better than usual, and possess a delicate flavour; the teas from the inferior districts such as Nip-car-szes, Low-yong, Ko-kew and Ping-kongs, are much the same as last year both in quality and price. It will be seen we make the crop generally a good one, that for the best teas very full price, were paid, but that kinds suitable for England have been laid down at a less cost than last season, owing to a lower rate of exchange and freight. Finest and Fine parcels are now gone, present arrivals consisting of medium to good medium teas A perceptable falling off in quality takes place with each fresh batch o' arrivals. f

FOOCHOW.—Messrs. Westall, Galton & Co.'s Letter says:—The new season's Teas commenced arriving on the 13th May. The Pakling market opened on 19th May, since when a large business has been transacted, and total settlements of this description to date amount to 85,050 boxes. Prices paid have been most irregular throughout. Business commenced at an advance over last season's rates of some Tls. 3 to 4, whilst later purchases show fully Tls. 6; Russian buyers having been the chief operators during the past week. Rates have ranged from Tls. 26 to 37½ short, and the general quality of the crop is inferior to last season's. No purchases of Country Teas have yet been made. As far as has been shown, the quality of the crop on the whole must be considered inferior to last season's. Low country Teas from the Yung How, Suey Kut, Nin Yong districts, &c., appear badly made, and wanting in quality, whilst those from the Saryune country are of a good average description both in make and cup. The Fock Oan districts have again sent forward the most attractive Teas. Up-country Teas have not yet arrived in sufficient quantity to form an opinion as to their quality. No Souchongs have yet arrived. A few Oolongs are on show; two chops of Flowery Pekoe, and three parcels of Scented Teas have also arrived; but a report on these descriptions cannot be given until larger quantities are on the market. Paklings costing from Tls. 24 to 37½, Freight £4.10s., Exchange 4s. 3d., lay down in London at 1s. 6½d. to 2s. 2½d., but the quantity of the lower cost Tea purchased is very trifling.

AMOY AND TAMSUI.—Congou: There were musters on the Amoy market for about 60 chops, the quality of which was considered superior to last season's. No transactions are reported, the ideas of Teamen being $2 to $4 over value on the London market.—Oolongs: Some few musters of this description had been shown, and so far they appeared to be on a par with last season's crop. At present, however, it was hardly possible to form an estimate of the quality of the crop.—The market had opened at Tamsui on a basis of $25 to $38 in Amoy without duty, for Teas grading from good cargo to finest. About 3,700 packages had been received at Amoy, and were considered disappointing in leaf, but fairly good in water.

CANTON.—Messrs. Deacon and Co.'s Report says:—A large business has been transacted during the past fortnight, and prices have generally ruled in favour of buyers. Congous have not been much dealt in, and the stock is now much reduced, and almost confined to a few very undesirable parcels. At Macao, supplies of second crop leaf are coming forward slowly, and being rather dearly bought in the country, are not pressed for sale; the settlements on market have been chiefly low class, which, at prices reported, do not show as good value as obtainable a month ago. Scented Teas: Capers have been freely purchased and the settlements are on a very large scale; fine and finest maintain their value, and are comparatively scarce, fair to medium descriptions may be quoted Tael 1 cheaper than last mail. Purchases have been made at Tls. 18 to 22 for fair to medium, at Tls. 23 to 26 for good medium to fine, and higher for fancy parcels. Orange Pekoes, long leaf sorts of medium quality have been sold about half a tael below former rates, but the finer sorts cannot be bought at any reduction; in "new-make" kinds there have been some dealings at Tls. 16 to 18 per picul. The following is a summary of the fortnight's business:—Congou, 2,400 boxes at Tls. 19 to 23½ per picul; Scented Caper, 46,500 do., Tls. 18 to 28; Scented Orange Pekoe, 20,000 do., Tls. 16 to 28; Gunpowder, 1,700 do., Tls. 13 to 28; Pouchong, 200 half-chests.

SILK.

YOKOHAMA.—As the season was drawing to its close supplies were falling off, good assortments becoming scarcer every day, and owing to the difference of opinion among sellers as regards the prospect of the coming season, prices were extremely irregular. The unsold stock had been reduced to 300 bales. The shipments of the fortnight were 333 bales, making the total export to date 11,517 bales against 14,417 last year for the corresponding period of last season.

SHANGHAI.—The new crop was estimated at fully 80,000 bales, an increase of about 10,000 bales on last season's supply. Some 350 bales having arrived, the market had been opened at Tls. 260 to 270 for common No. 5 Tsatlee, and about 100 bales had been settled, 250 bales remaining unsold. These first arrivals, as usual, hurriedly reeled and coarse in size, were no criterion of the general quality of the crop.

CANTON.—Messrs. Deacon and Co. report as follows:—It is difficult to arrive at settlements of new silk since the market was opened ten days ago. 700 to 800 bales are reported to have changed hands, but it is probable that there are further dealings under contract, which have not transpired. Purchases were made, prior to departure of last French mail, on a basis of $320 to $325 per picul for No. 4 Tsatlee, but prices have since advanced, and $335 is now the figure for that classification, and the tendency is upward. Nos. 4, 4½ and 5 qualities have been chiefly in demand. The silk is an improvement on ordinary first yields, and shows a tolerably clean thread, of very fair quality. It is to soon to speculate regarding second crop, but advices from the country are to effect that the worms are favourably progressing. Loong-kong: Of this description 30 to 40 bales areincluded in above settlements. Long-reels: For India 60 piculs, and 40 bales have been taken by Parsees. Re-reels: The only contracts reported are 200 boxes. Stock is not easily computed, but may be put at 200 to 300 bales Tsatlee, 40 bales Loongkong, 50 bales Cumchuck, 50 bales Kowkong, and 100 bales of inferior staple.
